

Cal EIS Fellowship Opportunity in Solano County

Solano County, located midway between San Francisco and Sacramento, in the northeast Bay Area, will be hosting a Cal EIS Fellow for the 2009-2010 academic year.

The Cal EIS Fellow will work directly with the Solano County Public Health Officer with projects, reports and investigations.

Projects include:

- ❖ analysis of reportable communicable disease data and the development of innovative prevention strategies;
- ❖ use of epidemiological evidence to direct outbreak investigations;
- ❖ mortality rate measurements for chronic diseases;
- ❖ identification of health inequities;
- ❖ and the development of a syndromic surveillance system.

Solano County has particular interest in a Fellow with expertise or experience in communicable disease and grant proposals.
