

**CDPH Monthly Update on Number of Chikungunya Infections in California  
March 1, 2023**

The following table provides the number of travel-associated infections with chikungunya virus in California residents from 2016 to 2023. Travel-associated infections include people exposed through travel to an area affected by chikungunya. All chikungunya cases reported in California have been associated with travel; there have been zero locally acquired infections reported in California.

**Travel-associated chikungunya virus infections in California, 2016-2023  
(as of March 1, 2023)**

County	2016	2017	2018	2019	2020	2021	2022	2023
