

# Pregnancy-Related Mortality Rates by Nativity for Hispanic California Residents: 1990-2004

SOURCE: State of California, Department of Public Health, California Birth and Death Statistical Master Files, 1990-2005. Maternal mortality (deaths ≤ 42 days postpartum) calculated 1990-1998 using ICD-9 classification. Pregnancy-related mortality (deaths ≤ 365 days postpartum) calculated beginning 1999 using ICD-10 classification. US-Born Hispanics had too few deaths during 1995-97 & 1996-98 periods to calculate rate. Produced by California Department of Public Health, Maternal, Child and Adolescent Health Program, October 2007.
