California Department of Public Health

GAVIN NEWSOM
Governor

Date: March 29, 2024
To: All Californians
From: California Department of Public Health (CDPH)
Subject: Future of Public Health Funding (FoPH) Work and Spend Plan Summary:
Los Angeles Region, Fiscal Year (FY) 2023-24 – FY 2025-26

I. Purpose and Background

This memo provides an overview of the FoPH spend plans for FY 2023-2024 and work plans for FY 2023-24, 2024-25, and 2025-26 in the Los Angeles region.

The Budget Act of 2022 (Chapter 249, Statutes of 2022) provides \$200.4 million in FoPH funding annually to local health jurisdictions (LHJs) for public health workforce and infrastructure capacity building. These funds are considered ongoing funds and part of the ongoing baseline state budget, which must be approved in the annual state budget process. The local assistance amount is pending annual budget approval for each upcoming FY.

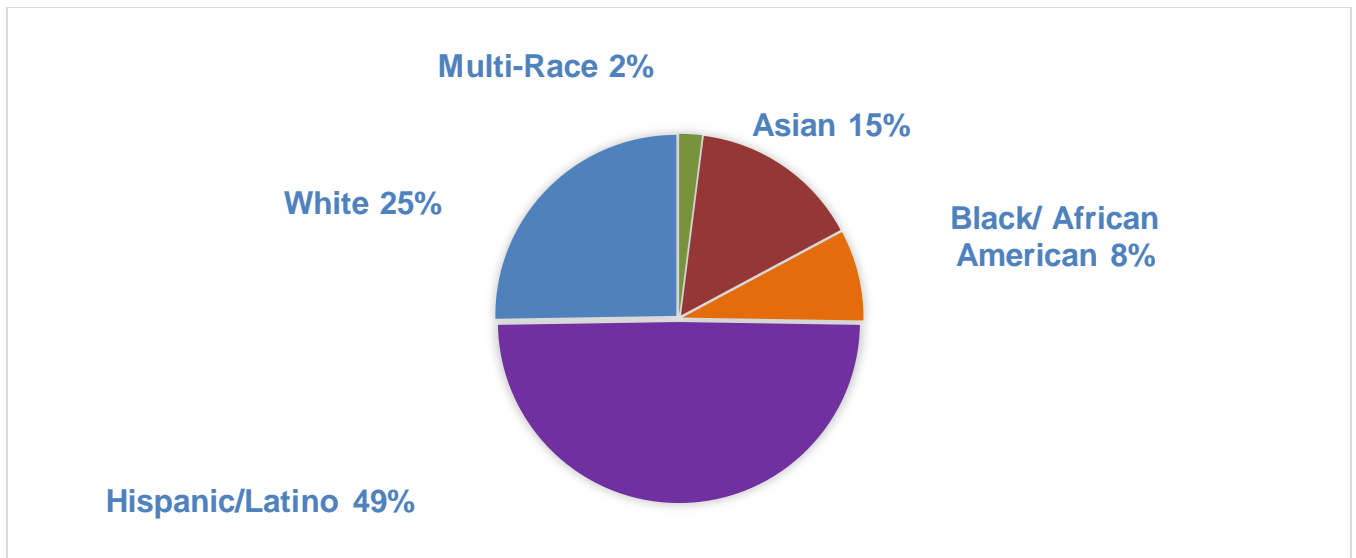

FoPH funding is overseen by the Regional Public Health Office (RPHO), a state office within CDPH. Built upon a long public health tradition of successful interagency collaboration and recent efforts in regional coordination for the development and implementation of policy and guidance, RPHO strives to enhance bidirectional communication and coordination across California to address a wide array of cross-cutting emerging public health concerns and issues. RPHO provides support to LHJs via a model of regional coordination. RPHO regions include Rural North, Greater Sierra Sacramento, Bay Area, Central Valley, Los Angeles, and Southern California.

II. Los Angeles Region

The Los Angeles region encompasses three LHJs: the City of Long Beach, Los Angeles, and the City of Pasadena. As the second most populous metropolitan area in the United States, the Los Angeles Region is a global center for entertainment, culture, and commerce. With a diverse population of over 10 million people, Los Angeles serves as the entertainment capital of the world, home to major film studios, theaters, and music venues. Additionally, the region boasts a thriving culinary scene, with diverse cuisines reflecting its multicultural population. Beyond entertainment, Los Angeles is a major hub for technology, aerospace, fashion, and international trade, contributing significantly to the global economy.

III. FoPH Framework

Foundational Public Health Services (FPHS) Framework

California's public health infrastructure requires significant, long-term investment to modernize the state's public health system. California has adopted a modified FPHS framework outlined by the Public Health Accreditation Board (PHAB) to define a core set of capabilities and programs that are vital to all health jurisdictions in building a thriving community. This framework will be used to measure and evaluate progress on the proposed three-year work plan and yearly spend plans for FoPH investment. Measured progress in the following six key service areas will indicate growth and stability of the infrastructure across the California public health landscape.

6 Key Service Areas

IV. FoPH Spend Plan

The FoPH initiative aims to transform and modernize California to effectively handle public health threats. Funds were allocated to LHJs with the intent of disrupting the disproportionate burden of preventable diseases in populations historically impacted, encouraging collaboration across counties, and making sure funds are used to supplement, or fill in gaps that existed

historically and were magnified by public health emergencies, rather than supplant existing resources. The allocation methodology focuses on the following four areas:

- **Workforce Expansion:** LHJs must leverage funding to fill critical public health positions, including those where gaps were identified by the pandemic. Each LHJ must certify that at least 70% of funds will be used to support permanent staff.
- **Reducing Health Disparities:** The funding methodology includes a base grant for each LHJ, and the remaining balance is appropriated based on population data and poverty data. Reference the funding methodology details below (in section 5).
- **Data Collection and Monitoring:** Each LHJ will be required to submit a plan to CDPH every three years that is informed by a Community Health Assessment (CHA) and Community Health Improvement Plan (CHIP) and/or local strategic plan, including proposed evaluation methods and metrics.
- **Regional Public Health Department Partnership:** Funding may be used to establish regional public health partnerships.

Additional parameters and requirements associated with FoPH funding are detailed in Health and Safety Code Sections 101320-101320.5.

FoPH FY 2023-24 LHJ Allocations

As outlined in the statute, of the \$200.4 million allocated for local assistance, each LHJ will receive a base funding amount of \$350,000 per year. The remaining balance of the appropriation will be provided to LHJs proportionally as follows:

- 50% based on 2019, or most recent, population data
- 25% based on 2019, or most recent, poverty data
- 25% based on 2019, or most recent, the share of the population that is Black/African-American, Hispanic/Latino, or Native Hawaiian/Pacific Islander

Los Angeles Local Assistance Allocations — Fiscal Year 2023-24

LHJ	Total Allocation
Long Beach	\$2,807,624
Los Angeles	\$47,328,331
Pasadena	\$1,033,025

The funding period for the 2023-24 fiscal year is July 1, 2023-June 30, 2024. The funds allocated during the 2022-23 state fiscal period allowed for carryover of unspent funds through June 30, 2024. Carryover was only allowable by statute for FY 2022-23 funds. Starting in FY 2023-24, funds must be spent within the year allocated.

FoPH will provide ongoing state funding for LHJs through 2025-26. Future increase of the funding or changes in allocation would require legislative action.

V. FY 2023-2026 Work Plan Summary

At the time of this memo, LHJs have completed and reported on their first year of work funded by FoPH (FY 2022-23). In addition, they have submitted work plans for FYs 2023-24, 2024-25, and 2025-26. Finally, LHJs have submitted spending plans for FY 2023-24. As a result, the summary below will incorporate both completed work (FY 2022-23) and projected work (FYs 2023-24 through 2025-26) that is still in process, as well as completed spending (FY 2022-23) and projected spending (FY 2023-24).

Work Plan Minimum Requirements

Each LHJ must meet the following minimum requirements for the FoPH funding and describe how the LHJ plans to meet this requirement in the work plan:

- A description of how the agency will achieve 24/7 health officer's coverage.
- A description of how these funds will assist the agency in meeting your CHA/CHIP and/or local strategic plan goals. In addition, a description of how the agency will measure/evaluate the impact of FoPH funding.
- A description of how the agency will use FoPH funding to meet LHJ equity goals.
- A description of how the agency will use FoPH funding to become, or sustain capacity as, a learning organization including continuous quality improvement and results-based accountability/evaluation.
- Commitment to health officer and health director's participation in RPHO monthly or quarterly convenings as determined by the region and CDPH.

Workforce Expansion

A core pillar of FoPH investment is workforce development, recruitment, and training. Funding offers a unique opportunity to strengthen and expand the local public health workforce. To build public health capacity and increase the LHJ's ability to recruit, retain, and develop a diverse workforce, each LHJ must establish hiring goals. The personnel plan allows for LHJs to project the number of planned hires using FoPH funds.

Personnel Plan Summary (Figure 1)

Figure 1 indicates the proportion of FoPH positions that have been proposed for recruitment at each LHJ in the Los Angeles region on the FoPH work and spend plans and displays the progress on hiring. For FY 2022-23, FoPH efforts were focused on hiring and building infrastructure capacity, thus it is expected that a higher proportion of hiring activity may be indicated during this timeframe. For context, the total proposed and hiring progress statewide and across the region has been provided. 61% of Los Angeles’s FoPH funded positions have been hired as of October 30, 2023.

	Total Proposed	Hiring Progress
Statewide	1253	919
Los Angeles Region	215	131

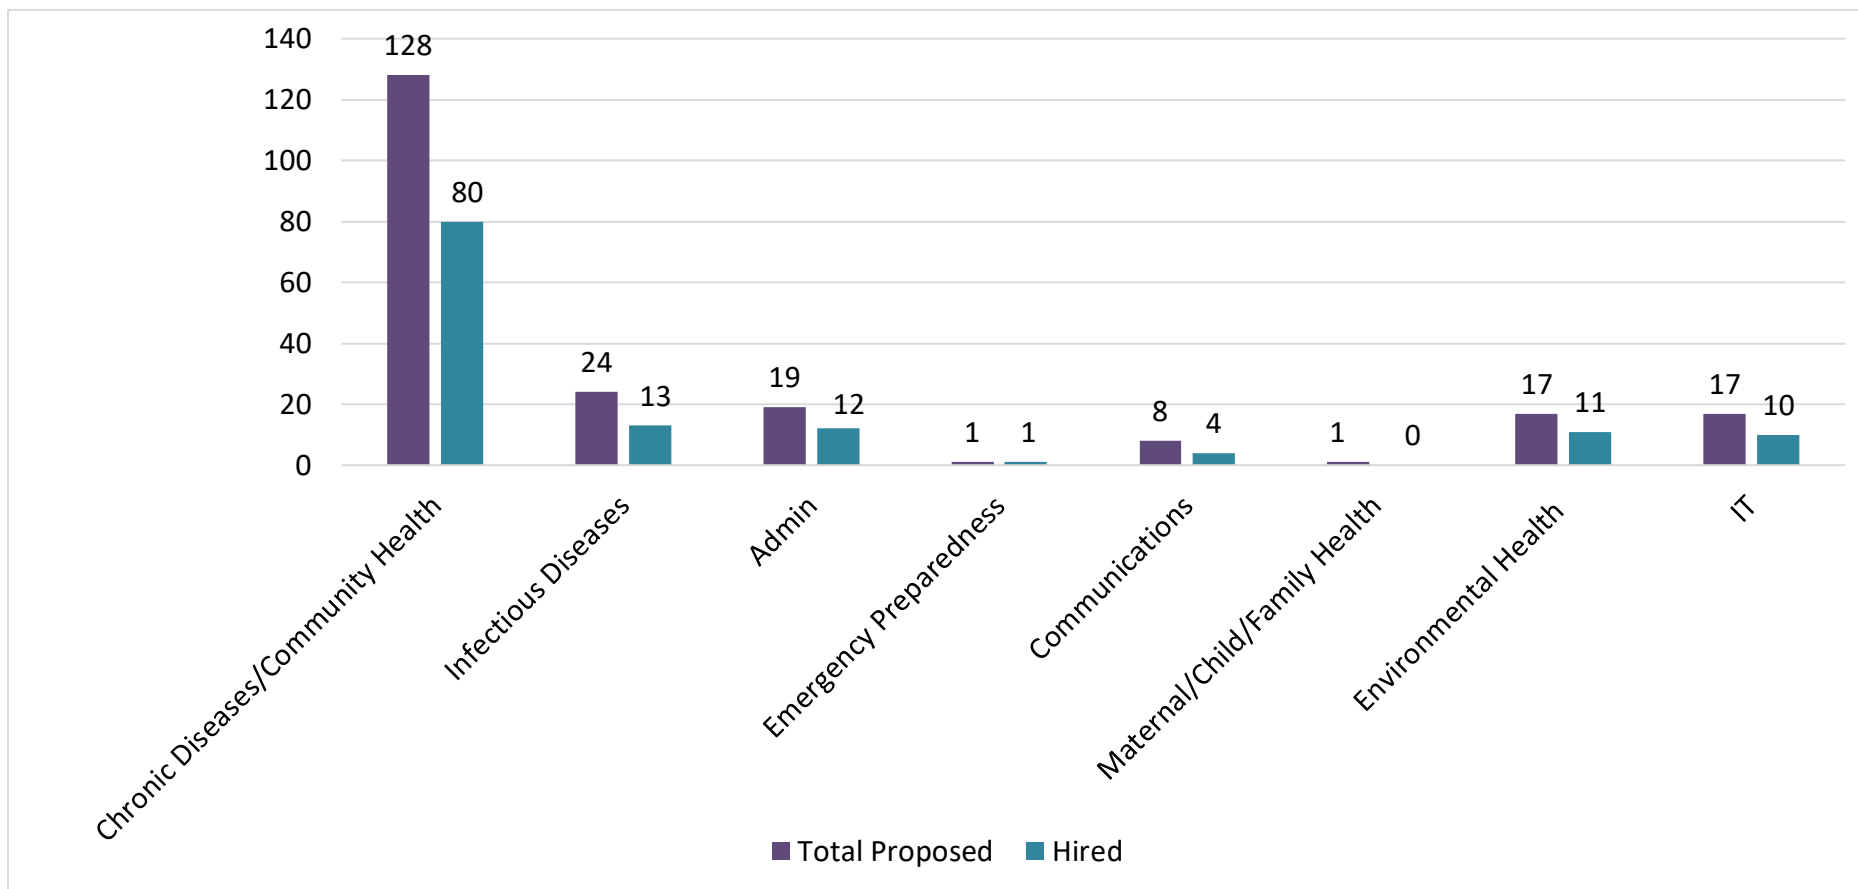

Data Source Figure 1: FoPH Spend Plans provided by LHJs

Footnote: The position data in this graph reflects total permanent positions and not full-time equivalent (FTE).

Staff Position Titles and Program Area Summary (Figure 2)

Figure 2 shows the top three program areas indicated by LHJs for recruitment and hiring staffing the Los Angeles region: Infectious Disease, Chronic Disease/Community Health, and Family Health. While these are the top three planned areas for recruitment among Los Angeles LHJs, there has been hiring progress in other areas. The top three program areas with the highest percentage of staff hired include: Chronic Diseases/Community Health, Infectious Diseases, and Administration. The program area with the lowest proportion of hired staff is in Los Angeles is Maternal, Child and Family Health.

Data Source Figure 2: FoPH Spend Plans provided by LHJs

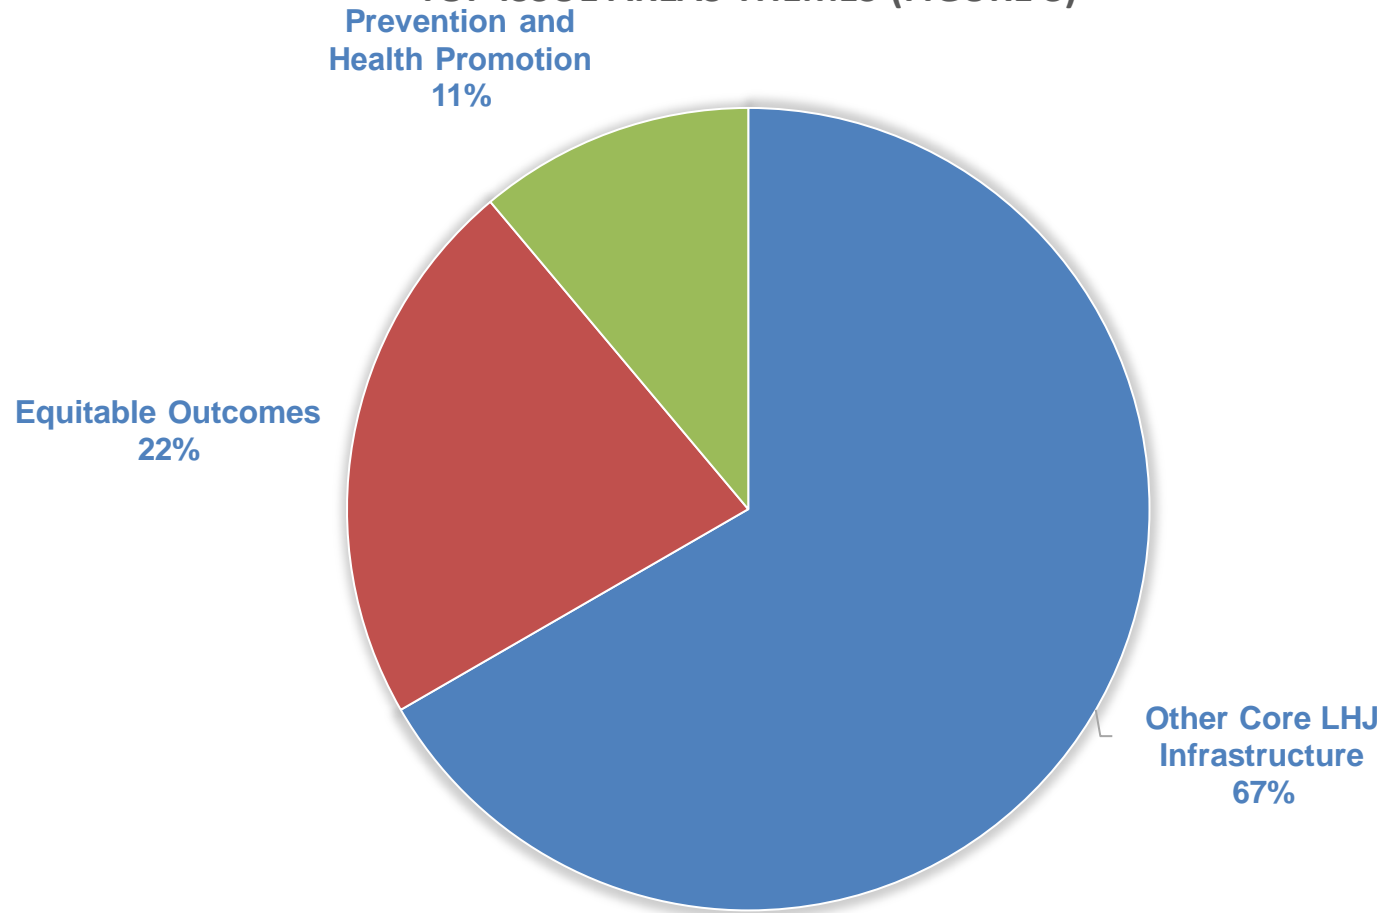

Footnote: The position data in this graph reflects total permanent positions and not FTE.

Issue Area Themes (Figure 3)

Top issue area themes identified across the Los Angeles region are documented in the table below by total number of issue areas reported among all LHJs in the region and total percentage of reported themes. The top three issue areas identified (Figure 3) across the Los Angeles region are: 1) other core LHJ infrastructure; 2) equitable outcomes; and 3) prevention and health promotion.

Los Angeles Issue Area Summary	Total Number	Percentage
Other Core LHJ Infrastructure	12	57%
Equitable Outcomes	4	19%
Prevention and Health Promotion	2	10%
Early Childhood Development and Resiliency	1	5%
Housing and Homelessness	1	5%
Prevention and Health Promotion: STD	1	5%

TOP ISSUE AREAS THEMES (FIGURE 3)

Data Source Figure 3: FoPH Spend Plans provided by LHJ

Footnote: The percentages reflected in this pie chart differs slightly from the percentages in the table above as some issue areas have been excluded from the graph.

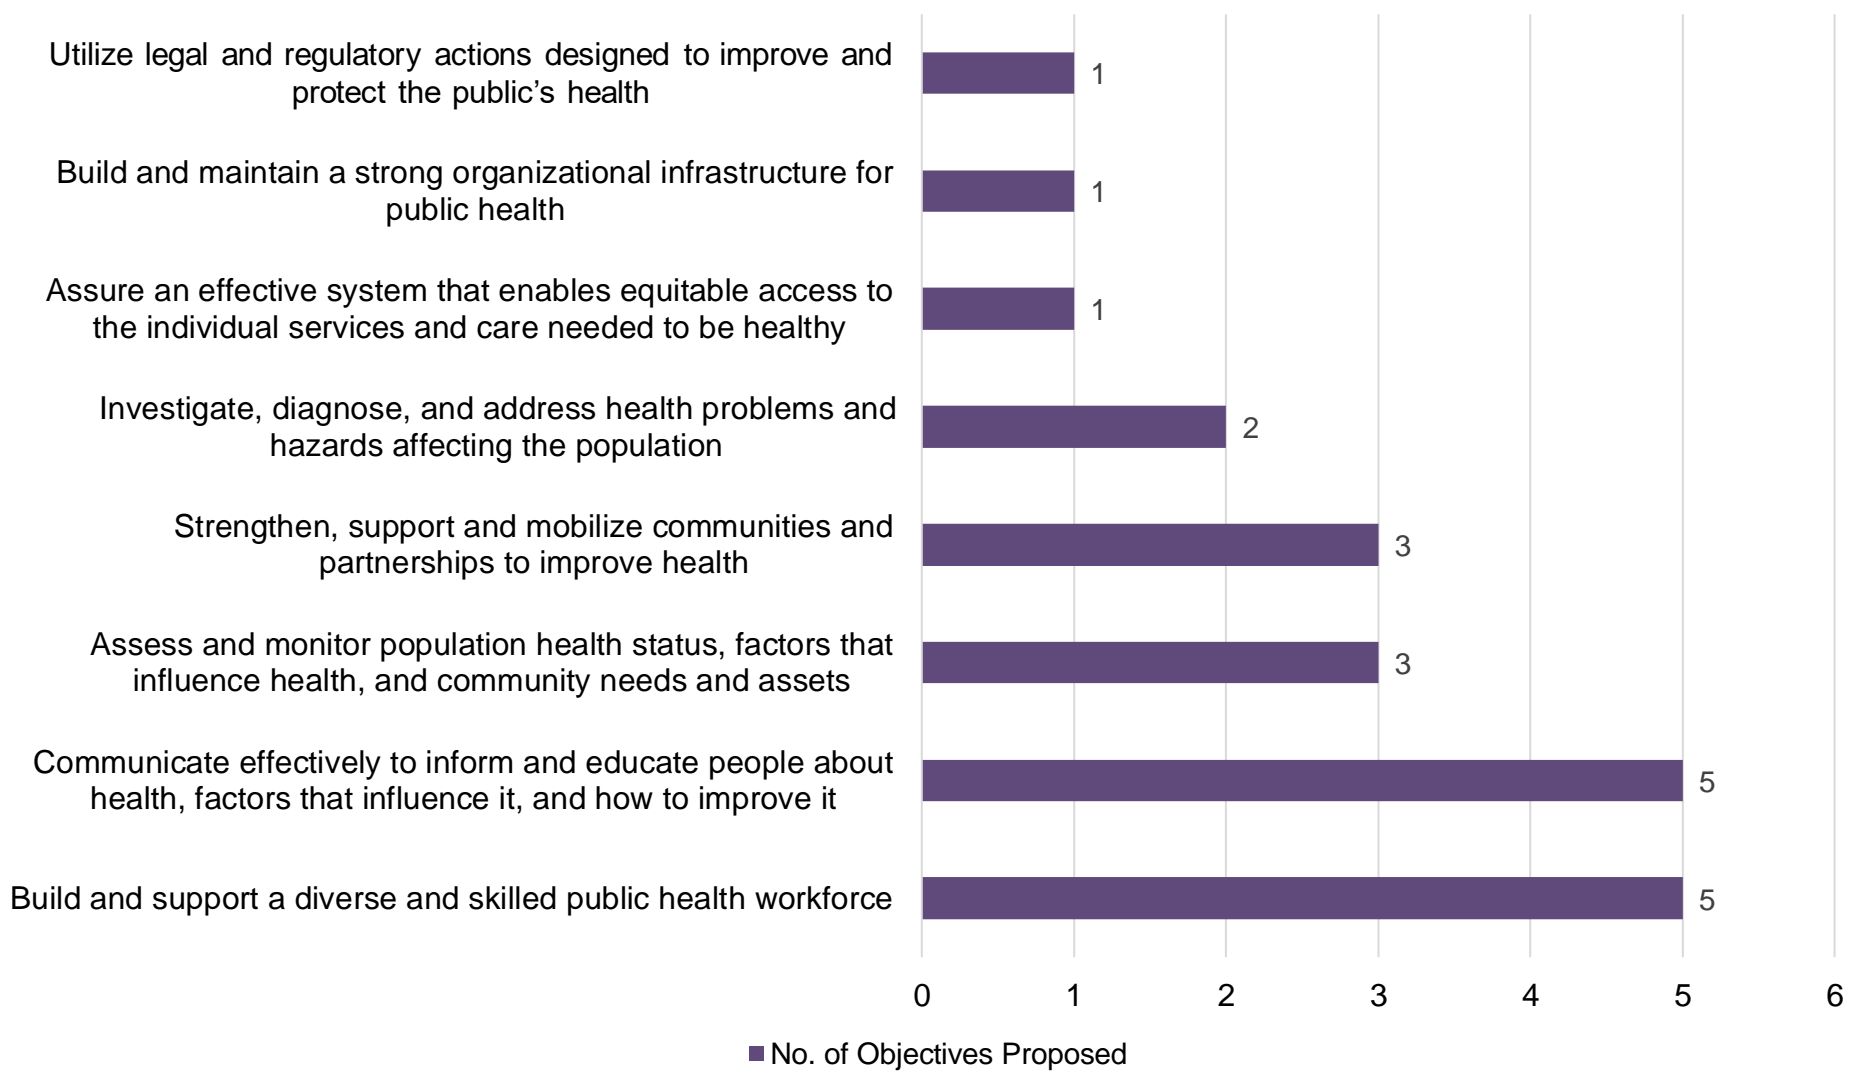

Work Plan Objective Themes (Figure 4)

The work plan objectives reported by the LHJs in the Los Angeles region were analyzed by the primary Strategy Areas. The figure below quantifies the total number of objectives proposed in each Strategy Area in the FY 2023-26 work plans across the region.

Additionally, a qualitative analysis was performed to identify common themes across objectives. The Los Angeles region is set to improve public health outcomes through the following objective themes:

- Expansion and enhancement of the public health workforce, with a focus on improving workflow efficiencies across various departments including administration, finance, digital media, public affairs, and fund development.
- Strengthening environmental health programs with a commitment to streamlining and updating infrastructure to better address emerging environmental health concerns.
- Employ a strategic and effective approach to bolster capacity in the management and delivery public health services to be able to adapt to the evolving health landscape.
- Foster a more responsive and resilient infrastructure to better address the complex challenges and strengthen the foundational elements of the public health system.
- Develop media and public outreach strategies to preserve community health and enhance communication strategies across the region.

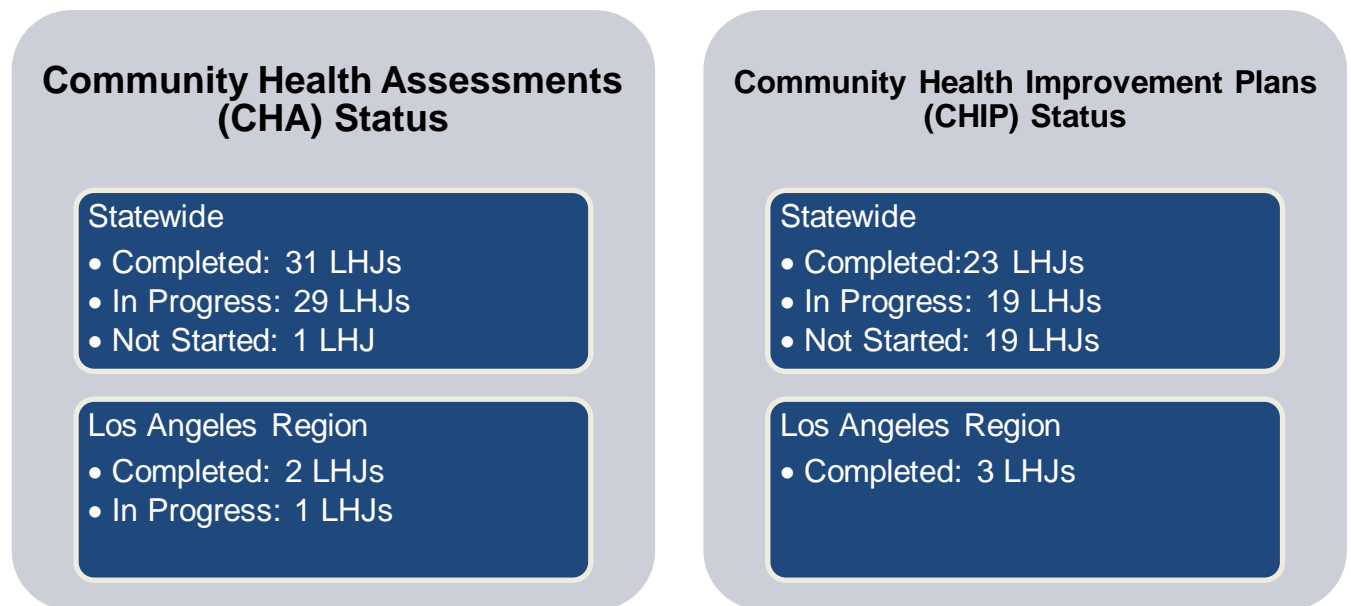

Primary Strategy Areas (Figure 4)

Data Source Figure 4: FoPH Work Plan Strategy Areas provided by LHJ

Data Collection and Monitoring

FoPH supports the development of CHAs, CHIPs, and other local public health plans. Completion of CHAs and CHIPs are not required as a condition of FoPH funding however if a CHA/CHIP and/or strategic plan has not been completed, the LHJ is required to begin coordination and planning activities by December 2023. One of three LHJs in the Los Angeles region indicated they've completed a CHA as part of their work plan objectives. Additionally, three LHJs in the Los Angeles region indicated they've completed a CHIP. In the graphic below, the current status of CHA/CHIP completion and progress is displayed both from the statewide perspective as well as for the entire Los Angeles region.

Regional Public Health Department Partnership

An LHJ may, upon submission of a letter of support to CDPH, direct a portion of their funds to another LHJ in support of regional capacity. The letter must provide a description of the regional capability being provided. Currently, no LHJs in the Los Angeles region have elected to direct a portion of their funds to any other LHJs during the 2023-24 fiscal year.

VI. Impact of FoPH Funding

Testimonials on Impact

“FoPH funding has been crucial in Long Beach's HIV/STD prevention efforts. The Health Department implemented the HIV/STD Plan, launched an HIV Dashboard for real-time data in December 2023, and introduced a PrEP navigation program, increasing access to prevention meds. By 2023's end, 111 clients received navigation services, with 16 new PrEP enrollments. Outreach included six events for testing, education, and care linkage, plus youth sexual health education. This funding has significantly improved education, prevention, and treatment, curbing HIV/STD spread.”

“The City of Pasadena developed a promotores program to train community members and deliver health education/promotion programs and resources. Promotores can reduce the barriers to health education and services that are common for native-born and immigrant communities. As of December 31, 2023, we’ve hired a Promotores Coordinator and at least 6 active promotores who deliver health information to the community at various events. These promotores participate in weekly meetings and trainings and connect with over 400 community members each month. The program continues to recruit additional promotores to expand reach.”

“In October 2023, the Los Angeles County Department of Public Health (DPH) launched the Public Health InfoLine, an enhanced version of the COVID General Information Call Center. This initiative provides community members with access to a wide array of local public health resources and up-to-date information, delivered by a dedicated team of health education assistants proficient in over 20 content areas. By December 31, 2023, the InfoLine had successfully handled 6,023 calls, offering a total of 6,176 resources via telephone — reflecting the diverse needs addressed in each interaction. Additionally, the InfoLine played a pivotal role in several key campaigns throughout the Fall 2023 season, including efforts related to respiratory virus prevention and vaccination, COVID-19 treatment options, antigen test distribution, scheduling vaccination appointments, and supporting Medi-Cal renewal. As the year concluded, the InfoLine Unit achieved a significant staffing milestone, filling 18 of the 19 permanent positions allocated by the County.”

Conclusion

Investing in a modern, innovative public health infrastructure is essential to ensuring the health and well-being of all Californians. The FoPH investments in the proposed capabilities and objectives by the Los Angeles region outlined in this memo demonstrates progress in public health infrastructure. The Los Angeles region has made significant progress in developing a diverse multi-disciplinary public health workforce through increasing permanent staffing in the areas of Chronic Diseases/Community Health, Infectious Diseases, and Administration.

The Los Angeles region exhibits a commitment to advancing core community health standards with FoPH funds for the development of CHA, CHIP, and public health accreditation efforts. The FoPH 2023-24 work plans and spend plans for the Los Angeles region will begin the process of transforming our public health landscape and accelerating our progress towards a 21st century public health system.
