Post-School Break Testing for COVID-19

Prepare now for a safe return to school for your student after break

Follow these steps:

**Step 1: Get your testing materials**
- Locate your testing materials from your school or district. A box of at-home COVID-19 rapid antigen tests may contain 1 or 2 tests.
- Your child’s school may also offer on-site antigen testing. For more information on other testing options reach out to your school.
- If possible, have a device ready with internet access available, so that you can share your results with your local health department after you test.

**Step 2: Plan your test days**
- You might receive specific instructions on which days to use your tests. If you can, test the day before returning to school after break. **If students are already back from break, test now!** Repeat test in 3 days.
- If your student gets sick with symptoms (like cough and fever), **STAY HOME** and use your tests to see if it is COVID-19.
- Talk to your school if your child was exposed to someone with COVID-19.

**Step 3: Share your results**
- **SHARE** test results through the Primary.Health link sent by your school or if your school does not use Primary.Health, through the Primary.Health’s California Schools At-Home testing website or by scanning the QR code below with your smartphone.

**Step 4: Understand your results**

**NEGATIVE TEST?**
- If the student feels well and has no COVID-19 symptoms, return to school.
- If the student has SYMPTOMS or has been in contact with someone with COVID-19, please call your school before they return.

**POSITIVE TEST?**
- Keep the student home from school and contact your doctor and your school right away.

**UNCLEAR TEST RESULTS?**
- Repeat test at school or at a local testing site.

**ANY SYMPTOMS? KNOWN EXPOSURE?** If your student has ANY COVID-19 symptoms or was exposed to COVID-19, CALL THE SCHOOL before they return. If your student is very sick: call 911, visit an emergency room, or call your doctor.

SCAN the QR code to share the results with your local health department.
