Left panel displays About Us information.

Central panel display widget tools that are useful to the public.

Right panel displays different widget tools that are available from the startup screen.
The Home Button widget zooms the map to the initial map extent.

The My Location widget allows the network to detect your physical location and zoom the map to it.
The Near Me widget allows you to find features within a buffer of a defined address or location, view detailed information about those features, and get directions to the selected feature.

The Query widget allows you to retrieve information from source data by executing a predefined query.

The Filter widget allows you to limit the visibility of features in a layer. Only the features that meet the expression criteria will be visible in the map.
Type an address in the search bar. The map will zoom into the address and all the facilities located within a radius of 1 to 25 miles will appear.

You can adjust the radius from 1 to 25 miles depending on your specific needs.
When you type an address you see all the facilities within the target radius. Also, you can find a complete list of all the facilities located within the target radius.
With this function, you can click “Directions” tab to see the step by step driving directions from the search address to the selected laboratories. In Addition, you can print the directions.
With the “Query” widget, you can find facilities by license type, facility county, facility city, facility zip code or specialties/subspecialties. You can use one or multiple query criteria.

The map will zoom into the area accordingly to the criteria that you selected. Will show all the facilities located in that region and in another color and shape all the facilities that comply with all the criteria's selections.
The results tab provide a list of all the facilities that comply with all the selection criteria.

In the Query window, user can click “…” and found functions to export the results to a CSV or future collection or GEOJSON file. Also, allow to do some statistical analysis, save the results in your “My Content” section.

If you click “X Remove this results” the results of the query will be clear.
With the “Filter” widget, you can find facilities by license type, facility county, facility city, facility zip code or specialties/subspecialties. You can use one or multiple query criteria.

The map will zoom into the area accordingly to the criteria that you selected. The map will show all the facilities that comply with all the criteria's selections.
The toggle button turns on (color green) after the filter is applied. Click the filter button again to remove the filtering from the map. You can also turn the toggle button on and off to apply or remove one or all the filter criteria.
The Legend widget displays labels and symbols for layers in the map.
