By the end of this training participants will be able to:

1. Describe trends in smoking prevalence in the US and the epidemiology of substance use and HIV/AIDS in women.
2. Discuss the impact of smoking and tobacco use on HIV disease and the intersection of substance use and HIV/AIDS among women.
3. Identify behavioral interventions to address treatment for smoking cessation with people with HIV and substance use among women with HIV.

The CDU PAETC Last Tuesday HIV Training Series is a free event for providers who serve patients living with HIV.
