**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**

Este informe contiene informacion muy importante sobre su agua potable. Traduzcalo o hable con alguien que lo entienda bien.

**NPS-Glen & Wildcat Campgrounds Failed to Perform Follow up Testing for *E. coli* Bacteria in June 2013**

Our water system failed to perform follow up testing on our drinking water during June 2013, after a routine water sample was tested and found to contain coliform bacteria. Although this is not an emergency, as our customers, you have a right to know about this violation – what happened, what you should do, and what we did to correct the situation. Please share this information with other people who drink this water, especially those who may not have received this notice directly. You can do this by posting this notice in a public place or giving out copies by hand or mail.

**What happened?** We are required by state regulations to monitor our drinking water for specific contaminants on a regular basis. Results of this routine monitoring are an indication of whether or not the drinking water meets health standards. During June 2013 our routine sample tested positive for coliform bacteria. No fecal coliform or *E. coli* bacteria were found. However, we failed to collect a sample from the well and, therefore, we cannot be sure of the quality of our drinking water during that time period.

**What does this mean?** Coliform bacteria are indicators of potential contamination and may originate from human, animal, or soil sources. If water is tested for coliform bacteria and it is found to be absent, the water can be considered safe from bacteria. If the water is not tested, consumption of the water may not necessarily result in illness, but that possibility exists. Routine and repeat sampling are important to periodically verify the quality of drinking water. Our failure to perform wellhead sampling for *E. coli* during June 2013 was a violation of Section 64430, Title 22 of the California Code of Regulations (CCR).

**What should I do?** This is not an emergency. If you have health concerns, you may wish to consult your doctor. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at (800) 426-4791.

**What corrective actions have been taken to prevent this violation from occurring in the future?**

This notification of the public is being done in compliance with Section 64463.4, Title 22 of the CCR as a means of keeping the public informed.
