

DON'T BRING ZIKA HOME

USE EPA-REGISTERED
INSECT REPELLENT, WHICH
IS SAFE FOR PREGNANT AND
BREASTFEEDING WOMEN.

IF YOUR PARTNER HAS BEEN
TO AN AREA WITH ZIKA, USE
PROTECTION OR AVOID
HAVING SEX.

AVOID GOING
TO AREAS AT-RISK
FOR ZIKA.

Zika is a mosquito-borne virus that poses a serious risk to a pregnant woman's developing baby. If a pregnant woman gets Zika, either through an infected mosquito or unprotected sex with an infected partner, the virus can be passed to the baby and cause certain birth defects.

While there is no treatment or vaccine for Zika, you can protect yourself and your developing baby.
