Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in San Bernardino county. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) conduct a Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) or other community assessment in up to 7 SNAP-Ed eligible low-income neighborhoods and share results with various local stakeholders, community members and community organizations; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

- . Continuing, No adaptation or change in intervention  
. Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Measures of implementation and performance will include a combination of process indicators and outcome evaluation methods. Process indicators: sign in sheets, presentation outlines, training/meeting agendas, media attention garnered, event fliers and photos. Outcome evaluation measures will explore cognitive, behavioral, institutional and environmental determinants through observation and direct surveys of eligible individuals, systems and organizations.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan (CNAP) group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

**Supplement:** San Bernardino's two initial PSE are: 1) Access to Healthy Food – this strategy will include working with partner organizations to pilot Community Supported Agriculture (CSA) venues for the target population at two sites in the City of San Bernardino; and initiate a healthy vending machine policy for County departments and other partners and 2) Access to Healthy Beverages – this strategy will build upon current Rethink Your Drink efforts and increase the number of partners trained and disseminating this message; and we are also identifying possible worksites for implementing a healthy beverage policy and increasing access to healthy beverages for employees. San Bernardino's two initial PSE are: 1) Access to Healthy Food – this strategy will include working with partner organizations to pilot Community Supported Agriculture (CSA) venues for the target population at two sites in the City of San Bernardino; and initiate a healthy vending machine policy for County departments and other partners and 2) Access to Healthy Beverages – this strategy will build upon current Rethink Your Drink efforts and increase the number of partners trained and disseminating this message; and we are also identifying possible worksites for implementing a healthy beverage policy and increasing access to healthy beverages for employees.

CNAP Plan has/will incorporate objectives that for their specific jurisdiction address the four State-level measurable objectives from the California SNAP-Ed Plan. Specific objectives for San Bernardino County's CNAP are as follows: The goal of the San Bernardino County Nutrition Action Plan (CNAP) is to empower and enable low-income residents to choose healthy foods and beverages and increase physical activity through nutrition education, advocacy, partnerships and collaboration, and environmental supports. By September 30, 2014, the CNAP partners will:

- 1) Convene a minimum six times.
- 2) Collaborate, especially with Cal Fresh, in a minimum of four joint ventures to provide outreach and nutrition education at USDA Food Distribution and/or retail sites.
- 3) Promote access to healthy foods and beverages through the investigation, strategic planning, and implementation of a minimum of one Healthy Vending Machine Policy among CNAP partners and/or within County facilities.
- 4) Promote healthy beverage choices as one of CNAP's primary nutrition messages by utilizing the "Rethink Your Drink" materials at a minimum of two USDA Food Distribution sites and among CNAP partners.
- 5) Support and play an active role in the ongoing development of the County-wide Food Policy Advisory Council.
- 6) Actively support and provide resources for the development of the Latino Health Collaborative's Farm Share Program.

\*After each school name indicate all that apply with the following abbreviations: K-12 School (S), Preschool (PS), After School (A) & Parents(P)

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measurable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10%, teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent systematic before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

<input checked="" type="checkbox"/>	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
<input checked="" type="checkbox"/>	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
<input checked="" type="checkbox"/>	Mobilize community partnerships around healthy eating and active living.

	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
<input checked="" type="checkbox"/>	Develop point-of-purchase marketing/signage at food retailers.
	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
<input checked="" type="checkbox"/>	Investigate environmental or cultural barriers to healthy eating and active living.
<input checked="" type="checkbox"/>	Provide training or technical assistance to health or community professionals.
	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
<input checked="" type="checkbox"/>	Create work-site SNAP-Ed programs.
<input checked="" type="checkbox"/>	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
	Cultivate community or school gardens.
<input checked="" type="checkbox"/>	Promote access/appeal, or policy changes to support physical activity or exercise.
	Other, specify:
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

**Response:**

There are a total of 7 proposed subcontractors in **San Bernardino** County's FY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity amongst adults, teens, and children.

**Objectives 1-3:** Specifically, 1 subcontractor(s) will take on a coordination role along with 1 additional subcontractor to directly work and train youth and adults at local school district sites. Collectively, these 2 subcontractors will support the LHD to provide nutrition education activities

to youth (teens and children) and adults (parents and teachers) at school district affiliated venues such as classrooms, school sponsored events, early childhood education sites, before and after school programs, teacher in-service/trainings, and partnership activities with local parks and recreational programs. Subcontractors will train teachers on the use of taste testing or food demonstration curriculum, materials and student workbooks, such as Harvest of the Month; train parents at nutrition education classes taking place at before and after school programs; and conduct food demonstrations and taste testing activities at school-wide events targeting both youth and adults. Additional nutrition education on the importance of vegetable, fruit, low-fat/nonfat milk, and water consumption will be coordinated by the subcontractors through the distribution of newsletters and other education materials sent directly to parents of youth and teens of targeted sites.

**Two** sub-contractors will use CX<sup>3</sup> data to make community presentations and host Town Hall meetings to share findings with neighborhood residents and relevant city and county level officials. These findings will then serve as a catalyst for community discussion and prioritization of the nutrition and obesity prevention strategies to be implemented.

**Objectives 1-4: One** subcontractor will also serve as the coordinating body for youth engagement trainings of both youth and teens at school and community sites, e.g. before and after-school programs, parks and recreational programs, faith based organizations, and youth-focused service organizations. **The same subcontractor** will directly provide these trainings. The purpose of the youth engagement related activities will be to increase awareness for policies, systems, and environmental change approaches to establishing wellness policies at their respective school sites.

**One** sub-contractor will recruit and train adult and youth peer educators and will conduct nutrition education on the importance of vegetable, fruit, low-fat/nonfat milk, water consumption, and physical activity.

**Two** sub-contractors will partner with retail owners identified in CX3 assessments to promote objectives 1-4 through nutrition education materials, food demonstrations, store tours, and point of purchase strategies.

**One** sub-contractor will provide training to three sub-contractors to enhance organizational and staff capacity to apply multi-level approaches to promote, advance, and sustain nutrition and obesity prevention strategies across the county with a focus on objectives 1-4 and community engagement.

**San Bernardino** County LHD and **1** subcontractor will specifically address **Objective 3** by working on a policies, systems, and environmental change strategy to increase the number of water stations at a school site. Students will be educated on the importance of hydration before, during and after physical activity, trained in the different methods in which they can communicate the newly acquired knowledge to peers, parents, teachers, and administrators within their school district; and help collect formative evaluation data on the level of support for increasing water stations amongst peers, parents, and adults.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

**Response:**

There will be **2** subcontractor(s) who will coordinate the school-based trainings of children, teens, and adults as it relates to taste testing and food demonstration activities, e.g. Harvest of the Month, cooking demos, etc. **Two** subcontractors will be actually conducting the trainings at different geographic locations in the county servicing a mix of medium and large sized school districts comprised of a significant number of target youth (estimated >10K FRPM youth). All subcontractors will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted. Formative evaluation will also be conducted to ascertain any changes in fruit and vegetable consumption and beverage intake.

A similar model of coordination and implementation will also take place amongst **two** subcontractors for the after-school related activities to support the adoption and implementation of school wellness policies. The subcontractor will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted.

There will be **2** subcontractor(s) who will partner with retail owners identified in CX<sup>3</sup> assessments to promote objectives 1-4 through nutrition education materials, food demonstrations, store tours, and point of purchase strategies. Each subcontractor will be conducting the interventions to different target audiences. All subcontractors will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted.

There will be **2** subcontractor(s) who will coordinate the community-based trainings of youth and adults as it relates to CX<sup>3</sup>. Subcontractors will conduct the trainings at different geographic locations in the county. All subcontractors will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted. Formative evaluation will also be conducted to ascertain any changes in fruit and vegetable consumption and beverage intake.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

## Prime Budget Justification

Prime Grantee Name: San Bernardino County Dept. of Public Health

Grant Number: 12-10204

Budget Categories	FFY 13 Total	FFY 14 Total	Difference	% Difference
1 Salaries	\$465,681.00	\$866,991.69	\$401,310.69	86.18%

Projected Number of Unduplicated Participants: 42,637

Narrative (max. 200 words)

The local health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in San Diego county. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) Implement *Network* allowable nutrition education interventions and obesity prevention strategies in at least 50% of Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX<sup>3</sup>) assessed neighborhoods; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

Project is new.

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

- Organizational and Environmental change
- Personal knowledge
- Changes in behavior
- Number of new partnerships

---

### 3. EVALUATION PLANS

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

### 4. COORDINATION EFFORTS (MAX. 100 WORDS)

Through the CNAP collaboration between multiple federally funded and non-federally funded food and meal assistance programs consistent nutrition messages for San Diego's CalFresh eligible population will be ensured. Collaboration specifically between the Local Health Department, CalFresh Department and our Health and Human Services Agency will provide outlets through our Family Resource Centers (FRC's) for nutrition education classes.

We will continue the current 6 CX3 projects to engage youth and residents in community improvement projects that could include: retail conversions, community gardens, walkability and other strategies for increasing healthy food access.

With the County's Community Transformation Grant subcontract with Chula Vista Elementary School District, we have opportunities to leverage nutrition education trainings and activities to at least two of the FFY13/14 SNAP-Ed program objectives to maximize participant reach. For example, Schools/After school programs (Objective 12) and Rethink Your Drink (Objective 8) are areas where the Chula Vista School District has expressed interest in engaging through the CTG-funded opportunity

We will provide quality direct nutrition education classes to high risk populations to increase knowledge of the benefits of eating healthy and strategies to maximize food dollars. Schools and after-school programs will be a primary focus with our nutrition efforts. Retail, Faith-based, and worksite efforts will be leveraged by our existing obesity prevention partnerships throughout the county.

**Supplement:** The San Diego Local Health Department (LHD) chose safe routes to school and healthy beverages to reduce sugar-sweetened beverages as their initial PSE priorities. San Diego County LHD plans to promote safe routes for users in eligible census tracts in San Diego County. They will work with schools, peer educators, etc. on this intervention. The second PSE is to reduce the purchase and consumption of sugar-sweetened beverages. They will use the Rethink Your Drink objective to work with schools, worksites, early childhood and medical/dental providers. The CNAP Plan will incorporate objectives that address the four State-level measurable objectives from the California SNAP-Ed Plan. Objectives for San Diego's County's CNAP include the following: implement ongoing direct nutrition education trainings and peer-to-peer trainings at various CNAP partner sites, conduct nutrition education trainings and food demonstrations at Farmers Markets and expand partnerships with health and wellness providers, schools and sports and recreation organizations to make nutrition education training available.

San Diego County LHD plans to promote safe routes for users in eligible census tracts in San Diego County. They will work with schools, peer educators, etc. on this intervention. The second PSE is to reduce the purchase and consumption of sugar-sweetened beverages. They will use the Rethink Your Drink objective to work with schools, worksites, early childhood and

medical/dental providers. The CNAP Plan will incorporate objectives that address the four State-level measurable objectives from the California SNAP-Ed Plan. **1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measureable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10% , teens by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

X	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Mobilize community partnerships around healthy eating and active living.

X	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
X	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
X	Develop point-of-purchase marketing/signage at food retailers.
X	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
X	Investigate environmental or cultural barriers to healthy eating and active living.
X	Provide training or technical assistance to health or community professionals.
X	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
X	Create work-site SNAP-Ed programs.
X	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
	Cultivate community or school gardens.
X	Promote access/appeal, or policy changes to support physical activity or exercise.
X	Other, specify:  Develop healthy nutrition policies at faith-based organizations, worksites and emergency food distribution sites.

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

There are a total of seven (7) proposed subcontractors in the County of San Diego's FFY14 SNAP-Ed Program. All subcontractors will support our SNAP-Ed program's primary project objectives as specified in Section 1 of this document.

**Objectives 1-4:** Seven (7) subcontractors (A – G) will coordinate nutrition education and obesity prevention activities working directly with adults, teens and children at local school district sites. These seven subcontractors will support the LHD by providing nutrition education classes at schools, conducting parent engagement activities, and integrating Harvest of the Month activities in classroom and community events.

Subcontractor A (University of California San Diego - UCSD) will focus on school engagement and train teachers on how to use the *PowerPlay!* curriculum for elementary school students. This will include lessons on the importance of vegetable and fruit consumption, taste testing and food demonstrations and also Harvest of the Month activities. Student workbooks and teacher materials will be provided in the classroom. Physical activity lessons will also be incorporated in the curriculum. Network-approved posters and other supporting educational materials will be placed at schools and also distributed to parents of students. This partnership

will assist the LHD by providing direct nutrition education at these targeted sites.

Subcontractor A (UCSD) will also develop and implement policies, systems, and environmental change strategies related to school, worksite, retail and faith-based interventions. Wellness policies will help create an environment supporting healthy consumption of fruits, vegetables, low-fat/nonfat milk, and water; as well as increase physical activity. Other activities will include:

- Students will be educated on proper nutrition and healthy foods and on the importance of hydration before, during and after physical activity.
- Worksite strategies will include implementing healthy meeting/worksite policies and monthly work lunch and learn employee wellness presentations on nutrition education and physical activity.
- Retail strategies will include highlighting healthy choices at retail stores, working with retailers on point of purchase strategies, and integrating Harvest of the Month promotion. Strategies will also include farmers market promotion through the nutrition education classes offered. Farmers markets that accept EBT cards will be promoted.
- Faith-based strategies will include engaging church leaders to implement nutrition education programs and physical activity opportunities, improving the nutritional quality of foods served at church-related functions, and implementing healthy food and beverage policies for church celebrations.

Subcontractors B-G (B: HomeStart-Central, C: HomeStart-East, D: South Bay Community Services, E: Social Advocates for Youth (SAY) San Diego, F: InterFaith-North Inland, and G: InterFaith-North Coastal) will provide nutrition education and services to eligible and potentially eligible CalFresh populations as part of the administration of the SNAP-Ed program. Nutrition education classes will emphasize the importance of fruit and vegetable consumption and physical activity using MyPlate, Harvest of the Month and physical activity curricula.

These six subcontractors will also collaborate with County staff to implement Communities of Excellence (CX3) projects in low-income neighborhoods throughout San Diego County. These projects are community improvement strategies related to school, worksite, retail and faith-based settings. Residents of these neighborhoods will learn about community engagement strategies, provide presentations to decision makers on community improvement, and implement these projects and strategies.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

Subcontractor A (UCSD) will implement SNAP-Ed services countywide and will be responsible for policies, systems, and environmental change strategies related to school, worksite, retail and faith-based interventions.

Subcontractors B – G (B: HomeStart-Central, C: HomeStart-East, D: South Bay Community

Services, E: Social Advocates for Youth (SAY) San Diego, F: InterFaith-North Inland, and G: InterFaith-North Coastal) will focus on CX3 and community engagement in their specific geographic regions: the Central Region, the East Region, the South Region, the North Central Region, the North Inland Region and the North Coastal Region. These subcontractors will also focus on specific low-income neighborhoods in these regions through the CX3 projects.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FFY 14?**

N/A

## Budget Coversheet

Prime Grantee Name: County of San Diego - Public Health Services

Grant Number: 13-20528

Budget Categories	FFY 13 Total	FFY 14 Total	Difference	% Difference
1 Salaries	\$561,453.00	\$805,889.85	\$244,436.85	30.33%

Budget Revision		Sub Grant(s)			
Action	Last Amt Approved	Name	Description/Justification	Total	Budget Revision Justification
		A University of California San Diego	University of California San Diego (UCSD) - prime SNAP-Ed contractor for San Diego County. UCSD provides direct and indirect education on nutrition and physical activity; community education and Policy, Systems and Environmental change and other services to achieve the four primary objectives of the SNAP-Ed grant: (1) Consumption and Access to Healthy Foods – Fruit and Vegetables, (2) Consumption and Access to Healthy Beverages and Reduced Consumption of Unhealthy Beverages, (3) Physical Activity and Sedentary Behavior, and (4) Environmental Supports for Nutrition Education. The School, Worksite, Retail and Faith-Based areas of the SNAP-Ed program are emphasized. \$340,000 of the total amount may be used to subcontract for Early Childhood Services and Harvest of the Month school services.	\$1,689,359.00	

**Prime Budget Justification**

		B	Home Start (Central)	Procurement for Nutrition Education services contracts with CBOs. Contractors provide services for the Family Self-Sufficiency (FSS) program. The FSS program helps eligible participants develop and continue educational and career goals. Participants are encouraged to seek training or education that will enable them to work or improve their current employment situation. The FSS program requires the provision of SNAP-Ed services. Contractors provide nutrition education, physical activity and related services to eligible and potentially eligible CalFresh populations as part of the administration of the SNAP-Ed program. Services are designed to achieve the four main objectives of the SNAP-Ed grant. These contracts include the following SNAP-Ed objectives: (1) Consumption and Access to Healthy Foods – Fruit and Vegetables, (2) Consumption and Access to Healthy Beverages and Reduced Consumption of Unhealthy Beverages, (3) Physical Activity and Sedentary Behavior. These same contractors will be responsible for CX3 Regional Support: the administration and management of CX3 projects and community engagement activities in support of the SNAP-Ed program. Contractors collaborate with designated business organizations to ensure that these organizations conduct CX3 community engagement and educational activities in their designated areas. The same four objectives will be addressed. These contracts include the following SNAP-Ed objectives: (1) Consumption and Access to Healthy Foods - Fruits and Vegetables, (2) Consumption and Access to Healthy Beverages and Reduced Consumption of Unhealthy Beverages, (3) Physical Activity and Sedentary Behavior, and (4) Environmental Supports for Nutrition Education. Home Start will be the FSS contractor for the Central region of the county.		\$120,659.00	
		C	Home Start (East)	Same as above. Home Start will also be the FSS contractor for the East region of the county.		\$80,395.00	
		D	South Bay Community Services	Same as above. South Bay Community Services will be the FSS contractor for the South region of the county.		\$76,369.00	
		E	Social Advocates for Youth San Diego (North Central)	Same as above. SAY San Diego will be the FSS contractor for the North Central region of the county.		\$80,395.00	

**Prime Budget Justification**

		F	Interfaith Community Services (North Inland)	Same as above. Interfaith Community Services will be the FSS contractor for the North Inland region of the county.	\$84,421.00	
		G	Interfaith Community Services (North Coastal)	Same as above. Interfaith Community Services will also be the FSS contractor for the North Coastal region of the county.	\$80,395.00	
<b>Total Sub Grant(s):</b>					<b>\$2,211,993.00</b>	

Budget Revision		Other Costs						
Action	Last Amt Approved	Budget Item	Description/Justification	Unit Cost	Quantity	Misc.	Total	Budget Revision Justification
		Enhanced funding for FFY14	Additional FFY14 funds per 4/2/13 Program Letter 13-06 from Network. Enhanced funds will be used for projects focusing on Policy, Systems and Environmental (PSE) changes to improve the effectiveness of the SNAP-Ed program. These projects will be designed to achieve the four primary objectives of the SNAP-Ed grant: (1) Consumption and Access to Healthy Foods – Fruit and Vegetables, (2) Consumption and Access to Healthy Beverages and Reduced Consumption of Unhealthy Beverages, (3) Physical Activity and Sedentary Behavior, and (4) Environmental Supports for Nutrition Education. The emphasis of the enhanced funds will be on the School, Worksite, Retail and Faith-Based areas of the SNAP-Ed program.	\$304,556.00	1.00	1.00	\$304,556.00	

**Prime Budget Justification**

		Various other costs	Will cover other expenses, such as nutrition education publications, materials and videos; printing costs; training and education; and food for demonstrations and testing. Printing: 100-150 requests to print materials (USDA tip sheets, Harvest of the Month materials, MyPlate educational materials, CX3 Fact Sheets, etc.) @ \$453.33 per request. Videos: 7-10 Breakfast in the Classroom videos @ \$6k each plus added production costs of approximately 17%. In San Diego County, the LHD School Channel trains teachers on the Network-approved Power Play! curriculum. These teachers present 10 nutrition and physical activity lessons in 15-30 minute sessions to their students using the curriculum manuals and student workbooks. We have an opportunity to engage kids in nutrition and physical activity education during breakfast in the classroom. The videos will be used as a supplement to the Power Play! lessons the teachers are facilitating. Website Integration with SNAP-Ed promotion: In San Diego County, we currently have a website called HealthyWorks which is planned to be an online communication tool (*not to exceed \$ 10,000)for the LHD's SNAP-Ed program to the SNAP-Ed community and to partners. We plan to incorporate Network-approved messaging, identify county emergency food resources, EBT-accepting retail stores and Farmers market locations, and other communication efforts on this medium. Food demonstrations for classroom trainings and community events: 50- 80 events @ \$200 each. Booth rentals for SNAP-Ed community events: 10-12 @ \$213.90 each	\$181,567.00	1.00	1.00	\$181,567.00		
		Office Space	Rental of office space for Nestor Martinez. Mr. Martinez is a CDPH Project Manager and will assist the County staff with the administration and management of the SNAP-Ed Grant. 38.5 sq ft x 2,083.33 * = \$ 25,000.00 (*Including but not limited to: space; computer; Internet, phone and copier/scanner use; repair; maintenance; custodial; trash removal; recycling and utility costs.)	\$25,000.00	1.00	1.00	\$25,000.00

**d. Project Description.**

Key Methods:

- Advisory Council/Task Force (specify): San Francisco County Nutrition Action Plan
- Internet/Web Sites-website address:  
<http://www.sfdph.org/dph/comupg/oprograms/NutritionSvcs/FeelingGood/default.asp>
- Print Media
- Radio: \_\_\_\_\_
- TV: \_\_\_\_\_
- Multi-level approaches that include environmental supports
- Nutrition Education Classes: (175 occurrences at 1 hour(s) each)
- Community Education Events: (45 occurrences at 3 hour(s) each)
- Training/Workshop/Conference: (30 occurrences at 2 hour(s) each)
- Point of Purchase: (\_\_\_\_\_ occurrences at \_\_\_\_\_ hour(s) each)
- Other (specify): \_\_\_\_\_ (\_\_\_\_\_ occurrences at \_\_\_\_\_ hour(s) each)

Key Educational Messages: *All messages will align with the Dietary Guidelines for Americans 2010 and MyPlate. Messages will promote Enjoy your food, but eat less; Avoid oversized portions; Make half your plate fruit and vegetables; Switch to fat-free or low-fat (1%) milk; Compare sodium in foods and Drink water instead of sugary drinks.*

Projected Unduplicate Number of Contacts: 13,384

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in San Francisco city/county. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) share Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) assessment results with various local stakeholders, community members, and community organizations. Implement Network allowable nutrition education interventions and obesity prevention strategies in at least 50% of CX3 assessed neighborhoods. 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

- Continuing, No adaptation or change in intervention  
 Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Process evaluation measures will indicate the participation levels in all activities performed, as recorded in sign-in sheets and on the Activity Tracking Form. Improved knowledge of healthy eating practices and the role of physical activity in preventing chronic disease will be collected. We will collect data on numbers of people reached and assess self-reported behavior change as a result of information received. We will work with the Research and Evaluation Unit to develop an Outcome Evaluation Process, as well as evaluate our Rethink Your Drink activities. We will collect information on Organizational Change related to adoption and implementation of Healthy Food and Beverage Guidelines

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

**Supplement:** We work closely with the San Francisco WIC Program, sharing regular updates of our project and activities. We participate in the San Francisco Rethink Your Drink Partnership Working Group, sharing information on our RYD activities and resources. We participate in the Citywide Healthy Food Retail Group, sharing information on our Community Assessments and activities supporting healthy food retail in San Francisco.

LOCAL PROJECT  
SYNOPSIS

Our coalition work and PSE work is centered primarily around the work we do within the San Francisco County Nutrition Action Plan, with a focus on helping SF CNAP Members to develop Healthy Food, Healthy Beverage and Healthy Movement Guidelines within their organizations to create healthier environments for the families they serve. The other PSE work we will be involved in is in collaboration with the San Francisco Unified School District who will address use of low nutrient density foods and beverages in classroom celebrations or as rewards in four SFUSD elementary schools. In addition we will provide resources and technical assistance to the organizations that perform a variety of sub-contracts (Early Childhood Settings, Schools and Afterschool Settings, Community Based Organizations and Faith Based Settings) with us to encourage them to adopt organizational practices to improve access to healthy food and beverages in their classes, events and celebrations.

We have not had an opportunity to develop a FFY14 Work Plan for the SF CNAP. We had intended to address this in our meeting of September 12, 2013, but we were asked to participate in a CalFresh Forum in Oakland at the same time, so we will address this in our November 2013 meeting, with the goal of having a final work plan by early 2014. It is anticipated that we will continue the work mentioned in number 3) above, where we are providing support and technical assistance to SF CNAP members and a number of other organizations that were trained on Healthy Food, Healthy Beverage and Healthy Movement Guidelines in April 2013 to see if they can develop Wellness guidelines for their programs/agencies.

We collaborate with all the members of the SF CNAP, SFUSD, Neighborhood Development Corporation, Shape Up San Francisco, CARECEN, Mission Neighborhood Health Center, Family Services Agency, Tenderloin Healthy Corner Store Coalition, Rethink Your Drink Partnership Working Group, Citywide Healthy Food Retail Group, Heart of the City Farmers' Market, San Francisco Food Bank, etc.

## City and County of San Francisco LHD

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measurable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10%, teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

X	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Mobilize community partnerships around healthy eating and active living.

X	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
X	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
X	Develop point-of-purchase marketing/signage at food retailers.
	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
X	Investigate environmental or cultural barriers to healthy eating and active living.
X	Provide training or technical assistance to health or community professionals.
	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
	Create work-site SNAP-Ed programs.
	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
	Cultivate community or school gardens.
X	Promote access/appeal, or policy changes to support physical activity or exercise.
	Other, specify:
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

There are a total of **five** proposed subcontractors in **the San Francisco** County's FY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity amongst adults, teens, and children.

**Objectives 1-3:** Specifically, **one** subcontractor will take on a coordination role to directly work and train youth and adults at local school district sites. Additionally **one other** subcontractor will support the LHD to provide nutrition education activities to adults (parents/caregivers) at school district affiliated venues such as school sponsored events and before and after school

programs. Subcontractors will train teachers on the use of taste testing or food demonstration curriculum, materials and student workbooks, such as Harvest of the Month; train parents at nutrition education workshops taking place before and after school; and conduct food demonstrations and taste testing activities at school-wide events targeting both youth and adults. Additional nutrition education on the importance of vegetable, fruit, low-fat/nonfat milk, and water consumption will be coordinated by the subcontractors through the distribution of newsletters and other education materials sent directly to parents of youth of targeted sites.

**Objectives 1-3: One** subcontractor will also serve as the lead in providing nutrition education classes in the community that will include nutrition education on the importance of vegetable, fruit, low-fat/nonfat milk, and water consumption, conduct food demonstrations and taste tests.

**Objectives 1-4: One** subcontractor will also serve as the coordinating body for youth engagement trainings of both youth and teens at school sites. The purpose of the youth engagement related activities will be to increase awareness for policies, systems, and environmental change approaches to establishing wellness policies at their respective school sites.

**Objectives 1-4: One** subcontractor will also serve as the lead in providing peer education in the community that will include providing class series to community members to promote CalFresh participation, nutrition education, physical activity and increased intake fruits and vegetables, water and low fat/nonfat milk.

**Objectives 1-4: One** subcontractor will also serve as the lead in carrying out activities in the faith based settings that will include walkability assessments and assessment of the food environment to support providing nutrition education, training and technical assistance to improve the environment for access to healthy foods and physical activity..

**Objectives 1-4: One** subcontractor will also serve as the lead in carrying out activities in the early childhood settings that will include assessments of the food and physical activity environments to support providing nutrition education, training and technical assistance to improve the environment for access to healthy foods and physical activity.

**San Francisco** County LHD will specifically address **Objective 3** by working on a policies, systems, and environmental change strategy to increase the number of water stations at community sites. Community members will be educated on the importance of hydration before, during and after physical activity, trained in the different methods in which they can communicate the newly acquired knowledge to peers within their community; and help collect formative evaluation data on the level of support for increasing water stations amongst peers.

Wellness policies, depending on the exact nature of the policy adopted, will help create an environment where it is easier to engage in the healthy consumption of fruits, vegetables, low-fat/nonfat milk, and water; as well as increase physical activity.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

There will be **two** subcontractor(s) who will coordinate the school-based trainings of adults as it relates to parent education on healthy eating and the importance of promoting water and low fat/nonfat milk intake. **These Two** subcontractors will be actually reaching parents through different modalities in selected schools with over 50% FRMP. One subcontractor will engage parents through their peer education trainings and the other subcontractor will engage parents through school wide events and through the distribution of newsletters and other education materials sent directly to parents of youth of targeted sites. All subcontractors will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted. Formative evaluation will also be conducted with parents taking the peer education classes to ascertain any changes in fruit and vegetable consumption and beverage intake by these parents.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

## Budget Coversheet

Prime Grantee Name:

City and County of San Francisco Department of Public Health

Grant Number:

13-20505

Budget Categories	FFY 13 Total	FFY 14 Total	Difference	% Difference
1 Salaries	\$314,039.00	\$416,930.03	\$102,891.03	32.76%
2 Benefits	\$135,437.00	\$164,763.73	\$29,326.73	21.65%
3 Operating	\$20,381.00	\$50,816.64	\$30,435.64	149.33%
4 Equipment	\$0.00	\$1,950.00	\$1,950.00	0.00%
5 Travel & Per Diem	\$4,873.00	\$9,865.20	\$4,992.20	102.45%
6 Subcontractors	\$0.00	\$650,000.00	\$650,000.00	0.00%
7 Other Costs	\$3,750.00	\$13,500.00	\$9,750.00	260.00%
8 Indirect Costs	\$22,474.00	\$29,084.69	\$6,610.69	29.41%
<b>Totals:</b>	<b>\$500,954.00</b>	<b>\$1,336,910.29</b>	<b>\$835,956.29</b>	<b>166.87%</b>

Budget Categories	Reason for difference greater than 5%
1 Salaries	Our funding was increased from \$500,954 in FFY 2013 to \$1,336,911 in FFY 2014
2 Benefits	Our funding was increased from \$500,954 in FFY 2013 to \$1,336,911 in FFY 2014
3 Operating	As a result of increased funding for FFY 2014 we are hiring additional staff to meet Scope of Work deliverables, requiring additional office space
4 Equipment	As a result of increased funding for FFY 2014 we are hiring additional staff to meet Scope of Work deliverables, requiring additional equipment
5 Travel & Per Diem	As a result of hiring new staff we will need to train them in a variety of areas to meet Scope of Work deliverables.
6 Subcontractors	This is a new part of our FFY 2014 contract and therefore increased from \$0 to \$650,000.
7 Other Costs	As a result of increased funding for FFY 2014 we will be reaching more SNAP Ed eligible participants, resulting in increases in Other Costs.
8 Indirect Costs	As a result of increased funding we will be hiring additional staff to meet Scope of Work deliverables, this in turn increases our Indirect Costs, based on Salary + Fringe Benefits

Narrative

San Joaquin County Public Health Services (SJCPHS) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in San Joaquin County. SJCPHS will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

SJCPHS will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) Implement *Network* allowable nutrition education interventions and obesity prevention strategies in at least 50% of CX<sup>3</sup> assessed neighborhoods; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX<sup>3</sup> or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

Continuing, No adaptation or change in intervention

Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Process evaluation measures will indicate participation levels in all *Network* activities performed as recorded on sign-in sheets, technical assistance logs, photos, reports, and the Activity Tracking Form. Key measures will include the number of residents reached by marketing, trainings, and food demonstrations; number of class participants; and number of materials distributed. Impact and outcome indicators, such as changes in eating behaviors and food preferences, will be captured using surveys and other evaluation methods identified in the evaluation plan.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

San Joaquin County Public Health Services will collaborate with community/faith-based organizations, schools/districts, healthcare agencies, and other SNAP-Ed funded programs to coordinate and supplement nutrition and physical activity programming and implementation of the County Nutrition Action Plan (CNAP). CNAP members that are SNAP-Ed funded meet quarterly to identify and address program gaps, ensuring complementary and unduplicated services are provided. SJCPHS also participates in the Obesity and Chronic Disease Prevention Taskforce, Healthy San Joaquin Collaborative, and the Hunger Taskforce, which includes SJC Human Services Agency and other organizations/agencies working to end hunger and food insecurity.

**Supplement:** San Joaquin Public Health Services has chosen to work with partners to create a healthy food store recognition program in CX3 neighborhoods and work with their Parks and Recreation Department to increase the number of physical activity opportunities available to low income residents as their initial PSE priorities. San Joaquin Public Health Services will participate in evaluation and report metrics as per Network criteria and as appropriate for the PSEs it chose. San Joaquin County will utilize the RE-AIM methodology to evaluate their proposed PSE strategies of creating a healthy food store recognition program in CX3 neighborhoods and working with their Parks and Recreation Department to increase the number of physical activity opportunities available to low income residents.

San Joaquin County is currently in the formative stages of its organizational and environmental evaluation processes. Formative evaluation has/will include review of CX3 assessment results, feedback from community forums and discussions, and results from the Tobacco Program Retail Store Surveys. PSE Success will be identified via an increase in the number of retail food stores that meet standard upon completion of CX3 reassessment, and improvements in personal health measures will be seen through a pre-/post-test physical activity survey. San Joaquin County Public Health Services will work with a designated Network Research and Evaluation team member to create and implement a customized PSE evaluation framework based on the Re-Aim model that will promote

successful PSE intervention outcomes. San Joaquin County has chosen to work with partners to create a healthy food store recognition program in CX3 neighborhoods and work with their Parks and Recreation Department to increase the number of physical activity opportunities available to low income residents as their initial PSE priorities. San Joaquin Public Health will partner with local farmers markets and food distributors to provide healthy produce options for retailers to access and sell. Local Network and Tobacco Program staff will collaborate to develop criteria for the healthy store recognition program. San Joaquin County CNAP members will mentor community champions to encourage healthy changes in retail food stores in low-income neighborhoods. The proposed PA intervention involves working with the Stockton Parks and Recreation department and community resource centers to develop a policy of offering more physical activity opportunities that are no cost to the public, especially in the CX3 neighborhoods. Please refer to responses to questions #9 and #64 above for more detail related to PSE activities. San Joaquin County's CNAP team will incorporate objectives for county specific jurisdiction to address the four State-level measurable objectives from the California SNAP-Ed Plan. Specific objectives for San Joaquin County's CNAP are as follow:

1. Coordination & Communication- Increase countywide leadership and coordination between nutrition and physical activity programs and collaborative.
2. Participation- Increase awareness and utilization of food and nutrition programs including but not limited to Supplemental Nutrition Assistance Program (SNAP), child nutrition programs and WIC.
3. Nutrition Education- Provide consistent education, information and resources to promote healthy eating and active living.
4. Policy & Initiative- Implement policies that contribute to increased access to healthy foods and physical activity on an organizational and regional level.

\*After each school name indicate all that apply with the following abbreviations: K-12 School (S), Preschool (PS), After School (A) & Parents (P)

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measurable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10% , teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens, and children from randomly sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

X	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Mobilize community partnerships around healthy eating and active living.

	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
X	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
X	Develop point-of-purchase marketing/signage at food retailers.
	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
X	Investigate environmental or cultural barriers to healthy eating and active living.
X	Provide training or technical assistance to health or community professionals.
	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
	Create work-site SNAP-Ed programs.
X	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
X	Cultivate community or school gardens.
X	Promote access/appeal, or policy changes to support physical activity or exercise.
	Other, specify:
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

There are a total of seventeen (17) proposed subcontractors in San Joaquin County's FFY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity amongst adults, teens, and children.

**Objectives 1-3:** Specifically, six (6) subcontractor(s) will take on a coordination role along with two (2) additional subcontractors to directly work and train youth and adults at local school district sites. Collectively, these eight (8) subcontractors will support the LHD to provide nutrition education activities to youth (teens and children) and adults (teachers) at school

district-affiliated venues such as classrooms, school sponsored events, after school programs, teacher in-service/trainings, and partnership activities with local parks and recreational programs. Subcontractors will train teachers on the use of taste testing or food demonstration curriculum, materials and student workbooks, such as Harvest of the Month; and conduct food demonstrations and taste testing activities at school-wide events targeting both youth and adults. Additional nutrition education on the importance of vegetable, fruit, low-fat/nonfat milk, and water consumption will be coordinated by the subcontractors through the distribution of newsletters and use of other education materials sent directly to parents of youth and teens of targeted sites.

**Objectives 1-4:** Four (4) subcontractors will also serve as the coordinating body for youth and community engagement trainings of both youth, teens, and adults at school and community sites, e.g. after-school programs, faith based organizations, and youth-focused service organizations. The purpose of the youth engagement related activities will be to increase awareness for policies, systems, and environmental change approaches to establishing wellness policies at their respective school sites.

San Joaquin County LHD will specifically address **Objective 4** by working on a policies, systems, and environmental change strategy to increase the number of physical activity opportunities in the community, in the parks, and other publicly accessible venues. Two (2) subcontractors will have the opportunity to work with this initiative while conducting community interventions through the faith-based projects.

Students will be educated on the importance of hydration before, during and after physical activity, trained in the different methods in which they can communicate the newly acquired knowledge to peers, parents, teachers, and administrators within their school district; and help collect formative evaluation data on the level of support for increasing water stations amongst peers, parents, and adults.

Wellness policies, depending on the exact nature of the policy adopted, will help create an environment where it is easier to engage in the healthy consumption of fruits, vegetables, low-fat/nonfat milk, and water; as well as increase physical activity.

Three (3) subcontractors have been selected to provide administrative support to San Joaquin County LHD by providing evaluation services and oversight of two key policy and community activities. Specifically, one (1) subcontractor will be providing coordination for a community forum that will not only include nutrition and physical activity education but also an opportunity for community engagement activities towards improving access to fruits and vegetables, which are part of **Objectives 1-2** above. One (1) subcontractor will be providing facilitation and oversight of the County Nutrition Action Plan (CNAP) in enhancing efforts around improving the quality and access of fresh produce, conducting nutrition education for the community, and improving community awareness of resources that address **Objectives 1-4**. An evaluation subcontractor will conduct the necessary local evaluation of interventions to be able to document the initiatives of these subcontractors and of the LHD.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

There will be six (6) subcontractor(s) who will coordinate the school-based trainings of children and teens as it relates to taste testing and food demonstration activities, e.g. Harvest of the Month, cooking demos, etc. Six (6) subcontractors will be actually conducting the trainings at different geographic locations in the county servicing a mix of medium-sized school districts comprised of a significant number of target youth (estimated >5K FRPM youth). All subcontractors will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted. Formative evaluation will also be conducted to ascertain any changes in fruit and vegetable consumption and beverage intake.

A similar model of coordination and implementation will also take place amongst two (2) subcontractors for the youth engagement related activities to support the adoption and implementation of school wellness policies.

Two (2) subcontractors will conduct faith-based interventions using the Body & Soul model and incorporating peer-to-peer nutrition education for their immediate population as well

Four (4) subcontractors will be charged with conducting direct nutrition education for community members within their organization as well as those within their surrounding reach. They are will be targeting audiences that are located within different parts of the county and the city of Stockton, and some are specific to the audience that their organization typically targets. One (1) subcontractor works with the Asian Pacific population living within and near the residential facility the program is housed. One (1) subcontractor will focus on the parents of youth who participate in the inner-city programs where they are located. One (1) subcontractor reaches out recipients at mobile emergency food program locations. Participants will be carefully tracked through collection of demographics forms and other information gathering to ensure that the reach is optimal for unduplicated SNAP-Ed-eligible members of the community.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

## Budget Coversheet

Prime Grantee Name: San Joaquin County Public Health Services

Grant Number: 13-20531

Budget Categories	FFY 13 Total	FFY 14 Total	Difference	% Difference

Projected Unduplicate Number of Contacts: 5,673

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in San Luis Obispo county. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) conduct a Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) or other community assessment in up to 7 SNAP-Ed eligible low-income neighborhoods and share results with various local stakeholders, community members and community organizations; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change

Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

. Continuing, No adaptation or change in intervention

. Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

We will track the percentage of the target population who receives nutrition messages, including tracking attendance and participation at all events, we will submit all CX3 data, and we will collect minutes and attendance at CNAP meetings. Other measures will be identified once we develop our evaluation plan.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

**Supplement:** The San Luis Obispo County Health Department chose to 1. improve nutrition and physical activity environments in qualified childcare settings. 2. Increase access to Farmer's Markets through location, EBT, and WIC coupon acceptance to increase consumption of fresh fruits and vegetables, and support development of a community garden as their initial PSE priorities. There is a pre and post-test for the 5 series classes which will measure behavior change.

We will track the percentage of the target population who receives nutrition messages, including tracking attendance and participation at all events. Submit all CX3 data, and we will collect minutes and attendance at CNAP meetings. Other measures will be identified once we develop our evaluation plan.

\*After each school name indicate all that apply with the following abbreviations: K-12 School (S), Preschool (PS), After School (A) & Parents (P)

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FFY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measurable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10%, teens by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of lowfat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent before and after exposure to or participation in an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

x	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
x	Mobilize community partnerships around healthy eating and active living.

x	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
	Develop point-of-purchase marketing/signage at food retailers.
	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
x	Investigate environmental or cultural barriers to healthy eating and active living.
x	Provide training or technical assistance to health or community professionals.
x	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
	Create work-site SNAP-Ed programs.
x	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
x	Cultivate community or school gardens.
	Promote access/appeal, or policy changes to support physical activity or exercise.
	Other, specify:
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

There are a total of 6 proposed subcontractors in San Luis Obispo County's FY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity amongst adults, teens, and children.

**Objectives 1-4:** Specifically, 3 subcontractors will take on a coordination role to directly work and train youth and adults at local school sites. Collectively, these 3 subcontractors will support the LHD to provide nutrition education activities to youth (teens and children) and adults (parents and teachers) at school venues such as classrooms, school sponsored events, early childhood education sites, before and after school programs, teacher in-service/trainings, and partnership activities with local community based programs. Subcontractors will train teachers on the use of taste testing and food demonstration curriculum; materials and student workbooks, such as Harvest of the Month; train parents at nutrition education classes taking place at before and after school programs; and conduct food demonstrations and taste testing activities at school-wide events targeting both youth and adults. Additional nutrition education on the importance of vegetable, fruit, low-fat/nonfat milk, and water consumption will be coordinated by the subcontractors through the distribution of newsletters and other education materials sent directly to parents of youth and teens of targeted sites.

Two subcontractors will also serve as the coordinating body for youth engagement trainings of both youth and teens at school, community and after-school sites. The purpose of the youth engagement related activities will be to increase awareness for policies, systems, and environmental change approaches.

One subcontractor will specifically address objective 1 & 2 by working with emergency food distribution sites to increase distribution of fresh fruits and vegetables, train distribution site staff and volunteers on how to conduct healthy food demonstrations using the fresh produce, and conduct nutrition education classes.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

There will be 3 subcontractors who will coordinate the school-based trainings of children, teens, and adults as it relates to taste testing and food demonstration activities, e.g. Harvest of the Month, cooking demos, etc. These subcontractors will be actually conducting the trainings at different geographic locations in the county servicing a mix of preschool, elementary and high school sites. All subcontractors will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted. Formative evaluation will also be conducted to ascertain any changes in fruit and vegetable consumption and beverage intake.

A similar model of coordination and collaboration will also take place amongst two subcontractors for the youth engagement related activities. These two subcontractors will work at different sites with different age groups – high school and elementary.

All sub-contractors will coordinate activities and share resources through our County Nutrition Action Plan workgroup.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

**d. Project Description.**

Key Methods:

- Advisory Council/Task Force (specify): Get Healthy San Mateo
- Internet/Web Sites-website address: \_\_\_\_\_
- Print Media
- Radio: \_\_\_\_\_
- TV: \_\_\_\_\_
- Multi-level approaches that include environmental supports
- Nutrition Education Classes: (438) occurrences at 1 hour(s) each
- Community Education Events: (10) occurrences at 3 hour(s) each
- Training/Workshop/Conference: (10) occurrences at 2 hour(s) each
- Point of Purchase: (\_\_\_\_\_ occurrences at \_\_\_\_\_ hour(s) each)
- Other (specify): \_\_\_\_\_ (\_\_\_\_\_ occurrences at \_\_\_\_\_ hour(s) each)

Key Educational Messages: *All messages will align with the Dietary Guidelines for Americans 2010 and MyPlate. Messages will promote Enjoy your food, but eat less; Avoid oversized portions; Make half your plate fruit and vegetables; Switch to fat-free or low-fat (1%) milk; Compare sodium in foods and Drink water instead of sugary drinks.*

LOCAL PROJECT  
SYNOPSIS

Delivery Sites by Type of Setting

- \_\_\_\_\_ Adult Education & Job Training Sites
- \_\_\_\_\_ Adult Rehabilitation Center
- \_\_\_\_\_ 5 CalFresh Offices
- \_\_\_\_\_ 7 Churches
- \_\_\_\_\_ 1 Community Centers
- \_\_\_\_\_ Elderly Service Centers
- \_\_\_\_\_ 1 Emergency Food Assistance Sites (includes Food Banks, Food Pantries, and Soup Kitchens)
- \_\_\_\_\_ Extension Offices
- \_\_\_\_\_ Farmers Markets
- \_\_\_\_\_ 7 Food Stores
- \_\_\_\_\_ Head Start Programs
- \_\_\_\_\_ Individual Homes
- \_\_\_\_\_ 2 Libraries

- \_\_\_\_\_ 1 Other Youth Education Sites (includes Parks and Recreation)
- \_\_\_\_\_ 3 Public/Community Health Centers (includes Public Health Departments)
- \_\_\_\_\_ 6 Public Housing
- \_\_\_\_\_ Schools – students (Preschool)
- \_\_\_\_\_ Schools – students (K-12)
- \_\_\_\_\_ 28 Schools – students (Afterschool Program)
- \_\_\_\_\_ 28 Schools - Parents
- \_\_\_\_\_ Shelters/Temporary Housing
- \_\_\_\_\_ TANF Job Readiness Program
- \_\_\_\_\_ 6 WIC Programs
- \_\_\_\_\_ Worksites
- \_\_\_\_\_ Other (specify): \_\_\_\_\_
- \_\_\_\_\_ Other (specify): \_\_\_\_\_
- \_\_\_\_\_ Other (specify): \_\_\_\_\_

---

Projected Unduplicate Number of Contacts: 7,945

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in San Mateo county. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) share Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) assessment results with various local stakeholders, community members, and community organizations. Implement Network allowable nutrition education interventions and obesity prevention strategies in at least 50% of CX3 assessed neighborhoods. 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessment in eligible neighborhoods 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

- Continuing, No adaptation or change in intervention  
 Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Document reported behavior change and barriers.

Reach projected number of individuals with behavior focused nutrition education interventions.

Reach projected number of new community partnerships.

Reach projected number of nutrition and physical activity promotion activities.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

**Supplement:** Participants will: increase water intake, physical activity, increase fruit and vegetable consumption, decrease unhealthy beverages and sedentary (screen time) behavior. Results will be used to revise and modify programs to increase behavior change. Participants will be able to measure success as a result of participating in the program. We will have established a community garden on public land for 30 families by June 2014. Low-income families will have more access to fruits and vegetables. Students at three schools will be drinking more water after the installation of three water stations. Interventions and results will be presented in the RE-AIM format. We will be using Network approved materials designed to meet core objectives. Rethink Your Drink Campaign will be conducted to reduce the consumption of unhealthy beverages. Three schools will be focusing on increasing water consumption by students. We will be using statewide surveys to evaluate programs promoting fruits and vegetables, physical activity and the reduction of sedentary behavior. PSE plans have been developed with a timeline. As of September 13, the coalition is seeking funding for the actual construction. Plans and permits have been obtained. "Friendship Park" Coalition, consisting of community members, network funded agencies, service clubs and other interested parties will develop a community garden increasing access to food by Spring of 2014. Water stations will be available for students to refill water bottles at three schools. At least 15 agencies providing nutrition

education in low-income communities or free and reduced meals qualifying schools will meet quarterly to develop an action plan to support PSE activities and support USDA nutrition messages in San Mateo County. CX3 data will be presented to two community groups to identifying one additional PSE objective

\*After each school name indicate all that apply with the following abbreviations: K-12 School (S), Preschool (PS), After School (A) & Parents (P)

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measurable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10%, teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent systematic before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

X	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Mobilize community partnerships around healthy eating and active living.

X	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
X	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
	Develop point-of-purchase marketing/signage at food retailers.
X	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
X	Investigate environmental or cultural barriers to healthy eating and active living.
X	Provide training or technical assistance to health or community professionals.
	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
	Create work-site SNAP-Ed programs.
	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
X	Cultivate community or school gardens.
X	Promote access/appeal, or policy changes to support physical activity or exercise.
	Other, specify:
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

There are a total of seven proposed subcontractors in San Mateo County's FY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity amongst adults, teens, and children.

**Objectives 1-3:** Specifically, one subcontractor will take on a coordination role along with one additional subcontractor to directly work and train youth and adults at local school district sites in after-school programs. One subcontractor will support the LHD to provide nutrition education activities to youth (teens and children) and adults (parents and teachers, and afterschool staff)

at school district affiliated afterschool programs, The Subcontractor will train staff on the use of taste testing or food demonstration curriculum, materials and student workbooks, such as Harvest of the Month; involve parents in education taking place in the after school programs; and conduct food demonstrations and taste testing activities. The other school subcontractor will focus on Garden based nutrition education activities in the county school districts.

Three of the subcontractor will implement nutrition education and physical activity promotion through the "Body and Soul tool kit in three of the major faith sectors, the African-American, Tonga, and Latino communities. The Health Department will coordinate the work of three subcontractors.

One Subcontractor will focus on adult Garden based community nutrition education classes.

**Objectives 1-4:** \_

One subcontractor will coordinate youth engagement trainings of both youth and teens at school and community sites in conjunction with CX3 interventions. The selected Policy, environmental, and Systems projects will be determined by community/youth decisions based on CX3 data and local input.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

As noted above the three faith based sub-contractors will be reaching different ethnic segments of the community and coordination will be done by the Health Department. The two School based subcontractors are focused on afterschool programs and Garden based nutrition education and the coordination of the interventions will be coordinated by local Health Department and one of the two subs.

The local Health department will also coordinate the activities of the subcontractor assigned to Youth Engagement/CX3 interventions with the other school based subcontractors.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

## Budget Coversheet

Prime Grantee Name: San Mateo County Health System

Grant Number: 13-20532

Budget Categories	FFY 13 Total	FFY 14 Total	Difference	% Difference
1 Salaries	\$172,827.00	\$257,088.00	\$84,261.00	48.75%

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Santa Barbara county. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) conduct a Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) or other community assessment in up to 7 SNAP-Ed eligible low-income neighborhoods and share results with various local stakeholders, community members and community organizations; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including

representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

. Continuing, No adaptation or change in intervention

. Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Service delivery and impact will be evaluated using a variety of approved tools and methods. Key performance measures will include: the number of outreach and educational events and classes provided, and the number of participants served under each applicable SOW objective; increases in nutrition knowledge and consumption of healthy foods and beverages; and tracking of the number and type of environmental changes made as a result of program activities. Related documentation will include sign-in sheets, meeting agendas, activity logs, photos, pre & post tests and data gathered with other approved evaluation tools.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population. Efforts are meant to maximize resources while avoiding duplication.

**Supplement:** The Santa Barbara county health department chose to work with a small grocery chain to encourage change of promotional ideas towards healthier options and to work with partners on a joint use agreement with a school district to increase PA opportunities as their initial PSE priorities. The

Santa Barbara county health department chose to work with a small grocery chain to encourage change of promotional ideas towards healthier options and to work with partners on a joint use agreement with a school district to increase PA opportunities as their initial PSE priorities. CNAP Plan has/will incorporate objectives that for their specific jurisdiction address the four State-level measurable objectives from the California SNAP-Ed Plan. Specific objectives for Santa Barbara's County's CNAP are as follows: 1) By Sept 30, 2014, at least 80% (120/150) of Healthy for Life Nutrition Lecture Series participants will report an increase in daily fruit and vegetable consumption, as compared to the baseline rate, and 2) By September 30, 2014, at least 75% (2550/3400) of students in k-6th grade will report an increase in daily fruit and vegetable consumption as compared to baseline rates.

\*After each school name indicate all that apply with the following abbreviations: K-12 School (S), Preschool (PS), After School (A) & Parents (P)

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measurable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10% , teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

X	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Mobilize community partnerships around healthy eating and active living.

X	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
X	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
	Develop point-of-purchase marketing/signage at food retailers.
	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
X	Investigate environmental or cultural barriers to healthy eating and active living.
X	Provide training or technical assistance to health or community professionals.
	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
	Create work-site SNAP-Ed programs.
	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
X	Cultivate community or school gardens.
X	Promote access/appeal, or policy changes to support physical activity or exercise.
	Other, specify:
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

**Response:**

There are a total of four proposed subcontractors in Santa Barbara County's FY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity amongst adults, teens, and children.

**Objectives 1-4:** Specifically, three subcontractors will take on a coordination role to directly work and train youth and adults at local school district sites. Collectively, these three subcontractors will support the LHD to provide nutrition education activities to youth and adults at school district affiliated venues such as classrooms, school sponsored events, early childhood education sites, teacher in-service/trainings, school gardens, and partnership activities with local parks and recreational programs and other community based organizations. Subcontractors will train teachers on the use of taste testing or food demonstration curriculum, materials and student workbooks, such as Harvest of the Month; train parents at nutrition education classes taking place at before and after school programs; and conduct food demonstrations and taste testing activities at school-wide events targeting both youth and adults. Additional nutrition education on the importance of vegetable, fruit, low-fat/nonfat milk, and water consumption, along with the importance of physical activity will be coordinated by the subcontractors through the distribution of newsletters and other education materials sent directly to parents of youth and teens of targeted sites.

One subcontractor will also serve as the coordinating body for youth engagement trainings of both youth and teens at school and youth-focused service organization sites. The purpose of the youth engagement related activities will be to increase awareness for policies, systems, and environmental change approaches to establishing wellness policies at their respective school sites.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

**Response:**

There will be three subcontractors who will coordinate the school-based trainings of children, teens, and adults as it relates to taste testing and food demonstration activities, e.g. Harvest of the Month, cooking demos, etc. Three subcontractors will be actually conducting the trainings at different geographic locations in the county (2 serving State Pre-school children and families in different school districts and one serving students from k-8<sup>th</sup> grade via School Garden Education in five school districts servicing a mix of medium and large sized school districts comprised of a significant number of target youth (estimated >4K FRPM youth). All subcontractors will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted. Formative evaluation will also be conducted to ascertain any changes in fruit and vegetable consumption and beverage intake.

An additional sub-contractor will be working directly with students on a youth engagement objective regarding policy, systems, and environmental changes at one local Network qualified high school campus.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

## Budget Coversheet

Prime Grantee Name: Santa Barbara County Public Health Department  
 Grant Number: 13-20509

Budget Categories	FFY 13 Total	FFY 14 Total	Difference	% Difference
1 Salaries	\$224,363.00	\$338,849.97	\$114,486.97	51.03%
2 Benefits	\$96,476.00	\$149,613.94	\$53,137.94	55.08%
3 Operating	\$3,074.00	\$8,638.08	\$5,564.08	181.00%
4 Equipment	\$2,000.00	\$0.00	-\$2,000.00	-100.00%
5 Travel & Per Diem	\$6,275.00	\$10,157.50	\$3,882.50	61.87%
6 Subcontractors	\$6,999.00	\$262,750.00	\$255,751.00	3654.11%
7 Other Costs	\$8,450.00	\$7,900.00	-\$550.00	-6.51%
8 Indirect Costs	\$58,104.00	\$87,923.50	\$29,819.50	51.32%
<b>Totals:</b>	<b>\$405,741.00</b>	<b>\$865,833.00</b>	<b>\$460,092.00</b>	<b>113.40%</b>

Budget Categories	Reason for difference greater than 5%
1 Salaries	Increase in overall SNAP-Ed budget allowance requires add'l staff to meet SOW
2 Benefits	Reflects increase/decrease in salary total category budget
3 Operating	Overall increase in other cost categories
4 Equipment	Reduction in needed equipment items
5 Travel & Per Diem	Increase due to grant funding training requirements for FFY 2014
6 Subcontractors	Grant funding requirement to subcontract 30% of total allocation
7 Other Costs	Increase in SNAP-Ed eligible participants in the FFY 2014 period
8 Indirect Costs	Overall increase in other cost categories

**d. Project Description.**

Key Methods:

- Advisory Council/Task Force (specify): County Nutrition Advisory Group
- Internet/Web Sites-website address: \_\_\_\_\_
- Print Media
- Radio: \_\_\_\_\_
- TV: \_\_\_\_\_
- Multi-level approaches that include environmental supports
- Nutrition Education Classes: (481 occurrences at 1 hour(s) each)
- Community Education Events: (25 occurrences at 4 hour(s) each)
- Training/Workshop/Conference: (53 occurrences at 2 hour(s) each)
- Point of Purchase: (10 occurrences at 2 hour(s) each)
- Other (specify): \_\_\_\_\_ (\_\_\_\_\_ occurrences at \_\_\_\_\_ hour(s) each)

Key Educational Messages: *All messages will align with the Dietary Guidelines for Americans 2010 and MyPlate. Messages will promote Enjoy your food, but eat less; Avoid oversized portions; Make half your plate fruit and vegetables; Switch to fat-free or low-fat (1%) milk; Compare sodium in foods and Drink water instead of sugary drinks.*

Delivery Sites by Type of Setting

1 Adult Education & Job Training Sites  
  Adult Rehabilitation Center  
1 CalFresh Offices  
25 Churches  
9 Community Centers  
  Elderly Service Centers  
5 Emergency Food Assistance Sites  
(includes Food Banks, Food Pantries,  
and Soup Kitchens)  
  Extension Offices  
2 Farmers Markets  
64 Food Stores  
1 Head Start Programs  
  Individual Homes  
1 Libraries

3 Other Youth Education Sites (includes Parks  
and Recreation)  
9 Public/Community Health Centers (includes  
Public Health Departments)  
  Public Housing

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Santa Clara county /city. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) continue implementation of *Network* allowable nutrition education interventions and obesity prevention strategies in at least 50% of CX<sup>3</sup> neighborhoods assessed during FFY 2011 and FFY 2012. Share Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX<sup>3</sup>) assessment results with various local stakeholders, community members, and community organizations and begin implementation of *Network* allowable nutrition education interventions and obesity prevention strategies in at least 50% of CX<sup>3</sup> assessed neighborhoods in FFY 2013; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX<sup>3</sup> or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

. Continuing, No adaptation or change in intervention

. Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Local logic model adapted from the State Nutrition Education and Obesity Prevention Program Three-Year Implementation Plan. Program performance will be measured against core programmatic goals: increase access and consumption of healthy foods; decrease consumption of less healthy foods and beverages and increase the consumption of water; increase physical activity opportunities throughout the day. Key measures of implementation: class attendance rates, surveys to measure gains in knowledge, changes in behavior, and intention to increase healthy foods and beverages (includes increase in water), decrease consumption of sweetened beverages and increase in physical activity; education attendance rates and evaluation; participation at community events; community based practice changes; organizational changes and reports and plans.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies; 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs; and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

**Supplement:** Santa Clara LHD plans to identify existing organization and environmental strategies in Santa Clara County related to access to healthy food and beverage and physical activity. Santa Clara LHD initial PSE strategies that align with the community needs are Rethink Your Drink and School Wellness. The core objectives will be met through the required nutrition education and obesity prevention activities and deliverables in the grant scope of work. For FFY 2014, Santa Clara will conduct nutrition education series classes, workshops, and participate in events promoting messages to address SNAP-Ed goals. Santa Clara will focus on two PSE strategies, Rethink Your Drink and School Wellness. The RYD interventions will focus on reducing the consumption and purchases of sugar-sweetened

12-10203

beverages and provide nutrition education to the SNAP Ed population so they have more information and knowledge to make healthy choices. Santa Clara plans to create and promote a healthy beverage standards in parks and recreational facilities, school vending machines, and other facilities in eligible settings serving low income populations. Santa Clara's school wellness policy will have the potential to promote and enhance healthy behavior for staff and students at eligible school sites. Santa Clara will develop partnerships that will allow for the development of updated school wellness policies and a stronger implementation of practices to promote healthier choices at school, before and after school. What will your measurable CNAP objectives be for FY-14? Santa Clara County LHD CNAP has/will incorporate objective that will address the measurable objectives from the California SNAP-Ed Plan. The proposed objectives include: Coordinate nutrition education and physical activity efforts to efficiently serve the target population, including harder to reach populations (SNAP Ed eligible populations that speak languages other than English and/or Spanish); Engage other stakeholders/organizations to support and promote access to and consumption of fresh fruit and vegetables, including the promotion of gardening and farmers' market; and Coordinate efforts to reduce the consumption and purchase of sugary sweetened beverages. We appreciate seeing the level of detail provided in the evaluation concept. Also, was disappointed to see that Alejandro is no longer on the staff. He was a great part of the team.

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measureable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10%, teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent systematic before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

X	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Mobilize community partnerships around healthy eating and active living.

X	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
X	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
X	Develop point-of-purchase marketing/signage at food retailers.
	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
X	Investigate environmental or cultural barriers to healthy eating and active living.
X	Provide training or technical assistance to health or community professionals.
	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
	Create work-site SNAP-Ed programs.
	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
	Cultivate community or school gardens.
	Promote access/appeal, or policy changes to support physical activity or exercise.
	Other, specify:
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

There are a total of 6-15 proposed subcontractors in Santa Clara County's FY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity levels among adults, teens, and children.

**Objectives 1-4:** 1-3 subcontractor(s) will provide support for neighborhood assessments, conduct a peer-to-peer nutrition and physical activity education program, and convene and coordinate a comprehensive community engagement and planning process to increase access to and consumption of healthy foods, including more fruits, vegetables, low/fat/nonfat milk and water, and to increase opportunities for physical activity among adults, teens and children.

Key activities include: assessment of the attitudes, knowledge, beliefs and skills related to nutrition education and the development of a plan of action specifically focused on increasing access to and consumption of healthy foods, physical activity opportunities and the needs of the target population; recruitment and training of peer educators from low-income neighborhoods to implement ongoing nutrition education workshops using established best practice USDA approved curriculum, including Rethink Your Drink curriculum; conducting community events promoting healthy foods and beverages and physical activity, including special promotional events such as Fruit & Veggie Fest, Latino Health Awareness Month and Rethink Your Drink events; development and implementation of environmental support strategies with local partners.

**Objectives 1-4:** 1 subcontractor will assume a lead role, working in conjunction with the Santa Clara County Public Health Department and CDPH, to develop and implement evaluation plans and strategies to evaluate key activities as relate to increased consumption of fruits, vegetables, low/fat/nonfat milk and water, and increased physical activity levels among adults, teens and children. Key evaluation activities include: evaluation of neighborhood assessments, community outreach and engagement, and planning processes, peer educator program activities, early childcare activities, school/afterschool activities, and social media/media campaigns and initiatives; evaluation of two targeted nutrition education and obesity prevention interventions that include environmental support, one focusing on reducing consumption of sugar sweetened beverages and the other focusing on increasing access and consumption of healthy foods through formative, process and outcome evaluations;

**Objectives 1-4:** 1-2 subcontractor/s will support school and afterschool programs to implement ongoing nutrition education, physical activity and social marketing strategies, activities, and events designed to increase access to and consumption of fruits and vegetables and water at schools and afterschool sites. This subcontractor will participate in all school/afterschool Rethink Your Drink Campaign activities and activities, including activities designed to create environmental and practice changes in the schools and after schools. Key activities include; facilitation of ongoing communication with and among County Office of Education, school district and after school administrators supporting healthy school/afterschool campaigns, nutrition education interventions, wellness policy expansion and staff development around these issues; recruitment and training of staff from each school site to assist in the scheduling and training of teachers and afterschool staff on *Network* nutrition education interventions, campaigns, and resources; providing participating schools and afterschool sites with posters, recipes, materials and supplies to conduct nutrition education and taste tasting demonstrations for students; supporting and attending special school and afterschool events such as Back-to-School nights, Open House, health fairs, and PTA meetings; providing technical support to classroom teachers, child nutrition personnel, and administrators on school wellness policy updates that support the nutrition education obesity prevention messages.

**Objectives 1-3:** 1-3 subcontractor/s will implement ongoing nutrition education strategies, activities and events aimed at increasing the consumption of fruits, vegetables, and low/fat/nonfat milk and water among children within early-childhood care and education sites and medical/dental providers/clinics. This subcontractor will participate in the Rethink Your Drink Campaign activities and other activities designed to create environmental and practice change in the early-childhood care and education sites and medical/dental providers/clinics. Key activities include: recruitment and engagement of agencies and organizations serving young children and their families including WIC, Child and Adult Care Food Program, Child Care Resource and Referral Agencies, First 5 County Commissions, County Offices of Education, County Offices of Social Services/Child Care Licensing, and medical/dental providers and clinics; provision of materials and training for early childhood care and education sites, including assessment tools and USDA approved nutrition education materials; engagement of decision makers to conduct a self-assessment with a *Network* provided tool, related to nutrition education and obesity prevention strategies and healthy site changes and to work with sites to create or update healthy site changes based on the assessments.

**Objectives 1-4:** 1-3 subcontractor/s will support youth serving agencies, community based organizations, park and recreation groups, middle/high schools and after schools to conduct youth engagement projects with SNAP-Ed eligible youth, ages 12-18. The youth engagement projects will engage SNAP-Ed-eligible youth in leadership, critical thinking, problem-solving, community-based research and address identified issues with consumption of and access to healthy foods and beverages and physical activity opportunities in their environment and identify solutions applying public health approaches. Key activities include: recruitment of Adult Allies at a youth serving agencies, CBOs, park and recreation departments or middle/high schools or afterschool qualifying site to work directly with youth teams to address key nutrition and/or physical activity related issues; providing orientations to members of the youth teams, including basic nutrition education information, importance of physical activity (through integration into comprehensive nutrition education lessons), taste testing, overview of youth-led participatory action research, and overview of youth development principles.

**Objectives 1-4:** 1-3 subcontractor/s will recruit and support predominately African American and/or Latino community churches to implement the Body & Soul program and culturally relevant nutrition education and physical activity promotion to influence organizational and systems changes in the faith-based community. Key activities include: engagement of church leadership, including pastor, pastor's spouse, cooking staff and other key members of the congregation to increase participation in the program; conducting walkability assessments and assessment of foods prepared, provided, and sold at church events applying *Network*-provided tools; inclusion of nutrition education and physical activity in children's programs, youth meetings, Sunday-School classes, Vacation Bible School, etc; facilitating an overarching healthy food and beverage policy for church celebrations and meetings to ensure healthy foods and beverages are provided and to limit choices high in fat, sugar, and sodium; helping to support a community garden at the church, on-going walking clubs for church members and helping to establish and pursue joint-use agreements with city-schools to create opportunities for increased community physical activity.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

As noted in section 4 above, aside from our one evaluation subcontractor we will look to engage more than one subcontractor to support our scope of work activities as relates to neighborhood assessments and peer-to-peer education program, school and afterschool activities, early childhood activities, youth engagement, and our faith-based work. All subcontractors will support one-another as well as the communities we serve as part of a comprehensive County Nutrition Action Plan and program aimed at empowering and supporting SNAP-Ed eligible community members to select and consume health foods and beverages and increase activity through nutrition and physical education, social marketing and environmental supports. All subcontractors will participate in and contribute to ongoing CNAP meetings and discussion as we as participate in scope of work focus area appropriate trainings and meetings, including but not limited to Rethink Your Drink, Body & Soul and other LHD and CDPH sponsored meetings and trainings. The key difference among these subcontractors is that they will be supporting different geographic locales (neighborhoods) within Santa Clara County. All subcontractors will be responsible for and held to the same performance measures, key deliverables, etc, as relates to their respective scope of work focus area (neighborhood assessment and peer-to-peer education, school and afterschool work, early childhood activities, youth engagement, and faith-based activities), including the collection of process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

**Instructions for Submitting Federal Fiscal Year (FFY) 2014 Budget Revisions for the United States Department of Agriculture (USDA), Supplemental Nutrition Assistance Program Education (SNAP-Ed), Nutrition Education and Obesity Prevention (NEOP) Grant Program**

Funding Source	2013-14 Funding Cycle	
	Begin Date	End Date
USDA / SNAP-Ed / NEOP	October 1, 2013	September 30, 2014

Please send your FFY 2014 Budget Revisions via e-mail to [NEOPBFiscalRequest@cdph.ca.gov](mailto:NEOPBFiscalRequest@cdph.ca.gov)  
 Please copy your NEOPB Project Officer and Contract Manager

**Budget Revisions must be submitted to NEOPB no later than 5 pm on July 31, 2014**

**BCS**

- Information on this tab will self-calculate by information that is entered into the Prime Staffing and Prime BJ tab.

**Prime Staffing, Prime BJ, Sub Staffing and Sub BJ**

Using your approved budget, please use the following guidelines for budget revisions.

- Action column (green)** - Please label the appropriate line items with one of the following:
  - ADD:** This is a new line item
  - DELETE:** This line item is being deleted
  - INCREASE/DECREASE/CHANGE:** This line item is being increased or decreased from the last approval. Please use **CHANGE** if original language stated "TBD".
  - If a line item has not been touched and is the same as last approved, please leave blank.
- Last Amount Approved column (blue)** - Please enter the amount that was approved in the last approved budget or approved budget revision.
  - If a **NEW** line item is being added, the amount in the Last Amount Approved column should be \$0
  - If a line item is being deleted, list the last amount that was approved for that line item.
  - If a line item is being Increased or Decreased, list the last amount that was approved for that line item.
- In the "Budget Revision Justification" column, please make sure that you clearly identify the change to the line item at the end of the justification.
  - "Reduced funds for this line item" – Include the reason for reducing the funds.
  - "New item" – Include the reason for new item. Also, include adequate justification and itemization for the line item.
  - If increasing funds to an existing line item, please make sure that you adjust the itemization to match the new total for this line item.
  - If deleting a line item, please add the following language at the end of the original justification: "Deleting this line item". Please leave the original text and zero out the dollar amount requested.
- Prime Staffing Tab - Personnel:** If you are modifying items in this category, please make sure that all applicable categories (% of SNAP-Ed time spent, FTE, total annual salary, benefit rate, etc) are updated to reflect the new information and/or amounts.
- Operating Expenses:** If you are modifying items in this category, please make sure that all applicable categories (budet item, description/justification, unit cost, quantity, FTE, etc) are updated to reflect the new information and/or amounts.
- Equipment Expenses:** If you are modifying items in this category, please make sure that all applicable categories ( budet item, description/justification, unit cost, quantity, months, etc) are updated to reflect the new information and/or amounts.
- Travel and Per Diem:** If you are modifying items in this category, please make sure that all applicable categories (travel/position title, location, trips, FTE, days, nights, per diem, miles, lodging, air, miles, reg. fee, other, etc) are updated to reflect the new information and/or amounts.
- Sub Grant(s):** If you are modifying items in this category, please make sure that all applicable categories are updated to reflect the new information and/or amounts.
- Other Costs:** If you are modifying items in this category, please make sure that all applicable categories (budet item, description/justification, unit cost, quantity, misc., etc) are updated to reflect the new information and/or amounts.
- Indirect Costs:** If you are modifying items in this category, please make sure that all applicable categories (calculation method, %, \$ amount of method, etc) are updated to reflect the new information and/or amounts.

**USDA  
POSITION DESCRIPTIONS**

<b>Position Number</b>	<b>USDA Position Title</b>	<b>LHD Position Title</b>	<b>Position Description</b>
1	Accountant/Finance Analyst		Serves as internal auditor and controller. Assists with processing purchase orders, invoices, preparation of vouchers for payment as related to the Network program, as well as monitoring the budgets.
2	Administrative Coordinator		Provides administrative and office support for the project staff and is responsible for the reporting requirements.
3	Administrator (e.g., Director of Programs)		Administer the nutrition education grant agreement and budget, supervising nutrition education staff, attend nutrition education and scope of work related meetings, program planning and participating in the Regional collaborative. Coordinate grant agreement reporting requirements.
4	After School Coordinator/Assistant		Plan and facilitate nutrition education activities for recreation programming, in after school setting for different age groups of children; seniors, teen; special populations, such as mothers with young children and families; nutrition education for special events and workshops. Prepare instructional plans for youth camps and field trips; and nutrition education for special events and workshops. Prepare instructional plans for nutrition activities, collect data related to nutrition education programming, prepare documentation for nutrition education grant agreement; and helps prepare interim and final progress report .
5	Chief Executive Officer		Provides overall guidance for the operations, personnel, and fiscal responsibilities required by the nutrition project.
6	Community Liaison		Conducts nutrition education, physical activity promotion interventions in the community setting. Works with Community Based Organizations to increase the reach of nutrition education interventions to Nutrition Education Obesity Program eligible.
7	Computer Specialist		The Computer Specialist will provide assistance with the nutrition database and tracking system.
8	Contract Manager		Manages the nutrition education grant agreement including budgets, invoices, local share documentation reports, time studies, fiscal reporting and adherence to funding requirements.
9	Coordinator of Other Program (e.g., Teen program, Healthy Start, etc.)		Supervises, coordinates, facilitates nutrition education activities, workshops, special events related to the recreation and community center planning and working together with other community center groups. Supervises staff implementing the nutrition education grant agreement, prepares invoices, prepares and collects documentation, prepares progress reports
10	Curriculum Specialist		Develops curriculum for nutrition education and physical activity interventions in a variety of different channels/venues.
11	Database Coordinator		Develops database used to track nutrition education, physical activity and food stamp promotion interventions in a variety of channels.
12	Dental/Medical Assistant		Conduct one-on-one nutrition education interventions prior to primary care visit.
13	Dietician		Oversees and supervises the nutrition education program including project administration, project coordination, the development of the nutrition education component and materials and other nutrition and physical activity promotion programs.
14	Family Advocate		Provides nutrition education to students and their families, and recruits NEOP eligible for group nutrition/cooking classes. Provides nutrition, physical activity and food stamp promotion resources to students and their parents.

**USDA  
POSITION DESCRIPTIONS**

15	<b>Food Service Worker (e.g., Director, Manager, Asst., Server, Cook)</b>		Assists with planning and preparing healthy food taste tests in the school setting in conjunction with classroom based nutrition education intervention. Works with teachers to increase student, teacher and parent knowledge of the importance of consuming more servings of fruits and vegetables and being active daily. Compiles documentation on taste testing activities and all reporting required for nutrition grants. In some cases, supervises staff that carry out activities.
16	<b>Graphic Illustrator</b>		Develop local promotional nutrition education materials such as community flyers/ newsletters and/or to develop local nutrition/physical activity promotional/educational materials under the direction of the nutrition staff.
17	<b>Health Educator (including Health Aide, Health Promotion Instructor, etc.)</b>		Develop materials and facilitate health education in both group and individual settings. Teaches general nutrition, the importance of fruits and vegetables, and health benefits of proper nutrition and physical activity.
18	<b>Legal Counsel</b>		Assist with development of policies, approval of grant agreements and Memorandums of Understanding and providing legal advice specifically related to the implementation of nutrition education and physical activity promotion
19	<b>Medical Assistant</b>		Demonstrates safe food handling and personal hygiene to prevent food borne illness, provide nutrition-related services to staff, parents, and students and promotes physical activity within the context of nutrition education. (This does not include any medical nutrition therapy).
20	<b>Nurse/Nurse Supervisor/Nurse Aide RN</b>		Provides nutrition and physical activity promotion to students enrolled in nutrition education programs and their families. Supports nutrition education goals through interventions; local, regional, and statewide collaboration and interventions. (This does not include any medical nutrition therapy).
21	<b>Nutritionist/Nutrition Educator/Nutrition Aide</b>		Provides nutrition education to the neop eligible population. Specific duties include: one-on-one general nutrition education, delivery of general nutrition education in a classroom or group setting, staffing health fairs and other community or promotional events where nutrition education messages are delivered, distribution of linguistically and culturally appropriate nutrition education materials, documentation of educational and other encounters, assisting with writing project reports and preparation of quarterly reports, maintaining program reporting and tracking systems.
22	<b>Office Manager/Secretary/Admin Assistant</b>		Provides general clerical support to the Program. Assists in development and maintenance of a data collection system with emphasis on fiscal information. Arranges meetings and trainings, orders supplies and materials, creates correspondence, photocopies, etc.
23	<b>Pharmacist</b>		Promotes nutrition education and physical activity to NEOP eligible population through displays, distributing literature, and supervising staff to update nutrition education bulletin board.
24	<b>Physician</b>		Supervises professional staff including Dietitians, Nurses and Nutrition/Project Coordinators that provide nutrition education and promotes physical activity to NEOP eligibles in a variety of channels. Provides direction on strategic planning of nutrition and physical activity programs to NEOP eligible clients. In some cases, provides nutrition education to NEOP eligibles. (This does not include any medical nutrition therapy).
25	<b>Professor</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for the NEOP eligible community, and students with their families. Supports nutrition education Program goals and local, regional, and statewide collaboration.

**USDA  
POSITION DESCRIPTIONS**

<b>26</b>	<b>Program Assistant</b>		Assists the Project Coordinator with nutrition education program planning and development. Under the direction of Project Coordinator, works directly with individuals and small groups providing curriculum-based, prevention-oriented general nutrition education and physical activity targeted to NEOP eligibles.
<b>27</b>	<b>Project Coordinator</b>		Coordinate program staff and nutrition education activities; plan and follow through on outreach and educational events at health fairs, schools, and other promotional activities; work with schools, churches, farm worker organizations, and community organizations in planning and promoting good health through dissemination of nutrition education materials; actively acquire and develop culturally and linguistically competent nutrition curriculum and educational materials; to promote existing and/or to develop new physical activity promotional components of nutrition education; and expand our existing community outreach program to encompass nutritional components to increase community awareness and knowledge of good nutrition and healthy active lifestyles.
<b>28</b>	<b>Promotora</b>		Works with the Project Coordinator in NEOP communities to conduct nutrition education interventions and participate in local events to promote health eating and physical activity for NEOP eligibles.
<b>29</b>	<b>Recreation Leader</b>		Mentors and trains staff on integration of physical activity into nutrition education interventions. Coordinates one-time physical activity demonstrations. Chooses nutrition and physical activity resources to distribute with nutrition education interventions.
<b>30</b>	<b>Research Specialist</b>		Evaluates nutrition education, and physical activity promotion interventions in a variety of community channels. Methods can include process and impact evaluations, pre and post tests, surveys, focus/discussion roundtables, photo documentaries, case studies, etc.
<b>31</b>	<b>School Administrator (e.g., Principal, Superintendent)</b>		Provides oversight and coordination of the nutrition education conducted in participating classrooms of all schools.
<b>32</b>	<b>Teacher/Student Aide/Assistant</b>		Assists the Nutritionists, Health Educators, and Project Coordinator with nutrition education activities and community events that promote healthy eating and physical activity for low-income families, the target population, Food Stamp recipients and other similar households. 100% direct delivery of educational services.
<b>33</b>	<b>Teacher (preK-12 Classroom, PE, Speech, etc.)</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for students and their families. Supports nutrition education program goals through promotion; local, regional, and statewide collaboration; and close coordination with the Registered Dietitian to train staff.
<b>34</b>	<b>Translator</b>		Translates approved curriculum and materials into Spanish or other languages. Reviews translation for cultural appropriateness. Interprets nutrition education interventions (one-on-one and group) in the community for dietitians, health educators and others .
<b>35</b>	<b>Tutor</b>		Assist teachers and/or students with nutrition education and physical activity promotion.
<b>36</b>	<b>Web Designer</b>		Develops and maintains website containing nutrition education resources, gardening and health related topics and issues.

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Santa Cruz County. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) conduct a Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) or other community assessment in up to 7 SNAP-Ed eligible low-income neighborhoods and share results with various local stakeholders, community members and community organizations; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**Summary of Research.**

*See Section A.*

**Modification of Project Methods/Strategies.**

- Continuing, No adaptation or change in intervention  
 Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Key performance measures will include the number of outreach and educational events and activities implemented and the number of participants served under applicable SOW objectives, increases in nutrition knowledge and/or consumption of fruits and vegetables, results of surveys and post-tests for nutrition classes, implantation of the CX3 action plan, and the establishment of new partnerships and the C-NAP group. Related documentation will include CX3 communication tools, sign-in sheets, meeting agendas, logs of dates and recipients of program materials, photos, a list of meetings, media clippings, and other relevant records.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

**Supplement:** The Santa Cruz County Health Department chose work with CX3 neighborhood vendors and restaurants to improve menu selections and marketing of healthier items, and work with 3 small grocery stores to increase the number of interior and exterior healthy promotions as their initial PSE priorities. The Santa Cruz county health department chose work with CX3 neighborhood vendors and restaurants to improve menu selections and marketing of healthier items, and work with 3 small grocery stores to increase the number of interior and exterior healthy promotions as their initial PSE priorities. The CNAP Plan has/will incorporate objectives that for their specific jurisdiction address the four State-level measurable objectives from the California SNAP-Ed Plan. Specific objectives for Santa Cruz County's CNAP are as follows: By September, 2014 the Santa Cruz County Nutrition Action Plan will: Identify stakeholders for collaboration and staff the County Nutrition Action Plan Committee, Identify consistent nutrition/physical activity messages for cross-

agency use including the following, U SDA Dietary Guidelines, Network for a Healthy California materials, Rethink Your Drink materials, Conduct at least two Spanish-language outreach events at Latino grocery stores (e.g., Mi Pueblo, La Princesa, Santa Fe, D'la Colmena) – coordinate with any existing outreach efforts by Champions for Change, Identify and map public transportation routes from at least one low-income housing complex and neighborhood to existing fitness and nutrition facilities / resources, and communicate these to residents and housing site managers, Reach out to private sector nutrition and physical activity / fitness businesses for partnerships and voucher programs (e.g., subsidized gym memberships), Participate in at least 3 Santa Cruz County Health Fairs promoting Rethink Your Drink and ten tips, Disseminate CNAP developed Resource Brochure which outlines all FNS programs in Santa Cruz County.

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measureable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10%, teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

x	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
x	Mobilize community partnerships around healthy eating and active living.

x	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
x	Develop healthy corner stores or food retail policies and organizational practices.
x	Develop nutrition standards at emergency food distribution sites.
	Develop point-of-purchase marketing/signage at food retailers.
	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
x	Investigate environmental or cultural barriers to healthy eating and active living.
x	Provide training or technical assistance to health or community professionals.
	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
	Create work-site SNAP-Ed programs.
	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
	Cultivate community or school gardens.
x	Promote access/appeal, or policy changes to support physical activity or exercise.
X	Other, specify: Provide restaurants in qualifying neighborhoods an award for providing healthful options.
X	Other, specify: Work with agencies and/or schools to install two hydration stations and two drinking fountains (funded through a CA4Health grant) to promote drinking water.

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

There are a total of six proposed subcontractors in Santa Cruz County's FY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity amongst adults, teens, and children.

**Objectives 1-4:** Specifically, four subcontractors will directly work and train youth and adults at local school district sites. These subcontractors will support the LHD to provide nutrition education activities to youth (teens and children) and adults (parents and teachers) at school

district affiliated venues such as classrooms, school sponsored events, early childhood education sites, before and after school programs, teacher in-service/trainings, and partnership activities with local parks and recreational programs. Subcontractors will train teachers on the use of taste testing or food demonstration curriculum, materials and student workbooks, such as Harvest of the Month; train parents at nutrition education classes taking place at before and after school programs; and conduct food demonstrations and taste testing activities at school-wide events targeting both youth and adults. Additional nutrition education on the importance of vegetable, fruit, low-fat/nonfat milk, and water consumption will be coordinated by the subcontractors through the distribution of newsletters and other education materials sent directly to parents of youth and teens of targeted sites.

One subcontractor will also serve as the coordinating body for working with retail stores to increase access to healthy foods. This will be done by educating the market owner on nutritional information, produce handling, display and pricing strategies, and create an appealing store environment, which can have a positive impact on the community.

Santa Cruz County LHD will specifically address Objective 3 by working on a policies, systems, and environmental change strategy to increase the number of water stations at school sites. Students will be educated on the importance of hydration before, during and after physical activity, trained in the different methods in which they can communicate the newly acquired knowledge to peers, parents, teachers, and administrators within their school district; and help collect formative evaluation data on the level of support for increasing water stations amongst peers, parents, and adults. In addition, restaurants in qualifying neighborhoods will receive an award for providing healthful options which includes fresh fruits and vegetables and a healthy children's menu.

All four objectives will be addressed by a subcontractor coordinating peer to peer education. Trained peer educators will lead nutrition classes and healthy recipe demonstrations at emergency food distribution locations on an on-going basis. Bilingual and bicultural peer educator trainers will both recruit and train new peer educators and provide on-going training and coaching to peer educators, to build their skills, confidence, and effectiveness.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

There will be four subcontractor(s) who will coordinate the school-based trainings of children, teens, and adults as it relates to taste testing and food demonstration activities, e.g. Harvest of the Month, cooking demos, etc. All four subcontractors will be conducting trainings at different geographic locations in the county servicing a mix of medium and large sized school districts comprised of a significant number of target youth (estimated >10K FRPM youth). All subcontractors will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted. Formative evaluation will also be conducted to ascertain any changes in fruit and vegetable consumption and beverage intake. Subcontractors will also attend quarterly County Nutrition Action Plan meetings to report on activities and coordinate efforts to eliminate

duplication of services.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

Santa Cruz County LHD is subcontracting with a registered dietician to work with agency subcontractors on nutrition content, network approved materials and presentation evaluation.

## Budget Coversheet

Prime Grantee Name: Santa Cruz County Health Services Agency

Grant Number: 13-20510

Budget Categories	FFY 13 Total	FFY 14 Total	Difference	% Difference

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Shasta County. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) conduct a Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) or other community assessment in up to 7 SNAP-Ed eligible low-income neighborhoods and share results with various local stakeholders, community members and community organizations; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

. Continuing, No adaptation or change in intervention

. Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Impact evaluations will measure change in consumption of fruits and vegetables and increased physical activity in the target population. Process evaluation will measure participation levels in all nutrition education and physical activity promotions as well as recorded on the Activity Tracking Sheet.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through the County Nutrition Action Plan group that meets four times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population. The LHD will continue with its CX3 project communities by engaging a minimum of 15 community members to identify food and beverage strategies in 3 qualifying communities to increase access and consumption of health foods and beverages. Community Forums will be held to prioritize the identified problems found by the public in the CX3 results

Projected Unduplicate Number of Contacts: 2,000

Narrative

The local health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Siskiyou County. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) conduct a community assessment in SNAP-Ed eligible populations within the community and report findings and develop a strategic plan for achieving identified changes; 4) conduct community events reaching SNAP-Ed eligible individuals or groups; 5) conduct training(s) of service providers which could include representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 6) continue CNAP group and enhance partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population; and 7) coordinate local media activities to highlight nutrition and physical activity events.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

- Continuing, No adaptation or change in intervention  
 Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (MAX. 100 WORDS)**

Process methods, including attendance, amount of time of the nutrition education, and the specific activities performed will be collected for all nutrition education activities. Nutrition education surveys will be used to measure general nutrition knowledge and behavior change for both adults and children.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

SISKIYOU COUNTY will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population. Siskiyou County plans to coordinate Snap-Ed service delivery with their DSS office as well as any other non-profit group which might be present in the county so that duplication of sites will be avoided. Siskiyou County plans to develop and/or enhance partnerships with their Community Services Council and Siskiyou First Five organizations which oversee the Family Resource Centers, as well as qualifying schools offering after-school programs and state preschools, head start programs, PSA2 Area Agency on Aging and at least one retail business. Siskiyou County plans to contract for Registered Dietician services to offer a high level of expertise in their SNAP-Ed program. MOUs and/or contracts will be developed as needed.

**d. Project Description.**

Key Methods:

- Advisory Council/Task Force (specify): Food and Nutrition Network of Solano County and Napa County Nutrition Action Plan
- Internet/Web Sites-website address: www.solanocounty.com
- Print Media
- Radio:
- TV:
- Multi-level approaches that include environmental supports
- Nutrition Education Classes: (218 occurrences at 1/2 hour(s) each)
- Community Education Events: (10 occurrences at 2 hour(s) each)
- Training/Workshop/Conference: (10 occurrences at 1 hour(s) each)
- Point of Purchase: (        occurrences at        hour(s) each)
- Other (specify): (        occurrences at        hour(s) each)

Key Educational Messages: *All messages will align with the Dietary Guidelines for Americans 2010 and MyPlate. Messages will promote Enjoy your food, but eat less; Avoid oversized portions; Make half your plate fruit and vegetables; Switch to fat-free or low-fat (1%) milk; Compare sodium in foods and Drink water instead of sugary drinks.*

Delivery Sites by Type of Setting

Adult Education & Job Training Sites  
Adult Rehabilitation Center  
5 CalFresh Offices  
Churches  
Community Centers  
Elderly Service Centers  
15 Emergency Food Assistance Sites  
(includes Food Banks, Food Pantries, and Soup Kitchens)  
Extension Offices  
Farmers Markets  
2 Food Stores  
18 Head Start Programs  
Individual Homes  
1 Libraries

Other Youth Education Sites (includes  
Parks and Recreation)

5 Public/Community Health Centers (includes  
Public Health Departments)  
7 Public Housing  
6 Schools – students (Preschool)  
34 Schools – students (K-12)  
28 Schools – students (Afterschool Program)  
31 Schools - Parents

2 TANF Job Readiness Program  
7 WIC Programs  
Worksites

Other:

6 Family Resource Centers  
3 Comprehensive Perinatal Services Program

---

Projected Unduplicate Number of Contacts: 8,000

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Solano and Napa County. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) Implement *Network* allowable nutrition education interventions and obesity prevention strategies in at least 50% of CX3 assessed neighborhoods. 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

- . Continuing, No adaptation or change in intervention  
. Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. KEY PERFORMANCE MEASURES/INDICATORS. (MAX. 100 WORDS)**

Key performance measures for process evaluation include: collecting and tracking materials used (agendas, flyers, education materials, surveys), checking progress of interventions (observations/feedback, evaluation surveys, pre and post tests, implementation plans, attendance sheets, data sheets); tracking expenditures and tracking reach with participant data forms, sign-in sheets and the Activity Tracking form excel spreadsheet. Key performance measures for outcome evaluation include assessment of the status of intervention effort for a baseline, develop plan and evaluate intervention.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

Narrative

The Sonoma County Health Department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Sonoma County. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) implement *Network* nutrition education interventions and obesity prevention strategies in at least 50% of CX<sup>3</sup> assessed neighborhoods; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX<sup>3</sup> or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change

Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

. Continuing, No adaptation or change in intervention

. Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**I. KEY PERFORMANCE MEASURES/INDICATORS. (MAX. 100 WORDS)**

DHS plans to conduct the following types of evaluation: formative (e.g. quality control measures for nutrition education sessions, measuring whether educators discussed key points), summative (e.g., measuring ease of implementation and likelihood of sustainability of school, after school and early care program components), process (e.g. tracking the number of people receiving nutrition education, POP materials distributed, number of new partnerships, etc.), and outcome (e.g., changes in knowledge and behaviors of SNAP-Ed eligible residents that attended education sessions, changes resulting from food environment community projects, changes in the retail food environment and customer buying patterns, and institutional systems and policy change).

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

**Supplement:** Sonoma County is subcontracting with community partners to complete all SNAP-Ed direct service work, as many have subject matter expertise, relationships with vital partners, and experience engaging low-income populations, including Latinos. County staff will provide oversight of all subgrantee contracts, providing trainings, technical assistance, and resources necessary for subgrantees to implement objectives successfully.

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measurable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10%, teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent systematic before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Mobilize community partnerships around healthy eating and active living.

X	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
X	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
X	Develop point-of-purchase marketing/signage at food retailers.
	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
	Investigate environmental or cultural barriers to healthy eating and active living.
X	Provide training or technical assistance to health or community professionals.
X	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
	Create work-site SNAP-Ed programs.
	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
X	Cultivate community or school gardens.
	Promote access/appeal, or policy changes to support physical activity or exercise.
X	Other, specify: Develop community farmer's markets
X	Other, specify: Support local food system through Harvest of the Month program
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

**BACKGROUND**

Sonoma County seeks to prioritize SNAP-Ed efforts based on a neighborhood "sphere of influence" concept, which promotes and supports healthy eating and physical activity through behavioral, environmental and policy change. SNAP-Ed strategies will be prioritized using the following targeting guidelines:

1. Children ages 2-11 at SNAP-Ed qualifying schools, after school and early-childhood care programs;
2. SNAP-Ed eligible parents at early-childhood care sites and at qualifying schools whose catchments fall within SNAP-Ed-qualifying census tracts/block groups where food access improvement effort are taking place;
3. SNAP-Ed eligible adults at means-tested sites located in school catchments and/or SNAP-Ed-qualifying census tracts/block groups where food access improvement effort are taking place; and
4. SNAP-Ed eligible adults at non-means tested sites located in SNAP-Ed-qualifying census tracts/block groups where food access improvement effort are taking place.

**SUBCONTRACTORS**

There are a total of 10 proposed subcontractors in Sonoma County's FFY14 SNAP-Ed Program project. All subcontractors will support strategies to create "spheres of influence" throughout the County in an

effort to achieve the four above identified objectives.

**Youth & Parents Nutrition Education:** Five subcontractors will focus efforts on engaging children (ages 2-11) at SNAP-Ed qualifying schools, after school and early-childhood care programs and their parents.

- An Early Childhood Subcontractor will support SNAP-Ed-qualifying early-childhood care and education sites to adopt or strengthen nutrition and physical activity site policies, nutrition and physical activity education for young children (ages 2-5), nutrition and physical activity education for parents, and/or increase parent involvement in healthy eating and activity living decision-making.
- Two School Subcontractors, representing four SNAP-Ed-qualifying elementary schools, will implement strategies aimed at increasing nutrition education and physical activity opportunities for children (ages 6-11) and improve access and consumption of healthy food and beverages on school campuses. This will be accomplished through a variety of activities, including adoption or strengthening of school wellness policies, implementation of strategies to increase access and consumption of healthy foods and beverages, improved communication of wellness policies to school staff and parents, implementation of a sustainable farm-to-school Harvest of the Month in-class education program for grades K-6, implementation of a sustainable in-class nutrition and physical activity education program for grades 2-5, and institutionalization of parent education program via parent involvement in wellness committee and parent education classes. The Subcontractors will also assist the LHD in administering pre/post outcome tools to 3<sup>rd</sup>-5<sup>th</sup> grade students.
- The After School Subcontractor will provide technical assistance, resources and trainings to after school programs at SNAP-Ed-qualifying schools to increase healthy food and beverage access and availability, nutrition education, and opportunities for physical activity. This will be accomplished through the adoption or strengthening of nutrition education and/or physical activity interventions for children (ages 6-11), wellness policies, and after school program staff development.

**Adult Nutrition Education:** One Subcontractor will focus efforts on providing nutrition education to SNAP-Ed eligible adults. The Nutrition Education Subcontractor will focus nutrition education effort primarily on Latino parents with children (ages 2-11). The secondary populations include SNAP-Ed eligible seniors, homeless, adolescents, parents of adolescents, and other adults within the target communities. The Subcontractor will provide nutrition education lessons, host nutrition education community event booths/tables, conduct grocery retailer nutrition education events, and 5-session nutrition education series at means-tested and non-means tested sites throughout Sonoma County. Nutrition education emphasis will be placed on MyPlate, Harvest of the Month and Rethink Your Drink and selected topic areas will be based on a targeted nutrition education needs assessment conducted at the beginning of the year. The Subcontractor will also recruit and train peer educators (Promotoras) to conduct nutrition education efforts, implement evaluation efforts to ensure lessons and provide ongoing mentoring to peer educators. They will conduct provider trainings aimed at advancing nutrition education messages and obesity prevention strategies in medical, dental, and and/or clinical settings serving SNAP-Ed qualifying children (ages birth to 5).

**Food Access:** Four subcontractors will focus efforts on improving access to healthier food in SNAP-Ed-qualifying census tracts/block groups.

- The CX3 Community Engagement Subcontractor will continue to mentor SNAP-Ed-eligible residents (CX3 Community Liaisons) from six SNAP-Ed-eligible census tracts/block groups to implement resident-devised and driven plans developed in FFY 2013 to improve access to healthier food in their respective neighborhoods. The Subcontractor will also recruit additional residents from these neighborhoods to participate in a CX3 Community Liaison Leadership Training, which will focus on leadership development, community driven leadership and policy change, media spokesperson training, and community action plan development. CX3 Community Liaisons will then identify neighborhood-based policy, environmental and systems strategies on which they will work through FFY 2015. The Subcontractor will assist in the development and update of the *CX<sup>3</sup> Implementation Strategy* plan.
- The CX3 Assessment and Program Subcontractor will assist CX3 Community Engagement Contractor and CX3 Community Liaisons with the identification of 1) policy, environmental or systems strategies aimed at improving access to healthier food and 2) an environmental support strategy aimed at increasing access to healthy beverage options. The Subcontractor also will assist in the development and update of the *CX<sup>3</sup> Implementation Strategy* plan as well as provide technical assistance and training to the CX3 Community Engagement Subcontractor and CX3 Community Liaisons related to the implementation and evaluation of the selected strategies.
- The Retail Specialist Subcontractor will assist the LHD's Food Access Coordinator to develop, implement and evaluate the following programs aimed at SNAP-Ed-eligible grocery retailers: 1) train-the-trainer program aimed at training CX3 Community Liaisons and business liaisons to train retailers in sustainable in-store practices, such as merchandising and produce storage; 2) sustainable marketing-by-mail program aimed at distributing nutrition-education/point-of-purchase materials to qualifying retailers; 3) development, implementation and evaluation of a healthier checkout pilot project; and 4) strengthening relationships between producers and distributors of local produce and retailers.
- The Youth Engagement Subcontractor will recruit youth (ages 12-18) from SNAP-Ed-qualifying schools or census tracts groups, guiding them through the process of conducting youth-led projects aimed at addressing issues in their environment related to consumption or access to healthy foods and beverages and physical activity opportunities.

**Evaluation:** All of the above subcontractors will participate in local, regional and state evaluation and reporting activities for the objectives, focusing primarily on data collection and providing input into the development of evaluation plans and reports. In addition, the tenth subcontractor, the Evaluation Consultant, will assist LHD staff in the development and implementation a 3-year SNAP-Ed evaluation plan and compile evaluation reports. The plan will include formative, summative, process, and outcome evaluation approaches and include evaluation activities related to Rethink Your Drink, policy, systems and environmental change efforts related to food access, measuring the impact/outcome of nutrition education efforts for youth, and school, after school, and early-childcare policy and program implementation. The Consultant will also provide guidance on the development of the County Nutrition Action Plan's outcomes and assist with the development of reporting and analysis protocols.

All 10 Subcontractors will be responsible for attending local, regional and/or state SNAP-Ed meetings, conferences, trainings, and workshops to aid in implementation and evaluation of nutrition education

and obesity prevention strategies for low-income households. This includes assisting with the development and implementation of a County Nutrition Action Plan , which seeks to streamline nutrition messaging and food access efforts through collaborative efforts with Food and Nutrition Service-funded and non-funded programs.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

Two subcontracts, representing four elementary schools, have been awarded to implement school-based work:

- Roseland School District is located in Santa Rosa. There are 1,651 students (91.5% Latino; 89% eligible for FRMP) attending the three SNAP-Ed eligible schools. Roseland School District is also located near an urban/suburban center and multiple SNAP-Ed eligible census tracts where SNAP-Ed-funded food access efforts are taking place. Two of the schools have received funding through a Kaiser Permanente’s HEAL Program to implement healthy eating and active living changes. SNAP-Ed funds are being used to build on HEAL work and implement and test sustainable policies and practices.
- Guerneville School District is located in rural, unincorporated Sonoma County and is a one-school district. The school has 385 students (24% Latino; 59% eligible for FRMP). Guerneville has the highest rate of unemployment in the county, compared to other Sonoma County cities and Census Designated Places. Guerneville has received technical assistance and in-class education support from SNAP-Ed and St. Joseph’s Healthy for Life program for the past five years to implement healthy eating and active living changes. SNAP-Ed funds are being used to build on this work and implement and test sustainable policies and practices.

While performance measure will be the same for each school, plans are being discussed to 1) measure the cost of implementation, ease of implementation, sustainability over time, and effectiveness (i.e., reach of activity and likelihood of behavior change) of school wellness strategies to determine which have the best outcomes and are easiest to implement among competing school priorities and 2) compare nutrition education outcome data and food environment data from around schools to determine potential relationships between the two.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

The LHD has identified 4 of the 10 subcontractors. Three contracts have been executed. One contract is going before their Board of Supervisors (Board) on 12/3/13. Five contracts are going before their Board of Supervisors on 2/5/14. The final contract is going before their Board on 2/12/14.

1. Nutrition Education Subcontractor – Northern California Center for Well-Being (Start Date: 12/3/13)
2. CX3 Assessment and Program Subcontractor – TBD (Expected Start Date: 2/5/14)

3. CX3 Community Engagement Contractor – Santa Rosa Memorial Hospital
4. Evaluation Consultant – TBD (Expected Start Date: 2/12/14)
5. School Subcontractor - Guerneville School District
6. School Subcontractor – Roseland School District
7. Afterschool Subcontractor – TBD (Expected Start Date: 2/5/14)
8. Youth Engagement Subcontractor – TBD (Expected Start Date: 2/5/14)
9. Early Childhood Subcontractor – TBD (Expected Start Date: 2/5/14)
10. Retail Specialist – TBD (Expected Start Date: 2/5/14)

Delays in securing contracts stem from significant staffing issues in FFY 2013. The LHD Program Manager and staff feel the delay will not impede on completing deliverables.

Budget Revision		Sub Grant(s)			
Action	Last Amt Approved	Name	Description/Justification	Total	Budget Revision Justification

**Prime Budget Justification**

		<p>Nutrition Education Subgrantee (TBD)</p>	<p>Subgrantee will devote the majority of activities to delivering single and multi-session (3-5) nutrition education sessions to reach SNAP-Ed eligible individuals from English and Spanish speaking communities. Activities include: participating in Network sponsored webinars, trainings, teleconferences, conference and monthly CNAP Workgroup and SNAP-Ed Team Meetings; engaging community partners to secure session locations; recruiting participants; assessment of attitudes, knowledge, beliefs and skills related to nutrition education nutrition needs of target population; meeting preparation; delivery of general nutrition education, including Rethink Your Drink; distribution of linguistically and culturally appropriate nutrition education materials; and participation in Network evaluation efforts for the project and assist with quality assurance and oversight efforts. Subgrantee will conduct nutrition education and physical activity promotion events, including a Rethink Your Drink kick-off or public event, that are either held within the target communities or will be attended by members of the eligible population. Additionally, the Subgrantee will engage and train SNAP-Ed eligible community members (i.e., community workers) to conduct NEOP classes, retail promotional events, assist in developing environmental support strategies to increase and promote access to healthy beverages, provide support for on Network media-related effort, and assist with evaluation.</p>	<p>\$230,000.00</p>	
		<p>CX3 Assessment and Program Subgrantee (TBD)</p>	<p>Subgrantee will be responsible for assessment, technical assistance and trainings related to CX3 food environment objectives. Activities include: conduct trainings of surveyors, overseeing Tier 2 field work utilizing all appropriate CX3 surveys and tools, and organizing all data for Network analysis; work with Food Access &amp; Youth Engagement Coordinator and CX3 Community Engagement Contractor to organize and facilitate community forums/town halls in order to prioritize identified problem areas with stakeholders, community groups and organizations; engage potential neighborhood Champions; provide CX3 findings to city/county officials; assist with the development of a CX3 strategic community-focused action plan; lead efforts to implement and market nutrition and obesity prevention strategies using public health approaches and Network allowable interventions implemented in three eligible neighborhoods; assist in the implementation of at least one county health forum; provide technical assistance and training to CX3 Community Liaisons on public health and evaluation strategies related to increasing access and consumption of healthy foods and beverages and physical activity opportunities; and assist with evaluation, as needed. Subgrantee will also participate in Network CX3 conference calls, SNAP-Ed Team Meetings, CX3 Workgroup meetings, and Network-sponsored webinars, conference and trainings specific to CX3 work.</p>	<p>\$15,000.00</p>	

**Prime Budget Justification**

		C	<p>Santa Rosa Memorial Hospital (CX3 Community Engagement Subgrantee)</p>	<p>Subgrantee will be responsible for recruiting community leaders and community liaisons (residents) from identified CX3 neighborhoods to participate in CX3 Assessment Training and/or the Leadership Training Program to assist with food environment assessments in three (in FFY 2012) and five (in FFY 2016) qualifying CX3 neighborhoods, work on projects to improve the food environment, and provide nutrition education in retail setting in CX3 neighborhoods. Subgrantee will also assist Food Access &amp; Youth Engagement Coordinator to organize and facilitate county health forums and community forums/town halls, provide CX3 findings to city/county officials, and develop and implement a CX3 strategic community-focused action plan, and assist with evaluation, as needed. Additionally, subgrantee will provide leadership training, support, and mentoring to at least five community liaisons (residents) to engage City/County officials and stakeholders, assist in the development and implementation of a food access strategic community-focused action plan, and assist in the the implementation of at least one county health forum. Subgrantee will also participate in Network CX3 conference calls, SNAP-Ed Team Meetings, CX3 Workgroup meetings, and Network-sponsored webinars, trainings, and conferences specific to CX3 community engagement activities.</p>		\$36,378.00
		D	<p>Evaluation Consultant Subgrantee (TBD)</p>	<p>Evaluates nutrition education and physical activity interventions in a variety of community channels. Methods can include process and impact evaluations, pre and post tests, surveys, focus/discussion roundtables, photo documentaries, case studeis. etc.</p>		\$90,000.00
		E	<p>Guerneville School District (Schools Subgrantee)</p>	<p>Subgrantee will coordinate school wellness activities. Activities include: schedule and train teachers on nutrition education interventions, campaigns and resources, distribution of nutrition education materials, inform and engage parents, development and/or update of school or district wellness policy, promote implementation of strategies to increase access and consumption of healthy foods, and assist with evaluation and assessment efforts. Subgrantee will also attend CNAP Workgroup meetings, SNAP-Ed Team Meetings, Healthy Students Subcommittee meetings, District Wellness Committe meetings, and required Network-sponsored webinars, conference, and trainings specific to youth engagement work.</p>		\$28,146.00
		F	<p>Afterschool Subgrantee (TBD)</p>	<p>Subgrantee will coordinate school wellness activities. Activities include: schedule and train teachers on nutrition education interventions, campaigns and resources, distribution of nutrition education materials, inform and engage parents, development and/or update of school or district wellness policy, promote implementation of strategies to increase access and consumption of healthy foods, and assist with evaluation and assessment efforts. Subgrantee will also attend CNAP Workgroup meetings, SNAP-Ed Team Meetings, Healthy Students Subcommittee meetings, District Wellness Committe meetings, and required Network-sponsored webinars, conference, and trainings specific to youth engagement work.</p>		\$34,000.00

**Prime Budget Justification**

		G	Youth Engagement Subgrantee (TBD)	Subgrantee will engage SNAP-Ed-eligible youth team to conduct a youth engagement project aimed at leadership development, critical thinking, problem-solving, community-based research. Activities include: recruiting youth, orienting members of the youth team, guiding team through process of conducting youth-led projects, and participate in annual statewide or regional youth forum/meetings. Subgrantee will also attend CNAP Workgroup meetings, SNAP-Ed Team Meetings, Healthy Students Subcommittee meetings, and required Network-sponsored webinars, conference, and trainings specific to youth engagement work.	\$15,000.00	
		H	Early Childhood Subgrantee (TBD)	Subgrantee will engage qualifying early-childhood care and education sites and in order to implement Early Childhood activities. Activities include: engaging site decision makers to conduct a self-assessment, compile materials and provide training for sites, working with trained sites to create and update healthy site changes, tracking and collecting information on healthy site changes, and providing on-going TA and tracking support. Subgrantee will also attend CNAP Workgroup meetings, SNAP-Ed Team Meetings, Healthy Students Subcommittee meetings, and required Network-sponsored webinars, conference, and trainings specific to early-childhood settings.	\$20,000.00	
		I	Retail Specialist (TBD)	Subgrantee will be responsible for engaging a minimum of 10 qualifying retail grocery retailers in the county to implement the Healthy Food Outlet Project. Activities include: developing partnerships with retailers, coordinating with Nutrition Education subgrantee to conduct promotional events, distributing Network point-of-purchase materials, and provide TA to retailers on approaches to increase availability and promotion of healthy food and beverage purchases. Subgrantee will also attend CNAP Workgroup meetings, CX3 Workgroup meetings, and Network-sponsored webinars, conference and trainings specific to retail work.	\$15,000.00	
		J	Roseland School District (Schools Subgrantee)	Subgrantee will coordinate school wellness activities. Activities include: schedule and train teachers on nutrition education interventions, campaigns and resources, distribution of nutrition education materials, inform and engage parents, development and/or update of school or district wellness policy, promote implementation of strategies to increase access and consumption of healthy foods, and assist with evaluation and assessment efforts. Subgrantee will also attend CNAP Workgroup meetings, SNAP-Ed Team Meetings, Healthy Students Subcommittee meetings, District Wellness Committee meetings, and required Network-sponsored webinars, conference, and trainings specific to youth engagement work.	\$86,601.00	
		K

The average fringe benefits estimate is 29.5% of salaries, of which 20% is included in the budget. The remainder of fringe benefits expenses will be provided in-kind. Fringe benefits expenses include statutory benefits (i.e., medicare, social security, workers comp, CA disability insurance) and discretionary benefits (i.e., Medical/Dental/Vision, life insurance, retirement benefits, and long-term disability)

Definition and basis for calculations of benefit rate(s):

Definition and basis for calculations of benefit rate(s):

The average fringe benefit percentage used for calculating the fringe benefit line is 18% of salaries. Fringe Benefits include statutory benefits (i.e., Medicare, Social Security, Federal Unemployment Tax and Workers Compensation) and voluntary benefits (i.e., Employee Medical and Dental Insurance, Dependent Medical and Dental Insurance, and Disability Insurance)

Narrative

Stanislaus County Health Services Agency (SCHSA) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents Stanislaus County. SCHSA will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population. SCHSA will be responsible to: 1) Conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) Implement *Network* allowable nutrition education interventions and obesity prevention strategies in at least 50% of CX<sup>3</sup> assessed neighborhoods. 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX<sup>3</sup> or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

- Continuing, No adaptation or change in intervention
- Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Nutrition education class series will be evaluated by pre and post-test surveys to determine change in knowledge, attitudes, and behavior. The number and magnitude of CX<sup>3</sup> interventions will be documented for analysis and outcome evaluation. The effectiveness of the afterschool program will be evaluated via surveys of program staff. Satisfaction surveys for child care providers will also be provided. A case study will be conducted to document efforts to develop environmental strategies to increase access of healthy beverages.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

Stanislaus County Health Services Agency will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

**Supplement:** Stanislaus County Health Services Agency has chosen 2 PSE strategies. The first will allow them to work with early childcare providers to create a healthier environment for pre-schools/Headstart sites in Oakdale and Riverbank neighborhoods. The other strategy will involve working with the Ceres Unified School District Superintendent, School Board, Stanislaus County's Community Transformation Grant school Wellness Policy Ad Hoc Group, and parents to improve school wellness policies and reinforce stronger implementation of healthy nutrition and physical activity policies in school and after school programs. Health Department staff's primary role will be to provide technical assistance and to maintain constant communication regarding any changes that may be occurring to the local school wellness policy. Stanislaus County Health Services collaborates with several other prevention efforts to implement interventions throughout the County. Both CTG and Network SNAP-Ed grants are administered and integrated through the Stanislaus County Health Services Agency (HSA). SNAP-Ed is currently partnering with CTG on improving school wellness policies in Communities for Excellence (CX3) neighborhoods. SNAP-Ed will serve as a resource to enhance school district wellness policies. SNAP-Ed is an important community partner in the Modesto HEAL Zone network. On April 17th, SNAP-Ed closely worked with the West Modesto King Kennedy Collaborative HEAL zone to host a very successful Fruit and Veggie Fest in a qualifying census tract in Modesto. The event drew several hundred people from the West Modesto neighborhood, a community where 60% of adults and 33% of children are overweight or obese. In addition, the Collaborative is also a leading partner in our CNAP group. SNAP-Ed also provides nutrition education resources for the Heal Zone.

\*After each school name indicate all that apply with the following abbreviations: K-12 School (S), Preschool (PS), After School (A) & Parents (P)

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measureable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10%, teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

x	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
x	Mobilize community partnerships around healthy eating and active living.

x	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
	Develop point-of-purchase marketing/signage at food retailers.
	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
	Investigate environmental or cultural barriers to healthy eating and active living.
x	Provide training or technical assistance to health or community professionals.
	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
	Create work-site SNAP-Ed programs.
x	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
x	Cultivate community or school gardens.
x	Promote access/appeal, or policy changes to support physical activity or exercise.
x	Other, specify: PSE interventions determined by youth participating in youth engagement projects at afterschool programs to improve access to healthy foods and beverages and physical activity opportunities.
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

There are a total of six proposed subcontractors in Stanislaus County's FY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity amongst adults, teens, and children.

**Objectives 1-3:** Two subcontractors will support the LHD to provide nutrition education activities to youth (teens and children) and adults (parents and teachers) at school district affiliated venues such as classrooms, cafeterias, school sponsored events, after school programs, and teacher in-service/trainings. Subcontractors will train teachers on the use of taste testing or food demonstration curriculum, materials and student workbooks, such as Harvest of the Month; train parents and students at nutrition education classes taking place at after school programs; and conduct food demonstrations and taste testing activities at school-wide events targeting youth.

Additionally, two subcontractors will provide direct nutrition education through a peer education

model to ensure culturally and linguistically appropriate information is provided. The peer educators will be trained to teach a series of nutrition education classes to promote healthy eating and food security via menu planning and budgeting.

**Objectives 1-4:** One subcontractor will also serve as the coordinating body for youth engagement activities at afterschool and community sites. They will provide training and oversight to the adult leads and youth participants. The purpose of the youth engagement related activities will be to increase awareness for policies, systems, and environmental change approaches to improving access and consumption of healthy foods and beverages and increasing opportunities for physical activity at their respective school and community sites.

To assist in process and outcome evaluation reaching all of the objectives listed above (1-4), the LHD will also subcontract with a research/evaluation specialist. This subcontractor will assure the project is being implemented as planned, identify opportunities for improvement, and develop and implement an outcome evaluation plan.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

There will be two subcontractors who will conduct nutrition education programs at school-based sites to children, teens, and adults as it relates to taste testing and food demonstration activities, e.g. Harvest of the Month, cooking demos, etc. The two subcontractors will be implementing the programs at two different school districts in the county. All subcontractors will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted. Formative evaluation will also be conducted to ascertain any changes in fruit and vegetable consumption and beverage intake.

A similar model of coordination and implementation will also take place amongst the two subcontractors for the peer education activities as they target two different subpopulations – seniors and predominately Hispanic/Latino adults at faith based sites. Additionally, they are working in different geographic locations.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

Projected Unduplicate Number of Contacts: **2,400 (direct and indirect)**

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Sutter County. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) share Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) assessment results with various local stakeholders, community members, and community organizations. Implement Network allowable nutrition education interventions and obesity prevention strategies in at least 50% of CX3 assessed neighborhoods; 4) coordinate local media activity to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) for service providers of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

Continuing, No adaptation or change in intervention

Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Process evaluation measures will indicate the participation levels in all activities performed, as recorded in sign-in sheets and on the Activity Tracking Form. Improved knowledge of healthy eating practices and the role of physical activity in preventing chronic disease will be measured using "Eating Healthy, Be Active" approved lesson plan evaluations. We will collect data on numbers of people reached and assess self-reported behavior change as a result of information received. We will work with the Research and Evaluation Unit to develop an Outcome Evaluation Process, as well as evaluate our Rethink Your Drink activities.

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

Narrative

Tehama County Health Services Agency (TCHSA) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Tehama County. TCHSA will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population. TCHSA will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) Share Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX<sup>3</sup>) assessment results with various local stakeholders, community members, and community organizations. Implement *Network* allowable nutrition education interventions and obesity prevention strategies in at least 50% of assessed neighborhoods. 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX<sup>3</sup> or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

- . Continuing, No adaptation or change in intervention  
. Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Tehama County's project will measure knowledge acquired about diet and physical activity by use of pre and post-tests for classes and technical assistance. Changes in behavior will be measured by aggregate surveys and statistics such as WIC Farmers' Market check redemption rates. Increased collaboration will be measured by formation of new partnerships. Tehama County will utilize a sub-grantee for the evaluation component. The sub-grantee will assist in the intervention development stage of the grant process to ensure the collection of proper data. The evaluator will process raw data and assist grant staff in evaluating progress and modifying interventions if needed.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

Tehama County Health Services Agency will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

**d. Project Description**

Key Methods:

- Advisory Council/Task Force (specify): 4
- Internet/Web Sites-website address: www.tularehhsa.org
- Print Media
- Radio
- TV
- Multi-level approaches that include environmental supports
- Nutrition Education Classes: (200 occurrences a min. of 30 minutes each)
- Community Education Events: (5 occurrences at 3 hour(s) each)
- Training/Workshop/Conference: (4 occurrences at 1.5 hour(s) each)
- Point of Purchase: (0 occurrences at 0 hour(s) each)
- Other (specify): (0 occurrences at 0 hour(s) each)

Key Educational Messages: *All messages will align with the Dietary Guidelines for Americans 2010 and MyPlate. Messages will promote Enjoy your food, but eat less; Avoid oversized portions; Make half your plate fruit and vegetables; Switch to fat-free or low-fat (1%) milk; Compare sodium in foods and Drink water instead of sugary drinks.*

Projected Unduplicate Number of Contacts: 13,256

#### Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Tulare County. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 4) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 5) conduct community events reaching SNAP-Ed eligible individuals or groups; 6) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 7) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 8) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

## LOCAL PROJECT SYNOPSIS

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

- Continuing, No adaptation or change in intervention  
 Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

- Harvest of the Month
- USDA MyPlate messages
- Rethink Your Drink Campaign materials

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Tulare County Health and Human Services Agency will provide quarterly updates on the program implementation, number of attendees, pre and post surveys to determine knowledge, attitude change, and skill improvement. At the time of quarterly reports we will evaluate the venues, outreach efforts and participant survey data to understand if there is a need for additional staff training, or reevaluate outreach efforts to agency and community about the Tulare County Health and Human Services Agency nutritional intervention.

---

## 2. EVALUATION PLANS

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

## 3. COORDINATION EFFORTS (MAX. 100 WORDS)

Tulare County Health and Human Services Agency will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

**Supplement:** Tulare County Health and Human Services Agency chose School Wellness (Priority Strategy 2) as their initial evidence-based PSE priority objective 1. This PSE project will attempt to increase awareness and implementation of a school wellness committee and wellness policy via parent, administration and youth participation. The outcome of this project would be an increase in consumption and awareness of the school's commitment to eating healthy, starting a life-long healthy eating habits among kids and parents. The second evidence-based PSE priority objective chosen by Mendocino County is Early Childhood Centers (Priority Strategy 1). This PSE seeks to identify and increase feeding and physical activity childcare site policies in 25 Headstart childcare centers in an

## LOCAL PROJECT SYNOPSIS

attempt to increase the amount of healthy food options and physical activity opportunities given to children throughout their day. Both PSE objectives were selected from the list of the Network's priority strategies and guidance to local agencies about evidence-based activities.

Tulare County is part of the Tulare County Nutrition Collaborative (TCNC). TCNC membership consists of Tulare Office of Education, UC Cooperative Extension, Foodlink, local Farmers Market Association, Tulare WORKs, WIC, Central California Regional Obesity Prevention Program (CCROPP) and various other community and local agencies that provide nutrition education and services to residents. Through TCNC, Tulare County plans to work together to participate in local ongoing activities, as well as recruit interested members to participate in CNAP activities. Tulare County will also work with the CalFresh County Director and the Healthy for Life Coalition to coordinate nutrition education and obesity prevention efforts throughout Tulare County. Tulare County Health and Human Services Agency will participate in evaluation and report metrics as per Network criteria and as appropriate for the PSEs it chose (School Wellness--Priority Strategy 2 and Early Childhood Centers--Priority Strategy 1). Evaluation methods planned to specifically measure environmental changes include RE-AIM methodology, semi-annual surveys (Survey Monkey), annual critical analysis (comprehensive annual reports), and in-depth assessments. In addition, CX3community assessment forums and questionnaires, and key informant interviews will be utilized. The Re-AIM evaluation framework will be applied to the LHD's PSE-related work and reporting. This approach accesses the potential public health impact of interventions according to the following dimensions: Reach, Effectiveness, Adoption, Implementation, and Maintenance. The original number of contacts stated in the FFY 2014 Local Project Synopsis submitted as part of the USDA Plan for Tulare County Health and Human Services Agency was incorrect and taken from a previous draft of the document. The "Projected Unduplicated Number of Contacts" section for Tulare County has been revised to reflect the correct total of 13,256, thereby meeting USDA WRO's request to reach a \$100 cost per person average. The revised Project Synopsis will be resubmitted to USDA.

Also, the project description does not provide a thorough explanation for how core objectives will be met. Please clarify and expand on what you seek to accomplish during FY-14, particularly in relation to coalition work and PSE activities. The core objectives will be met through the required nutrition education and obesity prevention activities and deliverables in the grant scope of work. For FFY 2014, this includes: (1) a three-year plan; (2) nutrition education series classes and workshops (evidence based /evaluating behavioral change); (3) events to address the four core objectives (e.g. MyPlate Pledge for Fruit and Veggie Fest, Rethink Your Drink, Turn Off the TV Week , Safe Routes to School –Back to School promotion); (4) development or implementation of CNAP depending on status of agency; (5) community assessment or CX3 reassessment; (5) community assessment or CX3 assessment; (6) PSE strategy identified from assessment (must align with core objective 1 and 2); and (7) peer-to-peer trainings to service providers working with target.

What will your measurable CNAP objectives be for FY-14? The FFY 2014 CNAP Plan for Tulare County Health and Human Services will incorporate objectives for their specific jurisdiction to address the four State-level measurable objectives from the California SNAP-Ed Plan. Current specific objectives stated in the CNAP for Tulare County are as follows: (1) Increase access to and consumption of healthier foods; (2) Support the integration of nutrition education, coordinate messages and information between programs; (3) Support environments that promote physical activities, healthy living and lifestyles; and (4) Support and promote policies that impact healthy eating and active living.

### **LOCAL PROJECT SYNOPSIS**

PSE: As stated in an earlier response above, the specific PSE activities to be conducted by Tulare County are as follows: Tulare County Health and Human Services Agency chose School Wellness (Priority Strategy 2) as their initial evidence-based PSE priority objective 1. This PSE project will attempt to increase awareness and implementation of a school wellness committee and wellness policy via parent, administration and youth participation. The outcome of this project would be an increase in consumption and awareness of the school's commitment to eating healthy, starting a life-long healthy eating habits among kids and parents. The second evidence-based PSE priority objective chosen by Mendocino County is Early Childhood Centers (Priority Strategy 1). This PSE seeks to identify and increase feeding and physical activity childcare site policies in 25 headstart child care centers in an attempt to increase the amount of healthy food options and physical activity opportunities given to children throughout their day. Both PSE objectives were selected from the list of the Network's priority strategies and guidance to local agencies about evidence-based activities.

**LOCAL PROJECT SYNOPSIS**

\*After each school name indicate all that apply with the following abbreviations: K-12 School (S), Preschool (PS), After School (A) & Parents (P)

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measurable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10%, teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent systematic before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

X	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Mobilize community partnerships around healthy eating and active living.

X	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
X	Develop healthy corner stores or food retail policies and organizational practices.
X	Develop nutrition standards at emergency food distribution sites.
X	Develop point-of-purchase marketing/signage at food retailers.
X	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
X	Investigate environmental or cultural barriers to healthy eating and active living.
X	Provide training or technical assistance to health or community professionals.
	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
	Create work-site SNAP-Ed programs.
X	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
	Cultivate community or school gardens.
X	Promote access/appeal, or policy changes to support physical activity or exercise.
	Other, specify:
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**

*Be specific in how your sub-contractors will contribute to the LHD project's success.*

There are a total of 6 proposed subcontractors in Tulare County's FY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity amongst adults, teens, and children.

School and Afterschool

Specifically, 1 subcontractor will take on a coordination role to directly work and train youth and adults at local school district sites. Collectively, this subcontractor will support the LHD to provide nutrition education activities to youth (teens and children) and adults (parents and

teachers) at school district affiliated venues such as classrooms, school sponsored events, before and after school programs, teacher in-service/trainings, and partnership activities with local parks and recreational programs. Subcontractor will train teachers on the use of taste testing or food demonstration curriculum, materials and student workbooks, such as Harvest of the Month; train parents at nutrition education classes taking place at before and after school programs; and conduct food demonstrations and taste testing activities at school-wide events targeting both youth and adults. Additional nutrition education on the importance of vegetable, fruit, low-fat/nonfat milk, and water consumption will be coordinated by the subcontractor through the distribution of newsletters and other education materials sent directly to parents of youth and teens of targeted sites.

### Youth Engagement

This subcontractor will serve as the coordinating body for youth engagement trainings of both youth and teens at school and community sites, e.g. before and after-school programs, parks and recreational programs, faith based organizations, and youth-focused service organizations. The purpose of the youth engagement related activities will be to increase awareness for policies, systems, and environmental change approaches to establishing wellness policies at their respective school sites. Youth will conduct community-based research that addresses and identifies issues regarding consumption, access to healthy foods and beverages, available physical activity opportunities in their environment, and identify solutions applying public health approaches.

### Peer to Peer

Two subcontractors will collaborate to achieve objectives 1-4. Peer educators recruited from the SNAP-Ed-eligible members in the community to reach adults to conduct education/obesity prevention class series which promote nutrition education/obesity prevention, food security, as well as individual, family, and organizational changes.

### Childcare

Early childhood chronic disease prevention will be provided by 1 subcontractor. Children ages birth to five and their families will be educated by developing partnerships and providing training and technical assistance to early-childhood care and education sites and medical/dental providers/clinics to facilitate nutrition education and obesity prevention strategies resulting in healthy site changes. Subcontractor will conduct community-based research that addresses and identifies issues regarding consumption, access to healthy foods and beverages, available physical activity opportunities in their environment, and identify solutions applying public health approaches.

### Community Engagement

One subcontractor shall prioritize identified problem areas based on CX<sub>3</sub> findings and feedback from at least three community forums to reach 100 community members, and utilize to develop and implement at least 2 *Network* allowable interventions with environmental supports. The subcontractor shall present findings to a variety of stakeholders, including community members and County level departments and officials where data on the CX<sub>3</sub> neighborhoods would guide/inform decisions and promote increased access to healthy food. Subcontractor shall work with County to implement and market nutrition and obesity prevention strategies using public health approaches and *Network* allowable interventions implemented in the eligible neighborhoods.

Tulare County LHD will specifically address Objective 3 by working on a policies, systems, and environmental change strategy to increase the number of water stations at school sites. Students will be educated on the importance of hydration before, during and after physical activity, trained in the different methods in which they can communicate the newly acquired knowledge to peers, parents, teachers, and administrators within their school district; and help collect formative evaluation data on the level of support for increasing water stations amongst peers, parents, and adults.

Wellness policies, depending on the exact nature of the policy adopted, will help create an environment where it is easier to engage in the healthy consumption of fruits, vegetables, low-fat/nonfat milk, and water; as well as increase physical activity.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

There will be 2 subcontractor(s) who will coordinate the peer to peer education training adults. Two subcontractors will be conducting the trainings at different geographic locations in the county servicing a mix of target adults. All subcontractors will support the program by collecting process evaluation data such as number of individuals reached, materials distributed, and documentation of the number and type of activities conducted. Formative evaluation will also be conducted to ascertain any changes in fruit and vegetable consumption and beverage intake.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Tuolumne County. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 1 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) participate in a Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) or other community assessment in up to 7 SNAP-Ed eligible low-income neighborhoods and share results with various local stakeholders, community members and community organizations; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

## LOCAL PROJECT SYNOPSIS

**f. Modification of Project Methods/Strategies.**

- Continuing, No adaptation or change in intervention  
 Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Process and outcome evaluations will be used to measure performance related to anticipated changes in knowledge and behavior specific to selection, purchase, and use of fruits/vegetables to increase consumption. Sign in sheets, records of participation, training materials will be collected and collated for data input. Participant surveys measuring knowledge and skill improvement in nutrition and behavior changes in fruit/vegetable consumption will be administered and collated. Formative evaluations will measure participants changes in knowledge and skills related to nutrition and increase fruit/vegetable consumption.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Ventura county. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) Implement Network allowable nutrition education interventions and obesity prevention strategies in at least 50% of CX3 assessed neighborhoods; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

. Continuing, No adaptation or change in intervention

. Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

Increased knowledge and changes in behavior in the target population, related to consumption of fruits and vegetables and physical activity, will be tracked and measured primarily through use of pre and post tests. Strategies to engage new partners and increase participation in local efforts, such as coalition activities, will be tracked. Activity Tracking Form and sign-in sheets will indicate participation levels in all program activities.

---

**2. Evaluation Plans**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. Coordination Efforts (max. 100 words)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets up to six times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population. The goal of the LHD is to provide infrastructure, coordinate local efforts, and collaborate with partners and stakeholders to maximize the impact of activities that address and promote healthy eating, active living, access to healthy food, obesity prevention, and prevention of other diet and physical activity related chronic diseases. The long term goal is to continue to build on the existing network of partners to create an environment for local families, in which the healthy choice is the easy choice for everyone.

**Supplement:** The Ventura County Health Department chose to work with after-school programs in qualifying areas to provide healthy snacks and access to water for the children attending the after-school program, and to work with two retail/corner stores in a CX3 neighborhood to increase access to fresh fruits and vegetables as their initial PSE priorities. The Ventura county health department chose to work with after-school programs in qualifying areas to provide healthy snacks and access to water for the children attending the after-school program and to work with two retail/corner stores in a CX3 neighborhood to increase access to fresh fruits and vegetables as their initial PSE priorities.

They will conduct a post survey of the afterschool sites to determine if they are offering healthier snacks and beverage options, and will conduct re-assessments/re-surveys of the retail stores to determine if CX3 scores for retail standards are improved.

**1) List 4 primary project objectives that are specifically supported by SNAP-Ed funds during FY 14.**  
*Objectives should reflect the results that you seek to demonstrate in your program; what you seek to accomplish. Objectives should be specific, measurable, appropriate, realistic, and time specific.*

1. By September 2014, as measured by pre/post surveys, increase vegetable consumption among adults by 10%, teen by 10%, and children by 10%.
2. By September 2014, as measured by pre/post surveys, increase fruit consumption among adults by 10%, teens by 10%, and children by 10%.
3. By September 2014, as measured by pre/post surveys, increase consumption of low/fat/nonfat milk and water among adults by 5%, teens by 7%, and children by 5%.
4. By September 2014, as measured by pre/post surveys, increase physical activity among adults by 5%, teens by 5%, and children by 5%.

**2) What is the rationale for these objectives?**

*What is the need? How will achieving these objectives contribute to statewide goals to improve consumption of healthy foods, reduce consumption of unhealthy foods, and increase the number of place-based nutrition and physical activity environment supports?*

Valid and reliable data to measure progress in attaining each objective must come from standardized instruments that are administered at times that represent before and after exposure to or participation in, an intervention. NEOP will conduct statewide evaluation of local SNAP-Ed interventions by obtaining consistent measures and evaluation procedures from local health departments. These measures will include pre/post comparisons from nutrition intervention courses, and/or from 2014 as compared with 2013 survey responses by adults, teens and children from randomly-sampled SNAP households.

**3) Please identify which type(s) of policy, environment, and systems changes you will work to address in FY 14 to help accomplish your objectives.**

*Below are examples of public health approaches that may be used to accompany direct or indirect nutrition education. Please place an "x" in the box for those that apply. This list is not comprehensive; please write-in other proposed approaches for review.*

X	Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
	Use digital or on-line media to promote access and appeal for healthy foods, beverages, and/or physical activity.
X	Mobilize community partnerships around healthy eating and active living.

X	Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.
X	Develop healthy corner stores or food retail policies and organizational practices.
	Develop nutrition standards at emergency food distribution sites.
X	Develop point-of-purchase marketing/signage at food retailers.
	Measure health status or individual risk factors for obesity in the SNAP-Ed population.
	Investigate environmental or cultural barriers to healthy eating and active living.
X	Provide training or technical assistance to health or community professionals.
	Develop healthy procurement policies, healthy nutrition standards, and/or signage for congregate meals providers.
X	Create work-site SNAP-Ed programs.
X	Link farms to institutions through farm stands or farm-to-where-you-are initiatives.
X	Cultivate community or school gardens.
X	Promote access/appeal, or policy changes to support physical activity or exercise.
	Other, specify:
	Other, specify:

**4) If applicable, briefly describe how your sub-contractor(s) will support the LHD in achieving its objectives for FY 14?**  
*Be specific in how your sub-contractors will contribute to the LHD project's success.*

There are a total of two proposed subcontractors in Ventura County Public Health Department's FY14 SNAP-Ed Program project. All subcontractors will support our program in achieving the four above identified objectives to increase vegetable, fruit, low-fat/nonfat milk, and water consumption; as well as increase physical activity amongst adults, teens, and children.

**Objectives 1-3:** Specifically, Ventura Unified School District (VUSD) will take on a coordination role along with Ventura County Public Health's Healthy Gold Coast Project to directly work and train youth and adults at multiple locations such as school districts, afterschool programs, Youth programs, Worksites and local retailers. Collectively, these two subcontractors will support the LHD to provide nutrition education activities to youth (teens and children) and adults (parents, teachers, afterschool program staff, Youth leaders, Worksite leaders, and the community at large) at affiliated venues such as school districts, classrooms, school sponsored events, after school programs, teacher in-service trainings, school cafeterias, Youth programs, Worksites, local grocery stores and partnership activities in collaboration with local organizations and

coalitions. Subcontractors will train teachers, food service employees, afterschool program staff, and volunteers on the use of taste testing or food demonstration curriculum, materials and student workbooks, such as Harvest of the Month; train parents, Worksite and Youth leaders on conducting nutrition education classes taking place in classrooms, after school programs Worksites and Youth activities; and conduct food demonstrations and taste testing activities at school-wide events, classrooms, cafeterias, worksite lunchrooms and local retail grocery stores targeting both youth and adults. Additional nutrition education on the importance of vegetable, fruit, low-fat/nonfat milk, and water consumption will be coordinated by the subcontractors through the distribution of newsletters and other education materials sent directly to parents, youth, teens and residents of targeted sites.

**Objectives 1-4:** Ventura Unified School District will also serve as the coordinating body for youth engagement trainings of both youth and teens at school and community sites, e.g. after-school programs, parks and recreational programs, and youth-focused service organizations. Central Coast Alliance United for a Sustainable Economy (CAUSE), a community based organizations, will be subcontracted by VUSD to directly provide these trainings. The purpose of the youth engagement related activities will be to increase awareness for policies, systems, and environmental change approaches to establishing wellness policies at their respective school sites. In addition, VUSD will develop model Farm to School policies and procedures and will work with three other school districts to help implement these policies in each district, as well as provide support and materials to enhance and promote nutrition education in the classroom and school cafeteria. Healthy Gold Coast Project staff will work with local retailers to provide a variety of point of purchase materials to be strategically display at/or near the fruit and vegetable isle, as well as other activities such as food demonstrations, taste testing and store tours at various SNAP-Ed eligible retail location throughout Ventura County with the purpose of educating and providing tools to consumers to make healthier choices and to increase the consumption of fruits and vegetables. Project staff will also work with a variety of local Employers to assist in developing and implementing activities that will support an environment of healthy eating and physical activity among workers, through a variety of activities such as nutrition education classes, food demonstrations, taste testing, physical activity demonstrations and promotional materials.

Ventura County Public Health Department will specifically address Objective 3 by working on a policies, systems, and environmental change strategy to increase the number of water stations at school sites and to make healthier beverage choices available to students participating in after-schools programs. Students will be educated on the importance of hydration before, during and after physical activity. Youth will be trained in the different methods in which they can communicate the newly acquired knowledge to peers and parents in their school district. They will also be trained to help collect formative evaluation data on the level of support for increasing water stations amongst peers, parents, and adults.

Wellness policies, depending on the exact nature of the policy adopted, will help create an environment where it is easier to engage in the healthy consumption of fruits, vegetables, low-fat/nonfat milk, and water; as well as increase physical activity.

**5) If you are awarding multiple sub-contracts for a similar type of service (e.g., school-based or peer-to-peer), please state specifically how the sub-contractors will complement one another?**

*Will there be differences in their target audiences, geographic locales, performance measures, etc.?*

There are a total of two subcontractors and each one of the subcontractors will be focusing on different areas of services.

**6) Any other comments regarding the scope of your proposed activities or sub-contractors in FY 14?**

Budget Revision		Sub Grant(s)			
Action	Last Amt Approved	Name	Description/Justification	Total	Budget Revision Justification
		A Ventura Unified School District	Subcontracting agency will assist in accomplishing the following Scope of Work Objective: 1) Nutrition Education: Using tools approve by CDPH, Contractor will assess the attitudes, knowledge, beliefs and skills of SNAP-Ed/NEOP eligible individuals related to nutrition education. Based on the assessment results, develop a plan of action for the nutrition education implementation; 2) School/After School: Actively engage multiple school sites and after school sites to establish relationships and commitment of support for nutrition education interventions, wellness policy expansion and staff development from the County of Ventura Superintendent of Schools, school districts and after school administrators. Schools must be institutions where at least 50% of the student body qualifies for free/reduced meals; 3) Youth Engagement: Contractor will recruit an Adult Ally to conduct a youth engagement project at youth engagement sites. The Contractor in coordination with the Adult Ally will provide orientation to members of the youth team. The role of the Adult Ally is to recruit youth and form a team with a minimum of 6 students. Create a research tool and conduct the research project around selected issue(s). The tool can be a survey, photo voice or video voice project, interviews etc. Gather information/data via the research tool and analyze the data. Identify public health approaches to reach solutions. Prepare presentations/reports and communicate to key stakeholders.	\$197,704.72	
		B Ventura County Public Health's Healthy Gold Coast Project	Subcontracting group will provide the following: 1). Qualify, engage and provide technical assistance to qualified worksites. Assist in creating an action plan for California Fit Business Kit tool implementation and nutrition education events. Based on the Check for Health assessment, provide technical assistance to Worksite Wellness Committee in selecting and implementing additional CFBK tools promoting healthy worksite strategies such as: a. Model procurement (vending) policies b. Access to healthy foods through establishing healthier options in the cafeteria or lunch trucks, including promotion strategies c. Access to free drinking water throughout the work day d. Implement strategies that promote purchasing/consumption of fruits and vegetables Provide technical assistance to worksites in completing the worksite Evaluation Tool to demonstrate the impact of the CFBK. Assess additional educational opportunities for worksite employees. As allowed by worksite employer consent and available personnel, provide additional nutrition education lessons to worksites based on the results of the needs assessment on topics prioritized by worksite employees. 2). Develop partnerships with local retail owners, managers, and/or staff and work with retail owners, managers and staff on healthy retail strategies including: nutrition education, benefits to the neighborhood, economic benefits of accepting food-assistance programs, and healthy point of purchase strategies. Target and prioritize retail stores based on CX3 assessment. Acquire food handling certification (such as ServSafe) that meets the county's requirements for the staff responsible for engaging the retail sites. Offer food demonstrations to promote and market healthy food products available for purchase at the retailer. Distribute and maintain appropriate nutrition-education materials such as the Harvest of the Month community newsletters, posters, signage, recipe cards, wobblers, magnets, window clings, ReThink Your Drink materials, hardware, CalFresh materials, etc., to qualifying stores. Provide technical assistance to qualifying retailers on approaches to increase availability and promotion of healthy food and beverage purchases. 3). Assist in convening and coordinating activities planned by the CNAP group and other existing nutrition education obesity prevention groups. Assist in coordinating and providing train the trainer opportunities to	\$202,295.28

**d. Project Description.**

Key Methods:

- Advisory Council/Task Force (specify): Food Connect, Yolo AFA, Head Start Health Advisory Committee, CNAP, RISE and West Sac Health Partners
- Internet/Web Sites-website address: www.yolohealth.org
- Print Media
- Radio:
- TV:
- Multi-level approaches that include environmental supports
- Nutrition Education Classes: (300 occurrences at 1 hour(s) each)
- Community Education Events: (4 occurrences at 1.5 hour(s) each)
- Training/Workshop/Conference: (4 occurrences at 1 hour(s) each)
- Point of Purchase: (        occurrences at        hour(s) each)
- Other (specify): (        occurrences at        \_ hour(s) each)

Key Educational Messages: *All messages will align with the Dietary Guidelines for Americans 2010 and MyPlate. Messages will promote Enjoy your food, but eat less; Avoid oversized portions; Make half your plate fruit and vegetables; Switch to fat-free or low-fat (1%) milk; Compare sodium in foods and Drink water instead of sugary drinks.*

LOCAL PROJECT  
SYNOPSIS

Delivery Sites by Type of Setting

1 Adult Education & Job Training Sites

Adult Rehabilitation Center

2 CalFresh Offices

Churches

Community Centers

Elderly Service Centers

13 Emergency Food Assistance Sites

(includes Food Banks, Food Pantries, and Soup Kitchens)

Extension Offices

4 Farmers Markets

8 Food Stores

11 Head Start Programs

Individual Homes

Libraries

2 Other Youth Education Sites (includes Parks and Recreation)

4 Public/Community Health Centers (includes Public Health Departments)

25 Public Housing

1 Schools – students (Preschool)

10 Schools – students (K-12)

7 Schools – students (Afterschool Program)

7 Schools - Parents

7 Shelters/Temporary Housing

TANF Job Readiness Program

7 WIC Programs

Worksites

1 Other (specify): County Fair

Other (specify):

Other (specify):

---

Projected Unduplicate Number of Contacts: 5,150

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Yolo county. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.

The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) share Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) assessment results with various local stakeholders, community members, and community organizations. Implement Network allowable nutrition education interventions and obesity prevention strategies in at least 50% of CX3 assessed neighborhoods. 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessment in eligible neighborhoods 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

- Continuing, No adaptation or change in intervention  
 Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

YCHD will look to track increases in the use of targeted HOTM produce by coordinated education and training with the local school districts through Yolo Farm to School and the Kids Farmers Market. The Rethink Your Drink evaluation tool will be implemented at selected sites of intervention. Through our nutrition education series of classes we will evaluate behavior change with pre/post surveys of participants. In early education we will monitor the skills of Head Start Family service workers before and after trainings on nutrition education.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

YOLO HD will establish/maintain key partnerships through the County Nutrition Action Plan (CNAP) group that meets at least 4 times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population.

## Budget Coversheet

Prime Grantee Name: Yolo County Health Department

Grant Number: 13-20495

Budget Categories	FFY 13 Total	FFY 14 Total	Difference	% Difference
1 Salaries	\$135,153.00	\$240,968.30	\$105,815.30	78.29%
2 Benefits	\$75,112.00	\$127,497.64	\$52,385.64	69.74%
3 Operating	\$30,026.00	\$51,765.20	\$21,739.20	72.40%
4 Equipment	\$1,683.00	\$3,121.13	\$1,438.13	85.45%
5 Travel & Per Diem	\$7,940.00	\$12,056.65	\$4,116.65	51.85%
6 Subcontractors		\$0.00	\$0.00	0.00%
7 Other Costs	\$6,655.00	\$19,200.00	\$12,545.00	188.50%
8 Indirect Costs	\$33,788.00	\$60,242.08	\$26,454.08	78.29%
<b>Totals:</b>	<b>\$290,357.00</b>	<b>\$514,851.00</b>	<b>\$224,494.00</b>	<b>77.32%</b>

Budget Categories	Reason for difference greater than 5%
1 Salaries	grant increased allowing for higher staffing
2 Benefits	grant increased allowing for higher staffing
3 Operating	grant increased allowing us to serve more eligible families
4 Equipment	Tax and environmental fee left off of last years budget
5 Travel & Per Diem	grant increased allowing us to increase the number of classes we teach
6 Subcontractors	N/A
7 Other Costs	grant increased allowing us to serve more eligible families
8 Indirect Costs	more personnel and that is what we use to calculate indirect

Projected Unduplicate Number of Contacts: 2000

Narrative

The health department (LHD) provides nutrition education and obesity prevention services to eligible SNAP-Ed residents in Yuba County. The LHD will promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population. The LHD will be responsible to: 1) conduct 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community; 2) conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities; 3) conduct a Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) or other community assessment in up to 7 SNAP-Ed eligible low-income neighborhoods and share results with various local stakeholders, community members and community organizations; 4) coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments; 5) conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods; 6) conduct community events reaching SNAP-Ed eligible individuals or groups; 7) conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts; 8) select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix and 9) establish coalitions and partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

- . Continuing, No adaptation or change in intervention  
. Project is new

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See attached Master Educational Materials list submitted in State plan Section F.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators. (max. 100 words)**

The documented number of individuals given direct and indirect nutrition education, along with feedback given regarding the single classes will be measured. Pre- and post-tests will be given to participants in the series classes to measure for an increase in nutrition knowledge. Expanding the number of sites currently being used to provide education will be a positive indicator. An increase in community partners at C-NAP meetings will also be a measurable indicator. Documentation of C-NAP strategic plan and CX3 findings with an environmental change strategic plan will all be a positive performance measure.

---

**2. EVALUATION PLANS**

*All grantees participate in process evaluation per their Scope of Work activities. Grantees must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**3. COORDINATION EFFORTS (MAX. 100 WORDS)**

LHD will establish/maintain key partnerships through County Nutrition Action Plan group that meets a minimum of four times per year. The LHD will develop/update a CNAP to 1) enhance collaboration and communication among stakeholder agencies, 2) coordinate nutrition education messages, resources and campaign implementation across FNS programs, and 3) maintain, expand and share CNAP with FNS programs, local partners and external stakeholders in an effort to increase food security in the target population. The LHD will continue with its CX3 project with 3 communities. Community Forums will be held to prioritize the identified problems found by the public in the CX3 results. The LHD plans to coordinate with foster youth in the Independent Living Program, high school youth in Future Farmers of America, and high school youth from a local youth community center in order to develop and implement a CX3 derived Environmental Support. CWD and LHD services are well coordinated due to both being in the same location. The LHD will work with CWD to promote consistent nutritional messages and will provide direct and indirect nutrition education to CWD participants. The LHD will provide health expertise to CWD for messaging and media campaigns. The LHD will coordinate with Chico Research Foundation for registered dietician consultation to assist with SOW objectives. C-NAP will continue to strengthen. The LDH will continue to coordinate with other USDA-funded programs to ensure there is no duplication of efforts. The LDH will coordinate with The Region for regional campaigns.

## RFA FFY 2013 Final Quarter

The following seven contracts began during FFY 2013, January 1, 2013. The contracts were a result of a competitive solicitation for innovative projects. Because the contracts didn't begin until the second quarter of FFY 2013, CDPH requests 25% FFY 13 carry-in from each contract to use during FFY 14 to complete these projects that end December 31, 2013. Detailed budgets and project synopsis were submitted and approved in the FFY 13 State Plan.

<b>Contractor</b>	<b>FFY 13 Approved Plan</b>	<b>Requested FFY 13 Carry-in</b>
Ventura County Public Health Department	\$ 499,500	\$ 124,875
Collective Roots	\$ 346,596	\$ 86,649
Office of Samoan Affairs	\$ 327,269	\$ 81,817
California Health Collaborative	\$ 470,118	\$ 117,530
Catholic Charities	\$ 1,235,937	\$ 308,984
Health Education Council	\$ 200,000	\$ 50,000
YMCA of Silicon Valley	\$ 569,405	\$ 142,351
<b>Total</b>	<b>\$ 3,648,825</b>	<b>\$ 912,206</b>

- Radio:
  - ✓ TV:
    - ✓ Multi-level approaches that include environmental supports
- Nutrition Education Classes: (            occurrences at            hour(s) each)
- Community Education Events: (            occurrences at            hour(s) each)
- ✓ Training/Workshop/Conference: (            occurrences at            hour(s) each)
- Point of Purchase: (            occurrences at            hour(s) each)
- Other (specify)            :            (            occurrences at            \_\_\_ hour(s) each)

Key Educational Messages: *All messages will align with the Dietary Guidelines for Americans 2010 and MyPlate. Messages will specifically focus on balancing calories, increasing the consumption of healthy foods and decreasing the consumption of fat, salt and sugar*

Delivery Sites by Type of Setting:

Adult Education & Job Training Sites	Head Start Programs
Libraries	Individual Homes
CalFresh Offices	Other Youth Education Sites (includes Parks and Recreation)
Churches	Public Housing
Community Centers	Schools – students (Preschool)
Elderly Service Centers	<u>6</u> Schools – students (K-12)
Emergency Food Assistance Sites (includes Food Banks, Food Pantries, and Soup Kitchens)	Schools – students (Afterschool Program)
Extension Offices	<u>6</u> Schools – Parents
Farmers Markets	Shelters/Temporary Housing
Food Stores	WIC Programs
	Worksites

Other (specify):

Other (specify):

Other (specify):

**\* Reminder: Every non-school site noted above must be listed with address and census tract separately on the Census Tract Data Sheet.**

**Projected Number of Unduplicated Participants:**

**Narrative** (max. 200 words)

Multi-county project conducted in qualifying school districts in Fresno, Tulare, Sonoma, and Butte Counties. Participating schools are chosen based on 50% of students qualifying for free or reduced lunch; and operating under the new National School Lunch and School Breakfast Program Guidelines. Project activities will be conducted in all 4 counties and will focus on nutrition education training for school food service staff relevant to: 1) promotion of healthy nutrient changes; 2) updated recipe libraries; 3) strategies to change the cafeteria environment to promote school meals and healthy selections by students; and 4) sharing best practices to increase the quality and variety of fruit and vegetables in school lunches, in addition to the training of local Youth Champions to advocate for policy or practice changes to reinforce implemented Guidelines. Not only will the Network population benefit from healthier, more nutritious school meals as a result of the Project, students will also participate in a number of activities such as Photovoice, to document changes in the school environment related to nutrition and physical activity and present findings to community stakeholders in an effort to advocate for policy and / or changes in practice that support healthy change. Policy changes could include an increase in required physical activity breaks in the coordinated school wellness policy. Practice changes could include changes in menu items, salad bar selection, or healthy cafeteria marketing and promotional activities.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

✓ Project is new.

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

-My Plate

-HOTM

-Power Play!

-Inspiring Youth, Growing Change: Nurturing Strong Minds for a Healthy Community

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators.** (max. 100 words)

Through intervention activities, participating school districts will serve a minimum of 70% of the weekly, grade-level quantities and varieties of fruits and vegetables as recommended by the 2013 USDA Nutrition Standards, and 60% of the

participating student population will indicate a decrease in consumption of less healthy food and beverages. Process evaluation includes an analysis of elements that impact implementation including context, linkages, and participation levels in each of the program activities. Data include staff activity logs, program attendance, school menus, and findings from assessment. By focusing the data analysis to target specific issues, the analytical process will draw meaning from data.

---

**3. EVALUATION PLANS**

*All contractors participate in process evaluation per their Scope of Work activities. Contractors must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**4. COORDINATION EFFORTS** (max. 100 words)

The California Department of Social Services acknowledges that nutrition education leads children to make healthier eating choices and that classrooms and cafeterias are an excellent place to discuss and reinforce making healthy food choices. Initial and frequent communication including the sharing of project activities, evaluation measures and coordinating efforts through current relationships with the Regional Collaboratives (FFY 2013), multi-county coalitions (FFY 2014), former LIA's, UCCE, Local Health Departments (CNAP), local Cal Fresh Contractors, etc. will guarantee that the project will not supplant existing partner activities, will strengthen relationships and improve the delivery of key behavior-focused nutrition messages.

**\* Reminder: Every non-school site noted above must be listed with address and census tract separately on the Census Tract Data Sheet.**

**Projected Number of Unduplicated Participants: 18,437**

**Narrative** (max. 200 words)

In FFY 2013, CCC and seven local Catholic Charities agencies will implement a project providing 26 evidence-based SNAP-Ed interventions to at least 18,437 unduplicated members of the Network target population, in 30 cities throughout nine counties, including Imperial, Orange, Riverside, San Bernardino, San Diego, San Francisco, San Joaquin, Santa Cruz, and Solano. Fifteen interventions emphasize Priority 1: increasing access and consumption of healthy foods, and will facilitate nutrition education, social support, and increased access/consumption. Four interventions emphasize Priority 2: decreasing consumption of less healthy foods and beverages and increasing consumption of water. These projects will facilitate nutrition education. Seven interventions emphasize Priority 3: increasing physical activity opportunities throughout the day. These projects will facilitate education on the importance of daily activity, in conjunction with nutrition education. Interventions will engage SNAP(CalFresh) eligible children, adults, and seniors, of primarily Latino, African American, and white racial/ethnic background, who are at risk for poor nutrition and chronic diet-related diseases, including obesity. Participants will increase their knowledge about and motivation to make healthy food, beverage, and physical activity choices; acquire concrete skills strategies to enact those choices; and be empowered toward self-advocacy for positive change in their communities.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

Project is new.

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See Master Educational Materials list submitted in State plan.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators.** (max. 100 words)

Participants in Priority 1 interventions will increase their knowledge of/motivation to make healthy food choices (evidenced by increased fruit and vegetable consumption); ability to self-advocate for positive, healthful changes in their communities; and maximize participation in/usage of CalFresh. Participants in Priority 2 interventions will increase their knowledge of/motivation to make healthy beverage and food choices (evidenced by increases in fruit, vegetable, and water consumption). Participants in Priority 3 interventions will increase their knowledge about and motivation to make healthy choices around food and physical activity, will increase daily physical activity, and will increase daily consumption of fruits and vegetables.

---

**3. EVALUATION PLANS**

*All contractors participate in process evaluation per their Scope of Work activities. Contractors must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**4. COORDINATION EFFORTS** (max. 100 words)

CCC will coordinate with seven Catholic Charities agencies in nine counties to implement SNAP-Ed efforts to effectively deliver consistent behavior-focused nutrition messages. The seven agencies have engaged in CalFresh Outreach efforts over the past three years, which shares the same target population. CCC will provide MOUs for each local agency engaged in SNAP-Ed activities. CCC has working relationships with the California Department of Social Services and CDPH under CalFresh, and will remain engaged with those departments to effectively coordinate SNAP-Ed activities. Local agencies will coordinate with their local health departments, other Network-funded projects, and regional networks to support SNAP-Ed efforts.

---

**\* Reminder: Every non-school site noted above must be listed with address and census tract separately on the Census Tract Data Sheet.**

**Projected Number of Unduplicated Participants: 4535**

**Narrative** (max. 200 words)

Collective Roots will partner with well-established health-focused non-profits (subcontractors as well as community partners) in San Mateo, Santa Clara and San Francisco counties to provide health and nutrition education to over **four thousand** SNAP-ed eligible children and adults. The Network population will participate in series of Network-approved, ongoing cooking and nutrition classes, as well as one-time taste tests and nutrition education events. Classes within these series teach the fundamentals of nutrition and healthy cooking on a budget, while also increasing access to fresh fruits and vegetables. Taste tests and nutrition events focus on increasing knowledge about and access to fresh fruits and vegetables. Collective Roots will partner with local organizations to increase participation in the CalFresh Program in eligible non-participating California households. In communities plagued with high obesity rates, poor eating habits and diet-related disease, participants of our program will increase fruit and vegetable consumption, improve attitudinal beliefs around healthy foods and learn basic cooking skills.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

X Project is new.

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See Master Educational Materials list submitted in State plan.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators.** (max. 100 words)

The Evaluation Expert will communicate with the CDPH Network Research and Evaluation Section staff to develop and implement procedures for the collection and recording of information to describe the project and assess its effectiveness. Evaluation activities will entail collection and recording client-level data including demographics, and number and types of services received into a Network provided database. Collective Roots will be collecting data from programming to measure changes in fruit and vegetable consumption, consumption of unhealthy foods and sweetened beverages, water, and physical activity. We will also measure changes in attitudinal beliefs towards healthy foods, unhealthy foods, and physical activity.

---

**3. EVALUATION PLANS**

*All contractors participate in process evaluation per their Scope of Work activities. Contractors must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**4. COORDINATION EFFORTS** (max. 100 words)

Collective Roots will subcontract with Veggielution, Sacred Heart and Urban Sprouts to accomplish Scope of Work activities. We will participate in Regional Collaboratives with groups and organizations such as BANPAC, Ravenswood Family Health Clinic, WIC, and Three Squares to deliver consistent behavior-focused nutrition messages. Collective Roots will coordinate with California Department of Social Services through our partnership with Sacred Heart to provide screening and application assistance for CalFresh, health insurance and Low Income Home Energy Assistance Program through the Self Sufficiency Calculator.

**\* Reminder: Every non-school site noted above must be listed with address and census tract separately on the Census Tract Data Sheet.**

**Projected Number of Unduplicated Participants: 2000**

**Narrative** (max. 200 words)

The overall goal of this project is to empower and enable SNAP eligible participants and those eligible up to 185% Federal Poverty Level to select healthy foods and beverages and increase physical activity through nutrition education, social marketing and environmental support.<sup>41</sup>

*Improving Food and Beverage Environments: A Multi-County Youth and Resident Engagement Model for Sustainable Change*, has three overall goals: 1) youth engagement and leadership development for community change; 2) resident engagement and capacity-building to address community change; and 3) coordination of youth and resident engagement activities to inform efforts and demonstrate best practices. <sup>96</sup>

The goals will be achieved through the following major objectives: (1) Implementing a train the trainer framework for nutrition education to youth and resident leaders and engaging them on issues related to nutrition, physical activity, and access to healthy foods and beverages, (2) Utilize trained youth and resident leaders to deliver direct education and engage SNAP-ED eligible residents to address barriers to making healthy food and beverage choices, (3) Develop youth and resident-driven action plans involving them in stages of decision making encourages sustainable environmental changes. Non-Network supported youth serving agencies, resident housing units will serve as primary venue to reach target population.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

Project is new.

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See Master Educational Materials list submitted in State plan.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators.** (max. 100 words)

The evaluation of this project will include collecting process measures, individual behavior on soda and water consumption, social support, and organizational change on the adoption and implementation of healthy food and beverage policies. Both qualitative and quantitative data will be used and case studies will be developed as a result.

**Survey questions:** The first survey will measure water and soda consumption as well a non-equivalent dependent variable, such as consumption of juice. Questions on social support for these behaviors and demographic questions (age, race/ethnicity, gender, enrolled in free lunch

(for students) or currently CalFresh user or eligible (for adult residents) will also included in the survey. **Survey Administration:** For the pre-survey, partner agencies will administer paper forms to participants in educational programs. The second survey will be conducted online or via text in order to minimize loss to follow-up. In addition, the post survey will be very short (3-5 behavioral and social support questions)

---

**3. EVALUATION PLANS**

*All contractors participate in process evaluation per their Scope of Work activities. Contractors must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**4. COORDINATION EFFORTS** (max. 100 words)

For this project the Health Education Council will work with partners in Tuolumne, Sacramento, and Nevada Counties. Youth engagement activities will be coordinated and leveraged through youth-serving organizations and qualifying schools. Moreover, resident engagement activities will be coordinated and leveraged through public housing, community organizations, and county public health departments. Additionally, the Health Education Council will work collaboratively through the Gold Country Region HEAL Collaborative, California Convergence, and subcontract with California Adolescent Nutrition and Fitness (CANFit), and Diana Cassady (Cassady Consulting), to coordinate key training and evaluation components to support and achieve project goals and deliverables.

---

**\* Reminder: Every non-school site noted above must be listed with address and census tract separately on the Census Tract Data Sheet.**

**Projected Number of Unduplicated Participants: 3500**

**Narrative** (max. 200 words)

The Office of Samoan Affairs (OSA) will educate, empower, and engage SNAP-Ed eligible participants to select healthy foods and beverages by 1) Conducting a media/marketing campaign (e.g., targeted radio and television advertisements, distribution of print media such as pamphlets, newsletters, and posters) ; 2) Providing nutrition education classes for large groups (i.e., seminars at community locations) and small groups (i.e., hands-on workshops that focus on learning new skills such as reading nutrition labels); 3) Developing a social support network through community partnerships (e.g., training peer volunteers to provide nutrition education); and 4) Advocating for improved local approaches that promote the availability of healthy food and beverage choices (e.g., presenting at staff meeting at agencies throughout the community and establishing written agreements of proposed changes). These objectives will be carried out in three counties: Los Angeles County, Orange County, and Sacramento County. OSA will also specifically target Native Hawaiians and Other Pacific Islanders (NHOPI) through partnerships with 75 faith-based and community organizations. The NHOPI population in CA is the largest in the world and suffers from one of the highest rates of obesity in the world. The NHOPI will benefit greatly from OSA's targeted nutrition education and obesity prevention objectives.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

Project is new.

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See Master Educational Materials list submitted in State plan.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators.** (max. 100 words)

Network-OSA will collect general surveys of community individuals participating in nutritional education seminars to measure knowledge about unhealthy foods and their associated health risks and basic health information such as height, weight, level of activity, and known medical issues, in order to get a sampling of the community's current level of nutritional knowledge and health. OSA will also administer pre/post surveys to participants in the workshops to evaluate changes in knowledge, attitudes, and behaviors about healthy nutrition over the course of the program (e.g., increased ability to read nutrition labels, increased consumption of water, and decreased consumption of unhealthy foods).

**3. EVALUATION PLANS**

*All contractors participate in process evaluation per their Scope of Work activities. Contractors must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**4. COORDINATION EFFORTS** (max. 100 words)

The Office of Samoan Affairs (OSA) will contact County UC-FSNEP offices to ensure that there is no overlap of Network-OSA and SNAP-Ed programs, attend CNAP Regional Collaboratives, and attend staff meetings at local departments of social services/health/education, in order to coordinate all Network-OSA efforts and establish program efficacy. OSA will utilize existing contacts with local government offices to facilitate participation in staff planning meetings. OSA will coordinate with established partnerships with faith-based organizations to identify new sites for Network service delivery and will acquire MOUs with organizations willing to provide complimentary Network services (e.g., field trips to farmer's markets).

**The Office of Samoan Affairs** provided a sampling of the churches we have partnerships with and their Network eligibility through qualifying census tracks. As proposed in the RFA, OSA will work to identify CalFresh, WIC, Farmer’s Markets, and other community agencies to work with that meet Network eligibility. The individual homes listed will be Tier 1 CACFP providers under our Sponsorship (which meet Network eligibility through FRPM school districting), and the locations of the community festivals are not known at this time.

**Projected Number of Unduplicated Participants: 2500**

**Narrative** (max. 200 words)

The “Healthy Gold Coast Project” aims to create healthy and sustainable communities through empowerment and engagement of the SNAP-Ed eligible populations in Ventura, Santa Barbara, and San Luis Obispo counties. The Healthy Gold Coast Project will recruit and train “Champion” individuals throughout the tri-county area to serve as leaders and advocates for healthy lifestyles within their respective communities. The project will collaborate with various partners agencies (faith-based groups, social service agencies, retailers and community based organizations), in order to lend support and link vital resources to SNAP-Ed families. The Healthy Gold Coast Project aims to increase access and consumption of healthy foods by creating more opportunities to make healthier food choices and addressing barriers the target population faces such as transportation and limited access to resources. The project aims to decrease the consumption of less healthy foods and beverages and increase consumption of water by emphasizing nutrition education and social marketing. In order to address the rates of physical inactivity and lack of access to physical activity spaces, the project will emphasize education, community empowerment and link support and resources to ensure ongoing physical activity.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

X Project is new.

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See Master Educational Materials list submitted in State plan.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators.** (max. 100 words)

The Healthy Gold Coast Project will utilize the following as key performance measures: Activity Tracking Form (ATF), sign-in sheets, training agendas, social media account profile, copies of media coverage, and Partnership Agreement and/or Plan of Action. Thus, indicating increased access and consumption of healthy foods and water as well as an increase in physical activity opportunities .

---

**3. EVALUATION PLANS**

*All contractors participate in process evaluation per their Scope of Work activities.*

*Contractors must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that*

*directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

---

**4. COORDINATION EFFORTS** (max. 100 words)

In order to promote healthy sustainable food environments, the project will collaborate with existing retailers and entities to increase access to healthier foods by bringing resources to the SNAP-Ed eligible community. For example, the project plans to work with local retailers and food vendors to promote “store to door” transportation and delivery systems, which would allow healthier food options to be accessible to the community. Various partner agencies e.g. Santa Barbara Public Health (SBPH), First 5, Dignity Health West, WIC, and CalFresh will be involved in the implementation of this project.

**d. Project Description.**

Key Methods:

- Advisory Council/Task Force (specify): Create a community leadership team for the four-county region that empowers parents and residents to advise the project and advocate for the priorities within the larger community
- Internet/Web Sites-website address: [www.sccasc.org](http://www.sccasc.org) and [www.region5afterschool.org](http://www.region5afterschool.org)
- Print Media
- Radio: PSA’s on local Latino stations and regional stations
- TV: PSA’s on local Latino stations (Telemundo) and regional stations
- Multi-level approaches that include environmental supports
- Nutrition Education Classes: (5120 occurrences at 2816 hour(s) each)
- Community Education Events: (128 occurrences at 128 hour(s) each)
- Training/Workshop/Conference: (153 occurrences at 168 hour(s) each)
- Point of Purchase: (\_\_\_\_\_ occurrences at \_\_\_\_\_ hour(s) each)
- Other (specify) Text Campaign: (24 occurrences at 1/60 hour(s) each)

Key Educational Messages: All messages will align with the Dietary Guidelines for Americans 2010 and MyPlate. Messages will specifically focus on balancing calories, increasing the consumption of healthy foods and decreasing the consumption of fat, salt and sugar

Delivery Sites by Type of Setting:

- |   |  |
|---|--|
| <b>Adult Education &amp; Job Training Sites</b>   | <b>Other Youth Education Sites (includes Parks and Recreation)</b> |
| _____ Libraries   | _____ Public Housing   |
| _____ CalFresh Offices  | _____ Schools – students (Preschool)                               |
| _____ Churches  | _____ Schools – students (K-12)                                    |
| _____ Community Centers   | 128 Schools – students (Afterschool Program)                       |
| _____ Elderly Service Centers   | 128 Schools – Parents  |
| _____ Emergency Food Assistance Sites (includes Food Banks, Food Pantries, and Soup Kitchens) | _____ Shelters/Temporary Housing                                   |

| _____ Individual Homes  |  |

\_\_\_\_\_ Other (specify): \_\_\_\_\_

**\* Reminder: Every non-school site noted above must be listed with address and census tract separately on the Census Tract Data Sheet.**

**Projected Number of Unduplicated Participants: 17,216**

**Narrative** (max. 200 words)

**The YMCA of Silicon Valley** (The Y) is applying for *Network Local Project* funds for ***Comida Sana, Vida Activa (Healthy Food, Active Life)***, which will leverage partnerships among afterschool program providers in Region 5 of the California Afterschool Network, serving Santa Clara, Santa Cruz, San Benito and Monterey Counties. Our multifaceted approach targets individuals, social groups, organizations, environments, and systems to build the capacity of afterschool providers, from provider leadership to Site Coordinators through line staff, to work effectively with school and district administration, children, families, and the community. The Y, which operates 60 afterschool programs (ASPs) in Santa Clara County, is a regional leader in promoting and modeling physical activity, nutrition education, and food security as integral elements of its ASPs, and in leveraging ASPs’ grass-roots, community-based relationships to create change at school and in the community. ***Comida Sana, Vida Activa*** aims to expand and systematize the Y’s approach throughout Region 5, in partnership with the Region’s Afterschool training and technical assistance team. We are targeting 128 ASPs, with at least 9,216 mostly low-income Latino students. We will also reach at least 8,000 family members through nutrition education; increasing access to healthy foods; and opportunities for physical education.

**e. Summary of Research.**

*See Section A.*

**f. Modification of Project Methods/Strategies.**

Project is new.

*All future modifications will be approved by the Network.*

**g. Use of Educational Materials.**

*See Master Educational Materials list submitted in State plan.*

**h. Development of New Nutrition Educational Materials.**

*No new nutrition educational materials will be developed with Network funds.*

**i. Key Performance Measures/Indicators.** (max. 100 words)

*Comida Sana, Vida Activa* aims to (1) Increase the number of afterschool program (ASP) sites providing CACFP/SFSP meals; (2) Provide direct evidence-based nutrition education to at least 9,216 students in 128 ASPs; (3) Have 128 ASPs commit to providing 150 minutes of moderate to vigorous physical activity for all participants each week (4) Provide at least 128 Healthy Family events; (5) Engage in a comprehensive education campaign using text, social media, and newsletters; (6) Build capacity among ASP staff and leadership to effect healthy change (e.g. increasing access to affordable produce, developing afterschool wellness policies) in afterschool and school environments.

**3. Evaluation Plans**

*All contractors participate in process evaluation per their Scope of Work activities. Contractors must participate in Impact/Outcome Evaluation. Impact/Outcome Evaluation measures the effectiveness of an intervention by assessing behavior change or the factors that directly influence behavior change primarily focusing on nutrition education and obesity prevention.*

**4. Coordination Efforts (max. 100 words)**

**The YMCA of Silicon Valley (YMCA SV)** is applying for *Network Local Project* funds for **Comida Sana, Vida Activa (Healthy Food, Active Life)**, which will leverage partnerships among afterschool program providers in Region 5 of the California Afterschool Network, serving Santa Clara, Santa Cruz, San Benito and Monterey Counties. *Comida Sana, Vida Activa* also leverages existing partnerships with County Offices of Education, county Departments of Public Health, school districts, and effective nonprofits such as YMCAs throughout the region as well as Team CA for Healthy After Schools and the Healthy Behaviors Initiative

# STATE LEVEL PROJECT SUMMARY FORM

FFY2014

## NEOP ADMINISTRATION

### 1. GOALS & OBJECTIVES (See State Level Objectives)

### 2. Project Title: NEOP ADMINISTRATION

#### a. Related State Objectives

Related State Objectives include 1-4

#### b. Audience

Local grantees that provide nutrition education to all ages and ethnicities of Californians participating in the CalFresh Program and SNAP-Ed-eligibles at 185% or below the Federal Poverty Limit (FPL). See Project Summaries in Section B for specific audience characteristics in each contract, and Section D, Budget for complete list of all local projects.

#### c. Focus on FSP Eligibles

All of the program activities by USDA SNAP-Ed local contractors are designed to reach SNAP-Ed-eligible consumers and their families where they learn, work, shop, worship, live and receive other services.

##### Income Targeting Data Sources

Site verification of 50 percent or greater SNAP-Ed-eligible persons participating in program activities is based on the following data sources:

##### Primary: **Nutrition Education and Obesity Prevention Branch (NEOPB)**

American Communities Survey (ACS) Census Tract Data-all races at 185% FPL  
ACS Census Tract Data at 100% FPL for specific race/ethnicities. California Department of Education (CDE) Free/Reduced Price Meal Participation rates and CDE Child and Adult Care Food Program (CACFP) participation rates when applicable.

Secondary: Percentage participation for location-based proxy sites for "Likely FSP Eligibles" include food banks, food pantries, food stamp offices, Head Start, public housing, shelters/temporary housing, soup kitchens, TANF Job Readiness Program; percentage participation for location based proxy site for "Potential Eligibles" is WIC offices); other agency specific income data.

See project summaries in Section B, a. Local Project Summaries for expanded income targeting data for each contractor.

#### d. Project Description

##### Summary:

NEOPB staff will continue to provide administrative and fiscal support and oversight at the State and local levels to local grantees to assure administrative and fiscal compliance with the USDA *Guidance* and SNAP-Ed Plan.

### Key Strategies:

1. Develop request for application (RFA) for FFY 2014 NEOPB *Plan* for local grantees to conduct solicitation and provide contractors with teleconference trainings on the RFA forms in the solicitation package; review and approve federal share program and fiscal documents, assuring SNAP-Ed income targeting.
2. Provide face-to-face orientation on NEOPB policies and procedures to new local project staff and refresher orientations as necessary to accommodate continuing local project staff.
3. Plan and conduct annual trainings (face to face, web-based and teleconference) to continuing agencies on fiscal policies and procedures. This includes a training calendar/curriculum and Power Point presentations, four NEOPB fiscal and program trainings in northern and southern California. Training curriculums are then posted on the NEOPB website.
4. Maintain a Fiscal Compliance function for all SNAP-Ed funded contracts. Monitor and provide continuous technical assistance to 100% of contracts to ensure administrative and fiscal accountability throughout FFY 2014.
5. Participate in quarterly interactive all-contractor teleconferences to communicate NEOPB, CDSS, and USDA updates, new program resources, and policy clarifications.
6. By September FFY 2014, a majority of LHD Fiscal/Administrative Orientation visits will be completed for the Local Health Departments. A fiscal monitoring process that will include a combination of on-site and desk reviews will be conducted and follow up reviews will occur as needed. This will ensure Corrective Action Plans developed by SNAP-Ed funded projects were implemented to verify priority findings from fiscal reviews have been addressed.
7. Contract Managers will review and analyze all annual and final contractor progress reports submitted and perform contract close outs on expiring contracts.
8. Continue working with SNAP-Ed LHD Advisory group to; a) to improve state/regional/local communications and administrative streamlining; b) through subcommittee address findings from the USDA ME Administrative Review conducted during FFY 2013; c) leadership development through technical assistance and training to increase program management capacity; and; d) facilitate state/regional program planning and coordination.
9. Contract Managers will follow-up on issues identified during fiscal site visits and/or desk reviews, and annual progress reports to ensure fiscal compliance and identify opportunities for technical assistance.
10. Respond to CDPH, CDSS and USDA technical inquiries.

Key Educational Messages for Contractors:

1. Successful projects require compliance with SNAP-Ed Plan *Guidance*.
2. Documentation and time reporting of SNAP-Ed expenditures is required for reimbursement.

Intervention Sites:

Local grantee intervention sites include community locations, school districts, county offices of education, local health departments, WIC offices, community settings in qualifying census tracts. See project summaries in Section B, a. Local Project Summaries for expanded intervention site data on each contractor.

Projected Number of Contacts:

Direct Contacts: 2.2 million SNAP-ED eligibles through local contractors.

**e. Summary of Research**

Results of most recent statewide surveillance data and individual contractor evaluation results are used to provide guidance to local contractors to improve SNAP-ED in their communities.

**f. Modification of Project Methods/Strategies**

Project methods and strategies have been modified to address corrective action workplan from the 2006 Administrative Review as outlined in FFY 2007 Plan, this will continue Program improvement into FFY 2013. See project summaries in Section B,a. Local Project Summaries for expanded project methods/strategies data for each contractor.

**g. Use of Existing Educational Materials**

All of the following materials will be updates to existing materials, produced in English and posted or linked on the NEOPB website with the exception of the staff Desk Manual which will be placed in prospective staff cubicles. These materials are developed by state staff for NEOPB contractors; they address guidelines both from USDA and the CDPH Contract Management Unit and include the following:

- Fiscal Guidelines Manual (semiannual updates)
- Contract Manager Desk Manual
- Fiscal Policy and Procedures Manual
- Contractor Performance Improvement Tool

See project summaries in Section B, a. Local Project Summaries for expanded educational materials data on each contractor.

**h. Development of New Educational Materials**

See project summaries in Section B, a. Local Project Summaries for expanded educational materials data on each contractor.

**i. Key Performance Measures/Indicators**

Completion of Key Strategies by state staff, including site visits and fiscal visits as outlined in d. Project Description, Key Strategies, paragraph 6 and 7 by *Network* staff. See project summaries in Section B, a. Local Project Summaries for key performance measures/indicators on each local contractor.

**j. Evaluation Plan**

Process (internal): GIFTS, an internal tracking system, provides status reports on Program and Contract Manager site visits, communications, invoicing, Request for Application (RFA) documents, progress report analyses, etc.;

Process (contractor): see annual SAAR data for contractor reach

Outcome (contractor): see REU Project #2 for Impact/Outcome Evaluation conducted by local contractors

Evaluations of contractor training activities include: surveys of participants in annual fiscal and program trainings for local contractors; surveys of local agency participants in local/regional contractor orientations and subject matter trainings/workshops. Evaluation Tools: GIFTS status reports, Web Based Survey Software, training surveys (participant satisfaction), SAAR reports

**k. Coordination Efforts**

NEOPB will continue coordination with USDA funded programs, namely WIC, CDE, UC-FSNEP and the California Department of Social Services. NEOPB staff are active partners in the State Nutrition Action Plan (SNAP). NEOPB continues to work with both internal and external partners and Regional Networks to promote consistent nutrition education messages to CalFresh participants and other SNAP-ED eligible audiences, to conduct activities that promote increased consumption of fruits and vegetables, increased physical activity and increased access to healthy foods. Through FANOut, NEOPB continues to work with the USDA Western Regional Office, local agencies, advocates, and other nutrition education and food security stakeholders, including local California Welfare Directors Association, California Association of Food Banks, America's Second Harvest and California Food Policy Advocates on nutrition education and CalFresh promotion. See project summaries in Section B, a. Local Project Summaries for coordination efforts of each contractor.

**STATE LEVEL PROJECT SUMMARY FORM**  
**CHAMPIONS FOR CHANGE Rx: BUILDING A STRONG INTERFACE BETWEEN**  
**COMMUNITY AND HEALTH CARE INTERVENTIONS TO PREVENT AND REDUCE**  
**OBESITY AMONG LOW-INCOME CALIFORNIANS**

**FFY 2014**

**1. Goals & Objectives** (See *State Level Objectives*).

**2. Project Title:** Champions for Change Rx: Building a Strong Interface between Community and Health Care Interventions to Prevent and Reduce Obesity among Low-income Californians

**a. Related State Objectives:**

Related State Objectives include 1, 2, 3, and 4

**b. Audience**

Gender: Female and Male

Ethnicity: All races and ethnicities

Languages: English and Spanish

Ages: Adults, especially SNAP-Ed eligible women with children, and SNAP-Ed and Medi-Cal intermediaries who serve this audience

**c. Focus on SNAP Eligibles**

As described in the Narrative Summary below, a total of five roundtable discussions will be conducted in northern, central, and southern California with SNAP-eligible Medi-Cal members. Income eligibility will be verified by the roundtable discussion participants at the time of recruitment. In addition, key informant interviews will be conducted with representatives from Medi-Cal managed care plans and provider groups, as well as *Network* state and Local Health Department leaders. The Medi-Cal managed care plan representatives and provider groups will serve more than 50% SNAP-eligible Medi-Cal members in their practices and the *Network* state and Local Health Department leaders will serve SNAP-eligible Californians as part of their routine scope of work.

**d. Project Description**

Key Strategies: Key strategies will be based upon the formative research results of this project. See the Narrative Summary below for a description of Champions for Change Rx.

Key Educational Messages: Key educational messages will be based upon the formative research results of this project and will be consistent with *Network* messages (e.g., childhood obesity prevention, chronic disease and obesity prevention, dietary quality, fruits and vegetables, healthy beverage promotion, healthier eating (general), cooking skills, physical activity promotion (integrated with nutrition education), food

shopping/preparation, and CalFresh promotion (brief promotional message). See the Narrative Summary below for a description of Champions for Change Rx.

Intervention Sites:

Health care delivery organizations and community sites will be identified based upon the formative research. See the Narrative Summary below for a description of Champions for Change Rx.

Projected Number of Contacts:

Direct (unduplicated) Contacts: 40 SNAP-Ed eligible Medi-Cal members reached through 5 roundtable discussions in northern, central, and southern California. See the Narrative Summary below for additional details.

Narrative Summary:

**Problem Statement**

The California Department of Health Care Services' (DHCS) mission is to preserve and improve the health of all Californians by operating and financing programs that deliver vital health care services to approximately 8.3 million individuals including low-income families and children, seniors and persons with disabilities, children in foster care, pregnant women, and those with certain diseases and conditions. These services include medical, mental health, substance use treatment, and long-term care.

As part of DHCS' commitment to deliver high-quality care, an assessment was conducted from April-October 2012 to inventory all Departmental quality improvement (QI) efforts in the areas of clinical care, health promotion and disease prevention, and administration.<sup>1</sup> Although a wide variety of QI activities was reported in the areas of clinical care and administration, little activity was noted in the area of health promotion and disease prevention. Most notably, there was an absence of QI activities in the areas of healthy eating, physical activity, and obesity prevention despite the high rates of overweight and obesity among children (29.6%), adolescents (35.2%), and adults (65.7%) enrolled in the Department's largest program, Medi-Cal. The results of the assessment provided a call to action to develop, implement, evaluate, and sustain a comprehensive obesity prevention program that links the many facets of the health care system to the *Network's* existing community-based efforts. At this time, unfortunately, there are no programmatic funds available for such a program.

**Background**

DHCS programs integrate a broad spectrum of care primarily via Medi-Cal, a federal/state partnership serving individuals and families who meet defined eligibility requirements. Medi-Cal services are delivered by more than 400 hospitals, approximately 130,000 doctors, pharmacists, dentists and other health care providers, and 21 managed care plans. Of the 8.3 million Medi-Cal members currently served by DHCS, over 7.2 million (88%) have annual household incomes that are at or below 185% of the Federal Poverty Level. This income criterion is consistent with SNAP-Ed.

To accelerate advancements in care, DHCS recently produced the *Strategy for Quality Improvement in Health Care (Quality Strategy)*.<sup>2</sup> The *Quality Strategy* establishes goals, priorities, and guiding principles, as well as highlights existing and emerging DHCS QI initiatives to improve health and patient care, and reduce costs. It aligns with the *National Strategy for Quality Improvement in Health Care*<sup>3</sup> and reflects the best evidence-based practice known to date in the areas of patient safety, care delivery, person and family engagement, communication and coordination of care, prevention, healthy communities, and elimination of health disparities.

Given the large number of SNAP-Ed eligible individuals reached through Medi-Cal and DHCS' newly-established commitment to QI in the areas of prevention and healthy communities, DHCS is interested in collaborating with the *Network* to conduct formative research, develop, and then pilot test a program to link obesity prevention efforts among SNAP-Ed eligible Medi-Cal members in the health care setting with the *Network's* community-based interventions. The purpose of the program will be to reduce the risk and prevalence of overweight and obesity among SNAP-Ed eligible Medi-Cal members and reduce projected health care costs.

The initial phase of the project will be to conduct formative research and develop the components of the pilot program from October 1, 2013-September 30, 2014, in collaboration with the *Network*. The aims of the formative research and program development phase are to:

- Identify feasible, sustainable, age- and culturally-appropriate obesity prevention approaches in the health care setting that can be delivered to SNAP-Ed eligible Medi-Cal members;
- Identify tested *Network*/SNAP-Ed tools, resources, materials, and communication methods that can be applied to the health care setting;
- Identify efficient and effective ways to drive SNAP-Ed eligible Medi-Cal members to participate in *Network* community-based interventions where they live, work, learn, worship, play, make food and physical activity decisions, and become involved in community empowerment efforts.
- Develop and produce a pilot program and evaluation plan designed to reduce the risk and prevalence of overweight and obesity among SNAP-Ed eligible Medi-Cal members and reduce projected health care costs.
- Develop the components of the pilot program in preparation for pilot program implementation and formal evaluation in Federal Fiscal Year (FFY) 2015.

## **Implementation Partners**

This proposal incorporates the complementary strengths of three partners: the California Department of Public Health (CDPH), DHCS, and the University of California, Davis, Institute for Population Health Improvement (IPHI). In July 2007, the Department of Health Services split into DHCS and CDPH to enable each department to focus on health care and public health, respectively. However, both departments are dedicated to improving the health of all Californians and work closely on specific areas such as:

chronic disease prevention and management; elimination of health disparities; advancing prevention; and building healthier communities.

In 2011, DHCS initiated a five-year, interagency agreement with IPHI to provide technical assistance, including on-site staffing, to help the Department advance the Triple Aim of: improved health, improved care, and reduced cost. IPHI is directed by Kenneth W. Kizer, MD, MPH, Distinguished Professor, UC Davis School of Medicine and the Betty Irene Moore School of Nursing. Dr. Kizer is an internationally-known expert in public health, health care quality, and system redesign and a member of the Institute of Medicine. He is credited with the transformation of the Veterans Administration Health Care System into one of the nation's preeminent health systems. Prior to this work, Dr. Kizer served as Director of the California Department of Health Services where he fostered the development of the 5-a-Day Program and the internationally-known Tobacco Control Program. This proposal includes IPHI as the subcontractor with DHCS. Under Dr. Kizer's leadership, IPHI staff are highly qualified to assist DHCS in carrying out the scope of work for this project, which requires expertise in population health, system redesign, program development, and evaluation.

## **Scope of Activities**

### Task 1

In collaboration with *Network* state and Local Health Department staff, identify and compile a list of tested *Network*, MyPlate, and other SNAP-Ed tools, materials, and community-based intervention approaches that could apply to the health care setting and be implemented widely with Medi-Cal members using DHCS distribution channels, including hospitals, clinics, pharmacists, and managed care plans.

Date: October-December 2013

### Task 2

Conduct a minimum of 25 key informant interviews with representatives from Medi-Cal managed care plans and provider groups, as well as *Network* state and Local Health Department leaders to identify feasible, sustainable, age- and culturally-appropriate obesity prevention approaches in the health care setting and identify ways to link Medi-Cal members with the *Network's* community-based approaches where they live, work, learn, worship, play, make food and physical activity decisions, and become involved in community empowerment efforts.

A broad array of health care, community-based, and technological approaches will be vetted with the key informants including, but not limited to: First Lady Michelle Obama's *Let's Move—Health Care Providers*,<sup>4</sup> the American Medical Association expert committee recommendations on the assessment, prevention, and treatment of child and adolescent overweight and obesity,<sup>5</sup> the *Let's Go! Childhood Obesity Resource Toolkit for Healthcare Professionals*,<sup>6</sup> the California Medical Association Foundation's Obesity Provider Toolkits,<sup>7-8</sup> and various *Network*, MyPlate, and other SNAP-Ed resources. A variety of ways to link SNAP-Ed eligible Medi-Cal members to the *Network's* community-

based interventions will also be explored, including the use of targeted social media and web-based applications, referral by health care providers, and more.

After the key informant interviews have been conducted, the results will be analyzed and a report of the findings and recommendations will be produced.

Date: October 2013-March 2014

### Task 3

Conduct a total of five roundtable discussions with SNAP-Ed eligible Medi-Cal members in northern, central, and southern California to identify obesity prevention approaches in the health care setting that would best meet their needs. In addition, identify ways to create an effective link between obesity prevention in the health care setting and *Network* community-based interventions. The roundtables will explore questions such as: What resources, assistance, or types of content related to nutrition and physical activity would most likely be useful in the health care setting? What channels, formats, or delivery modes would be most effective (e.g., 1-on-1 counseling, classes, support groups)? What are specific ways the health care system could support community-based prevention activities? The results of the roundtable discussions will be analyzed and a report of the findings and recommendations will be produced.

This developmental work to better understand local differences is necessary for a number of reasons. First, the Medi-Cal population is quite diverse with respect to urban/rural residence, race/ethnicity, language and culture. Second, the Medi-Cal Program is the largest in the U.S. with 8.5 million members and is delivered through a health care network which varies, significantly, across the state. There are over 20 individual health plan contracts, a significant fee-for-service network, large multi-specialty medical groups, small practices, as well as federally qualified health centers. Third, there is a major expansion of Medi-Cal eligibility supported through the Affordable Care Act. One and one-half to two million more Medi-Cal members will be enrolled in the next few years. This expansion is driving significant redesign of the health care system including the rapid growth of patient-centered medical homes, improved chronic disease management, and enhanced working relationships between health care and community services.

The proposed roundtable discussions across the state will enable the development of programs for SNAP-Ed-eligible Medi-Cal members that are tailored to the varied needs and environments described above.

Date: October 2013-March 2014

### Task 4

In collaboration with *Network* state and Local Health Department staff, identify and compile a list of communities in California that could serve as pilot test sites for future health care/community intervention testing. The pilot test sites should have: well-coordinated, evidence-based *Network* activities; campaigns, programs, and

collaboratives that reach SNAP-Ed eligible families; a high prevalence of overweight and obesity; Medi-Cal managed care plans that support the implementation of prevention approaches in health care settings and community-based linkages; and Medi-Cal managed care plans that are able to efficiently and effectively provide aggregate health data to monitor the outcomes of the pilot test.

Date: October 2013-January 2014

#### Task 5

Based on Tasks 1-4, develop and produce a pilot intervention and evaluation plan aimed at reducing the risk and prevalence of overweight and obesity among SNAP-Ed eligible Medi-Cal members and reducing projected health care costs, with an emphasis on those that suffer the effects of overweight and obesity (e.g., Medi-Cal members with metabolic syndrome, type 2 diabetes, and cardiovascular disease). DHCS will collaborate with the *Network's* Research and Evaluation Unit to develop the evaluation plan based upon the Western Region SNAP-Ed Nutrition, Physical Activity, and Obesity Prevention Outcomes Evaluation Framework, 2013. DHCS will submit the plan for *Network* approval and prepare for intervention and evaluation execution in FFY 2015.

In FFY 2015 and depending upon the availability of funds, DHCS plans to conduct an evaluation to determine the effects of health care and community interventions, which will be informed by the activities in this proposal, on selected measures among SNAP-Ed eligible Medi-Cal members. Anticipated measures for the FFY 2015 evaluation include diet and physical activity behaviors and behavioral predictors, Body Mass Index, hemoglobin A1C, lipid levels, blood pressure, patient satisfaction, quality of life, and projected health care cost estimates using a sophisticated modeling program known as Archimedes. Other measures may include: practice changes among health care organizations, improved access to obesity prevention interventions by SNAP-Ed eligible Medi-Cal members and their families, and commitment of resources in the health care sector for nutrition and physical activity.

If the project is able to demonstrate improvement in health behaviors and outcomes in a cost-effective fashion, the program will be broadly implemented across the Medi-Cal health care delivery system. Based on the experience of the implementation partners and the care with which the formative research will be conducted, we believe that the program will likely produce significant value for SNAP-Ed-eligible Medi-Cal members and for those organizations that deliver the program.

Date: March-May 2014

#### Task 6

Based on the *Network*-approved pilot intervention and evaluation plan, develop and assemble the following pilot program and evaluation components:

- Confirm health care and community pilot test sites and partners.
- Confirm logistics of participant recruitment for the pilot test.

- Assemble health care program intervention pieces and materials. DHCS is planning to use existing *Network/My Plate/SNAP-Ed* materials and health care obesity prevention tools to the greatest extent possible.
- Develop methods to motivate and drive SNAP-Ed eligible Medi-Cal members to *Network* interventions at the community level. The methods will be based upon the findings of the formative research.
- Develop draft evaluation instruments and methods to secure health data. As noted above, health data will include, but may not be limited to the following: diet and physical activity behaviors and behavioral predictors, Body Mass Index, hemoglobin A1C, lipid levels, blood pressure, patient satisfaction, quality of life, projected health care cost estimates using the Archimedes modeling program, practice changes among health care organizations, improved access to obesity prevention interventions by SNAP-Ed eligible Medi-Cal members and their families, and commitment of resources in the health care sector for nutrition and physical activity.
- Prepare for the launch of the pilot test in FFY 2015.

Date: June-September 2014

### **Reaching SNAP-Ed Consumers**

The formative research phase of Champions for Change Rx is designed to inform the development of a health care/community pilot program that meets all USDA targeting criteria and specifically reaches the SNAP-Ed eligible population.

### **Maximizing SNAP-Ed's Impact**

The formative research phase of Champions for Change Rx is designed to inform the development of a health care/community pilot program that leverages and maximizes all possible connections between the *Network* and DHCS' large-scale, statewide, population health system.

### **Strength through Collaboration**

Champions for Change Rx is designed to stimulate synergy among CDPH, DHCS, Local Health Departments funded by the *Network*, the extensive Medi-Cal health care delivery system in California, and SNAP-Ed eligible Medi-Cal members.

#### **e. Summary of Research**

The results from the key informant interviews and roundtable discussions will inform the development of the Champions for Change Rx pilot program and evaluation plan.

#### **f. Modification of Project Methods/Strategies**

Champions for Change Rx is a new project; as such, no modifications to the project methods/strategies are requested.

### **g. Use of Existing Educational Materials**

As described in the Narrative Summary in Tasks 1 and 2, DHCS staff, in collaboration with *Network* state and Local Health Department staff, will identify and compile a list of tested *Network*, MyPlate, and other SNAP-Ed tools, materials, and community-based intervention approaches that could apply to the health care setting and be implemented widely with SNAP-Ed eligible Medi-Cal members using DHCS distribution channels, including hospitals, clinics, pharmacists, and managed care plans.

In addition, during the key informant interviews, a broad array of health care, community-based, and technological approaches will be vetted with the key informants including, but not limited to: First Lady Michelle Obama's *Let's Move—Health Care Providers*,<sup>4</sup> the American Medical Association expert committee recommendations on the assessment, prevention, and treatment of child and adolescent overweight and obesity,<sup>5</sup> the *Let's Go! Childhood Obesity Resource Toolkit for Healthcare Professionals*,<sup>6</sup> the California Medical Association Foundation's Obesity Provider Toolkits,<sup>7-8</sup> and various *Network*, MyPlate, and other SNAP-Ed resources.

### **h. Development of New Educational Materials**

None planned.

### **i. Key Performance Measures/Indicators**

Formative research results for Champions for Change Rx will help inform the development of the pilot program and evaluation plan.

Key performance measures/indicators for the future pilot program evaluation in FFY 2015 may include, but are not limited to: diet and physical activity behaviors and behavioral predictors, Body Mass Index, hemoglobin A1C, lipid levels, blood pressure, patient satisfaction, quality of life, projected health care cost estimates using the Archimedes modeling program, practice changes among health care organizations, improved access to obesity prevention interventions by SNAP-Ed eligible Medi-Cal members and their families, and commitment of resources in the health care sector for nutrition and physical activity.

## **3. Evaluation Plan**

An evaluation plan will be developed based upon the formative research results for Champions for Change Rx.

As noted previously, in FFY 2015 and depending upon the availability of funds, DHCS plans to conduct an evaluation to determine the effects of health care and community interventions, which will be informed by the activities in this proposal, on selected measures among SNAP-Ed eligible Medi-Cal members. Anticipated measures for the FFY 2105 evaluation include diet and physical activity behaviors and behavioral predictors, Body Mass Index, hemoglobin A1C, lipid levels, blood pressure, patient

satisfaction, quality of life, and projected health care cost estimates using the Archimedes modeling program. Other measures may include: practice changes among health care organizations, improved access to obesity prevention interventions by SNAP-Ed eligible Medi-Cal members and their families, and commitment of resources in the health care sector for nutrition and physical activity.

If the project is able to demonstrate improvement in health behaviors and outcomes in a cost-effective fashion, the program will be broadly implemented across the Medi-Cal health care delivery system. Based on the experience of the implementation partners and the care with which the formative research will be conducted, we believe that the program will likely produce significant value for SNAP-Ed-eligible Medi-Cal members and for those organizations that deliver the program.

#### **4. Coordination Efforts**

Champions for Change Rx is designed to stimulate synergy among CDPH, DHCS, Local Health Departments funded by the *Network*, the extensive Medi-Cal health care delivery system in California, and SNAP-Ed eligible Medi-Cal members. To our knowledge, this is the first time that CDPH and DHCS have connected their large-scale program and health care systems to reduce the prevalence and risk of overweight and obesity among the low-income populations they serve. This new collaboration is consistent with other large-scale partnerships that DHCS has forged in the last year. For example, DHCS and CDSS have established a partnership to increase CalFresh enrollment among the 1.2 million Medi-Cal members who are eligible but not currently enrolled in the nutrition assistance program. CDSS and DHCS have identified and are implementing a variety of ways to promote CalFresh through Medi-Cal and connect the two systems at the time of health care enrollment and recertification.

**USDA  
POSITION DESCRIPTIONS**

<b>Position Number</b>	<b>USDA Position Title</b>	<b>LHD Position Title</b>	<b>Position Description</b>
1	Accountant/Finance Analyst		Serves as internal auditor and controller. Assists with processing purchase orders, invoices, preparation of vouchers for payment as related to the Network program, as well as monitoring the budgets.
2	Administrative Coordinator		Provides administrative and office support for the project staff and is responsible for the reporting requirements.
3	Administrator (e.g., Director of Programs)		Administer the nutrition education grant agreement and budget, supervising nutrition education staff, attend nutrition education and scope of work related meetings, program planning and participating in the Regional collaborative. Coordinate grant agreement reporting requirements.
4	After School Coordinator/Assistant		Plan and facilitate nutrition education activities for recreation programming, in after school setting for different age groups of children; seniors, teen; special populations, such as mothers with young children and families; nutrition education for special events and workshops. Prepare instructional plans for youth camps and field trips; and nutrition education for special events and workshops. Prepare instructional plans for nutrition activities, collect data related to nutrition education programming, prepare documentation for nutrition education grant agreement; and helps prepare interim and final progress report .
5	Chief Executive Officer		Provides overall guidance for the operations, personnel, and fiscal responsibilities required by the nutrition project.
6	Community Liaison		Conducts nutrition education, physical activity promotion interventions in the community setting. Works with Community Based Organizations to increase the reach of nutrition education interventions to Nutrition Education Obesity Program eligible.
7	Computer Specialist		The Computer Specialist will provide assistance with the nutrition database and tracking system.
8	Contract Manager		Manages the nutrition education grant agreement including budgets, invoices, local share documentation reports, time studies, fiscal reporting and adherence to funding requirements.
9	Coordinator of Other Program (e.g., Teen program, Healthy Start, etc.)		Supervises, coordinates, facilitates nutrition education activities, workshops, special events related to the recreation and community center planning and working together with other community center groups. Supervises staff implementing the nutrition education grant agreement, prepares invoices, prepares and collects documentation, prepares progress reports
10	Curriculum Specialist		Develops curriculum for nutrition education and physical activity interventions in a variety of different channels/venues.
11	Database Coordinator		Develops database used to track nutrition education, physical activity and food stamp promotion interventions in a variety of channels.
12	Dental/Medical Assistant		Conduct one-on-one nutrition education interventions prior to primary care visit.
13	Dietician		Oversees and supervises the nutrition education program including project administration, project coordination, the development of the nutrition education component and materials and other nutrition and physical activity promotion programs.
14	Family Advocate		Provides nutrition education to students and their families, and recruits NEOP eligible for group nutrition/cooking classes. Provides nutrition, physical activity and food stamp promotion resources to students and their parents.

**USDA  
POSITION DESCRIPTIONS**

15	<b>Food Service Worker (e.g., Director, Manager, Asst., Server, Cook)</b>		Assists with planning and preparing healthy food taste tests in the school setting in conjunction with classroom based nutrition education intervention. Works with teachers to increase student, teacher and parent knowledge of the importance of consuming more servings of fruits and vegetables and being active daily. Compiles documentation on taste testing activities and all reporting required for nutrition grants. In some cases, supervises staff that carry out activities.
16	<b>Graphic Illustrator</b>		Develop local promotional nutrition education materials such as community flyers/ newsletters and/or to develop local nutrition/physical activity promotional/educational materials under the direction of the nutrition staff.
17	<b>Health Educator (including Health Aide, Health Promotion Instructor, etc.)</b>		Develop materials and facilitate health education in both group and individual settings. Teaches general nutrition, the importance of fruits and vegetables, and health benefits of proper nutrition and physical activity.
18	<b>Legal Counsel</b>		Assist with development of policies, approval of grant agreements and Memorandums of Understanding and providing legal advice specifically related to the implementation of nutrition education and physical activity promotion
19	<b>Medical Assistant</b>		Demonstrates safe food handling and personal hygiene to prevent food borne illness, provide nutrition-related services to staff, parents, and students and promotes physical activity within the context of nutrition education. (This does not include any medical nutrition therapy).
20	<b>Nurse/Nurse Supervisor/Nurse Aide RN</b>		Provides nutrition and physical activity promotion to students enrolled in nutrition education programs and their families. Supports nutrition education goals through interventions; local, regional, and statewide collaboration and interventions. (This does not include any medical nutrition therapy).
21	<b>Nutritionist/Nutrition Educator/Nutrition Aide</b>		Provides nutrition education to the neop eligible population. Specific duties include: one-on-one general nutrition education, delivery of general nutrition education in a classroom or group setting, staffing health fairs and other community or promotional events where nutrition education messages are delivered, distribution of linguistically and culturally appropriate nutrition education materials, documentation of educational and other encounters, assisting with writing project reports and preparation of quarterly reports, maintaining program reporting and tracking systems.
22	<b>Office Manager/Secretary/Admin Assistant</b>		Provides general clerical support to the Program. Assists in development and maintenance of a data collection system with emphasis on fiscal information. Arranges meetings and trainings, orders supplies and materials, creates correspondence, photocopies, etc.
23	<b>Pharmacist</b>		Promotes nutrition education and physical activity to NEOP eligible population through displays, distributing literature, and supervising staff to update nutrition education bulletin board.
24	<b>Physician</b>		Supervises professional staff including Dieticians, Nurses and Nutrition/Project Coordinators that provide nutrition education and promotes physical activity to NEOP eligibles in a variety of channels. Provides direction on strategic planning of nutrition and physical activity programs to NEOP eligible clients. In some cases, provides nutrition education to NEOP eligibles. (This does not include any medical nutrition therapy).
25	<b>Professor</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for the NEOP eligible community, and students with their families. Supports nutrition education Program goals and local, regional, and statewide collaboration.

**USDA  
POSITION DESCRIPTIONS**

<b>26</b>	<b>Program Assistant</b>		Assists the Project Coordinator with nutrition education program planning and development. Under the direction of Project Coordinator, works directly with individuals and small groups providing curriculum-based, prevention-oriented general nutrition education and physical activity targeted to NEOP eligibles.
<b>27</b>	<b>Project Coordinator</b>		Coordinate program staff and nutrition education activities; plan and follow through on outreach and educational events at health fairs, schools, and other promotional activities; work with schools, churches, farm worker organizations, and community organizations in planning and promoting good health through dissemination of nutrition education materials; actively acquire and develop culturally and linguistically competent nutrition curriculum and educational materials; to promote existing and/or to develop new physical activity promotional components of nutrition education; and expand our existing community outreach program to encompass nutritional components to increase community awareness and knowledge of good nutrition and healthy active lifestyles.
<b>28</b>	<b>Promotora</b>		Works with the Project Coordinator in NEOP communities to conduct nutrition education interventions and participate in local events to promote health eating and physical activity for NEOP eligibles.
<b>29</b>	<b>Recreation Leader</b>		Mentors and trains staff on integration of physical activity into nutrition education interventions. Coordinates one-time physical activity demonstrations. Chooses nutrition and physical activity resources to distribute with nutrition education interventions.
<b>30</b>	<b>Research Specialist</b>		Evaluates nutrition education, and physical activity promotion interventions in a variety of community channels. Methods can include process and impact evaluations, pre and post tests, surveys, focus/discussion roundtables, photo documentaries, case studies, etc.
<b>31</b>	<b>School Administrator (e.g., Principal, Superintendent)</b>		Provides oversight and coordination of the nutrition education conducted in participating classrooms of all schools.
<b>32</b>	<b>Teacher/Student Aide/Assistant</b>		Assists the Nutritionists, Health Educators, and Project Coordinator with nutrition education activities and community events that promote healthy eating and physical activity for low-income families, the target population, Food Stamp recipients and other similar households. 100% direct delivery of educational services.
<b>33</b>	<b>Teacher (preK-12 Classroom, PE, Speech, etc.)</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for students and their families. Supports nutrition education program goals through promotion; local, regional, and statewide collaboration; and close coordination with the Registered Dietitian to train staff.
<b>34</b>	<b>Translator</b>		Translates approved curriculum and materials into Spanish or other languages. Reviews translation for cultural appropriateness. Interprets nutrition education interventions (one-on-one and group) in the community for dietitians, health educators and others .
<b>35</b>	<b>Tutor</b>		Assist teachers and/or students with nutrition education and physical activity promotion.
<b>36</b>	<b>Web Designer</b>		Develops and maintains website containing nutrition education resources, gardening and health related topics and issues.

**STATE LEVEL PROJECT SUMMARY**  
**FFY 2014**

**1. Goals & Objectives** (*See State Level Objectives 1-4*).

**2. Project Title: Communications: Project #1 - Advertising**  
**\$12,326,726 State budget**

**a. Related State Objectives**

Related State Level Objectives include #1-4

**b. Audience**

Ethnicity: Multi-ethnic populations including African American, Latino, Caucasian, and Asian-American.

Languages: English, Spanish

Ages: 18-54 women with children living in the home

---

**c. Focus on SNAP Eligibles**

At least 50 percent of mass media impressions will be received by Supplemental Nutrition Assistance Program Education (SNAP-Ed) eligible individuals, defined as women living in households with incomes  $\leq$ 185% Federal Poverty Level (FPL). Messaging will be crafted using findings from quantitative and qualitative research conducted among low-income populations in order to ensure all information resonates with the target audience.

Income Targeting Data Source:

2011 Scarborough Research Data, Geographic Information System Census Data, American Community Survey

06-10 and 07-11.

**d. Project Description**

Key Strategies:

Sustain the Champions for Change Communication Campaign using the following strategies:

1. Implement a statewide mass advertising campaign April through September using approved television, radio, outdoor, and digital advertising directed at low-income audiences.

2. Develop Nutrition Education and Obesity Prevention (NEOP) printed and digital materials that will address barriers those low-income families encounter every day when trying to increase fruit and vegetable consumption; increasing consumption of healthy beverages and physical activity to prevent obesity.
3. Build on the *Network's* Champions for Change and Champion Mom initiative by training select local health department staff as spokespersons, and providing technical assistance for media outreach to Local Health Departments (LHD).
4. Utilize statewide public relations activities to promote *Network* messaging and the NEOP media campaign. This will include support of events in qualifying census tract. Events include but not limited to: Fruit and Veggie Fests, African American targeted events, and Latino Health Awareness Month events.

#### Key Educational Messages:

Federal Fiscal Year 2014 (FFY 14) messaging will continue to inspire moms to become Champions for Change by placing emphasis on healthy behavior change at home and in their communities. Based on qualitative and formative research, the primary intended outcomes are to increase self-efficacy and social normative beliefs as they relate to fruit and vegetable consumption, healthy beverage consumption, and physical activity. Research has shown self-efficacy and social normative beliefs to be main determinants of health behavior, and specifically fruit and vegetable consumption.

#### Intervention Sites: Statewide

#### Projected Number of Contacts:

Direct Education Contacts (unduplicated): Direct contact with SNAP-Ed individuals will be generated through the NEOP Series, the mobile text initiative, and Facebook. Until implementation testing can be conducted, direct education contact totals cannot be definitively projected.

Indirect Contacts - Mass Media: 7,000,000 (Adults 18+ years old) unduplicated contacts among <185% FPL adult target population. Duplicated indirect contacts: 997,502,000 targeted impressions received by the <185% FPL adult target population. This reach represents 56 percent of all projected 1,791,169,000 mass media impressions among total adults 18+ years old.

## Narrative Summary:

1. Implement a statewide mass advertising campaign April through September using English and Spanish television, radio, outdoor and digital advertising that effectively reaches SNAP-Ed eligible, and that will achieve U.S. Department of Agriculture's (USDA) requirement to deliver over 50 percent of purchased media impressions to individuals living in <185% FPL households. Media plans will be based on the approved strategic plan targeting California's low-income populations at or below 185% of the FPL, specifically multicultural English or Spanish dominant women with school-aged children. The media plan will conform to USDA Guidance specifying that over half of total impressions be received by California's low-income populations. Evaluation measure: The statewide *Network* Annual Tracking Survey (Benchmark) conducted via phone interviews and shopping mall intercept interviews to monitor consumer recall of *Network* advertising as well as beliefs, attitudes, and behavior related to nutrition and physical activity among eligible and SNAP-Ed recipients. (See PHI Research section)
2. The campaign will feature ads in English and Spanish, targeting low-income African American, Caucasian, and Latina moms. All advertising materials will include the USDA SNAP-Ed acknowledgement and promotion of CalFresh. A total of 16 weeks of TV will be "flighted" in order to extend advertising over a six-month period – April through September. All California media markets will receive advertising, representing coverage of just under 100 percent of California's SNAP-Ed population.
3. Develop a series of nutrition education printed and digital materials that will serve as the *Network's* primary resource for building nutrition knowledge, skills, and self-efficacy among low-income moms (working name: NEOP Series). Specifically, the materials will address cost barriers, time barriers, access barriers, family acceptance barriers, and emotional barriers that low-income families encounter every day when trying to increase fruit and vegetable consumption and physical activity. Healthy recipes will also be a core feature. New materials will be tailored to reach Multi-Cultural, African American, Latino, and Asian target groups in a culturally relevant manner.
4. Utilize statewide public relations activities to promote *Network* messaging and extend the new NEOP ads in collaboration with LHDs. This will include but not limited to supporting: Fruit and Veggie Fests in May, African American-targeted events in February and June, Power-Up Your Summer! June through August, and Latino Health Awareness Month events in September. The *Network* will participate in other events directed to low-income audiences and co-sponsored by *Network* partners such as National Public Health Week. . Events will be designed to provide low-income Californians with nutrition education and will be held in qualifying low-income census tracts.

5. Provide public relations and media relations technical assistance to *Network*-funded programs and partners on an as-needed basis and in support for promotional events held by LHD's throughout the state.
6. Build on the *Network's* Champions for Change brand and Champion Mom initiatives by training spokespeople, and providing ongoing message point and media training assistance to LHD's. Media trainings will be conducted throughout the year to train both English and Spanish-language spokespeople. Identify and/or create activities that promote *Network* messaging and the involvement of Champions for Change in the campaign.

**e. Summary of Research**

The *Network* continues to conduct an annual tracking survey that measures advertising awareness and knowledge, attitudes, and beliefs related to fruit, vegetable, and physical activity consumption and other family change behaviors. (See Research Evaluation Section Project Summary)

**f. Modification of Project Methods/Strategies**

None

**g. Use of Existing Educational Materials**

The Nutrition Series will include a library of existing educational materials, brochures, DVDs, and compilation videos.

**h. Development of New Educational Materials**

Two to four multi-media self-efficacy materials will be developed to support the Multicultural Campaign using the messaging "We're All In this Together". Existing material will be updated as more recent survey data becomes available. The need for new materials will be produced to complement LHD's efforts.

**i. Key Performance Measures/Indicators**

Key measures and indicators will include target audience direct nutrition education contacts and indirect contacts, as well as gross impressions for the SNAP-Ed target. Data from the FFY13 Benchmark Survey will be available in March 2014.

**j. Evaluation Plan**

Evaluation Type:

Formative: NEOP materials will be focus group tested. Focus groups will be conducted in Oakland, Fresno, Sacramento and Los Angeles among groups comprised of English language dominant women with school-aged children who are Caucasian, African

American, Asian or Latina, and Spanish-language dominant women with school-aged children representing no less than 18 hours of evaluation. Key diagnostic dimensions such as affect, attention, clarity, comprehension, believability, agreement, relevance, and persuasiveness form the basis of questions and probing during the focus groups.

**Outcome:** See Research Evaluation Section Project Summary.

A Benchmark Survey is conducted annually to track measurements such as campaign awareness, self-efficacy, knowledge levels, behavioral intentions, social normative beliefs, and other important measures. The Annual Tracking Survey is planned for the 2013 campaign year, and it will compare findings of SNAP recipients and eligibles to the baseline survey conducted in 2004 as well as findings from 2007-2013.

#### **k. Coordination Efforts**

All materials produced for use in FFY14 will be shared and made available to all LHDs, *Network* contractors, sister agencies in California, partners and all SNAP-Ed programs in California and other states. The *Network* will continue to coordinate with USDA on the promotion of new and updated materials including *MyPlate* icon, [www.ChooseMyPlate.gov](http://www.ChooseMyPlate.gov) website and supporting materials and resources.

The *Network* will continue efforts to infuse the Champions for Change brand into all *Network* materials produced at the state and local levels. Such coordination accelerates brand equity and saliency of *Network* messaging.

**Budget Justification  
FFY 2014  
October 1, 2013 - September 30, 2014**

**Media Contractor (TBD)**

<b>Campaign Goals</b>		
Media and Public Relations Contractors (TBD) in partnership with the California Department of Public Health (CDPH) will implement a strategic communications plan, encompassing advertising and public relations activities that will meet the primary goals of Nutrition Education Obesity Program's (NEOP) <i>Network for a Healthy California (Network) Program</i> : 1. Increase consumption of fruit and vegetables. 2. Decrease consumption of unhealthy foods and beverages; especially increase consumption of water. 3. Increase access to and participation in physical activity throughout the day. 4. Reduce food insecurity.		
<b>Objectives</b>		
<ul style="list-style-type: none"> <li>• Increase target's self-efficacy and social normative belief measures related to fruit and vegetable consumption and physical activity.</li> <li>• Increase target's awareness of dietary and physical activity recommendations.</li> <li>• Increase target's knowledge of relationship between fruit and vegetable consumption and physical activity with obesity prevention.</li> <li>• Increase target's mass media campaign aided recall measures from FFY2013.</li> <li>• Maintain ongoing relationships with LHDs via public relations efforts.</li> </ul>		
<b>Line A: Media and Advertising</b>	<b>Activity Detail</b>	<b>Budget Year 14</b>
Activity 1: <b>Strategic Planning</b>	Media Contractor (TBD) will ensure that overall communications address NEOP goals and each communication channel plays a unique, well-defined role in the overall integration of all campaign elements (as appropriate).	\$250,000
<b>Total Line A: Media and Advertising</b>		<b>\$250,000</b>
<b>Line B: Production and Distribution</b>		
Activity 1: <b>Media Plan Placement:</b> Implement a media plan that effectively delivers messaging to audiences comprised of SNAP recipients and eligibles and that will achieve USDA's requirement of delivering over 50% of purchased weight to individuals living in <185% FPL households. The 2013 plan proposes the following: a) English-language TV in Bakersfield, Chico, Eureka, Fresno, Los Angeles, Sacramento, and Santa Barbara; b) Spanish-language TV in Bakersfield, Fresno, Los Angeles, Monterey, Palm Springs, Sacramento, San Diego, and San Francisco; c) Spanish-language radio in Bakersfield, Chico, Fresno, Imperial County, Los Angeles, Monterey, Palm Springs, Sacramento, San Diego, San Francisco, Santa Barbara; d) English- and/or Spanish-language outdoor advertising located in low-income census tracts in Bakersfield, Chico, Fresno, Los Angeles, Palm Springs, Imperial County, Monterey, Sacramento, San Diego, and San Francisco. Based on proprietary research commissioned from Scarborough Research, combined media impressions received by individuals living in <185% FPL households represent 57% of all impressions. (See media placement plan: Section F)	<ul style="list-style-type: none"> <li>• Concentrate the advertising schedule in key months for higher long-term impact and recall, based on budget availability.</li> <li>• Provide more concentrated levels of advertising in media markets with the greatest composition and coverage of the target audience.</li> <li>• Utilize media vehicles that can most efficiently provide effective levels of target audience reach and frequency.</li> <li>• Media plan to meet USDA target population guidelines (51% of overall impressions to be at or below 185% FPL).</li> <li>• Coordinated added-value opportunities/radio remotes provided through media plan placement Media Placement for Invitation For Bid (IFB) \$4,270,371.85. Breakout is as follows: TV: \$ 2,453,373.10, Radio: \$ 1,461,947.40, Out of home: \$ 244,960.20, Digital: \$ 110,091.15 Breakout of remaining funds of \$4,884,086.15 will be determined after contract execution.</li> </ul>	\$9,154,458
Activity 2: <b>NEOP Creative Concept Development:</b>	Media Contractor (TBD) will develop creative concepts for both TV and outdoor executions addressing nutrition education and obesity prevention messages. Concepts will be developed for multicultural, Latino and African American and Asian targets.	\$100,000

**Budget Justification  
FFY 2014  
October 1, 2013 - September 30, 2014**

**Media Contractor (TBD)**

<p>Activity 3: <b>NEOP Nutrition Series:</b> Media Contractor (TBD) will develop multimedia nutrition education materials that build on materials developed in FFY2013.</p>	<p>The NEOP materials will address cost barriers, time barriers, access barriers, family acceptance barriers and emotional barriers that low-income families encounter everyday when trying to increase fruit and vegetable consumption and physical activity to prevent obesity. The materials will encourage trial, repeat and feedback among members of our target to encourage behavior change. New materials that are developed will be tailored to reach multicultural audiences, Latinos, African Americans and Asians in a culturally relevant manner.</p> <p>Digital access/dissemination of the curriculum will be used for scalability, availability on-demand, cost-effectiveness, updating, ease of use, viral quality, tailoring and effectiveness at developing mastery of health-related skills. Low-income mothers living at or below 185 percent of FPL will be directed to materials with very prominent, specific and motivating calls-to-action in communications materials.</p> <p>Through social media, moms who have opted into the "Champions campaign" can be sent webisodes and ongoing supportive tips to encourage trial, repeat and feedback that will encourage behavior change.</p>	<p align="right">\$400,000</p>
<p>Activity 4: <b>TV Production:</b></p>	<p>Media Contractor (TBD) will produce one multicultural advertisement in English and Spanish based on approved concepts, concept testing and SAR approval. The production of the spots will follow the standard production guidelines:</p> <ul style="list-style-type: none"> <li>- Approved work order.</li> <li>- Review and selection of a minimum of three directors to be reviewed with client with RS&amp;E recommendation.</li> <li>- Comprehensive timeline for all steps of production and SAR-approval process.</li> <li>- Casting of Champion moms.</li> <li>- Identification of shoot locations for Network approval.</li> <li>- Casting and location pre-production meeting.</li> <li>- Pre-production meeting with director and producer.</li> <li>- Shoot, edit, sound design/music.</li> <li>- Rough cut review and approval.</li> <li>- SAR approval process prior to final edit.</li> <li>- Final edit and approval.</li> <li>- As produced scripts.</li> <li>- Traffic spots.</li> </ul>	<p align="right">\$250,000</p>

**Budget Justification  
FFY 2014  
October 1, 2013 - September 30, 2014**

**Media Contractor (TBD)**

Activity 5 : <b>Mobile Text Initiative:</b>	Media Contractor (TBD) will develop a mobile text plan that will engage the Network target audience (low income mothers living at or below the 185% FPL.) Moms can opt in to receive supportive text messages, while allowing the campaign to begin an interactive dialogue. Dialogue can take many forms, the most basic of which could prompt the mom to sign up for a series of weekly reminder texts focusing on a number of topics from the NEOP series materials.	\$100,000
Activity 7: <b>Traffic Creative:</b>	Media Contractor (TBD) will distribute campaign materials to media outlets as directed by the approved media plan.	\$50,000
Activity 8: <b>Travel:</b>	Media Contractor (TBD) will keep an account of all travel expenses to support the Network for a Healthy California media campaign. Travel expenses cover the following: parking, mileage, airline tickets, hotels, meals, rental car, Amtrack or other forms of travel. All travel expenses will adhere to the Department of Personnel Administration (DPA) rates.	\$30,000
Activity 9: <b>General Charges:</b>	Media Contractor (TBD) will keep an account of all charges that support the Network for a Healthy California media campaign. General charges cover the following administrative expenses: copies, faxes, postage/overnight packages, teleconferences and telephone.	\$20,000
Activity 10: <b>Mid-Year and End-of Year Reports:</b>	Media Contractor (TBD) will develop a comprehensive mid-year and end-of year report, covering all activities that occur between October 1, 2013 and September 30, 2014. Supporting documentation will be provided.	\$1,000
<b>Total Line B: Production and Distribution</b>		<b>\$10,105,458</b>
<b>Line C: Public Relations</b>	<b>Activity Detail</b>	<b>Budget Year 14</b>
Activity 1: <b>Local Network Events:</b> Provide technical assistance and media relations support for promotional events being held by LHDs throughout the state. Events will be designed to provide low-income Californians with nutrition education and will be held in qualifying low-income census tracts.	Public Relations subcontractor (TBD) will: <ul style="list-style-type: none"> <li>• provide strategic focus and direction for the events.</li> <li>• technical assistance in the form of developing a range of media and promotional materials and providing media lists.</li> <li>• provide technical assistance by conducting media outreach (pitching) to ensure event coverage and coordinating media interviews during events, as appropriate.</li> <li>• monitor coverage and provide a wrap report for each activity.</li> </ul>	\$350,000
Activity 2: <b>Technical Assistance:</b> Provide public relations and media relations technical assistance to <i>Network</i> -funded programs and partners on an as-needed basis.	Public Relations subcontractor (TBD) will be available to provide assistance to <i>LHDs</i> , such as reviewing and providing feedback on media materials, writing template materials, providing media lists, conducting media outreach, monitoring media coverage and providing clip reports with media impressions.	\$200,000

**Budget Justification**  
**FFY 2014**  
**October 1, 2013 - September 30, 2014**

**Media Contractor (TBD)**

<p>Activity 3: <b>Media Bureau:</b> Continue media bureau operations that position <i>Network</i> spokespersons as resources for important and timely nutrition education news directed to low-income populations, primarily CalFresh participants and eligibles. Provide proactive and reactive media relations throughout the year, and monitor key public health and media sites for topics of interest for <i>Network</i> staff and LHDs.</p>	<p>Public Relations subcontractor (TBD) will conduct proactive media outreach and respond to incoming media requests. This includes developing appropriate media materials and pitching media as needed, monitoring media and general public health sites for important information and updates.</p>	\$200,000
<p>Activity 4: <b>Account Management/Strategic Counsel:</b> Provide overall account management and strategic counsel. Provide ongoing reporting and evaluation.</p>	<p>Public Relations subcontractor (TBD) will:</p> <ul style="list-style-type: none"> <li>• provide overall account management, strategic counsel and ongoing reporting</li> <li>• develop weekly status reports, monthly activity reports, a mid-year report and a year-end report</li> </ul>	\$200,000
<p>Activity 5: <b>Champions for Change:</b> Identify and/or create activities that promote <i>Network</i> messaging and the involvement of Champions for Change in the campaign.</p>	<p>Public Relations subcontractor (TBD) will:</p> <ul style="list-style-type: none"> <li>• plan and implement activities</li> <li>• create necessary materials and conduct media outreach, as needed</li> <li>• provide wrap-up reports and results for activities</li> </ul>	\$146,500
<p>Activity 6: <b>State-level Network Events:</b> Create an event and/or events that will help showcase the <i>Network</i> to statewide media. Potential event themes may include supporting the <i>Network's</i> participation in events such as: Latino Health Awareness Month, Fruit and Veggie Fest, Black Health Awareness Month, and California's annual Public Health Week.</p>	<p>Public Relations subcontractor (TBD) will:</p> <ul style="list-style-type: none"> <li>• work with the <i>Network</i> to create and implement an event or events that showcase the <i>Network's</i> efforts to statewide media.</li> <li>• plan and implement the approved activity, including coordinating any logistical needs, developing media materials and conducting media outreach to ensure coverage.</li> <li>• monitor coverage and provide a wrap-up report for the activity.</li> </ul>	\$150,000
<b>Total Line C: Public Relations</b>		<b>\$1,246,500</b>
<b>Line D: Training</b>	<b>Activity Detail</b>	<b>Budget Year 14</b>
<p>Activity 1: <b>Trainings:</b> Plan, schedule and implement at least five sessions throughout the year that allow participants a graduated range of trainings intended to sharpen the skills of <i>Network</i> spokespersons. A minimum of four in-person trainings will be held for <i>Network</i> spokespeople and a minimum of two trainings will held for Champions for Change. Additionally, ongoing message point and media training assistance - in the form of one-on-one technical assistance and educational webinars - to <i>Network</i> staff as well as LHDs will be provided.</p>	<p>Public Relations subcontractor (TBD) will plan and implement all details of the trainings.</p>	\$150,000
<b>Total Line D: Training</b>		<b>\$150,000</b>
<b>Line E: Resources</b>	<b>Activity Detail</b>	<b>Budget Year 14</b>

**STATE LEVEL PROJECT SUMMARY  
FFY 2014**

1. **Goals & Objectives** (*See State Level Objectives*).

2. **Project Title: Harvest of the Month Materials**

**\$1,683,366 PHI budget**

**a. Related State Objectives**

Related State Objectives include 1, 2, 3, and 4

**b. Audience**

Primary - Local Health Department (LHD) Grantees and other partners that provide nutrition education and obesity prevention services to all ages and ethnicities of Californians participating in the Supplemental Nutrition Assistance Program (SNAP) and SNAP-Ed-eligibles at 185 percent or below the Federal Poverty Level (FPL).

Secondary - SNAP-Ed eligibles at or below 185 percent FPL throughout California.

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for African American, Caucasian/White, and Latino/Hispanic populations

Languages: English, Spanish, and select Asian languages, which may include Chinese, Vietnamese, Korean, and/or Hmong

Ages: All ages, primary focus is on families, especially women with children

**c. Focus on SNAP-Ed Eligibles**

The projects proposed in Summary #2 are specifically designed for the purpose of providing nutrition education to SNAP-Ed recipients and eligible Californians by continuing to support the development and maintenance of *Harvest of the Month (HOTM)* materials; maintaining supplies of existing SNAP-Ed materials, including continuing to develop new multimedia self-efficacy materials to support the FFY2013/FFY2014 media campaign; providing brand training to new local LHD contractors; updating the *Network's* Champions for Change consumer website; and finalizing production and editing of the Nutrition Education and Obesity Prevention's (NEOP) Multicultural television advertisement (ad).

1. Re-print materials for public health events and development of new multimedia self-efficacy materials to support the FFY2013/FFY2014 television ad campaign targeted to SNAP-Ed recipients and eligibles.
2. *Harvest of the Month (HOTM)* is implemented in NEOP-qualified schools, retail outlets, and community sites, targeting SNAP-Ed recipients and eligibles.
3. *Network* Brand Training for LHDs and other new NEOP contractors designed to help contractor more effectively reach SNAP-Ed recipients and eligibles.
4. Update and redesign the NEOP Champions for Change website to better serve the low-literacy, SNAP-Ed population.
5. Finalize production and editing of the NEOPs multicultural television ad campaign.

#### **d. Project Description**

##### Key Strategies:

1. As needed, re-print existing materials to be used at special public events attended by low-income populations in Sacramento as well as throughout California. In addition, continue to develop new multimedia self-efficacy print and digital materials that will be compiled into a series of tools that will serve as the NEOPs primary resource for building nutrition knowledge, skills, and self-efficacy among low-income moms. Specifically, the tools will address cost barriers, time barriers, access barriers, family acceptance barriers, and emotional barriers that low-income families encounter every day when trying to increase fruit and vegetable consumption and physical activity. Healthy recipes will also be a core feature. In continuing this series of tools, existing materials from United States Department of Agriculture (USDA), Women, Infants, and Children (WIC) Program and other credible organizations will be reviewed to determine if any new materials will be needed to fill possible gaps in the content.
2. Provide assistance in two key areas: *HOTM* and Communications and Media, with an emphasis on researching and developing copy for materials and providing strategic counsel on future direction. Provide consulting support for *HOTM* and Communications materials development.
3. NEOP staff will coordinate, plan, and conduct *Network* Brand (and message) Trainings in the Regions for LHD's and other new contractors. Trainings will include, but are not limited to coordination of Champions for Change brand implementation, maximizing use of *Network* templates and existing *Network* materials, advanced design techniques, tools for analyzing literacy level, and hands-on branding examples and review to streamline messaging and more effectively reach California's low-income population.

4. Redesign Champions for Change website and update content to include operating on the California Department of Public Health (CDPH) approved, SharePoint 2013 platform. Provide updates to improve the usability of the site, including navigation and overall redesign to be more in line with the FY2013/FY2014 advertising campaign. The Champions for Change website is the *Network's* consumer site where SNAP-Ed participants and eligibles can access nutrition information, recipes, and other resources.
5. Make final production edits to the *Network's* multicultural television advertisement including audio recording, final mix, color correction, close captioning, dubbing, and other final edits as necessary.

Key Educational Messages:

- 1) Increase consumption of healthy foods, especially fruits and vegetables, increase water consumption and increased physical activity
- 2) Make "Half Your Plate" Fruits and Vegetables.
- 3) Be a Champion for your children. Be a Champion for Change!
- 4) A legacy of health
- 5) Not my Kids
- 6) 2010 *Dietary Guidelines for Americans*
- 7) ChooseMyPlate.gov

Intervention Sites:

- 1) *HOTM*: Qualifying *Network* schools, community sites, retail sites, and possibly CalFresh offices. See Fruit, Vegetable and Physical Activity Campaign, Project Summary.
- 2) Mass media.

Projected Number of Contacts:

See the *Network* Fruit, Vegetable, and Physical Activity Campaigns plan for *HOTM* projected number of contacts.

Narrative Summary:

- 1) In previous years, the *Network* has been invited to state level events and promotions such as the CDPH's Public Health Week or the California Department of Agriculture's - Agriculture Day event. Funds will be used to print materials, as needed, in order to promote the *Network* at local events in the Sacramento area targeted to low-income populations in qualifying census tracts. In addition, the *Network* will develop and produce targeted multimedia self-efficacy materials tailored to the Latino and African American low-income communities to support the FY2013/FFY2014 television ads.

- 2) Since 2006, the Communications and Media Unit has supported *HOTM* with consulting services on the development of materials and communications strategies. Funding is requested to continue this support. See the *Network Fruit, Vegetable, and Physical Activity Campaigns* plan for a narrative of the *HOTM* 2014 projects.

**e. Summary of Research**

Harvest of the Month

See the targeted Fruit, Vegetable, and Physical Activity Campaign's Project Summary FFY2014.

**f. Modification of Project Methods/Strategies**

None

**g. Use of Existing Educational Materials**

Materials in this FFY14 Communications Project Summary # 2 that require production, with the exception of the multimedia self-efficacy materials, are existing materials.

**h. Development of New Educational Materials**

Development of targeted multimedia self-efficacy materials for the Latino and African American low-income populations in support of the FFY2013/FFY2014 television ads.

**i. Key Performance Measures/Indicators**

*HOTM*: Number of school sites and other points of distribution as reported in the *Network's* Semi-Annual Activity Report - estimated number of youth and adult participants.

**j. Evaluation Plan**

See the targeted Fruit, Vegetable, and Physical Activity Campaign's Project Summary FFY2014 for the *HOTM* evaluation plan.

**k. Coordination Efforts**

See the targeted Fruit, Vegetable, and Physical Activity Campaign's Project Summary FFY 2014 for *HOTM* coordination efforts.

## PHI Leadership, Technical Assistance and Training Projects

FFY 2014

### *Harvest of the Month*

1. **Goals & Objectives** (See State Level Objectives).

2. **Project Title:** *Harvest of the Month (HOTM)* – GALEWill

PHI - \$ 150,000 total contract for both Communications, *HOTM* and direct expenses

*HOTM* hours- ~1284

Communication's hours- ~500

a. **Related State Objectives:**

Related State Objectives include 1, 2, 3, and 4

b. **Audience**

Gender: Male and Female

Ethnicity: All

Languages: English; Spanish

Ages:-0-adults

c. **Focus on SNAP Eligibles**

*Network*-funded projects and other Supplemental Nutrition Assistance Program Education (SNAP-Ed) Intermediaries; Schools with >50% Free and Reduced Price Meals (FRPM)

d. **Project Description**

GALEWill has an existing, satisfactory relationship with the *Network*. GALEWill Design has been an integral team member of *HOTM*, one of the *Network's* key initiatives to keep Californians of all ages eating healthy and being active and now recognized Nationally. Their history and knowledge of *HOTM* is unmatched by any other agency or consultant. GALEWill has been a writer of content development for *HOTM* resources under the direction of the *HOTM* manager, providing support in developing over 200 monthly elements, dozens of training materials, fact sheets, calendars, posters and other collateral materials and working with California Department of Public Health's IT department to upload new/updated elements for the *HOTM* website, [www.harvestofthemonth.cdph.ca.gov](http://www.harvestofthemonth.cdph.ca.gov). GALEWill has also provided copywriting support for general *Network* pieces and the *Network's* consumer website, [www.cachampionsforchange.net](http://www.cachampionsforchange.net).

Under the oversight and direction of the *HOTM* Manager, GALEWill develops and updates materials design and content development; manages ongoing updates and edits to *HOTM* monthly elements; develops messages from research of new produce items to be delivered through other vehicles outside of traditional newsletters; finalizes development of tip sheets; submits abstracts to journals for publications. GALEWill researches articles done by partners on *HOTM* and submits in a summarized report.

Under the oversight and direction of the Communications Marketing Manager III, GALEWILL provides copywriting service support for *Network* general publications, website content updates, reviews existing publication content and provides updated content.

### Key Strategies:

Completed under the guidance/oversight of the Harvest of the Month Manager

1. Materials Design and Development
  - Provide support for updates and edits to *HOTM* monthly elements. FFY14 integrate MyPlate messages to 36 featured produce items in the Educator Newsletter, Family Newsletter and Menu Slicks
  - Utilize research compiled on new produce items to be delivered through other vehicles outside of traditional newsletters
  - Finalize development of tip sheets to support local health departments with implementation strategies
  - Continued promotion of other FVPA campaigns and programs through *HOTM* (Power Play!, Retail, Worksite and Cultural Campaigns)
  - Other *HOTM* materials as needed to support Farm to Fork efforts
2. Partnerships & Promotions
  - Write and submit articles to journals, e-newsletters and other online websites for publication.
  - Identify possible awards/recognition of *HOTM* materials; submit applications on behalf of *HOTM*. Maintain list of awards/recognition for *HOTM* received by local partners.
  - Identify, monitor for, and compile articles Nationally about *HOTM*
  - Compile best practices in success story data base
3. Training
  - Post updated/revised training tools on *HOTM* website
4. *HOTM* Internal Team
  - Participate in internal team meetings as requested by *HOTM* Manager
5. *HOTM* Website
  - Coordinate monthly site updates to content and materials posted on website in collaboration with *Network's* ITU.
  - Contingent upon CDPH allowability upgrade site functionality and design
  - Submit Google Analytics to *HOTM* manager for analysis

6. Engagement and Other Communications

- Develop draft content for miscellaneous *HOTM* communications materials

7. *Network* Website and Online Publications

- Provide copywriting updates for websites and other online publications
- Collaborate with *Network* Communications and IT teams to complete updates and review active updates to Champions for Change site

8. *Network* Publications

- Review and copyedit existing *Network* publications (e.g., cookbooks, brochures, toolkits) for new or planned updates to materials
- Develop content for new *Network* publications (e.g., cookbooks, brochures, fact sheets, toolkits)

9. Strategic Counsel, Engagement and Technical Assistance

- Provide general strategic counsel to Communications team on general issues related to the *Network*
- Provide technical assistance to the Communications team on projects, drills and future planning of *Network* activity

Key Educational Messages:

Seasonal and local fruits and vegetables (*Harvest of the Month*); MyPlate; Promote Healthy Communities, Community Gardens, School Gardens, physical activity promotion, obesity prevention, healthy beverages, cooking skills, produce selection tips and nutrition facts

Intervention Sites:

Women, Infants, and Children (WIC) Program food stores, schools, food banks, farms, farmers markets, early childhood, summer meal programs, retail, worksite, institutions, community and school gardens, SNAP-Ed programs and interventions.

Narrative Summary:

After several years of local implementation, in 2006 *HOTM* was made available statewide with a tool kit and website. The overall goal is to provide knowledge and skill-based strategies that are standardized, cost-effective, replicable, convenient and based on sound science. These strategies are designed to motivate and empower individuals to increase consumption and

enjoyment of a variety of colorful fruits and vegetables and to engage in physical activity every day.

*HOTM* provides materials and resources to support healthy food choices through increased access and consumption of fruits and vegetables as well as encourage daily physical activity. It uniquely supports core curricular areas through exploration and study. *HOTM* presents a strategic opportunity to bring together the classroom, cafeteria, home and community to promote a common goal and healthier habits, especially those in low resource populations.

The objectives of Harvest of the Month is for individuals to increase their access to fruits and vegetables through school meal programs, classrooms, school gardens, farmers' markets, grocery stores, community gardens, and worksites. Increase their preference for selected produce items through activities, such as taste testing, cooking and garden activities, and through menu offerings in the school meals program and Summer Meals programs. Increase participation in daily physical activity and understand of why it is important along with their knowledge of and familiarity with California grown fruits and vegetables and the rich agricultural bounty of the State.

**e. Summary of Research**

In FFY 10, 44 local projects conducted evaluation projects. Of these 44 agencies, 12 were selected for a meta-analysis that targeted grades 4-8 and used pre/post test evaluation design. A total of 1,474 children participated in *HOTM* and its evaluation; an additional 544 participated in a control group that received no *HOTM* intervention. Significant increases ( $p < .001$ ) were found for the number of fruits, vegetables and total fruits and vegetables reported as consumed – 16, 10 and 13 percent increases, respectively. The control group showed no significant increases in consumption. In FFY 2010, a best practice study for *HOTM* was started; it included key informant interviews with stakeholders and, in FFY 2011, a quantitative survey with 750 teachers. 90% of the teachers survey had implemented *HOTM* during that school year. Teachers believed that participation in *HOTM* exposes students to fruit and vegetables and teaches them about the importance of nutrition. The majority of teachers surveyed reported using *HOTM* for 4 or more years. The most frequently used elements were the Educator Newsletter and Family Newsletter.

**f. Modification of Project Methods/Strategies**

Diversified organizations will be recruited as part of a strategy to increase reach, provide additional support and expertise, centered on fruit and vegetable consumption, farm to fork, schools, retail and worksite.

**g. Use of Existing Educational Materials**

*HOTM* educator, family and community newsletters, calendar templates, student assessment tools, botanical images, instructional guide, training tools, bar graphs, marketing tools, MyPlate, California School Garden *Network* and USDA Know Your Farmer Know Your Food resources.

**h. Development of New Educational Materials**

Update Educator Newsletters, Family Newsletters and Menu Slicks to reflect MyPlate messages. Finalize implementation tip sheets to support local health departments to reach multiple audiences with *HOTM* and continue to update/revise training tools. Release new links to Common Core Standards for schools and monthly updates to website. GALEWiLL will help update and develop new materials as needed for publications listed in the *Materials State-level Project Summary* starting on page 27.

i. **Key Performance Measures/Indicators.**

Number and type (school, pre-school, summer meal, retail or worksite) of *Network*-funded projects and other SNAP-Ed eligible sites that received technical assistance to strengthen the connection between Farm to School or Farm to Fork and SNAP-Ed to improve the access and appeal for healthy eating, estimated reach to SNAP-Ed eligible audience of these projects.

**3. Evaluation Plan**

Process evaluation information is collected through the Activity Tracking Forms (ATF). A portion of the local health departments will conduct outcome evaluations of their *HOTM* efforts during FFY 14.

**4. Coordination Efforts**

Harvest of the Month has become the tool organizations, agencies, schools, retail, worksite, agricultural groups, food banks and others have been using to provide the tie between nutrition education and the Farm to Fork movement working with targeted populations to improve message delivery to the SNAP-Ed audience. The success in these coordination efforts has led to National recognition with awards and publications.

## STATE LEVEL PROJECT SUMMARY FORM

FFY 2014

### COMMUNICATIONS – Project #3 (Multicultural Television Advertising Campaign-PHI Administered Projects)

1. **Goals & Objectives** (See State Level Objectives 1, 2, 3 & 4).

2. **Project Title: Communications: Project #3 – Multicultural TV Advertising Campaign, PHI \$400,000**

**a. Related State Objectives**

Related State Level Objectives include #1-4

**b. Audience**

Ethnicity: Multi-ethnic populations including African American, Latino, Caucasian, and Asian-American.

Languages: English, Spanish

Ages: 18-54 women with children living in the home

---

**c. Focus on SNAP Eligibles**

At least 50 percent of mass media impressions will be received by Supplemental Nutrition Assistance Program Education (SNAP-Ed) eligible individuals, defined as women living in households with incomes  $\leq$ 185% Federal Poverty Level (FPL). Messaging will be crafted using findings from quantitative and qualitative research conducted among low-income populations in order to ensure all information resonates with the target audience.

Income Targeting Data Source:

2011 Scarborough Research Data, Geographic Information System Census Data, and American Community Survey 06-10 and 07-11.

**d. Project Description**

Key Strategies:

The Multicultural TV ad is designed to provide fresh Nutrition Education Obesity Prevention messaging; shifting from self-efficacy to normative beliefs designed to ultimately effect community-level change.

The *Network* will produce two, Multicultural TV ads (one English-language, and one trans-adapted for Spanish-language), two English and two Spanish-language outdoor ads (billboards), and English and Spanish-language online executions to complement the campaign. This integrated, multi-level approach will ensure a broader reach of the SNAP-Ed eligible population.

### Key Educational Messages:

The messaging in the Multicultural TV ad will expand on the FFY13 television ad by conveying a social normative message, that moms are not alone and others, just like them are making healthy changes and encourage them to “join the movement.” This ad will continue the momentum of inspiring moms to become Champions for Change in their homes and communities.

Based on qualitative and formative research, the primary intended outcome is to change social normative beliefs as they relate to fruit and vegetable consumption, healthy beverage consumption, and physical activity. Research has shown that social normative beliefs are a main determinant of health behavior, and specifically fruit and vegetable consumption.

### Intervention Sites:

Statewide

### Projected Number of Contacts:

Direct Education Contacts (unduplicated): N/A

Indirect Contacts: Included in the State-level Communications Project Summary

### Narrative Summary:

1. As part of the statewide mass advertising campaign, the Multicultural TV ads consist of two TV ads (one English-language, and one trans-adapted for Spanish-language), two English and two Spanish-language outdoor ads (billboards), and English and Spanish-language online executions to complement and expand the reach of the campaign. This comprehensive approach, including television, outdoor and digital advertising ensures that we effectively reach SNAP-Ed eligibles, and achieve U.S. Department of Agriculture’s (USDA) requirement to deliver over 50 percent of purchased media impressions to individuals living in <185% FPL households. Media plans will be based on the approved strategic plan targeting California’s low-income populations at or below 185% of the FPL, specifically multicultural English or Spanish dominant women with school-aged children. The Multicultural portion of the media plan will conform to USDA Guidance specifying that over half of total impressions be received by California’s low-income populations.

Evaluation measure: Evaluation of the Multicultural TV ads will be through the *Network’s* statewide Annual Tracking Survey (Benchmark), which is conducted via phone and shopping mall intercept interviews to monitor consumer recall of *Network* advertising as well as beliefs, attitudes, and behavior related to nutrition and physical activity among SNAP-Ed eligibles and recipients. (See PHI Research and Evaluation section Project Summary)

2. The Multicultural ad campaign will feature ads in English and Spanish, targeting low-income African American, Caucasian, and Latina moms. The ads will include the USDA SNAP-Ed acknowledgement and a call to action to “join the movement.” Upon completion, these ads will be part of a 16 week flight extending over a six-month period – April through September. All California media markets will receive advertising, representing coverage of just under 100 percent of California’s SNAP-Ed population.

**e. Summary of Research**

The *Network* continues to conduct an annual tracking survey that measures advertising awareness and knowledge, attitudes, and beliefs related to fruit, vegetable, and physical activity consumption and other family and community change behaviors. (See PHI Research and Evaluation Section Project Summary)

**f. Modification of Project Methods/Strategies**

None

**g. Use of Existing Educational Materials**

Use of the Nutrition Series developed in FFY13 that includes a library of existing nutrition educational brochures, DVDs, and compilation videos.

**h. Development of New Educational Materials**

Two to four multi-media social normative behavior change materials will be developed to support the Multicultural Campaign using the messaging “We’re All In this Together.” Existing material will be updated as more current survey data become available. The need for new materials will be produced to support and complement Local Health Department’s efforts.

**i. Key Performance Measures/Indicators**

Key measures and indicators will include target audience direct nutrition education contacts and indirect contacts, as well as gross impressions for the SNAP-Ed target. Data from the FFY13 Benchmark Survey will be available in March 2014.

**j. Evaluation Plan**

Evaluation Type:

Formative: NEOP materials will be focus group tested. Focus groups will be conducted in Oakland, Sacramento and Los Angeles among groups comprised of English language dominant women with school-aged children who are Caucasian, African American, Asian or Latina, and Spanish-language dominant women with school-aged children

representing no less than 18 hours of evaluation. Key diagnostic dimensions such as affect, attention, clarity, comprehension, believability, agreement, relevance, and persuasiveness form the basis of questions and probing during the focus groups.

**Outcome:** See PHHI Research and Evaluation Section Project Summary.

A Benchmark Survey is conducted annually to track measurements such as campaign awareness, self-efficacy, knowledge levels, behavioral intentions, social normative beliefs, and other important measures. The Benchmark Survey is planned for the 2014 campaign year, and it will compare findings of SNAP recipients and eligibles to the baseline survey conducted in 2004 as well as findings from 2007-2014.

**k. Coordination Efforts**

All materials produced for use in FFY14 will be shared and made available to all LHDs, *Network* contractors, sister agencies in California, partners and all SNAP-Ed programs in California and other states. The *Network* will continue to coordinate with USDA on the promotion of new and updated materials including *MyPlate*, the [www.ChooseMyPlate.gov](http://www.ChooseMyPlate.gov) website and supporting materials and resources.

The *Network* will continue efforts to infuse the Champions for Change brand into all *Network* materials produced at the state and local levels. Such coordination accelerates recall, brand equity and saliency of *Network* messaging.

## STATE LEVEL PROJECT SUMMARY FORM #5

FFY 2014

**Project Title:** Conference Coordination -8th Biennial Childhood Obesity Conference and 2014 Statewide Conference

### 1. Description of Projects/Interventions

Title: Conference Coordination -8th Biennial Childhood Obesity Conference and 2014 Statewide Conference

**State Project/Budget:** \$305,838.57 (combined UCD Cress and CSUS budgets)

a. **Related State Objectives** - 1, 2, 3, and 4

b. **Audience**

The primary audiences are:

- Education community:
- Public health professionals
- Healthcare professionals
- Parent and youth-based organizations
- Community and business leaders
- Food system leaders
- Farmers
- Parks and recreation planners and providers
- Urban and rural planners
- Gender: Males and females
- Language: English/Spanish
- Ethnicity: All ethnic groups with primary focus on African-American, White and Latinos audiences.
- Age: Adults 18 years +
- NEOP Program-funded projects and partners who provide SNAP-Ed services to eligible low-income households.

c. **Focus on SNAP-Ed Eligibles**

All activities funded through the NEOP Program are designed to reach, in part, NEOP Program funded projects and partners to improve SNAP-Ed funded program integrity, skills, understanding of SNAP-Ed Guidance and requirements, and to advance SNAP-Ed goals for persons certified, likely and potentially eligible for the Food Stamp Program (FSP). Conferences will focus on examining the causes and consequences of ongoing health disparities and continuing to share and develop cutting-edge strategies to understand and reduce inequities, particularly in high-risk, low-income communities.

#### **d. Project Description**

Complete program evaluation for the 2013 Childhood Obesity Conference, and program management and leadership for the 2015 Childhood Obesity Conference and 2014 Statewide conference. Provide oversight and support to the Executive and Planning Committees, development of conference content and to CSUS Conference Services in the area of event planning, meeting facilitation, sponsor development, grant writing, communications, public relations, conference promotion and conference content.

8<sup>th</sup> Biennial Childhood Obesity Conference will be held in 2015. The biennial conference is the largest, most influential collaboration of professionals dedicated to combating pediatric obesity. Nearly 2,000 local, state, national, and international researchers, health professionals, educators, nutrition professionals, community advocates and others attend to share and learn about the evidence and best practices for combating the childhood obesity epidemic, especially among low-income populations (SNAP-Ed eligible). NEOP is the lead in the planning and development of this Conference, in collaboration with the California Department of Education, and the UC Berkeley Atkins Center for Weight and Health, The California Endowment and Kaiser Permanente. NEOP has long been a strong partner in not only the development of the conference agenda and sessions, but as participants and presenters sharing best practices implemented by regions, local health departments and state level leadership. NEOP USDA funds will be used to support relevant conference planning activities such as the school/after school, community, and early childhood track planning activities; conference sessions by USDA and non-USDA funded speakers that are aligned with USDA Guidance to provide attendees with cutting-edge activities and resources that can be incorporated into their existing programs; reproduction and dissemination of resources to conference attendees; and technical and logistical needs of NEOP USDA-funded projects speaking or moderating conference sessions.

The Statewide Annual Conference will be conducted February , 2014 in Sacramento, CA, with planning have begun in March, 2013, and will and support FSNE content to help NEOP USDA funded projects and partners understand FNS nutrition priorities; current and emerging initiatives; and identify resources and tools available to support implementation of effective nutrition education programs; apply networking and partnership skills to coordinate nutrition education across FNS nutrition assistance programs, and improve collaboration among State and community partners; enhance skills in planning, implementing, and evaluating nutrition education; share strategies for advancing California's State Nutrition Action Plan (SNAP); and understand factors contributing to obesity amongst low-income Californians.

NEOP funding supports approximately 100% of the interagency agreement with the University of California, Davis (UCD) which includes one full-time person to coordinate the Childhood Obesity Conference and the Statewide Conference. In addition, NEOP funding also supports a contract with California State University,

Sacramento (CSUS) to assist in the logistics planning and execution of the Statewide conference.

#### Key Strategies

- Develop conference themes, goals and issues to integrate.
- Promote conferences to potential attendees through mailing lists, online, at conferences/presentations and through partner networks.
- Recruit members to planning committees and to track workgroups to plan workshops and mini plenaries.
- Secure keynote speakers.
- Ensure conference sessions identify collaborative opportunities and content relevant to low-income populations.
- Provide significant networking time within conference agendas.
- Incorporate survey findings into future conference planning.
- Oversee work plans and timelines.
- Monitor all fiscal and contractual obligations

#### Key Educational Messages:

Childhood obesity prevention; chronic disease and obesity prevention; accelerating progress, evidence-based practices, Champions for Change messages, dietary quality; fruits and vegetables; healthier eating (general); physical activity promotion (integrated with nutrition education); California Food Stamp Program promotion (CalFresh) (brief promotional message); *Dietary Guidelines for Americans*; SNAP-Ed youth, consumer and community empowerment; promotion of healthy communities, and leadership development.

Intervention Sites: Throughout California

#### Projected Number of Contacts:

- Direct Contacts: A minimum of 1,500 attendees will participate in the 2015 Childhood Obesity Conference and 900 attendees at the 2014 Statewide Conference.
- Indirect Contacts: Unknown number. High potential for information sharing between attendees and their colleagues and clients.

#### **e. Summary of Research**

- Childhood obesity has more than tripled in the past 30 years.
- Studies show that approximately one in five children are overweight or obese by the time they reach their 6th birthday and over half of obese children become overweight at or before age two.
- The prevalence of obesity among children aged 6 to 11 years increased from 7% in 1980 to nearly 18% in 2010.

- The prevalence of obesity among adolescents aged 12 to 19 years increased from 5.0% to 18.1%, and there are now more than 9 million obese or overweight children in the U.S.
- In 2010, more than one third of children and adolescents were overweight or obese.
- There is a link between long-term healthy eating behaviors and experiential learning (gardening, farming, and cooking) that begins early in life.
- Children begin to establish food preferences and dietary habits during the first six years of life.
- In both adult and youth audiences, media use and exposure to food marketing and advertising messages continues to rise with advances in technology and increasingly pervasive and targeted marketing. At the same time, more than 15% of young people and almost two out of three adults are overweight or obese. People with low-incomes, including those in households eligible for foods stamps are at the highest risk for chronic disease resulting from poor diet and physical inactivity. Exposure to media is identified as a risk factor in many health arenas, while media literacy is recognized as a prevention strategy.
- Peer-led nutrition education models have proven effective at improving knowledge, attitudes, and behavior of target audiences, all while remaining cost-effective. Findings suggest that positive changes in knowledge, skills and behavior may be realized by both the audiences receiving nutrition education as well as the peer educators themselves.
- While there is some evidence that childhood obesity rates are starting to level off, they are still dangerously high, and they continue to climb for some subgroups, with increases in rates of extremely obese children

#### **f. Modification of Project Methods/Strategies**

There will be increased promotion of conference tracks, workshops and presenters via web-based communications. The conferences will also utilize an online Request for Proposals (RFP) process piloted during the 2013 Childhood Obesity conference. Conference workshops will be both designed by conference planning members and selected through the web-based RFP processes.

The Statewide Conference will highlight successful and innovative projects demonstrating evidence-based interventions that align with healthy food, sugary beverages and physical activity priorities along w/ food security, and at all levels of the Social Ecological Model. Attendees will comprise of participants at the statewide, regional, county and local levels, including coalitions/collaboratives.

#### **g. Use of Existing Educational Materials –N/A**

#### **h. Development of New Educational Materials – N/A**

#### **i. Key Performance Measures/Indicators**

- Number of attendees

- Number of attendees who identify new collaborative opportunities
- Number of attendees who identify new obesity prevention strategies
- Number of visits to conference websites
- Number of media stories

## **2. Evaluation Plans**

The Biennial Childhood Obesity and the Statewide Conferences are extensively evaluated both during the conference and after their completion. Evaluations are collected at the close of each individual session focusing on multiple elements, content, cohesion, and relevance. Immediately following the close of the conferences an online survey is distributed to all attendees to evaluate, in part, the conference's success in bringing forward new environmental strategies, partners, and collaborative opportunities. Online evaluations may be distributed to presenters, exhibitors, and sponsors to assess satisfaction with their role in the conferences.

These results will be disseminated to key partners and the planning committee to continue to improve future conferences. A debriefing meeting will be held to share the strengths of the conference and areas that need improvement

## **3. Coordination Efforts**

The California Department of Public Health/Nutrition Education and Obesity Prevention Branch (NEOP), the University of California, Berkeley, Atkins Center for Weight and Health, and the California Department of Education have joined together to hold the Childhood Obesity Conference every other year since 2001. The California Endowment and Kaiser Permanente along with other foundations have been a major sponsor and advisor to the previous conferences. Representatives from each organization sit on the Executive and Planning Committees for the conference.

## STATE LEVEL PROJECT SUMMARY FORM

FFY 2014

### 1. Description of Projects/Interventions

**Title:** Peer-led Nutrition Education and SNAP

**State project/Budget:** \$350,439.95

#### a. Related State Objectives: 1, 2, and 3

#### b. Audience

California Local Health Departments (LHDs) and their local contractors

Promotores de Salud (Community Health Workers)

Peer to Peer Adult Leaders

SNAP eligible populations

Gender: Males and Females

Ethnicity: Primarily African-American, Native American, and Hmong

Language: English and Hmong

Age: Adults 18 years +

#### c. Focus on SNAP Eligibles

Will focus on SNAP eligible populations identified by LHDs participating in this project with an emphasis on African-American, Native American and Hmong populations with health disparities

Income Targeting Data Source:

2010 Census Tract Data; CalFresh eligibility

Free and Reduced Priced Meal Participation

#### d. Project Description

During the past three federal fiscal years, the Community and School Policy and Training Section (CSPT) developed a curriculum and implemented the Peer-led Nutrition Education and SNAP Project using a train-the-trainer model with English- and- Spanish-speaking promotores / community lay-health workers (peer educators). Evaluation results indicate that over 95% of community participants reported an increase in their fruit and vegetable consumption and level of physical activity as a result of this program.

In 2013, with funding from the Preventive Health and Health Services Block Grant from the Centers for Disease Control and Prevention, the Peer-led nutrition education and SNAP curriculum was culturally adapted and pilot tested with the following populations: African-American, Native American, and Hmong. Feedback on the curriculum was provided by each community followed by a three month intervention which included the delivery of the three lessons taught by trained peer educators. The curriculum addresses the following objectives:

- Consumption and Access to Healthy Foods - Fruit and Vegetables

- Consumption and Access to Healthy Beverages and Reduced Consumption of Unhealthy Beverages
- Physical Activity and Sedentary Behavior

By September 2013, evaluation of the pilot intervention will be completed. Lessons learned from the evaluation findings will be used to continue to modify and improve the curriculum to meet the cultural and linguistic (Hmong only) needs of each respective group addressing the key objectives listed above. Ultimately, the culturally adapted lesson plans will be available for use by the Local Health Departments (LHDs) that serve these specific populations as part of the LHD scope of work, Objective 10: Peer to peer education” as outlined by the Network for a Healthy California’s Local Health Department Guidelines.

#### Key Strategies:

- Review the evaluation findings from the 2013 pilot intervention to make any modifications to the lesson plans developed to make them more culturally appropriate. This may include adjustments to specific activities in the lessons, content, and delivery techniques.
- Field test the revised lessons with each population. This may include review of the lessons by experts from each respective group and testing the lessons with members of the target audience representing African-Americans, Native Americans and Hmong.
- Update all the lessons and translate the lessons into Hmong.
- Finalize each curriculum and assure that all USDA guidelines are met, and all content and graphics are culturally appropriate.
- Print a total of 300 copies of the curriculum (100 for each population) depending on the needs of LHDs. A PDF version of the curriculum will be available for download as well.
- Provide tailored technical assistance via phone calls, emails, and/or webinars/teleconferences to LHD staff using the adapted curriculums.
- Maintain a TA log.

#### Key Educational Messages:

- Make half your plate fruits and vegetables.
- Make at least half your grains whole grains.
- Switch to fat-free or low-fat (1%) milk and milk products.
- Reduce sugary beverage intake.
- Increase healthier beverage consumption (e.g., water, fat-free and low-fat milk).

- Increase physical activity.

Projected Number of Contacts:

Direct Contacts:

- A minimum of 20 LHDs and their local contractors.

Indirect contacts:

- A minimum of 2,000-3,000 unduplicated SNAP-eligible individuals will be reached by LHDs and their local contractors. These counts will be reflected in the LHD EARs reporting.
- This project has the potential to reach family members of participants.

**e. Summary of Research –**

Rationale for adopting a Promotora Model

Community health workers (CHWs) and promotores de salud have effectively demonstrated their ability to reach and positively impact behavior change among underserved groups, especially Spanish-speaking populations. CHWs are recognized for providing cost-effective services, linkages to resources, and for serving as leaders in the communities where they live. A review of the literature shows that CHWs are an acceptable way to deliver nutrition information to the African American, American Indian, and Hmong communities. Furthermore, studies indicate that CHWs are an essential component of a larger effort to culturally adapt nutrition education curricula for underserved communities.

**f. Use of Existing Educational Materials**

*Peer-led Nutrition Education Lesson Plans-* These lesson plans, developed by the CSPT Section, include a series of three lessons that address MyPlate, Healthy Eating on a Budget, Sugary Drinks, and Physical Activity. The lessons are in English and Spanish and designed to be led by a peer educator such as a community health worker, promotora and/or an adult leader in a small group setting. Supplemental materials may include:

Parents in Action!- Developed by California Project LEAN, it includes lesson plans on the nutrition and physical activity in schools. It is available in English and Spanish. This toolkit provides resources for training parents on the importance of good nutrition and physical activity and provides specific suggestions for how parents can work effectively with schools to promote improved student access to healthier food and physical activity. This toolkit can be adapted to incorporate policy, systems, and environmental change strategies in community settings other than schools.

Fruit, Vegetable, and Physical Activity Toolbox for Community Educators- Developed by the Network for a Healthy California, it is designed for community educators to teach low-income adults about eating the recommended amount of fruits and vegetables and enjoying physical activity everyday. The *Toolbox* website contains lessons with supporting handouts, resources, and evaluation tools. The *Toolbox* Kit provides all the information available from the website as well as two educational videos, five decks of fruit, vegetable, and physical activity playing cards, a music CD, poster, and produce guide.

#### **g. Development of New Educational Materials**

There may be a need to create supporting materials that complement the materials identified above to support the culturally adapted lesson plans.

### **3. Evaluation Plans**

- Field testing of curriculum with key experts/CHWs as well as representatives from the target audience.
- Survey to determine the usefulness of the culturally adapted curriculums by LHDs.
- Site visits with LHDs to observe curriculum implementation.

### **4. Coordination Efforts**

This project will be coordinated with the following organizations that participated in Phase I of the project: Allen Temple, The California Rural Indian Health Board, and the Hmong Women's Heritage Association. These organizations will serve as reviewers and provide access to the target audiences that include the African-American, Native American, and Hmong communities.

In addition, resources and cultural expertise will be sought from the Network for a Healthy California's African-American and Asian Campaigns.

**USDA  
POSITION DESCRIPTIONS**

<b>Position Number</b>	<b>USDA Position Title</b>	<b>LHD Position Title</b>	<b>Position Description</b>
1	Accountant/Finance Analyst		Serves as internal auditor and controller. Assists with processing purchase orders, invoices, preparation of vouchers for payment as related to the Network program, as well as monitoring the budgets.
2	Administrative Coordinator		Provides administrative and office support for the project staff and is responsible for the reporting requirements.
3	Administrator (e.g., Director of Programs)		Administer the nutrition education grant agreement and budget, supervising nutrition education staff, attend nutrition education and scope of work related meetings, program planning and participating in the Regional collaborative. Coordinate grant agreement reporting requirements.
4	After School Coordinator/Assistant		Plan and facilitate nutrition education activities for recreation programming, in after school setting for different age groups of children; seniors, teen; special populations, such as mothers with young children and families; nutrition education for special events and workshops. Prepare instructional plans for youth camps and field trips; and nutrition education for special events and workshops. Prepare instructional plans for nutrition activities, collect data related to nutrition education programming, prepare documentation for nutrition education grant agreement; and helps prepare interim and final progress report .
5	Chief Executive Officer		Provides overall guidance for the operations, personnel, and fiscal responsibilities required by the nutrition project.
6	Community Liaison		Conducts nutrition education, physical activity promotion interventions in the community setting. Works with Community Based Organizations to increase the reach of nutrition education interventions to Nutrition Education Obesity Program eligible.
7	Computer Specialist		The Computer Specialist will provide assistance with the nutrition database and tracking system.
8	Contract Manager		Manages the nutrition education grant agreement including budgets, invoices, local share documentation reports, time studies, fiscal reporting and adherence to funding requirements.
9	Coordinator of Other Program (e.g., Teen program, Healthy Start, etc.)		Supervises, coordinates, facilitates nutrition education activities, workshops, special events related to the recreation and community center planning and working together with other community center groups. Supervises staff implementing the nutrition education grant agreement, prepares invoices, prepares and collects documentation, prepares progress reports
10	Curriculum Specialist		Develops curriculum for nutrition education and physical activity interventions in a variety of different channels/venues.
11	Database Coordinator		Develops database used to track nutrition education, physical activity and food stamp promotion interventions in a variety of channels.
12	Dental/Medical Assistant		Conduct one-on-one nutrition education interventions prior to primary care visit.
13	Dietician		Oversees and supervises the nutrition education program including project administration, project coordination, the development of the nutrition education component and materials and other nutrition and physical activity promotion programs.
14	Family Advocate		Provides nutrition education to students and their families, and recruits NEOP eligible for group nutrition/cooking classes. Provides nutrition, physical activity and food stamp promotion resources to students and their parents.

**USDA  
POSITION DESCRIPTIONS**

15	<b>Food Service Worker (e.g., Director, Manager, Asst., Server, Cook)</b>		Assists with planning and preparing healthy food taste tests in the school setting in conjunction with classroom based nutrition education intervention. Works with teachers to increase student, teacher and parent knowledge of the importance of consuming more servings of fruits and vegetables and being active daily. Compiles documentation on taste testing activities and all reporting required for nutrition grants. In some cases, supervises staff that carry out activities.
16	<b>Graphic Illustrator</b>		Develop local promotional nutrition education materials such as community flyers/ newsletters and/or to develop local nutrition/physical activity promotional/educational materials under the direction of the nutrition staff.
17	<b>Health Educator (including Health Aide, Health Promotion Instructor, etc.)</b>		Develop materials and facilitate health education in both group and individual settings. Teaches general nutrition, the importance of fruits and vegetables, and health benefits of proper nutrition and physical activity.
18	<b>Legal Counsel</b>		Assist with development of policies, approval of grant agreements and Memorandums of Understanding and providing legal advice specifically related to the implementation of nutrition education and physical activity promotion
19	<b>Medical Assistant</b>		Demonstrates safe food handling and personal hygiene to prevent food borne illness, provide nutrition-related services to staff, parents, and students and promotes physical activity within the context of nutrition education. (This does not include any medical nutrition therapy).
20	<b>Nurse/Nurse Supervisor/Nurse Aide RN</b>		Provides nutrition and physical activity promotion to students enrolled in nutrition education programs and their families. Supports nutrition education goals through interventions; local, regional, and statewide collaboration and interventions. (This does not include any medical nutrition therapy).
21	<b>Nutritionist/Nutrition Educator/Nutrition Aide</b>		Provides nutrition education to the neop eligible population. Specific duties include: one-on-one general nutrition education, delivery of general nutrition education in a classroom or group setting, staffing health fairs and other community or promotional events where nutrition education messages are delivered, distribution of linguistically and culturally appropriate nutrition education materials, documentation of educational and other encounters, assisting with writing project reports and preparation of quarterly reports, maintaining program reporting and tracking systems.
22	<b>Office Manager/Secretary/Admin Assistant</b>		Provides general clerical support to the Program. Assists in development and maintenance of a data collection system with emphasis on fiscal information. Arranges meetings and trainings, orders supplies and materials, creates correspondence, photocopies, etc.
23	<b>Pharmacist</b>		Promotes nutrition education and physical activity to NEOP eligible population through displays, distributing literature, and supervising staff to update nutrition education bulletin board.
24	<b>Physician</b>		Supervises professional staff including Dietitians, Nurses and Nutrition/Project Coordinators that provide nutrition education and promotes physical activity to NEOP eligibles in a variety of channels. Provides direction on strategic planning of nutrition and physical activity programs to NEOP eligible clients. In some cases, provides nutrition education to NEOP eligibles. (This does not include any medical nutrition therapy).
25	<b>Professor</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for the NEOP eligible community, and students with their families. Supports nutrition education Program goals and local, regional, and statewide collaboration.

**USDA  
POSITION DESCRIPTIONS**

<b>26</b>	<b>Program Assistant</b>		Assists the Project Coordinator with nutrition education program planning and development. Under the direction of Project Coordinator, works directly with individuals and small groups providing curriculum-based, prevention-oriented general nutrition education and physical activity targeted to NEOP eligibles.
<b>27</b>	<b>Project Coordinator</b>		Coordinate program staff and nutrition education activities; plan and follow through on outreach and educational events at health fairs, schools, and other promotional activities; work with schools, churches, farm worker organizations, and community organizations in planning and promoting good health through dissemination of nutrition education materials; actively acquire and develop culturally and linguistically competent nutrition curriculum and educational materials; to promote existing and/or to develop new physical activity promotional components of nutrition education; and expand our existing community outreach program to encompass nutritional components to increase community awareness and knowledge of good nutrition and healthy active lifestyles.
<b>28</b>	<b>Promotora</b>		Works with the Project Coordinator in NEOP communities to conduct nutrition education interventions and participate in local events to promote health eating and physical activity for NEOP eligibles.
<b>29</b>	<b>Recreation Leader</b>		Mentors and trains staff on integration of physical activity into nutrition education interventions. Coordinates one-time physical activity demonstrations. Chooses nutrition and physical activity resources to distribute with nutrition education interventions.
<b>30</b>	<b>Research Specialist</b>		Evaluates nutrition education, and physical activity promotion interventions in a variety of community channels. Methods can include process and impact evaluations, pre and post tests, surveys, focus/discussion roundtables, photo documentaries, case studies, etc.
<b>31</b>	<b>School Administrator (e.g., Principal, Superintendent)</b>		Provides oversight and coordination of the nutrition education conducted in participating classrooms of all schools.
<b>32</b>	<b>Teacher/Student Aide/Assistant</b>		Assists the Nutritionists, Health Educators, and Project Coordinator with nutrition education activities and community events that promote healthy eating and physical activity for low-income families, the target population, Food Stamp recipients and other similar households. 100% direct delivery of educational services.
<b>33</b>	<b>Teacher (preK-12 Classroom, PE, Speech, etc.)</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for students and their families. Supports nutrition education program goals through promotion; local, regional, and statewide collaboration; and close coordination with the Registered Dietitian to train staff.
<b>34</b>	<b>Translator</b>		Translates approved curriculum and materials into Spanish or other languages. Reviews translation for cultural appropriateness. Interprets nutrition education interventions (one-on-one and group) in the community for dietitians, health educators and others .
<b>35</b>	<b>Tutor</b>		Assist teachers and/or students with nutrition education and physical activity promotion.
<b>36</b>	<b>Web Designer</b>		Develops and maintains website containing nutrition education resources, gardening and health related topics and issues.

## STATE LEVEL PROJECT SUMMARY FORM

FFY 2014

1. **Goals & Objectives:** *(See State Level Objectives)*

2. **Project Title: Training Coordination**

a. **Related State Objectives**

Related State Objectives include 1, 2, 3 and 4

b. **Audience**

Local *Network* staff, contracts and partners that provide and support nutrition education and obesity prevention initiatives for all ages and ethnicities of Californians participating in the CalFresh Program and SNAP-Ed-eligibles at 185% or below the FPL. See Project Summaries in Section B for specific audience characteristics in each contract, and Section D, Budget for complete list of all local projects.

### **Focus on SNAP Eligibles**

All of the targeted activities funded by USDA are designed to improve the likelihood that persons eligible for SNAP will make healthy food choices within a limited budget and choose physically active lifestyles consistent with the Dietary Guidelines for Americans. All coordinated training, technical assistance and professional development activities focus on building the capacity of SNAP-Ed intermediaries to effectively provide:

- Individual or group –based nutrition education, health promotion and intervention strategies;
- Comprehensive, multi-level interventions at multiple complementary organization and institutional levels; and
- Community and public health approaches to improve nutrition.

### Income Targeting Data Source

Site verification of 50 percent or greater SNAP-Ed-eligible persons participating in program activities is based on the following data sources:

Primary: Network American Communities Survey (ACS) Census Tract Data-all races at 185%F PL ACS Census Tract Data at 100% FPL for specific race/ethnicities. California Department of Education Free/Reduced Price Meal Participation rates and California Department of Education Child and Adult Care Food Program (CACFP) participation rates when applicable.

Secondary: Percentage participation for location-based proxy sites for “Likely FSP Eligibles” include food banks, food pantries, food stamp offices, Head Start, public housing, shelters/temporary housing, soup kitchens, TANF Job Readiness Program; percentage participation for location based proxy site for “Potential Eligibles” is WIC offices); other agency specific income data.

See project summaries in Section B, a. Local Project Summaries for expanded income targeting data for each contractor.

## c. Project Description

### Summary

A cross-sectional Training Coordination Unit will be created to design and implement a comprehensive system for strengthening and streamlining TAT services focused on supporting the success of LHD contractors and NEOP partners. CDPH will employ training, internet technology (IT) and facilitation consultants to work with NEOP staff and other TAT providers to:

- Create an Accessible Website - Design, implement and maintain an accessible NEOP/Network website including an interactive prospective training calendar and clear links to State and Federal level SNAP-Ed resources;
- Develop an Evidence-Based, Coordinated Training Model - Increase training access and efficacy for SNAP-Ed intermediaries by using evidence based design, delivery and evaluation methodologies to update all in-person and web-based training and technical assistance initiatives delivered in conjunction with NEOP/Network administrative, programmatic, leadership and evaluation programs.
- Institute Workforce Development – Provide training to strengthen competencies needed by State level staff to effectively transfer skills and knowledge needed by NEOP contractors to achieve contractual and programmatic success as Snap-Ed lead agencies.
- Coordinate NEOP/Network Sponsored Meetings Conferences – Create a master plan to guide statewide meetings and conferences to support clear and consistent communication, build on themes, facilitate partnerships and support core competencies needed for sustainable SNAP-Ed initiatives.

Training and technical assistance referenced in this state plan and summarized in the table below will be provided to SNAP-Ed intermediaries in California's 60 local health jurisdictions throughout FFY 2014 to ensure their capacity to achieve contractual and programmatic success as Snap-Ed lead agencies. The companion matrix provides an at-a-glance summary of all CDPH SNAP-Ed Nutrition Education Projects to facilitate cross sectional coordination of programmatic and training initiatives.

### Key Strategies

- Create an Accessible Website
  - Establish a cross-sectional website workgroup to outline how to clean up, re-organize and re-design the NEOP website housed within the CDPH website.
  - Contract with an IT analyst consultant to orchestrate and implement website design changes, including an interactive, prospective calendar.
  - Establish an internal NEOP webmaster team to maintain the site.
  - Identify and purchase web-based software to facilitate development, implementation, tracking, and evaluation of training webinars and e-learning orientation sessions.
- Develop an Evidence-Based, Coordinated Training Model
  - Catalogue all training and technical assistance planned in conjunction with NEOP units and programs for FFY 2014 (*See table below*).

- Work with a professional training consultant and cross sectional team of NEOP staff responsible for training in their respective units/programs to create a collaborative model for designing and delivering SNAP-Ed training to NEOP funded contractors and partners by:
  - Identifying training needs based on; FFY13 capacity/training needs assessments, performance measures, and program managers' knowledge.
  - Work across sections and projects to coordinate capacity and training needs assessments to be conducted in FFY 2014;
  - Define core SNAP-Ed competencies and link them to key performance indicators.
  - Identify common program and training elements across NEOP Sections by objective, topic, channel and/or audience;
  - Identify measurable learning outcomes associated with SNAP-Ed objectives, topics, channels and/or audiences;
  - Review and select evidence-based training methodology(ies) to frame design, delivery and evaluation of TAT;
  - Develop a rubric and tools to inform and instruct how to modify existing TAT to fulfill methodology requirements including: learning outcomes, training content, sequencing, delivery methods and evaluation metrics;
  - Work with NEOP staff content experts to apply principles of the Evidence-Based, Coordinated Training Model to existing TAT.
- Institute Workforce Development
  - Provide workforce development training for NEOP staff to strengthen cross-sectional programmatic collaboration and build capacity to design and deliver effective TAT according to the established model via TAT resources, in-service trainings, and expert skill building workshops.
- Coordinate NEOP/Network Sponsored Meetings Conferences
  - Establish a cross-sectional team of NEOP staff to create a master plan to guide NEOP sponsored meetings and conferences to support clear and consistent communication, build on themes, facilitate partnerships and support core competencies needed for sustainable SNAP-Ed initiatives. Events include but are not limited to: Statewide NEOP Conference, NEOP Statewide Collaboratives, FAN-Out, Region-based meetings and summits.

**d. Summary of Research:**

**Capacity and Training Needs:**

- LHD FFY 2014 FAP Training Assessment - Jun. 2013
- Excerpts from the Four-Year Evaluation of Network-Funded Projects - Jun. 2013.
- Needs Assessment of Strategic Collaboration Training and Resource Needs for California Local Health Departments and Local Education Agencies – Apr. 2013
- NSC Training Breakout Session Assessment – Nov. 2013
- CCLHDN Peer Exchange Summary of Interviews – Mar. 2013

## **Evidence Based Training:**

- American Society for Training & Development - world's largest association dedicated to the training and development profession
- Evidence-Based Training Methods: A Guide for Training Professionals\_ R.Colvin Clark, 2010

### **e. Modification of Project Methods/Strategies**

Training and technical assistance for NEOP funded projects and partners are continually reviewed based on ongoing formative and process evaluation and feedback to ensure they meet the needs of local projects and can ensure reliable delivery of allowable SNAP-Ed objectives.

Existing NEOP/Network State level TAT outlines, curricula and resource materials proposed for use in FFY14 will be reviewed by members of the cross-sectional Training Coordination Unit for content, design and delivery considerations. Modifications will be made as needed to align with evidence-based training methodologies, coordinate across intersecting TAT elements and for logical sequencing, improve delivery methods that will ensure a learner centered approach and integrate behavioral evaluation measures.

### **f. Use of Existing Educational Materials**

See Individual Project Summary Forms for specific information on how SNAP-Ed programs use existing educational materials and the languages used.

### **g. Development of New Educational Materials**

Most training and TA materials will be revised rather developed anew to align with the Evidence Based Coordinated Training Model for designing and delivering SNAP-Ed training. New materials may include web-based self-guided orientations, webinar templates and materials, toolkits and website resources such as an interactive training and event calendar. New workforce development materials may be developed or acquired to help State level staff to ensure that Local Health Departments and other NEOP/Network SNAP-Ed contractors and partners achieve administrative and programmatic success.

### **h. Key Performance Measures/Indicators**

Training Coordination Unit - Kirkpatrick's model for evaluating training<sup>i</sup> will be utilized in developing the Evidence Based Coordinated Training Model. The levels include: measures of satisfaction, knowledge, application capacity and performance.

Training Proposed in FFY2014 State Plan - See Project Summary Forms for specific information on Training Performance Measures.

### **i. Evaluation Plan**

Process measures will be used to document the resources, activities, meetings, trainings presentations, and utilization involving in the four initiatives of the NEOP Training Coordination Unit. Levels of satisfaction and changes in knowledge will be assess via survey for participants involved in and affected by these initiatives. Baseline measures of core competencies or performance indicators will be assessed among random samples of user groups from which to assess changes in capacity over time.

**j. Coordination Efforts**

NEOP TAT Coordination Unit is designed around a high level of coordination and collaboration within and outside of NEOP's State level organization. It involves content experts across the Branch actively participating in an examination and modification of TAT being provided to SNAP-Ed intermediaries for consistent and coordinated messaging and instruction. Collaboration with external contractors, partners and sister SNAP-Ed State level agencies will also occur to coordinate TAT initiatives and maximize resources.

<sup>i</sup> Evaluating Training Programs – Donald Kirkpatrick - 1994

**USDA  
POSITION DESCRIPTIONS**

<b>Position Number</b>	<b>USDA Position Title</b>	<b>LHD Position Title</b>	<b>Position Description</b>
1	Accountant/Finance Analyst		Serves as internal auditor and controller. Assists with processing purchase orders, invoices, preparation of vouchers for payment as related to the Network program, as well as monitoring the budgets.
2	Administrative Coordinator		Provides administrative and office support for the project staff and is responsible for the reporting requirements.
3	Administrator (e.g., Director of Programs)		Administer the nutrition education grant agreement and budget, supervising nutrition education staff, attend nutrition education and scope of work related meetings, program planning and participating in the Regional collaborative. Coordinate grant agreement reporting requirements.
4	After School Coordinator/Assistant		Plan and facilitate nutrition education activities for recreation programming, in after school setting for different age groups of children; seniors, teen; special populations, such as mothers with young children and families; nutrition education for special events and workshops. Prepare instructional plans for youth camps and field trips; and nutrition education for special events and workshops. Prepare instructional plans for nutrition activities, collect data related to nutrition education programming, prepare documentation for nutrition education grant agreement; and helps prepare interim and final progress report .
5	Chief Executive Officer		Provides overall guidance for the operations, personnel, and fiscal responsibilities required by the nutrition project.
6	Community Liaison		Conducts nutrition education, physical activity promotion interventions in the community setting. Works with Community Based Organizations to increase the reach of nutrition education interventions to Nutrition Education Obesity Program eligible.
7	Computer Specialist		The Computer Specialist will provide assistance with the nutrition database and tracking system.
8	Contract Manager		Manages the nutrition education grant agreement including budgets, invoices, local share documentation reports, time studies, fiscal reporting and adherence to funding requirements.
9	Coordinator of Other Program (e.g., Teen program, Healthy Start, etc.)		Supervises, coordinates, facilitates nutrition education activities, workshops, special events related to the recreation and community center planning and working together with other community center groups. Supervises staff implementing the nutrition education grant agreement, prepares invoices, prepares and collects documentation, prepares progress reports
10	Curriculum Specialist		Develops curriculum for nutrition education and physical activity interventions in a variety of different channels/venues.
11	Database Coordinator		Develops database used to track nutrition education, physical activity and food stamp promotion interventions in a variety of channels.
12	Dental/Medical Assistant		Conduct one-on-one nutrition education interventions prior to primary care visit.
13	Dietician		Oversees and supervises the nutrition education program including project administration, project coordination, the development of the nutrition education component and materials and other nutrition and physical activity promotion programs.
14	Family Advocate		Provides nutrition education to students and their families, and recruits NEOP eligible for group nutrition/cooking classes. Provides nutrition, physical activity and food stamp promotion resources to students and their parents.

**USDA  
POSITION DESCRIPTIONS**

15	<b>Food Service Worker (e.g., Director, Manager, Asst., Server, Cook)</b>		Assists with planning and preparing healthy food taste tests in the school setting in conjunction with classroom based nutrition education intervention. Works with teachers to increase student, teacher and parent knowledge of the importance of consuming more servings of fruits and vegetables and being active daily. Compiles documentation on taste testing activities and all reporting required for nutrition grants. In some cases, supervises staff that carry out activities.
16	<b>Graphic Illustrator</b>		Develop local promotional nutrition education materials such as community flyers/ newsletters and/or to develop local nutrition/physical activity promotional/educational materials under the direction of the nutrition staff.
17	<b>Health Educator (including Health Aide, Health Promotion Instructor, etc.)</b>		Develop materials and facilitate health education in both group and individual settings. Teaches general nutrition, the importance of fruits and vegetables, and health benefits of proper nutrition and physical activity.
18	<b>Legal Counsel</b>		Assist with development of policies, approval of grant agreements and Memorandums of Understanding and providing legal advice specifically related to the implementation of nutrition education and physical activity promotion
19	<b>Medical Assistant</b>		Demonstrates safe food handling and personal hygiene to prevent food borne illness, provide nutrition-related services to staff, parents, and students and promotes physical activity within the context of nutrition education. (This does not include any medical nutrition therapy).
20	<b>Nurse/Nurse Supervisor/Nurse Aide RN</b>		Provides nutrition and physical activity promotion to students enrolled in nutrition education programs and their families. Supports nutrition education goals through interventions; local, regional, and statewide collaboration and interventions. (This does not include any medical nutrition therapy).
21	<b>Nutritionist/Nutrition Educator/Nutrition Aide</b>		Provides nutrition education to the neop eligible population. Specific duties include: one-on-one general nutrition education, delivery of general nutrition education in a classroom or group setting, staffing health fairs and other community or promotional events where nutrition education messages are delivered, distribution of linguistically and culturally appropriate nutrition education materials, documentation of educational and other encounters, assisting with writing project reports and preparation of quarterly reports, maintaining program reporting and tracking systems.
22	<b>Office Manager/Secretary/Admin Assistant</b>		Provides general clerical support to the Program. Assists in development and maintenance of a data collection system with emphasis on fiscal information. Arranges meetings and trainings, orders supplies and materials, creates correspondence, photocopies, etc.
23	<b>Pharmacist</b>		Promotes nutrition education and physical activity to NEOP eligible population through displays, distributing literature, and supervising staff to update nutrition education bulletin board.
24	<b>Physician</b>		Supervises professional staff including Dieticians, Nurses and Nutrition/Project Coordinators that provide nutrition education and promotes physical activity to NEOP eligibles in a variety of channels. Provides direction on strategic planning of nutrition and physical activity programs to NEOP eligible clients. In some cases, provides nutrition education to NEOP eligibles. (This does not include any medical nutrition therapy).
25	<b>Professor</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for the NEOP eligible community, and students with their families. Supports nutrition education Program goals and local, regional, and statewide collaboration.

**USDA  
POSITION DESCRIPTIONS**

<b>26</b>	<b>Program Assistant</b>		Assists the Project Coordinator with nutrition education program planning and development. Under the direction of Project Coordinator, works directly with individuals and small groups providing curriculum-based, prevention-oriented general nutrition education and physical activity targeted to NEOP eligibles.
<b>27</b>	<b>Project Coordinator</b>		Coordinate program staff and nutrition education activities; plan and follow through on outreach and educational events at health fairs, schools, and other promotional activities; work with schools, churches, farm worker organizations, and community organizations in planning and promoting good health through dissemination of nutrition education materials; actively acquire and develop culturally and linguistically competent nutrition curriculum and educational materials; to promote existing and/or to develop new physical activity promotional components of nutrition education; and expand our existing community outreach program to encompass nutritional components to increase community awareness and knowledge of good nutrition and healthy active lifestyles.
<b>28</b>	<b>Promotora</b>		Works with the Project Coordinator in NEOP communities to conduct nutrition education interventions and participate in local events to promote health eating and physical activity for NEOP eligibles.
<b>29</b>	<b>Recreation Leader</b>		Mentors and trains staff on integration of physical activity into nutrition education interventions. Coordinates one-time physical activity demonstrations. Chooses nutrition and physical activity resources to distribute with nutrition education interventions.
<b>30</b>	<b>Research Specialist</b>		Evaluates nutrition education, and physical activity promotion interventions in a variety of community channels. Methods can include process and impact evaluations, pre and post tests, surveys, focus/discussion roundtables, photo documentaries, case studies, etc.
<b>31</b>	<b>School Administrator (e.g., Principal, Superintendent)</b>		Provides oversight and coordination of the nutrition education conducted in participating classrooms of all schools.
<b>32</b>	<b>Teacher/Student Aide/Assistant</b>		Assists the Nutritionists, Health Educators, and Project Coordinator with nutrition education activities and community events that promote healthy eating and physical activity for low-income families, the target population, Food Stamp recipients and other similar households. 100% direct delivery of educational services.
<b>33</b>	<b>Teacher (preK-12 Classroom, PE, Speech, etc.)</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for students and their families. Supports nutrition education program goals through promotion; local, regional, and statewide collaboration; and close coordination with the Registered Dietitian to train staff.
<b>34</b>	<b>Translator</b>		Translates approved curriculum and materials into Spanish or other languages. Reviews translation for cultural appropriateness. Interprets nutrition education interventions (one-on-one and group) in the community for dietitians, health educators and others .
<b>35</b>	<b>Tutor</b>		Assist teachers and/or students with nutrition education and physical activity promotion.
<b>36</b>	<b>Web Designer</b>		Develops and maintains website containing nutrition education resources, gardening and health related topics and issues.

**STATE LEVEL PROJECT SUMMARY FORM**  
**COMMUNITY DEVELOPMENT**

**1. GOALS & OBJECTIVES** (*See State Level Objectives*)

**2. Project Title: Local Health Department Program Support**

**a. Related State Objectives**

Related State Objectives include 1, 2, 3, and 4

**b. Audience**

Primary - Local Health Department Grantees (52), Non Profit Contracts (4) and (10) Local Food and Nutrition Education projects that provide nutrition education and obesity prevention services to all ages and ethnicities of Californians participating in the Supplemental Nutrition Assistance Program (SNAP) and SNAP-Ed-eligibles at 185% or below the FPL.

Secondary - SNAP-Ed eligibles at or below 185% FPL throughout California.

Gender: 59.23% Female and 40.77% Male

Ethnicity: All races and ethnicities with specific targeting for African American, Caucasian/White, and Latino/Hispanic populations

Languages: English, Spanish, and select Asian languages, which may include Chinese, Vietnamese, Korean, and/or Hmong

Ages: All ages, primary focus is on families, especially women with children

See Project Summaries in Section B for specific audience characteristics for each grant and/or contract, and Section D, Budget for complete list of all local projects and budget amounts.

**c. Focus on FSP Eligibles**

All of the program activities by USDA SNAP-Ed local contractors are designed to reach SNAP-Ed-eligible consumers and their families where they learn, work, shop, worship, live and receive other services.

Income Targeting Data Sources

Site verification of 50 percent or greater SNAP-Ed-eligible persons participating in program activities is based on the following data sources:

Primary: *Network* American Communities Survey (ACS) Census Tract Data-all races at 185%F PL ACS Census Tract Data at 100% FPL for specific race/ethnicities. California Department of Education Free/Reduced Price Meal Participation rates and California Department of Education Child and Adult Care Food Program (CACFP) participation rates when applicable.

Secondary: Percentage participation for location-based proxy sites for “Likely FSP Eligibles” include food banks, food pantries, food stamp offices, Head Start, public housing, shelters/temporary housing, soup kitchens, TANF Job Readiness Program; percentage participation for location based proxy site for “Potential Eligibles” is WIC offices); other agency specific income data.

See project summaries in Section B, a. Local Project Summaries for expanded income targeting data for each contractor.

#### **d. Project Description**

##### Summary:

*Network* staff will continue to provide programmatic support at the state and local levels to established Local Health Department Grantees, Nonprofit Contractors, and Special Projects to assure programmatic compliance with the USDA *Guidance* and SNAP-Ed Plan.

Local Health Departments will be funded to implement a comprehensive set of deliverables/outcomes that include the following:

The LHD will be responsible to:

- 1) Promote the 2010 Dietary Guidelines to increase consumption and access to healthy foods and drinks, decrease consumption of and access of less healthy foods and drinks, and increase opportunities and activity levels of physical activity among the SNAP-Ed eligible population.
- 2) Conduct and evaluate 2 - 5 series nutrition education classes and/or one time classes/workshops for SNAP-Ed eligible individuals in the community.
- 3) Conduct nutrition education activities in support of local and regional healthy foods/beverage education efforts to reach SNAP-Ed eligible individuals in qualifying communities.
- 4) Conduct a Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) or other community assessment in up to 7 SNAP-Ed eligible low-income neighborhoods and share results with various local stakeholders, community members and community organizations.
- 5) Coordinate local media activities to highlight nutrition and physical activity events, campaigns or accomplishments.

- 6) Conduct community engagement events in order to establish consensus on community priority issues directly related to the CX3 or other community assessments or reassessments in eligible neighborhoods.
- 7) Conduct community events reaching SNAP-Ed eligible individuals or groups.
- 8) Conduct training(s) of service providers including representatives of peer-to-peer (“Champions”) of SNAP-Ed-eligible families, youth and community groups in SNAP-Ed-eligible venues/census tracts.
- 9) Select and implement allowable evidence-based strategies from approved Network Policy, Systems and Environmental Change Matrix.
- 10) Establish a County Nutrition Action Plan (CNAP) and/or coalitions of partnerships for the purpose of addressing community-specific consensus issues/initiatives impacting SNAP-Ed population.

State-level Key Strategies:

- 1) Require template scope of work with standardized goals, objectives and activities with minimum required participants reached based on budget allocation. This standardization will allow channel-specific evaluation.
- 2) Develop programmatic components and review sections of request for application (RFA) for FFY 2015 *Network Plan* for Special Projects; assist with solicitation and provide contractors with teleconference trainings on the forms in the solicitation package; review and approve application documents, assuring SNAP-Ed income targeting.
- 3) Provide an orientation on *Network* policies and procedures to new agency staff and refresher orientations as necessary to accommodate staff turnover.
- 4) Plan and conduct semi-annual meetings with LHDs to discuss overarching strategies , provide specialized trainings and opportunities to share best-practices.
- 5) Conduct training(s) (face to face, web-based or teleconference) to participating agencies on programmatic policies and procedures. Training curriculums are then posted on the *Network* website.
- 6) Monitor and provide continuous technical assistance to 100% of contracts to ensure program and fiscal responsibility throughout FFY 2014.
- 7) Conduct quarterly interactive all-contractor teleconferences to communicate state *Network*, CDSS, UC-CalFresh updates, new program resources, and policy clarifications.

- 8) *Network* CDU Program Managers will conduct site visits annually with 100% of *Network* contractors in FFY 2014 to ensure program quality and compliance with program policies and procedures.
- 9) Program Managers will provide detailed programmatic analyses on all annual and final contractor progress reports submitted.
- 10) Continue working with the Research and Evaluation Unit to develop efficient processes and systems to implement the Education and Administration Reporting System (EARS).
- 11) Partner with the Public Health Institute for FFY 2014 through a master contract to provide enhanced social marketing, fiscal resource development and highly specialized or technical personnel services that are not available through the State infrastructure to ensure that the *Network* is able to meet the goals and objectives of the proposed plan.
- 12) Partner with TBD Media and Public Relations contractor to provide advertising, media and public relations support for the *Network's* social marketing campaigns and the *Centers for Excellence*.
- 13) Program and Contract Managers will follow-up on issues identified during ME Reviews, site visits, annual progress reports, and desk reviews to ensure compliance and identify opportunities for technical assistance.
- 14) Respond to CDPH, CDSS and USDA technical inquiries.
- 15) Update Community Development Unit Resource Section on the website to include all approved resource for use by *Network* Contractors.
- 16) Conduct survey of *Network* funded projects on resource needs and develop a plan to address gaps in resources with other *Network* Units.

Key Educational Messages for Contractors:

- 1) Successful projects require compliance with SNAP-Ed Plan *Guidance*.
- 2) Documentation of allowable expenditures and accurate time reporting is required for reimbursement.
- 3) Nutrition Education messages for target audience will be based on 2010 *Dietary Guidelines for Americans* and [www.ChooseMyPlate.gov](http://www.ChooseMyPlate.gov) with focus on increasing fruit and vegetable consumption, increasing physical activity to 60 minutes a day for children and 30 minutes a day for adults, achieving balanced caloric intake and expenditure, and promotion of SNAP (known as CalFresh in California) to help those with low resources obtain healthy food choices.
- 4) Encourage and support the promotion of the Champions for Change and *Network* brand.

### Intervention Sites:

See project summaries in Section B, a. Local Project Summaries for expanded intervention site data on each contractor.

### Projected Number of Contacts:

Direct Contacts: 2.2 million SNAP-ED eligibles

#### **e. Summary of Research**

Results of most recent statewide surveillance data and individual contractor evaluation results are used to provide guidance to local contractors to improve SNAP-Ed in their communities.

#### **f. Modification of Project Methods/Strategies**

See project summaries in Section B,a. Local Project Summaries for expanded project methods/strategies data for each contractor.

#### **g. Use of Existing Educational Materials**

See *Network for a Healthy California Nutrition Education Materials List* submitted in State plan, Section F.

All of the following materials will be updates to existing materials, produced in English and posted or linked on the *Network* website (except staff Desk Manuals and Technical Assistance Toolkit). They are developed by state staff for *Network* contractors. They address guidelines both from USDA and the CDPH Contract Management Unit and include the following:

- *Nutrition Education and Obesity Prevention Program Guidelines Manual* (semiannual updates; to include Preferred Material and Curriculum List)
- Fiscal Guidelines Manual (semiannual updates)
- Program Manager Desk Manual

See project summaries in Section B, a. Local Project Summaries for expanded educational materials data on each contractor.

#### **h. Development of New Educational Materials**

See project summaries in Section B, a. Local Project Summaries for expanded educational materials data on each contractor.

#### **i. Key Performance Measures/Indicators**

Completion of Key Strategies by state staff, including site visits as outlined in d. Project Description, Key Strategies, paragraph 6 and 7 by *Network* staff. See project summaries in Section B, a. Local Project Summaries for key

performance measures/indicators on each local contractor.

### **3. Evaluation Plan**

Process (internal): GIFTS, an internal tracking system, provides status reports on Program and Contract Manager site visits, communications, invoicing, Request for Application (RFA) documents, progress report analyses, etc.;

Process (contractor): see semi-annual progress report (SAAR) data for contractor reach

Outcome (contractor): see REU Project #2 for Impact/Outcome Evaluation conducted by local contractors

Evaluations of contractor training activities include: surveys of participants in annual fiscal and program trainings for local contractors; surveys of local agency participants in local/regional contractor orientations and subject matter trainings/workshops. Evaluation Tools: GIFTS status reports, Web Based Survey Software, training surveys (participant satisfaction), and SAAR reports.

### **4. Coordination Efforts**

The *Network* will continue coordination with USDA funded programs, namely WIC, CDE, UC-CalFresh and the California Department of Social Services. The *Network* continues to work with both internal and external partners to promote consistent nutrition education messages to SNAP participants and other SNAP-Ed eligible audiences, to conduct activities that promote increased consumption of fruits and vegetables, increased physical activity opportunities and increased access to healthy foods. See project summaries in Section B, a. Local Project Summaries for coordination efforts of each contractor.

**STATE LEVEL PROJECT SUMMARY  
FFY 2014**

**PHI Budget;** \$0 (personnel only)

**1. GOALS & OBJECTIVES** (*See State Level Objectives*).

**2. Project Title: *Campaigns and Program***

**a. Related State Objectives**

Goals 1,2,3,4

**b. Audience**

The campaigns and programs will target activities to Californians who are eligible or potentially eligible for the Supplemental Nutrition Assistance Program.

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for African American and Latino communities and selected materials available in Asian languages and cultural adaptations for Native populations.

Languages: English, Spanish, and select Asian languages, which may include Chinese, Hmong, and/or Vietnamese.

Ages: Adults 18+, primarily women with children, and children ages 5-17 years with concentrated efforts aimed at young adolescents ages 9-11 years.

**c. Focus on SNAP-Ed Eligibles**

All of the targeted campaign and program activities are designed to reach Supplemental Nutrition Assistance Program—Education (SNAP-Ed)-eligible consumers where they shop, learn, work, play, worship, and live. These sites are identified using the data sources described below.

Income Targeting Data Sources:

Site verification of 50 percent or greater SNAP-Ed-eligible persons participating in campaign and program activities will be based on the following data sources:

Primary: *Network* GIS census tract and census block data based on the American Community Survey, 2006-2010 and 2007-2011 data; school free/reduced price meal program percentages; WIC income guideline qualifications; worksites verifying that 50 percent of employees earn \$9.63 per

hour or less; and retail sites in qualifying census tracts and those redeeming more than \$50,000 SNAP benefits, and a wider array of sites that are considered means-tested programs.

#### **d. Project Description**

Key Strategies: Nutrition education classes, marketing, and consumer empowerment that include environmental support strategies; community events; retail promotions; print and outdoor media; radio/TV; internet/websites; training/workshops/conferences; advisory councils; nutrition education research/evaluation; worksite healthy food and physical activity promotions; community empowerment and promotion of healthy communities in low-income dominant settings.

Key Educational Messages: Primary messages focus on consumption and access of fruits and vegetables; consumption of and access to healthy beverages; physical activity promotion and access (integrated with nutrition education); and chronic disease and obesity prevention. Secondary messages include healthier eating, in general; food safety; cooking skills.

Intervention Sites: Working with Local Health Departments (LHDs) and their partners in the following type of sites: Community-based organizations, community youth organizations, direct health service providers (education classes at community clinics and other health care organizations), farmers' markets, flea markets, grocery stores, low-wage worksites, churches, beauty salons, media and public relations events, restaurants/foodservice, food banks, low-resource schools, and community events. May focus on *Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX<sup>3</sup>)* intervention communities.

#### Projected Number of Contacts:

Total estimated reach for the campaign and program *Regional Network* implementation in FFY 2013 is approximately 951,000 individuals. This includes 283,900 through the *Children's Power Play! Campaign*, 402,000 through the *Latino Campaign*, 81,800 through the *African American Campaign* (excluding Faith Projects), 180,000 through the *Retail Program*, 3,600 through the *Worksite Program*.

*Harvest of the Month (HOTM)* contacts are captured through the Semi-Annual Activity Reports and activity tracking reports submitted by school-based and other *Network*-funded agencies and partners such as retailers reaching 3,928,000 pre-school through grade-12 students-and 869,000 adults.

In 2103, *Rethink Your Drink (RYD)* contacts were captured through the Activity Tracking Forms completed by both *Regional Network* and local assistance contractors (primarily, though not exclusively, schools and local health

departments). *Regional Network RYD* contacts are repeated figures from the aforementioned campaigns, as messages and materials are integrated into the tools and activities of these campaigns. Approximately 55,000 unique *RYD* contacts are reported by local contractors.

In FFY 2014, the reach will be through the LHDs implementation of the various campaigns and programs and will be reflective in their FFY 2014 EARs data.

### **Narrative Summary:**

#### ***Network for a Healthy California Fruit, Vegetable, and Physical Activity***

**Campaigns:** The *Network for a Healthy California's* targeted statewide campaigns and programs empower eligible Californians to consume the recommended amount of fruits and vegetables and enjoy physical activity every day. Structured campaigns and programs have been developed, namely the *Children's Power Play! Campaign, Latino Campaign, African American Campaign, Retail Program, and Worksite Program, Physical Activity Integration Program* and expansion to include an *Asian Campaign* specifically targeting Hmong, Chinese and Vietnamese in 2014. Core resources will also be culturally adapted to the Native American population in California. In addition, *Harvest of the Month* offers partners in multiple community channels a tool kit that features monthly produce items that can be linked to a variety of nutrition education activities. All of the targeted campaign/program activities funded by USDA are designed to reach SNAP-Ed-eligible consumers where they shop, learn, work, play, worship, and live. These programs facilitate behavior change by reaching consumers directly through media and community venues, by educating and empowering eligible families to make positive changes in their own environments and with others toward increasing access outside the home.

These research-based, multi-channel, large-scale social marketing initiatives reach specific target audiences in the most effective, cost-efficient manner possible. The community channels used by each campaign/program have been selected to reach the largest proportion of each target audience in environments in which they will be most receptive to educational messages and program interventions. The campaigns and programs align with the *Network for a Healthy California's* brand, Champions for Change, allowing all of the *Network's* activities to work together to reinforce messages, create synergy, and promote behavioral and environmental change.

#### **e. Summary of Research**

The targeted campaigns and programs have undergone extensive formative research and impact evaluation. Focus groups, key informant interviews, community surveys, and statewide surveys have provided the basis for messages, materials, and intervention development. Each intervention channel has been pilot tested, and large-scale studies have been conducted to prove the

effectiveness of specific campaigns and programs. The *Worksite Program* will conduct a case study evaluation on the impact of the *Worksite Program* on low-wage worksites and their employees.

To monitor healthy eating and physical activity behaviors among the target audiences represented by each campaign and program, the team relies on the findings of the *Network's* three statewide surveys. The biennial surveys are the adult *California Dietary Practices Survey*, the *California Teen Eating, Exercise and Nutrition Survey*, and the *California Children's Healthy Eating and Exercise Practices Survey*. The *Network* also collaborates with the researchers conducting the Behavioral Risk Factor Surveillance Survey, the Women's Health Survey, and the California Health Interview Survey by adding questions or working on *Network*-relevant analyses. The surveys are used to help set state and local priorities and to raise public awareness. (See Research and Evaluation Project Summary for more information.)

#### *Children's Power Play! Campaign:*

In FFY 2012, the *Campaign* concluded a large-scale impact evaluation. The study was conducted in 44 low-resource public schools using a cluster randomized, controlled trial. Baseline and follow-up data were collected from 3,463 4th/5th grade students in Fall/Winter 2011/12 and Spring 2012 for the ten-week *Power Play! Campaign* intervention conducted during the 2011-2012 school year. Students received training prior to completing a 24-hour diary-assisted recall interview to estimate foods and beverages consumed. A student survey assessed psychosocial factors that may mediate fruit and vegetable consumption or physical activity engagement: awareness, peer norms, adult modeling, intentions, preferences, and perceived barriers. Minutes spent in physical activity was measured using the validated Self-Administered Physical Activity Checklist. Students participating in *Power Play!* showed statistically significant gains from baseline to follow-up in daily fruit, vegetable, and FV consumption (totaling  $\frac{1}{4}$  cup more,  $p < .001$ ); the proportion meeting the FV guideline (5.1% more,  $p = .001$ ); and PA time at school during lunch and recess (5.1 minutes more,  $p = .003$ ) when compared to control children.<sup>3</sup> *Power Play!* is an effective, low-cost program for schools and community organizations targeting these behaviors, meeting the critical need for affordable and pragmatic nutrition and PA education for high-risk populations.

#### *Latino Campaign:*

In FFY 2012, the *Network for a Healthy California—Latino Campaign* embarked on an Impact Evaluation Study. This investigation used a longitudinal survey design and included a random sample of approximately 700 English and Spanish-speaking free-living California residents of Latino ethnic background

aged 18 to 54 years living in Monterey and Santa Cruz Counties (intervention, n=327) and Kern County (control, n=378). All respondents were participants in the Supplemental Nutrition Assistance Program, called CalFresh in California.

Part of the *Latino Campaign* intervention included two *teatro* performances. The live theater event, called *Aventuras con Verduras*, was evaluated via a brief post-retrospective survey in English and Spanish. Attendees who completed the evaluation were awarded a *Flavors of My Kitchen* cookbook for participating. The first two questions asked respondents how important it was to them that their family 1) eat healthy foods, and 2) is physically active. Survey respondents (n=148) reported just over a 16% increase in the level of importance they felt about both feeding their family healthy foods and ensuring they are physically active ( $p < .001$ ). Questions 3 and 4 asked if respondents were sure they 1) know what is healthy to drink, and 2) can apply for *CalFresh* benefits. They reported a 22% increase in feeling sure about knowing what is healthy to drink, and a 50% increase in feeling sure they could apply for *CalFresh* benefits ( $p < .001$ ). Questions 5-7 indicated that, overall, survey respondents (n=167) agreed that at least one story shown in the play reminded them of their life, the play inspired them to make healthy changes, and that they would come to this type of presentation again, as the mean response was between agree and strongly agree for each measure.

Results from the *teatro* evaluation support the effectiveness of music and theatre at reaching the Latino audience with messages about healthy eating, physical activity, and accessibility of *CalFresh* benefits. Results of the entire Impact Evaluation Study will be available in the fall of 2013.

#### *African American Campaign:*

In order to effectively reach the African American community, the *African American Campaign* adopted and implements the proven-effective ACS *Body & Soul* program. It is based on a National Cancer Institute-funded research project which was conducted by the University of North Carolina and Emory University in Atlanta. It showed that *Body & Soul* significantly increased fruit and vegetable consumption, decreased fat consumption, and increased internal motivation and self-efficacy among program participants. It was particularly important that the impact evaluation demonstrated that churches could implement the program on their own and achieve a significant change in behavior.

In FFY 2008, the *African American Campaign* completed testing of the *Fruit, Vegetable, and Physical Activity Toolbox for Community Educators (Toolbox)* with African American audiences in church and other community settings. The purpose of the study was to test how well the *Toolbox* worked in providing effective nutrition education for the community and to determine whether it could be used to provide the nutrition education lessons within the *Body & Soul* framework. Results showed the *Toolbox* to be effective in increasing self-efficacy

among African Americans with significant changes, over time, in purchasing behaviors, meal and snack preparation, and the reported consumption of fruits and vegetables by women who attended the *Toolbox* sessions. The *Toolbox* is now a component of the *African American Campaign* and is used in faith settings, as well as other community channels. Additionally, results from the *California Dietary Practices Survey* showed increased consumption of fruits and vegetables between the years 1997 and 2011 among African American adults, from 3.1 to 4.4 daily servings ( $p < .05$ ).

*Retail Program:*

Retailer Satisfaction Surveys were conducted with a random sample of three types of retailers: large grocery store chains, small chains/independent and smaller grocers. A complete listing of retailers participating in the *Retail Program* from Oct 2011-Sept 2012 was created from the Regional Networks' Activity Tracking Forms. A random sample of approximately 700 retailers was selected for each "type" of store. A brief online survey was disseminated to the selected stores. Multiple follow-up emails encouraged completion of the survey. Questions addressed the stores' experience and feedback on the *Retail Program* activities as well as suggestions for improvement and general store descriptive information. In FFY 2013, the survey was disseminated to either store directors, produce managers, or store owners in their respective stores. In addition, 30 retailers (10 of each group) were contacted by phone and asked to complete additional questions to solicit more in-depth feedback. The interviewer explained the purpose of the survey, any potential risk or benefits, and ensured responses would be kept confidential.

The results from the survey in FFY 2013 will inform improvements in the *Retail Program* activities to be responsive to retailer perspectives and opinions. A summary of results will be shared with the *Retail Program* Managers in each *Regional Network* and retailers to identify areas for possible improvement.

The FFY 2014 *Guidance* refers to "consultation to SNAP retailers on stocking healthier food options" which is the focus of this evaluation. The *Retail Program's* Retail Fruit & Vegetable Marketing Guide (Marketing Guide) is a technical assistance resource that provides an introduction to handling, storage, and produce marketing to help small and medium stores in low-income communities to improve the quality, variety, and promotion of their fresh produce inventory. The FFY 2012 pilot addressed the following questions: 1) how effective are the Marketing Guide's various components for assisting retailers in the selection, handling, displaying, promotion and sale of fresh produce items, 2) what changes are evident in the store, and 3) what technical assistance is needed for capacity building of *Network*-funded partners, staff, and public health departments. In FFY 2012 Retail Managers in three *Regional Networks* were paired with at least one small to medium size store in a SNAP-Ed eligible census tract interested in increasing their fresh produce sales. Baseline measures of each

store's marketing materials, healthy food inventory, and produce availability and quality were conducted using the CX3 Food Availability & Marketing Survey and Quality Scorecard. The Retail Manager worked with the participating store to complete the *Retail Fruit & Vegetable Marketing Guide's* various components such as the merchandising and display strategies. Structured feedback tools were developed to document the effectiveness of the *Guide*, the types of additional community partnerships or technical assistance that is needed. Pilot results included the need for implementing a statewide technical assistance plan versus individual, on-demand requests. The *Guide's* primary focus is storing, stocking and marketing produce, but the stores involved in the pilot needed more assistance with business planning, funding for equipment, and store layout. The evaluation will explore the potential for partnering with other organizations such as ChangeLab Solutions which has considerable expertise in this area, and will provide opportunities for technical assistance through webinars, virtual office hours, briefs, and a regional convening. Technical assistance will be offered to *Regional Networks*, local health departments, and/or CX3 projects utilizing the *Guide*. Based on surveys from the *Regional Networks*, local health departments and CX3 projects, the webinar topics most requested include: overcoming distribution obstacles to bring fresh, healthy foods to corner stores; how nutrition, tobacco control, and alcohol control advocates can collaborate to develop comprehensive strategies to improve and support local food stores; and developing community-driven strategies to design and implement corner store conversions. Briefs are four-to-eight-page documents intended to provide an accessible introduction to an issue that healthy corner store proponents commonly face. The brief topics most requested include: highlighting policy, systems, and environmental change strategies that can improve conditions highlighted in the CX3 process; a step-by-step guide for residents and local community groups that want to take the first step towards creating healthier corner stores; and how businesses can work with community members to identify what products will meet shoppers' needs, how to build partnerships with local community groups, and how to market healthy changes.

The evaluation results will be used in FFY 2014 to determine the effectiveness of the *Guide* and to identify areas for further improvements as well as to inform decisions regarding appropriate partnerships and technical assistance strategies for working with small retailers in low-income communities to increase their fruit and vegetable access and sales.

*Worksite Program*: Each element of the *Worksite Program* also has been tested. The tools within the *California Fit Business Kit* have been pilot tested with worksite leaders throughout the state, and many of the tools were developed by using an existing evidence base. In FFY 2007, the *California Fit Business Kit Take Action! Employee Wellness Program* was formally evaluated in five worksites. Refinements to this tool were made to both printed program materials and website pages based on the results of the evaluation. In the *Worksite*

*Program Fruit Snack Study*, there was a 39 percent increase in reported fruit and vegetable consumption among low-wage workers who were exposed to the fresh fruit snack deliveries three times per week, as compared to the control worksites.

The *Worksite Program* also completed a study to examine the effect of healthy food merchandising and promotions on the purchase of healthy food items at catering trucks that serve low-wage workers. The Catering Truck Study began in FFY 2007 and was completed in FFY 2008. For five weeks, eight catering trucks offered two “healthy” dishes, termed “Grab N Go” food, in addition to their regular menu items. The two items were a turkey, avocado, and sprouts sandwich with sliced fresh fruit, and a chicken wrap with sliced fresh fruit. Price was held constant throughout the five weeks. During the final Week 5 (Post-Intervention), all special packaging, the health message sign, and the employee promotional wear items were removed, but the two new “Grab N Go” food items were still offered for sale. Sales rose sharply during the “Grab N Go” period where promotional signage and packing were used. The sales increased by 37 percent for the turkey sandwich and by 14 percent for the chicken wrap during the promotional period compared to baseline. The study offers initial evidence that nutritious food items supported by a strong positive message about healthy eating can dramatically improve sales and purchase behavior for those items among low-wage workers, even in a non-traditional food purchase venue.

In FFY 2013, the *Worksite Program* conducted a Case Study Evaluation which was a qualitative study seeking to evaluate how participating worksites are using the program. Information was gathered from *Worksite* Regional Managers, participating business representatives, and employee focus groups. In these interviews, the following questions were answered:

- What are the employers’ attitudes and opinions about the *Worksite Program* materials, activities, and customer service?
- What is the impact of the *Worksite Program’s California Fit Business Kit* tools on creating healthier workplaces for low-wage employees?
- What benefits/return on investment are participating worksites observing and/or documenting with their organizations and employees?

The deliverable from this project is a report that can be formatted into a camera-ready document for website publication by the *Network* to describe successful program implementation. Results will be available in Fall 2013.

### *Asian Campaign*

In FFY 2014, materials and resources will be linguistically and culturally adapted to reach segments of the low-income Asian population. The three sub-groups that will be targeted are Hmong, Chinese and Vietnamese. Resources will be developed, pilot tested and evaluated with the intention to go statewide in FFY 2015 with the refined resources.

### American Indian/Alaskan Native Resources

In FFY 2014, materials and resources will be linguistically and culturally adapted to reach low-income American Indian/Alaskan Native population. Focus will be placed on tribes that are native to California. Resources will developed, pilot tested and evaluated with the intention to go statewide in FFY 2015 with the refined resources.

### Harvest of the Month:

In 2005-2006, a *HOTM* process evaluation was conducted with the goal being to assess the reach, doses delivered and received, and fidelity of the standardized *HOTM* intervention, compared with the implementation plan. The evaluation sought to identify contextual factors and the resources required to implement the intervention and to capture qualitative data that could gauge the likelihood that the intervention will have the intended impact in schools. Ten *Network* contractors measured change in the reported consumption of fruits and vegetables and four factors associated with consumption—knowledge, preferences, familiarity, and self efficacy for eating fruits and vegetables. Data came from contractors who used a pretest and posttest design. The results showed that change in fruit and vegetable consumption and factors that influence fruit and vegetable consumption could be attributed to the interventions used by these contractors which emphasized *HOTM*.

In 2006 and 2007, a customer satisfaction survey was sent to LIAs. The purpose was to determine if *HOTM* was meeting their needs and to obtain feedback that would help direct the development of future *HOTM* elements. Overall, LIAs were very satisfied with the educator newsletters, family newsletters, and menu slicks. LIAs requested additional literature lists and more technical assistance for adding school district logos to the elements. The *HOTM* poster received very positive feedback and is displayed in classrooms, cafeterias, offices, and the teachers lounge.

In FFY 2010, 44 local projects conducted evaluation projects. Of these 44 agencies, 12 were selected for a meta-analysis that targeted grades 4-8 and used pre/post test evaluation design. A total of 1,474 children participated in *HOTM* and its evaluation; an additional 544 participated in a control group that received no *HOTM* intervention. Significant increases ( $p < .001$ ) were found for the number of fruits, vegetables, and total fruits and vegetable reported as consumed—16, 10 and 13 percent increases, respectively. The control group showed no significant increases in consumption. In FFY 2010, a best practice study for *HOTM* was started; it included key informant interviews with stakeholders and, in FFY 2011, a quantitative survey with 750 teachers. The final findings, along with input from the *HOTM* advisors, are being used to drive future implementation and development.

### Rethink Your Drink:

Healthy beverage education continues to be a key element of *Network* nutrition education programming offered in support of MyPlate healthy diet messaging. In FFY 12, activities were primarily formative. The *Rethink Your Drink Campaign (RYD)* completed two sets of focus groups - one to steer the rebrand process, and the other to offer insights on healthy beverage behaviors, nutrition messaging and effective tools. In response to partner and target-audience feedback, a new *RYD Campaign* logo and accompanying marketing materials were developed. In response to the nutrition education focus groups, the *RYD* approach and messaging were confirmed as resonating with the target audience, and supporting nutrition education materials were developed.

During 2012, the *RYD Campaign* completed a formative statewide survey.

Modeled after the Benchmark Survey, the survey consisted of both telephone and mall-intercept inquiries. Respondents were asked about their sugary beverage consumption patterns, preferred substitution behaviors, as well as questions addressing knowledge, attitude, and normative beliefs. Data from this survey will be analyzed in FFY 2014 and will inform materials development and messaging.

The *RYD Campaign* has placed a high priority on providing training and technical assistance to contractors throughout the State. *RYD Campaign* staff has conducted three webinars and one in-person training since the campaign was activated in late January of 2012. A second priority has been to augment the available materials to support the *RYD Campaign* implementation in line with the most recent USDA advice on *RYD*. In that same time period, the team has established an *RYD* presence on the *Network* website and has built an impressive listing of supporting materials.

*RYD Campaign* elements are informed by programmatic formative work as well as by state level trends in consumption as reported by multiple sources including CHIS data and State level surveys administered by the *Network*.

### **Modification of Project Methods/Strategies**

The campaigns and programs will work in FFY 2014 to support and build capacity in social marketing, cultural competence, and public/private partnership for LHDs now participating in the *Network*.

Core intervention approaches for the targeted campaigns and programs have not been modified. The *African American Campaign* will work through LHDs to pilot interventions through beauty salons, and the *Latino Campaign* will work similarly in the faith channel. The *Children's Power Play! Campaign*, through collaborations with the LHDs, *Latino* and *African American Campaigns*, will continue to seek opportunities to reach elementary-school aged children using targeted, age and culturally appropriate materials. In addition, the *Latino*

*Campaign and Worksite Program* will collaborate on methods to reach low-wage Latino farm workers and ag workers with LHDs.

The *Retail Program* will work closely with

#### **g. Use of Existing Educational Materials**

**The following kits, manuals, guides, print, electronic, lesson plans, and educational aids will be used:**

*School Idea & Resource Kits Power Up for Learning: A Physical Activity Supplement to the School Idea & Resource Kit. Community Youth Organization (CYO) Idea & Resource Kit: Fruit, Vegetable, and Physical Activity Toolbox for Community Educators: Nutrition and Health Barriers Facing California Latinos - Latino Community Leaders Recommend Practical Solutions: A Day in the Life (DVD and Discussion Guide): Conducting Successful Nutrition Education and Physical Activity Promotion at Community Events (Manual)*

*Building a Healthy Body & Soul: Faith-Based Nutrition and Physical Activity Health Ministry Guide: Advocating for the Health of our Communities: Consumer Empowerment Agenda of the Network for a Healthy California—African American Campaign Advisory Council: Retail Food Demonstration Training Kit, Retail Store Tour Guide, Produce Quick Tips, Retail Program Point-of-Sale Merchandising Materials: Produce Handling Guide, Retail Fruit and Vegetable Marketing Kit: California Fit Business Kit, Workplace Nutrition and Physical Activity - An overview of the facts, case studies, and information resources: Harvest of the Month (HOTM) Tool Kit, Instant Recess (DVDs), Shape of Yoga: Nutrition and Physical Activity Booklet for the Family: Playing for Healthy Choices, Eat Well, Move More EASY: Shape of Yoga DVD EASY: Power Up in 10 DVD, Power Up in 10 Strength Training Booklet, Try Something New Sticker Booklet: Power Up Your Summer! Challenge Group and Individual Play Trackers, Power Cards, Farm to Table Activity Booklet, Power Play! Nutrition and Physical Activity Promotion Stickers, Photovoice Guide, Rethink Your Drink High School Lessons Beverage Label Cards: Potter the Otter Early Childhood Materials*

#### **Cookbooks**

*Kids...Get Cookin'!: Fast and Fun Recipes, Flavors of My KitchenSoulful Recipes: Building Healthy Traditions ,Everyday Healthy Meals*

In addition to the materials described above, the campaigns and programs promote the use of materials produced by USDA, the California Department of Education (CDE), the Centers for Disease Control and Prevention (CDC), the Produce for Better Health Foundation (PBH), and other reputable sources. For example, the *Children's Power Play! Campaign* promotes the use of *Fruits and Vegetables Galore* (USDA), *The Power of Choice* (USDA), *Nutrition to Grow On* (CDE), and the *Nutrition Decathlon Toolkit* (Health Education Council). The *Network* encourages participation in national programs, such as the Healthier US

Schools Challenge, the First Lady's *Let's Move!* Initiative (especially *Let's Move Salad Bars to Schools*), and the Alliance for a Healthier Generation. The *Children's Power Play! Campaign* encourages partners to use their own funds for the *School Health Index* (CDC), *Changing the Scene* (USDA), and a locally-developed tool for evaluating community youth organization nutrition and physical activity environments.

The *African American Campaign* promotes and uses the ACS *Body & Soul* program, and the *Latino Campaign* is modifying *Body & Soul* for use with Latino populations. In addition, the campaigns and programs monitor fruit and vegetable and physical activity messages and materials that are disseminated by USDA, CDC, and PBH, and use these messages, as appropriate, in revised educational materials.

Note: All of the materials developed through the fruit, vegetable, and physical activity campaigns are intended for SNAP-Ed audiences. They are developed based upon formative research with these audiences, pilot tested with eligible audiences, and include the required USDA acknowledgement language and SNAP promotion statement. For those materials not already submitted or those that have been updated, this will be submitted for inclusion in the SNAP-Ed Nutrition Connection Resource Library. Please see Materials State Level Project Summary Form for a complete inventory.

#### **h. Development of New Educational Materials**

Please see the State Level Project Summary for Materials for itemized list of proposed updates and new materials for FFY 2014.

#### **i. Key Performance Measures/Indicators.** *Key Performance measures will be reviewed through existing surveys over time to see significant change in the following areas in the low income population in California with specific interests in groups with health disparities (Latino, African-American, American Indian and Asian):*

- Increase in fruit and vegetable consumption, increase access to fruits and vegetables
- Decrease in consumption of Sugar Sweetened Beverages, Increase in water consumption
- Increase in Physical Activity duration, Increase access to PA opportunities
- Increase in Self-Efficacy and any reported social norm changes

### **3. Evaluation Plan**

#### **Evaluation Type**

**Formative:**

**Process:** LHDs, their subcontractors, and other funded partners will continue to collect process evaluation measures for the *Children's Power Play! Campaign*, *Latino Campaign*, *African American Campaign*, *Retail Program*, *Physical Activity Intergration Program*, *Worksite Program*, and *Rethink Your Drink* via activity tracking forms, which are based upon the USDA EARS requirements. Measures will include: number of classes/events conducted, number of contacts, number of partner organizations, nutrition and physical activity environmental changes implemented by partners, documentation of media efforts across all campaigns and programs, and any additional EARS requirements. The *Worksite Program* specifically tracks *California Fit Business Kit* implementation; gathers *Take Action!* evaluations from worksite participants, Team Captains, and Program Managers; conducts two in-depth employee surveys per region; collects a productivity/ absenteeism evaluation form; and completes two case histories per region. All data are being captured in a customized database developed at Loma Linda University, which is used by the *Regional Networks*.

The *Retail Program* in conjunction with the CX<sup>3</sup> team and an outside contractor will explore the implementation of a healthy retail certification program and setting the standard criteria for achievement.

**Outcome/Impact:** In FFY 2014, the *Latino Campaign* will be conducting a Federally Qualifying Health Center Texting pilot intervention to assess behavior change and look at BMI pre and post intervention.

The *Worksite Program* will be conducting a Vending Study to assess the success of healthy vending at low-wage worksites using a variety of intervention groups.

The *African American Campaign* will be piloting a more comprehensive approach to a Beauty Salon intervention, building in the successes and learning from the failures of the past. This intervention will ultimately result in an AA Beauty Salon toolkit that can be used in a train-the-trainer format statewide.

**Evaluation Tools:** Consumer surveys and questionnaires, intermediary questionnaires, focus groups and/or informal roundtable discussions, intercept surveys, key informant interviews, and sales data are collected using tested and/or tailored instruments. Environmental assessment tools around access to physical activity will also be identified and piloted this fiscal year.

#### 4. Coordination Efforts

The targeted campaigns and programs are aligned with the *Network for a Healthy California's* overall strategy, brand, and messaging. At the state level, the Fruit, Vegetable, and Physical Activity Campaigns Unit staff will coordinate with the Community Development unit, Research and Evaluation, and the Media and Communications team. Campaigns and Programs will coordinate with LHDs and their local partners to provide training, technical assistance and resources throughout the state.

The *Children's Power Play! Campaign* and *Harvest of the Month* coordinates with UC-CalFresh's school-based programs for classrooms and cafeterias in order to cross-promote programs and ensure complementary services. The *Children's Power Play! Campaign* and UC-CalFresh state-level staff will continue to identify effective models for collaboration, while ensuring program and fiscal integrity between the two SNAP-Ed programs. *Power Play!* and *Harvest of the Month* also coordinate with the California Department of Education (CDE) and the California Department of Food and Agriculture (CDFA). Continued collaboration and sharing of resources with CDSS and other FAN-Out partners. Representation from the campaigns and programs are also expected to coordinate with state level partners of the Interagency State Nutrition Action Partnership Committee (iSNAC), and the *Retail* program will continue partnerships specifically with WIC.

## STATE LEVEL PROJECT SUMMARY

1. Goals & Objectives (*see State Level Objectives*)
2. Project Title: American Indian Alaskan Native Materials Pilot

PHI Budget: \$100,000

- a. Related State Objectives: 1, 2, 3, 4
- b. Audience.

Gender: Females and Males

Ethnicity: American Indian/Alaska Native (AI/AN)

Languages: English.

Ages:15-40

- c. Focus on SNAP-Ed Eligible. American Indians and Alaska Natives (AI/AN) living on or near Tribal Health Programs on California Indian Reservations and Rancherias or Urban Indian Health Centers, who are at or below 185% of the federal poverty level.
- d. Project Description.

### Key Strategies/Methods:

1. Implement the *Fruit, Vegetable, and Physical Activity Toolbox for Community Educators (Toolbox)* at four Tribal Health Programs and two Urban Indian Health Centers in counties with large populations of AI/AN.
2. Reinforce key nutrition, physical activity, and obesity prevention messages with text messages.
3. Obtain feedback from community members and health program/clinic staff on the implementation and effectiveness of the toolbox and any cultural modifications.
4. Obtain feedback from community members and health program/clinic staff on the text messages.
5. Identify additional policy, systems, and environmental changes, as well as nutrition education and physical activity promotion materials, that would be useful for Tribal Health Programs, Urban Indian Health Clinics, and Local Health Departments (LHDs) in future SNAP-Ed work with AI/AN for potential development.
6. Provide input on cultural adaption and translation of existing SNAP-Ed materials for AI/AN.
7. Provide guidance and technical assistance as requested to LHDs on how to best serve AI/AN in their respective counties.

### Key Educational Messages:

1. Fruit and Vegetable Intake
2. Label Reading
3. Physical Activity
4. Sugar Sweetened Beverages

Intervention Sites: Six (6)

Projected Number of Contacts:

6 locations x 20 participants at each location = 120

Narrative:

The *Network Fruit, Vegetable, and Physical Activity Toolbox for Community Educators (Toolbox)* is an evidenced-based set of lessons that has been proven effective in increasing participants' knowledge, attitudes, self-efficacy, empowerment, and reported fruit and vegetable- and physical activity-related behaviors.<sup>1</sup> Outreach to AI/AN in California on or near Reservations, Rancherias, and Urban Indian Health Centers is an excellent opportunity to reach one of California's neediest communities with evidenced-based nutrition education and physical activity promotion. This project aims to conduct a series of at least five *Toolbox* classes (to align with the number of classes taught in the JNEB Supplement of the *Network's Toolbox* Evaluation paper), adding text message reinforcement opportunities between sessions.

e. Summary of Research.

American Indians and Alaska Natives suffer disproportionately from the burden of chronic disease.<sup>2</sup> Over 35% of AIAN in California are overweight (95% CI: 27%-44%) and nearly 39% are obese (95% CI: 30%-48%), which is higher than that of non-Hispanic Whites in California of the same age group (34% and 21%, respectively). Diet-related disease prevalences are alarmingly high for AIAN in California. Over a fifth (21%) of AIAN have been diagnosed with diabetes, which is significantly higher than those of non-Hispanic Whites (7%; 95% CI: 6% - 7%). In fact, more AI/AN report having been diagnosed with diabetes than any other race or ethnicity (Black 12%, Latino 10%, Asian 7%,). Nearly 15% of AIAN have been diagnosed with heart disease and 43% have been diagnosed with high blood pressure, higher than non-Hispanic Whites (8% and 28%, respectively). When looking at the SNAP-Ed population (household income <185% of the Federal Poverty Level), more AIAN (46%) report not being able to afford enough food (i.e., are food insecure) than any other race or ethnicity.

When only one out of every four AI/AN in California fall in to a healthy Body Mass Index (BMI) range, and with nearly half of the SNAP-Ed eligible AI/AN population classified as food insecure, culturally tailored nutrition education outreach is critical.

Texting is a new and innovative way to outreach to populations with health education messages. Several peer-reviewed journal articles have reported positive health behavior outcomes with text message interventions (e.g., Text4Baby, Text2Quit). The *Network* recently pilot tested a text message program with low-income (SNAP-Ed

Using a Toolbox of tailored educational lessons to improve fruit, vegetable, and physical activity behaviors among African American women in California. *J Nutr Educ Behav.* 2011 Jul-Aug;43(4 Suppl 2):S75-85.

<sup>2</sup> All statistics in this paragraph are from the 2007 and 2009 California Health Interview Survey. The UCLA CHPR race variable was used for race and ethnic specific data. [www.ask.chis.ucla.edu](http://www.ask.chis.ucla.edu).

eligible) Latinos in FFY 2012. Culturally tailored messages were sent to subscribers for up to 16 weeks. Content included prompts to eat more fruits and vegetables, recipes and ideas for healthy meals and beverages, links to helpful websites, and information about upcoming events in their area. Results of this pilot showed a 17% increase in reporting that half of plates were filled with fruits and vegetables ( $p < .05$ ). Seventy percent of participants with healthy beverages goals reported meeting or exceeding them. Unprompted, some participants replied with text messages reporting that they had lost weight and that they and/or their children had stopped drinking sugar sweetened beverages as a result of the text message program.

Texting in Indian Country is an arena that has recently been explored with other tribal organizations. A survey done with AI/AN aged 13-21 in the Northwest Portland area reported cell phones as the media most frequently used to talk, text, access the Internet, and send or receive images.<sup>3</sup> Of those who had cell phones, nearly all (96%) reported using its text message feature. Over half of females reported sending more than 60 text messages per day. Based on the survey results, We R Native was created as a multimedia health resource for Native teens and young adults, run by the Northwest Portland Area Indian Health Board. The service includes a website, a text messaging service, a Facebook page, a YouTube channel, a Tumblr account, a Twitter feed, and print marketing materials. The service is funded by the President's National HIV/AIDS Strategy and the Indian Health Service.

f. Modification of Project Methods/Strategies.

Adapting existing approved materials to increase cultural relevance. Adding text message reinforcements to *Network Toolbox* lessons.

g. Use of Existing Educational Materials.

- *Fruit, Vegetable, and Physical Activity Toolbox for Community Educators (Toolbox)* (<http://www.network-toolbox.cdph.ca.gov/en/index.asp>).
- *Ten Tips Nutrition Education Series* (<http://www.choosemyplate.gov/healthy-eating-tips/ten-tips.html>)
- Network Cookbooks
  1. *Everyday Healthy Meals* cookbook (<http://www.cdph.ca.gov/programs/cpns/Documents/CPNS-EverydayHealthyMealsCookbook.pdf>)
  2. *Kids Get Cookin'* cookbook (<http://www.cdph.ca.gov/programs/cpns/Documents/Network-FV-PP-KidsGetCookinPowerPlayRecipes.pdf>)
  3. *Flavors of my Kitchen* cookbook (<http://www.cdph.ca.gov/programs/cpns/Documents/COOK225JU2011FINAL.pdf>)

---

<sup>3</sup> Rushing, S. and Stephens, D. Use of Media Technologies by Native American Teens and Young Adults in the Pacific Northwest: Exploring Their Utility for Designing Culturally Appropriate Technology-Based Health Interventions. *Journal of Primary Prevention*, 31(1). Published online July 20 2011.

- h. Development of New Educational Materials. Culturally tailored text messages to reinforce key nutrition education and physical activity promotion messages presented in the *Toolbox*, *Ten Tips Series*, and *Network* cookbooks.
- i. Key Performance Measures/Indicators.
  - 1. Knowledge, attitudes, self-efficacy, empowerment, and reported fruit and vegetable- and physical activity-related behaviors.
  - 2. Recommendations for future tribal nutrition education and outreach activities.

### 3. Evaluation Plans

Pre- and post-test questions regarding the knowledge, attitudes, self-efficacy, empowerment, and reported fruit and vegetable- and physical activity-related behaviors. Qualitative interviews with tribal staff members regarding the implementation and cultural appropriateness of the *Toolbox* and text message reinforcements. Focus groups with community members on the cultural appropriateness of the text messages and *Toolbox* lessons.

### 4. Coordination Efforts.

This project will align with the *Network's* overall strategy, brand, and messaging. In a culturally competent manner, the *Toolbox* lessons will continue to identify and work with LHDs that have expertise and experience with AI/AN groups, reach out to other school and community local assistance projects (former LIAs, other projects, and partnership initiatives) and continue to compliment current and former *Network* funded AI/AN Tribal Health Programs and Urban Indian Health Centers to create horizontal and vertical integration. This project will promote the use of nutrition assistance programs such as CalFresh, WIC, food banks, and school meals to help families extend their food dollars and obtain the foods they need to maintain their health. Flyers, brochures, and other educational materials will be made available to connect eligible families with local resources for health information and physical activity options in a culturally relevant manner. Technical assistance and guidance given to LHDs on how they can best serve the AI/AN population in their respective counties.

## STATE LEVEL PROJECT SUMMARY FORM

### 1. Goals & Objectives (see State Level Objectives)

### 2. Project Title: Asian Materials

PHI Budget: \$150,000

a. **Related State Objectives: 1, 2, 3, 4**

b. **Audience.**

Gender: Females and Males

Ethnicity: Asian Americans (Hmong, Chinese, and Vietnamese)

Languages: English, Cantonese, Hmong, Vietnamese, and potentially Mandarin.

Ages:18-54

c. **Focus on SNAP-Ed Eligible.** Asian Americans, specifically Chinese, Hmong, and Vietnamese, who have household incomes at or below 185% of the federal poverty level.

d. **Project Description.**

Key Strategies/Methods:

1. Implement translated *Fruit, Vegetable, and Physical Activity Toolbox for Community Educators (Toolbox)* lessons in community based organizations and/or direct health service providers that serve low-income Asian Americans, in particular Chinese, Hmong and Vietnamese, in counties with large populations of these high-need populations.
2. Assist in the translation and cultural adaption of current SNAP-Ed materials.
3. Provide input on cultural adaption and translation of new SNAP-Ed materials for low income Asian Americans, specifically Chinese (Cantonese and/or Mandarin), Hmong and Vietnamese.
4. Obtain feedback from community members and health program/clinic staff on current *Network* materials, and the implementation and effectiveness of the *Toolbox* and any successful cultural modifications.
5. Identify additional policy, systems, and environmental changes, as well as nutrition education and physical activity promotion materials, that would be useful for community based organizations, direct health service providers, and Local Health Departments (LHDs) in future SNAP-Ed work with Asian Americans for potential development.
6. Work with LHDs that have experience with low-income Asian American groups and provide guidance and technical assistance as requested to LHDs on how to best serve Asian Americans in their respective counties.

Key Educational Messages:

1. Fruit and Vegetable Intake
2. Label Reading
3. Physical Activity
4. Sugar Sweetened Beverages

Intervention Sites: Six (6)

Projected Number of Contacts:

2,000

Narrative:

The *Network Fruit, Vegetable, and Physical Activity Toolbox for Community Educators (Toolbox)* is an

evidenced-based set of lessons that have been proven effective in increasing participants' knowledge, attitudes, self-efficacy, empowerment, and reported fruit and vegetable- and physical activity-related behaviors.<sup>1</sup> This project aims to conduct a series of at least five *Toolbox* classes (to align with the number of classes taught in the JNEB Supplement of the *Network's Toolbox* evaluation paper).

e. **Summary of Research.**

When viewed as a homogenous group, Asian Americans tend to have more positive health outcomes when compared to other ethnic minorities. However, when looking particularly at low-income Chinese, Hmong, and Vietnamese Californians, perceived health, food security, and income disparities become more readily visible. Chinese and Vietnamese California adults were less likely to report that their general health was Excellent (19% and 17%, respectively) compared to non-Hispanic Whites (30%), and more likely to report that their general health was just Fair (Chinese 16%, Vietnamese 21%, non-Hispanic White 8%)<sup>2</sup>. These population groups are less likely to seek medical attention due to cultural and language barriers, and thus miss out on valuable health promotion efforts. Language and literacy factors affect label reading skills, making informed food and beverage selections difficult, especially for elders with diabetes and hypertension issues.

The California Asian Pacific Islander Joint Legislative Caucus highlights several major health outcomes specific to Asian Americans in California in their 2009 legislative report<sup>3</sup>:

- *Asian Americans, Native Hawaiians, and Pacific Islanders (AANHPIs) are the only racial group for whom the leading cause of death is cancer, with higher rates among Asian Americans (27.7%) and NHPs (25.4%) than for White (23.3%), Latino (20.4%), Black (22.4%) and American Indian/Alaska Native (20.3%) populations in California in 2004.*
- *Compared to other racial/ethnic groups, NHPs have some of the highest rates of diabetes; Filipinos, Vietnamese, and South Asians also have diabetes rates higher than the California average, despite having a generally younger population.*
- *Many Asian American subgroups have a greater percentage of people with limited English proficiency (LEP) compared with other groups.*
- *Over half of the Vietnamese (54%)... communities have limited English proficiency, the highest rates among Asian groups.*
- *The Hmong community has the highest percentage of individuals (32%) living below poverty.*
- *Chinese, Vietnamese and South Asians each have 12% of their population without a usual source of care, a rate that is 2 percentage points above the rate for Whites (10%).*
- *Higher proportions of Vietnamese, Chinese, and NHP do not participate in walking for fun.*
- *Diabetes as a leading cause of death is of particular concern among Chinese in California in 2004.*

The *Network* has funded several Asian America Community Based Organizations (CBOs) and Direct Health Service Providers (DHSPs) in the past. For example, the San Francisco Chinatown Public Health Center recently developed and implemented a "We Can!" project for low-income Chinese adults and their children, a four-week series which included label reading, nutrition education, physical activity demonstrations and promotions, and recipe tastings, in a culturally competent manner and in Cantonese. The opportunity to standardize curricula being taught in SNAP-Ed nutrition

*FFY 2014 Plan*

education outreach in California while still considering cultural and linguistic needs would assist in serving these three priority low-income Asian populations.

Asian Americans in California are the only racial/ethnic group with cancer as the number one cause of death and they experience language and cultural barriers to health promotion and quality nutrition education, making tailored SNAP-Ed interventions critical.

f. **Modification of Project Methods/Strategies.**

Adapting existing approved materials to increase cultural relevance.

g. **Use of Existing Educational Materials.**

- *Fruit, Vegetable, and Physical Activity Toolbox for Community Educators (Toolbox)* (<http://www.network-toolbox.cdph.ca.gov/en/index.asp>).

1. **Goals & Objectives** (see State Level Objectives)
2. **Project Title: Multi-Ethnic Faith Special Projects**

	<b>Minimum Direct Contacts</b>	<b>PHI Budget</b>
Faith Project Pilots	5300	\$375,000

a. **Related State Objectives.**

Supports State Level Objectives 1, 2, 3, 4

b. **Audience.**

The interventions will target activities to African American, Chinese American and Latino families who are eligible, likely-eligible, or potentially-eligible for the CalFresh.

Gender: Female and Male

Ethnicity: African American, Chinese, Latino

Languages: English, Cantonese, Mandarin, Spanish

Ages: Adults 18-54 year

c. **Focus on SNAP Eligibles**

These interventions are funded by USDA and are designed to reach SNAP-Ed-eligible consumers where they shop, learn, worship, and live. These sites are identified using the data sources described below.

Income Targeting Data Sources:

Site verification of 50% or greater SNAP-Ed-eligible activities will be based on the following data sources:

- Primary: *Network* GIS census tract and census block data, school free/reduced-price meal program enrollment data, and/or means tested locations.
- Secondary: Community-based organization record audits and consumer surveys

d. **Project Description.**

Key Strategies/Methods: Nutrition education classes; community events; print media; radio/TV; internet/websites; training/workshops/conferences; advisory councils; nutrition education & community empowerment, youth engagement; research/evaluation; promotion of healthy communities (promotion will be directly linked, supportive of, and proportionate to direct nutrition education for SNAP-Ed-eligible families); policy, systems or environmental change; technical assistance to Local Health Departments (LHD) on how to best serve SNAP-Ed populations via faith outreach.

Key Educational Messages:

1. Fruit and Vegetable Intake
2. Healthy Eating
3. Label Reading
4. Physical Activity
5. Sugar Sweetened Beverages

Intervention Sites: Delivery sites for Faith Projects includes churches, temples, community-based organizations, community events, farmers' markets, grocery stores, and media and public relations events.

Projected Number of Contacts:5300

Narrative Summary:

**i. Faith Project Pilot (African American):**

In FFY 2013, there were three active faith projects. These three distinct faith associations/alliances worked with churches in the Central Valley, Los Angeles, and San Diego regions. Faith Projects used the American Cancer Society's *Body & Soul* program, which provides a framework for successfully influencing nutrition and physical activity behaviors among African Americans in church settings.

In FFY 2014, in coordination with LHDs, the key activities of the Faith Projects will include: recruitment, training, and support to qualifying churches within the church association's network to implement the *Body & Soul* program and complementary activities to reach eligible African American adults. State-level *African American Campaign* activities will include program development and refinement; materials updating; research and evaluation; partnership development; and oversight, training, and technical assistance for LHDs that elect to work with African American faith organizations.

**ii. Faith Project Pilot (Asian American):**

The key activities of this new Faith Project includes:

1. Recruitment, training, and support to qualifying churches, temples, and faith-based nonprofit organizations to reach SNAP-Ed eligible Asian American adults, especially Chinese Americans.
2. Provide technical assistance to participating congregations in developing community partnerships and educating and encouraging consumers to create positive changes in their communities.
3. Conduct SNAP-Ed eligible education and marketing activities with churches, temples, and faith-based organizations, including but not limited to: Nutrition education classes; community events; print media; radio/TV; internet/websites; training/workshops/conferences; advisory councils; nutrition education & community empowerment; research/evaluation; promotion of healthy communities.

4. Provide guidance, and offer technical assistance as requested to LHDs on how to best serve Asian Americans, especially Chinese Americans, in their respective counties in churches, temples, and faith-based organizations.
5. If the County LHD has selected Faith Objective #17 of the LHD Scope of Work, and focuses on low-income Chinese Americans, provide technical assistance and guidance on how to best serve the SNAP-Ed eligible Chinese population in churches, temples, and faith-based nonprofit organizations to effectively complete Objective #17.
6. Assist in the translation and cultural adaptation of current SNAP-Ed materials.
7. Provide input on cultural adaptation and translation of new SNAP-Ed materials for Asian Americans, specifically Chinese (Cantonese and/or Mandarin).
8. Identify additional policy, systems, and environmental changes, as well as nutrition education and physical activity promotion materials, that would be useful for community based organizations, direct health service providers, and LHDs in future SNAP-Ed work with Asian Americans in churches, temples, and faith based nonprofit organizations for potential development.
9. Contribute to the development of the Faith Interventions Toolkit, specific to the Asian American outreach sections and translated components.

### iii. Faith Project Pilot (Latino):

In response to lessons learned from the *Body and Soul* pilot program, and the overwhelming response to wanting to work with Latino churches by LHDs the *Latino Campaign* will develop a program designed to address parishioner's request to include youth as part of what the *En Cuerpo y Alma* nutrition program will offer faith communities.

The *En Cuerpo y Alma* (Latino *Body & Soul*) program, slated for piloting in FFY2014, will comprise structured bilingual nutrition education and physical activity lessons from the *Network for a Healthy California's* Latino Fruit, Vegetable and Physical Activity Toolkit geared towards adults ages 18 to 54, along with a youth component comprising nutrition education and physical activities geared towards kids ages 5 to 12. Classes offered to youth will be held concurrently with those provided to adults.

Activities offered to youth may include youth gardening projects and simple recipe demonstrations trainings for older children. They will also incorporate kid-friendly physical activities to support the nutrition classes. Youth will implement a leadership component in order to move policy, systems and environmental change topics up the chain-of-command at the churches.

## e. Summary of Research

### i. Faith Project Pilot (AA):

An impact evaluation study funded, in part, by the National Cancer Institute and conducted by the University of North Carolina and Emory University, showed that the *Body & Soul* program significantly increased fruit and vegetable consumption, decreased fat consumption, and increased internal motivation and self-efficacy among program participants. It was particularly important that the *Network* impact evaluation

learn whether churches could implement the program on their own and achieve a significant change in behavior.

In FFY 2008, the *African American Campaign* completed testing of the *Fruit, Vegetable, and Physical Activity Toolbox for Community Educators* with African American audiences in church and other community settings. The purpose of the study was to test how well the *Fruit, Vegetable, and Physical Activity Toolbox for Community Educators* worked in providing effective nutrition education for the community and to determine whether the *Toolbox* could be used to provide the nutrition education lessons within the *Body & Soul* program's framework. Specifically, there was a significant increase in the proportion of women in the treatment group who reported that they ate 3.5 or more cups of fruits and vegetables (from 12.2% before the *Toolbox* intervention to 31.4% after); and, in reported physical activity among women in the treatment group, the proportion of women reporting they had been active 5 or more days per week increased from 34.0% to 59.0% for activity the previous week, and 37.2% to 59.3% for activity in a usual week.

## ii. Faith Project Pilot (Asian):

Churches are an excellent venue to reach the Chinese American audience with SNAP-Ed. According to the Pew Research Center, over a third of Asians report that they attend worship services at least one time per week, and seven out of ten Asians report that religion is somewhat or very important in their life. The three largest religious groups with which Asian-Americans self-identify are Christian (42%), Buddhist (14%) and Hindu (10%).

The demographics of the three largest religious groups for Asian-Americans are:

Asian Christians:

- 73% Foreign born
- 30% have household incomes <\$30,000
- 29% have less than a high school education.

Asian Buddhists:

- 79% foreign born
- 37% have household incomes <\$30,000
- 50% have less than a high school education.

Asian Hindus:

- 96% foreign born
- 12% have household incomes <\$30,000
- 8% have less than a high school education.

Therefore, the *Network* will focus on engaging low-income Asian Americans at Churches and Temples.

## iii. Faith Project Pilot (Latino)

Latinos make up over one-third of the California population and are a rapidly growing demographic group in the state and the nation. By the year 2025, the Latino

population is expected to increase to 43 percent in California. Thirty-eight percent of low-income California Latino adults are already overweight, and 31 percent of low-income California Latino adults are obese according to self-reported heights and weights. More than 1 out of 3 (37%) Latino adolescents in California are overweight or at risk for overweight. Excess weight contributes to heart disease, some forms of cancer, stroke, and diabetes, which are four of the top five leading causes of death among Latinos in California. The chronic diseases that affect this population can be reduced by healthful eating, which includes a diet low in added sugar and rich in fruits and vegetables. The goal of this study is to support and activate healthy eating behaviors among low-income Latino Californians. Studies have shown that using a church setting is a good way to reach large numbers of Latino families since 62% of Latinos self-identify as Catholic and 19% as Protestant. In addition, 43% of Latinos report that they attend church services on a weekly basis (Taylor, Paul; Lopez, Mark Hugo; Hamar Martinez, Jessica; and Velasco, Gabriel, "When Labels Don't Fit," Pew Research Hispanic Center, April 4, 2012).

f. **Modification of Project Methods/Strategies: Faith Project Expansion (African American)**

From 1999 through 2008, the *African American Campaign* funded churches directly through its faith-based community projects. In 2009, the *Campaign* modified its approach to fund "faith associations" (i.e., intra-denominational church alliances) in order to build upon the successful approaches and lessons learned through the faith-based community projects and to engage a larger number of churches, communities, and African American families within the state. In 2010, the *Campaign* modified its approach even further to include "faith alliances" as well (i.e., inter-denominational faith alliances). In FFY 2014, the AA Faith Projects model will work closely with LHDs that elect to work with African American faith organizations, to provide training and technical support.

g. **Use of Existing Educational Materials.**

The African American, Latino and Asian Faith Projects will use evidenced-based materials that are culturally appropriate for each audience.

NEW: Faith Interventions Toolkit

This toolkit supports a train-the-trainer model and will be a key resource for LHDs in working with and training faith projects serving low-income African Americans, Asian Americans (especially Chinese), and Latinos. It will include resources such as *Body & Soul*, *En Cuerpo y Alma* Program Guide, nutrition education lessons from the *Fruit & Vegetable Toolbox for Community Educators*, the Health Ministry Guide, various assessment tools and more.

Network for a Healthy California— Health Ministry Guide: Building a Healthy Body & Soul: Faith-Based Nutrition and Physical Activity.

This Guide supports the *Body & Soul* program, and is based on 10 years of feedback from *Network* faith partners. The Guide walks church leaders through a step-by-step process for planning and starting a new health ministry. It is a complementary component to the NCI/ACS *Body & Soul: A Celebration of Healthy Eating and Living* curriculum. It

includes an introduction to food banks and pantries, and a section using USDA Myplate tools.

*Body & Soul: A Celebration of Healthy Eating and Living, A Guide for Your Church:* The guidebook, developed by the National Cancer Institute (NCI) in collaboration with the American Cancer Society (ACS), provides African American churches with the framework for successfully integrating healthy eating and physical activity into their churches. The guide describes *Body & Soul's* four pillars and makes a case for the importance of helping church members eat more fruits and vegetables and be more physically active. In FFY 2013, the program guide was updated to make it more consistent with 2010 USDA Dietary Guidelines for Americans and will be available to contractor in FFY 2014.

*Fruit, Vegetable, and Physical Activity Toolbox for Community Educators:* Originally developed by the *Latino Campaign* in 2004, the *Toolbox* was designed so that community educators can easily teach eligible Latino adults how to increase their fruit and vegetable consumption and physical activity. Each item in the *Toolbox* was revised to meet the 2005 *Dietary Guidelines for Americans* and was tested in 2007 with eligible African American adults to ensure wider application of this educational tool. The *Toolbox* is in both English and Spanish. The *Toolbox* content was updated in FFY 2008, and a website was created ([www.network-toolbox.net](http://www.network-toolbox.net)) to allow broader access.

*NEW: Network for a Healthy California—Stylin' for Life Magazine:* This new nutrition education resource is designed in the style and format of a magazine that an African American woman might find on the table in beauty salon. It includes tips for healthy eating as well as tips for maintaining a hairstyle in the face of light to moderate physical activity. This resource will be used in salon-based interventions.

*NEW: African American Campaign Promotional Video:* Designed for partners in the field, this new video features a core element of the *African American Campaign*, the Faith channel. It also provides an overview of other *Campaign* interventions and tools.

*Conducting Successful Nutrition Education and Physical Activity Promotion at Community Events Manual:* See *Network for a Healthy California Fruit, Vegetable, and Physical Activity Campaigns State Level Project Summary* for description.

*Advocating for the Health of our Communities: Consumer Empowerment Agenda of the Network for a Healthy California—African American Campaign Advisory Council:* See *Network for a Healthy California Fruit, Vegetable, and Physical Activity Campaigns State Level Project Summary* for description.

Ten Tips Nutrition Education Series (<http://www.choosemyplate.gov/healthy-eating-tips/ten-tips.html>)

*En Cuerpo y Alma: A Celebration of Healthy Eating and Living Program Guide:* The program guide offers Latino churches a framework for successfully integrating healthy eating and physical activity into their churches and makes a case for the importance of helping church members eat more fruits and vegetables and be more physically active.

## Cookbooks

Soulful Recipes: Building Healthy Traditions: See *Network for a Healthy California* Fruit, Vegetable, and Physical Activity Campaigns State Level Project Summary for description.

Everyday Healthy Meals Cookbook: See *Network for a Healthy California* Fruit, Vegetable, and Physical Activity Campaigns State Level Project Summary for description.

Kids Get Cookin' Cookbook (<http://www.cdph.ca.gov/programs/cpns/Documents/Network-FV-PP-KidsGetCookinPowerPlayRecipes.pdf>)

Flavors of My Kitchen/Sabores de Mi Cocina: Developed in FY2011. This English and Spanish version cookbook provides healthy and traditional Latino recipes with an abundance of fruits and vegetables.

Healthy Chinese Cooking

([http://www.cachampionsforchange.cdph.ca.gov/en/docs/Healthy-Chinese-Cuisine\\_Cookbook.pdf](http://www.cachampionsforchange.cdph.ca.gov/en/docs/Healthy-Chinese-Cuisine_Cookbook.pdf))

## Video

Love and Tomatos Telenovela/Amor y Tomates Telenovela: A telenovela is a limited-run novel drama that is popular in the Latino community. The *Latino Campaign* created this mini telenovela “Love and Tomatos” as a culturally-appropriate tool to deliver nutrition education messages to its Latino target audiences.

## Brochures

n/a

## Posters

“Afternoon in the Park” Artwork: See *Network for a Healthy California* Fruit, Vegetable, and Physical Activity Campaigns State Level Project Summary for description.

Adult Cups of Fruits and Vegetables poster: See *Network for a Healthy California* Fruit, Vegetable, and Physical Activity Campaigns State Level Project Summary for description.

## USDA/Other Materials Promoted/Used by Campaigns

In addition to the materials listed above, the *African American Campaign* promotes the use of materials and resources produced by USDA, the Centers for Disease Control and Prevention, the Produce for Better Health Foundation, and other reputable sources, as appropriate.

### h. **Development of New Educational Materials.**

The campaigns/programs will routinely review new USDA materials as they become available to determine whether they should be reproduced or purchased in order to infuse them into our interventions.

Faith Project Pilot (Asian): Selected materials will be translated into Cantonese and Mandarin. Translated materials will also be pilot tested with the target population. Feedback will be incorporated into SNAP-Ed nutrition education and physical activity materials to improve cultural resonance.

## **Key Performance Measures/Indicators.**

Key performance measures will include improvements in knowledge, attitudes, self-efficacy, empowerment, and reported fruit and vegetable- and physical activity-related behaviors. Measurement occurs through statewide and special surveys, semi-annual reports, Activity Tracking Forms, media reports, the *California Dietary Practices Survey* of adults, and the *Network Benchmark Survey*.

Faith Project Pilot (Asian): Identifying recommendations for future Asian nutrition education and outreach activities will be the primary goals for FFY 2014.

### **3. Evaluation Plans**

#### **i. Outcome: Faith Project Expansion (African American)**

The *African American Campaign* will conduct an outcome evaluation in FFY 2014 related to the inclusion of *Sister Circles* in the *Body & Soul* Program framework.

Process: 120 Low-income African American women will participate in bimonthly Sister Circles at 10 churches (approximately 12 women per church). A pre-test/post-test survey design will be used to assess changes in diet and physical activity knowledge, attitudes, and behavior. LHDs will assist with pre and post testing.

#### **ii. Faith Project Pilot (Asian American):**

The evaluation will involve qualitative interviews with congregation members regarding the implementation and cultural appropriateness of materials and the church outreach activities. Focus groups with community members on the cultural appropriateness of the materials and church outreach activities will also be conducted. Measures will be collected by the Faith Projects via Activity Tracking Forms (ATFs). Measures will include number of classes/events conducted, number of participants, number of social marketing contacts, number of partner organizations, documentation of media efforts, etc. The ATFs also document the targeting data for each site at which interventions are conducted.

#### **iii. Outcome: Faith Project Pilot (Latino):**

An outcome evaluation will be conducted using a pre- and post-test Food Habits Checklist (Lista de hábitos alimenticios), a 16-item low literacy photo-based questionnaire available in English and Spanish that asks the program participant to provide a response to questions about how they typically make food choices. A set of validated physical activity questions and basic demographics questions will also be included, and post-study program satisfaction surveys for church members, En Cuerpo y Alma leaders, and priests/pastors will be conducted. To ensure consistency and protect confidentiality, pre- and post-evaluations will be administered and collected by *Network Latino Campaign* staff members.

### **4. Coordination Efforts**

The Faith Projects will align with the *Network for a Healthy California's* overall strategy, brand, and messaging in a culturally competent manner. *Network* resources such as the new *Faith Interventions Toolkit* and *FVPA Toolbox* lessons will continue to complement and work synergistically with the *Network's* LHDs and Faith Projects to create horizontal and vertical integration. This project will promote the use of nutrition assistance programs such as CalFresh, WIC, food banks, and school meals to help families extend their food dollars and

obtain the foods they need to maintain their health. Flyers, brochures, and other educational materials will be made available to connect eligible families with local resources for health information and physical activity options in a culturally relevant manner. State *Network* staff will work with leading LHDs and provide training, technical assistance and guidance, as appropriate, to LHDs on how they can best serve the African American, Asian American, and Latino populations in their respective counties.

<b>Federal Share Budget</b>	<b>FFY2014 Total</b>	<b>FFY2013 Total</b>
1. Personnel/Salaries/Benefits	\$223,000	\$298,572
2. Contracts/Grants/Agreements	\$34,000	\$52,730
3. Non-capital Equipment/Supplies	\$35,000	\$43,219
4. Materials	\$19,988	\$23,018
5. Travel	\$9,900	\$17,634
6. Administrative	\$0	\$0

**Physical Activity Integration Project**  
**FFY 2014**

**1. Goals & Objectives** (See *State Level Objectives*).

**2. Project Title:** *Physical Activity Integration Support*

**PHI Budget:** \$500,000

**a. Related State Objectives:**

Related State Objectives include 1, 2, 3, and 4

Audience (SNAP-Ed/NEOP Intermediaries)

Gender: Female and Male

Ethnicity: All Ethnic Groups

Languages: English

Ages: Adults 18+

**b. Focus on SNAP Eligibles**

The *Physical Activity Integration* Program will support the Local Health Departments (LHDs) and funded partners to promote physical activity (PA) through campaign and program activities designed to reach SNAP-Ed eligibles. The sites are identified using the data sources described below.

Income Targeting Data Sources:

Site verification of 50 percent or greater SNAP-Ed eligibles participating in program activities will be based on the following data sources:

*Network* GIS Qualifying Census Tract Data and census block data, USDA-approved retail and worksites.

School sites with 50% or more participation in Free and Reduced Price Meals Program.

**c. Project Description**

Key Strategies:

Assist LHDs with planning, implementing, and evaluating *Network*-allowable PA interventions by providing support, technical assistance, training and materials.

Convene group of key stakeholders to inform the development of statewide strategic plan for PA through SPAP-Ed.

Key Educational Messages:

Fruit and Vegetable Promotion, Healthy Beverage Education, PA Promotion, Environmental Supports, Engagement Strategies

Intervention Sites: Parks and Recreational Departments, community centers, schools, retail stores, worksites, churches, farmers markets, community based organizations, community events.

Projected Number of Contacts: N/A

Narrative Summary:

**Physical Activity Integration Strategic Plan**

The development of a strategic plan to promote PA will include comprehensive, multi-level strategies for providing support, technical assistance, training and materials to LHD contractors and partners to promote and support PA.

The changes in the funding guidance from the USDA SNAP-Ed program and the strategic shift in the Network's direction have created the need for a statewide Physical Activity promotion strategic plan that supports the new Local Health Department (LHD) infrastructure. To prepare for these changes, the Physical Activity Integration staff will convene a group of key stakeholders to develop a strategic statewide plan for PA that includes key partnerships to advance PA work. Key stakeholders include NEOP CDPH management, PHI management, interested LHD program directors and/or staff, and relevant programs within CDPH, such as California Project LEAN, California Active Communities, and the California Obesity Prevention Program.

**Physical Activity Evaluation Tools**

The identification, development and approval of comprehensive, easy-to-use PA evaluation tools to assist LHDs in identifying policy, system and environmental needs and strategies within local communities. These tools will support LHDs in performing their formative research, monitoring and evaluation activities. Some indicators to consider are access and use of parks and recreation, schools, community and worksite programs, and active transportation to and from school/work.

This project will include working meetings between *Physical Activity Integration*, the Research and Evaluation Section, and CX<sup>3</sup> teams to identify the current need among LHDs, existing evidence-based survey uses and gaps, and opportunities to utilize existing or design new survey instruments and monitoring systems. Relevant tools will be included in a resource guide to help provide technical assistance and support to LHDs.

This project will partner with the *Network's* programs for Children & Youth, Retail, Worksite and Faith-based campaigns and programs to pilot test one PA evaluation tool

within two LHDs. This will help us identify ease of use and gaps to make improvements and to validate the survey.

Develop in-person and online trainings for LHDs and partners on how to utilize PA evaluation tools and monitoring systems. Include information about how to collect, analyze and disseminate the data collected. Partners could include schools/educational institutions, corporations and businesses, city governments, parks and recreational departments, and many other stakeholder organizations.

### **Physical Activity Integration Toolkit**

The development of a *Physical Activity Integration* Toolkit for LHDs and *Network*-funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating *Network*-allowable PA interventions. The toolkit will include, but is not limited to the following:

- Guidance manual for how to get started, who to partner with, and objectives/contents of the toolkit.
- PA train-the-trainer modules for partners/intermediaries and community champions (e.g., youth, parents, medical providers, etc.), which include national and state recommendations, strategies and evaluation tools.
- Consumer-facing nutrition education/PA promotion resources including messaging, hand-outs, websites, and other *Network*-approved resources.
- Evidence-based and best practice strategies for increasing PA across multiple sectors that reach our SNAP-Ed audience (i.e., worksites, schools/after schools, early childhood settings, faith-based organizations, and community-based venues).

### **Maintain Physical Activity Expertise Statewide**

Contract 2 PA program managers at the state, PA Specialists in 9-11 multi-county locations, and try for PA designees in LHDs. These PA Specialists will provide 1:1 technical assistance, trainings and resources to the LHDs on the successful integration of PA into *Network* program planning, implementation and evaluation to LHDs in their geographical vicinity. The *PA Integration* program managers will ensure that the contracted PA Experts are highly skilled and qualified to assist the LHDs with the following tasks:

- Assess and map level of PA expertise, number of dedicated staff, type and volume of PA activities and interventions being undertaken for SNAP-Ed and through other programs in all LHDs.
- Educate, collaborate and engage with external partners from a variety of disciplines to promote PA at multiple settings.
- Identify and use public health data as a tool to develop and prioritize PA promotion.
- Review and recommend best and evidence-based practices for the development and implementation of PA efforts.

- Identify appropriate resources and provide training and ongoing TA for promoting PA.
- Use behavior change principles from the Social Ecological Framework to target the SNAP-Ed population for PA promotion.
- Address cultural, social, behavioral, and environmental factors that contribute to disease progression and health promoting behaviors as part of a PA program.
- Effectively integrate

### **Physical Activity Integration Content Expert Trainings**

Under the direction of the state-level Contract Managers and in conjunction with the *Physical Activity Integration* program managers; we would contract/partner with statewide and local organizations to provide technical assistance and trainings for LHDs and other *Network*-funded contractors to meet their specific needs. We would contract organizations to further assist LHDs in building capacity, leadership and multi-level approaches to advance nutrition education and PA promotion interventions in low income communities. Some organizations to consider contracting/partnering with are CAN-Fit, California After School Resource Center (CASRC), ChangeLabSolutions, SPARK/CATCH, and Alliance for a Healthy Generation.

### **PA Promotional Events**

The PA Integration team will also build out a signature events during the month of May to promote PA throughout the state by promoting May is Bike Month collaborating with existing efforts that are happening through the state during this month. This initiative will have events, promote bike safety, having biking challenges and conduct assessments in communities to gather information about how “bike friendly” an area is to expand opportunities for PA in low income neighborhoods. For further details regarding all of the PA integration plans for FFY 2014 please see the full Project Summary.

- d. Modification of Project Methods/Strategies:** N/A (new projects)
- e. Use of Existing Educational Materials:** *Network*-approved PA promotion resources and those from effective recognized third-party resources such as the USDA SNAP-Ed Toolkit.
- f. Development of New Educational Materials:** *Physical Activity Integration* toolkit for LHDs, other *Network*-funded projects and partners. This toolkit will assist LHDs with planning, implementing, and evaluating *Network*-allowable PA interventions.

## **3. Evaluation Plan**

Qualitative evaluation of the *Physical Activity Integration* Toolkit to measure the effectiveness, ease of use and to identify gaps to make improvements to the Toolkit.

Materials include, but are not limited to, train-the-trainer modules for intermediaries, consumer-facing nutrition education and PA pieces, evidence-based and best practice strategies for increasing PA across multiple sectors that reach the SNAP-Ed audience.

Pre and post testing of the SNAP-Ed audience to measure knowledge and behavior change.

Qualitative evaluation of resources provided to the LHDs that include the PA Toolkit, content expert trainings, PA expertise, and PA evaluation tools to measure effectiveness, cultural appropriateness and to identify gaps to make improvements.

#### **4. Coordination Efforts**

The *Physical Activity Integration Program* will coordinate with the *Children & Youth Campaign, Latino Campaign, African American Campaign, Retail and Worksite Programs as well as the Asian American and American Indians and Alaska Natives Campaigns* to integrate PA promotion activities. Coordination with relevant programs within the NEOP Branch and LHD program directors will occur as we develop the statewide strategic plan.

We will also coordinate with external partner organizations and initiatives, such as Safe and Active Communities Branch; Community Transformation Grant; University of California, Davis; Strategic Growth Council (where available); Team California; Let's Move!; and Action for Healthy Kids.

<b>Federal Share Budget</b>	<b>FFY2014 Total</b>	<b>FFY2013 Total</b>

## STATE LEVEL PROJECT SUMMARY

FFY 2014

**1. Goals & Objectives** (*See State Level Objectives*).

**2. Project Title:** The Office of Farm to Fork

CDPH (state) - \$140,000

CDE - \$63,000

**a. Related State Objectives:**

Related State Objectives include 1, 2, 3, 5, 7, 8, and 9

**b. Audience**

Gender: Male and Female

Ethnicity: All

Languages: English; Spanish

Ages: -0-adults

**c. Focus on SNAP Eligibles**

*Network*-funded projects and other Supplemental Nutrition Assistance Program Education (SNAP-Ed) Intermediaries; Schools with >50% Free and Reduced Price Meals (FRPM)

**d. Project Description**

As set forth in the Senate Bill 732 The Strategic Growth Council was developed to bring together key agencies to plan for future growth patterns of California the Health in All Policies (HiAP) taskforce was developed under the Strategic Growth Council and one of the priority recommendations was to implement Farm to Fork to encourage and expand the availability of affordable and locally grown produced through Farm to Fork policies and programs. The Office of Farm to Fork builds upon existing efforts around Farm to Fork projects and the Farm to School Task Force efforts. This is an Interagency agreement among California Department of Food and Agriculture (CDFA), California Department of Education (CDE), California Department of Public Health (CDPH) to strengthen connections between Farm to School and Farm to Fork programs and SNAP-Ed efforts in California.

The Office of Farm to Fork will provide the structure for the development and implementation of recommendations to promote access to healthy and affordable food. The housing of the Office of Farm to Fork in CDFA is crucial due to its relationship with the agricultural industry as well as being a critical link between providers of the goods and recipients. CDE and CDPH will set priorities with input from Farm to School Task Force, HiAP Task Force, Team California for Healthy Kids and relevant stakeholders. The Office of Farm to Fork will be staffed with 2 positions.

### Key Strategies:

1. Identify zoning barriers to Farmers' Markets, produce stands and other sources of fruits and vegetables in residential areas, food deserts and recommend solutions. Research creative land uses for community gardens and orchards, consider potential safety concerns and disseminate promising practices.
2. Explore approaches and disseminate information about how to ensure food safety of locally grown fruits and vegetables while increasing their availability in schools.
3. Compile a list of schools that have career technical education programs to support development of agriculture, food service and culinary workforces; explore collaboration with additional partners to support and expand the agricultural, food service and culinary workforces including the identification of best practices and opportunities for expansion.
4. Assess and document how large institutions such as schools, hospitals, universities, food banks and prisons currently purchase produce from local farms, and identify barriers to such purchasing arrangements. Consult institutional and agricultural stakeholders to identify opportunities and successful strategies for local procurement including regional food hubs.
5. Serve as point of contact for members of the public and others seeking more information about Farm to Fork policies and programs.

### Internet/Web Sites-website address:

- <http://www.cdfa.ca.gov/>

### Key Educational Messages:

Seasonal and local fruits and vegetables (*Harvest of the Month*); MyPlate; Promote Healthy Communities, Community Gardens, School Gardens, physical activity promotion, obesity prevention

### Intervention Sites:

Women, Infants, and Children (WIC) Program food stores, schools, food banks, farms, farmers markets, early childhood, summer meal programs, retail, worksite, institutions, community and school gardens, SNAP-Ed programs and interventions.

Narrative Summary:

CDPH in collaboration with CDE and CDFA will continue providing oversight for the Office of Farm to Fork housed at CDFA to promote and provide structure for the development of recommendations and to promote access to healthy and affordable food.

The Office of Farm to Fork will set priorities with input from the Farm to School Task Force, the HiAP Task Force, Team California for Healthy Kids, and other relevant stakeholders, The Office of Farm to Fork will initially prioritize Farm to School programs and policies, and will aim to expand its scope as feasible.

**e. Summary of Research**

Increasingly, community leaders are recognizing that Farm to School programs have potential to counteract obesity and other diet-related chronic diseases such as diabetes and hypertension among America's youth. (Dillon, Casey, National Association of Counties, A Publication of the NACo Center for Sustainable Communities, July 2007.)

Farm to Fork or Farm to Institutions programs are gaining in momentum as an avenue to align food service operations with increase access to healthy foods by tying the community with agriculture. Programs and policies that support local sourcing of produce are schools, hospitals, faith-based organizations and worksites. Nutritionists, health practitioners, and researchers can support communities to develop programs and policies that support Farm to Fork efforts.

**f. Modification of Project Methods/Strategies**

Diversified organizations will be recruited as part of a strategy to increase reach, provide additional support and expertise, centered on farm to fork and agriculture issues.

**g. Use of Existing Educational Materials**

*Harvest of the Month* educator, family and community newsletters, calendar templates, student assessment tools, botanical images, instructional guide, training tools, bar graphs, and marketing tools, MyPlate, California School Garden Network and USDA Know Your Farmer Know Your Food resources.

**h. Development of New Educational Materials**

Submit report identifying current zoning laws creating barriers to urban/suburban agricultural production, creative uses of municipal land for agricultural purposes supporting access to fruits and vegetables.

Develop a guidance document targeting school districts, county health departments and agricultural offices describing food safety in production and preparation of locally grown produce. Provide dissemination plan including recommended materials.

Submit report identifying schools with agricultural, food service and culinary arts programs including an action plan outlining opportunities to expand and support programs.

Submit report documenting current and best practices for procurement of locally grown produce and recommendations for overcoming barriers.

i. **Key Performance Measures/Indicators.**

Number and type (school, pre-school, summer meal, retail or worksite) of *Network*-funded projects and other SNAP-Ed eligible sites that received technical assistance to strengthen the connection between Farm to School or Farm to Fork and SNAP-Ed to improve the access and appeal for healthy eating, estimated reach to SNAP-Ed eligible audience of these projects.

**3. Evaluation Plan**

Progress report will be analyzed. Network staff will also identify opportunities to systematically collect and report for this project according to relevant indicators identified in the Western Region SNAP-Ed Nutrition, Physical Activity and Obesity Prevention Outcomes evaluation framework.

**4. Coordination Efforts**

This is a collaboration project between CDFA, CDE and CDPH. The Office of Farm to Fork will share research and materials from this project with other federal state funded programs working with the same target population to improve message delivery to the SNAP-Ed audience.

## STATE LEVEL PROJECT SUMMARY

FFY 2014

1. **Goals & Objectives:** (see *State Level Objectives*)

2. **Project Title: Champion Physician Project**

**Project Title: Champion Physician project**

**PHI Budget: \$400,000**

a. **Related State Objectives**

Objectives 1, 2, 3, 4

b. **Audience**

Gender: Male and Female

Ethnicity: All ethnicities, additional focus on Latino, African American

Languages: English/Spanish

Ages: Adult physicians providing care, support and services to low-income children and adults.

c. **Focus on SNAP-Ed Eligible**

All activities funded will be delivered through one or more intermediary organizations working with and for SNAP-Ed-eligible children and adults. The activities are focused on providing messaging, materials, and resources designed to increase fruit and vegetable consumption, increase healthy beverage consumption, increase physical activity opportunities throughout the day, and provide obesity prevention efforts targeting low-income children and adults.

Income Targeting Data Sources:

Site verification of 50 percent or greater SNAP-Ed-eligible persons participating in program activities will be based on the *Network for a Healthy California (Network) GIS Qualifying Census Tract Data*.

d. **Project Description**

Key Strategies/Methods:

Outreach and engagement; regional and/or statewide forums or convenings; webinars and teleconferences; peer-to-peer engagement.

Key Educational Messages:

Obesity prevention strategies; access to and consumption of healthy foods (fruit and vegetables); access to and consumption of healthy beverages; reduced consumption of unhealthy beverages; increased physical activity

and decreased sedentary behavior; integration of physical activity promotion with nutrition education; the *Dietary Guidelines for Americans*.

Intervention Sites:

Physician offices; Federally Qualified Health Centers (FQHC) and other county and community health clinics; school-based health centers; healthcare and health professional organizations; local health departments and their qualifying geographic areas such as CX3 neighborhoods, free and reduced price school lunch sites neighborhoods, retail and worksites, park and recreation sites; other sites as qualified through USDA approved methods.

Projected Number of Contacts:

Direct Contacts: Up to 30 physicians (one representative from up to half of total local health department (LHD) communities)

Indirect Contacts: 2000 based on who the Physician reached in their communities through *Network* resources, materials and support.

Narrative:

The Champion Physician Leadership Project seeks to engage a critical stakeholder group that is recognized nationally as under-represented in obesity prevention strategies and efforts. This project will work with physician organizations in California to determine parameters, develop relationships, and identify and support a network of Champion Physicians who serve low-income families. As key influential members of their communities, these physicians will act as resources and spokespeople for nutrition education, physical activity, and obesity programming as well as champions for policy, systems, and environmental changes (PSEs) to improve access to healthy foods and space for physical activity in their communities. In addition, the physicians will help identify and breakdown barriers low-income Latino and African American populations face to receiving health care, health services, nutrition and physical activity programming and resources, and accessing resources at their LHDs. This project will assist the *Network* in advancing healthy eating, physical activity, and obesity prevention strategies by purposefully partnering with stakeholder groups (physicians) who play a critical role in the healthcare of low-income families and are committed to upstream and system-based prevention strategies.

Specifically, this project will:

1. Identify, recruit, and engage an initial cohort of physicians serving low-income families to champion nutrition education, physical activity and obesity prevention programs and support PSEs to improve access to healthy foods and space for physical activity.
2. Build capacity of Champion Physicians by providing tools, training and resources on obesity prevention programming and messaging as well as

- community engagement strategies.
3. Encourage and support Champion Physicians to engage and work with LHDs to strengthen collaboration, synergy and alignment of efforts within communities.
  4. Emphasize ways to incorporate appropriate, culturally adapted messaging, materials and resources to share in physician's offices, county and community health clinics, and other community venues as necessary.
  5. Work with LHDs and their communities to identify barriers that low-income Latino and African American populations face in accessing preventative care services and propose actionable solutions.
  6. Encourage opportunities to partner with the Department of Health Care Services, Child Health and Disabilities Program (CDHP), FQHC's, Medi-Cal organizations, and other healthcare organizations serving low-income families.

e. **Summary of Research**

A 2012 report from the Institute of Medicine (IOM) entitled *Accelerating Progress in Obesity Prevention: Solving the Weight of Nation* cites activating healthcare professionals as a priority in the fight against obesity.<sup>1</sup> The report calls on health service providers to increase the support structure for achieving better population health and obesity prevention. One of the key strategies is relevant to the Champion Physicians Project: Provide standardized care and advocate for healthy community environments. Specifically, this strategy urges health care providers to serve as role models for their patients and providing leadership for obesity prevention efforts in their communities by advocating for institutional, community, and state-level strategies that can improve physical activity and nutrition resources for their patients and their communities. In addition to promoting systemic change, physicians can help elicit change through one-on-one visits with patients. The 2007 *Network for a Healthy California Latino and African American Campaigns Consumer Survey* demonstrated that 24.4% of survey participants are motivated by physicians to make changes in their community that will make it easier for people to eat healthy. The consumer survey also demonstrated that 19.4% of participants are motivated by physicians to make changes in their community that make it easier for people to be physically active.<sup>2</sup> In addition to providing the necessary motivation, research suggests that physicians can be successful in helping

patients to improve diet and exercise habits and achieve sustained modest weight loss.<sup>3</sup>

f. **Modification of Project Methods/Strategies**

N/A-new project

g. **Use of Existing Educational Materials**

This project will utilize existing educational materials from the Fruit, Vegetable and Physical Activity Campaigns and Programs, Harvest of the Month (HOTM), ReThink Your Drink (RYD), USDA's SNAP-Ed PSE Toolkit, as well as the Network's new PSE resource list and additional existing resources.

h. **Development of New Educational Materials**

This project will rely heavily on existing resources, modifying materials as necessary for nutrition and physical activity messaging. No original materials will be developed without an extensive search for existing materials that can be used "as is" or modified to meet *Network* needs. For community messaging, existing materials from reputable sources will be used to the maximum degree possible. All materials will be thoroughly vetted and will follow the established *Network* Branding Guidelines.

i. **Key Performance Measures/Indicators**

Key performance measures for this project will include: the number of physicians identified and recruited as Champion Physicians; the number of signed physician agreements to participate; the improvement/increase in knowledge of physicians around obesity prevention strategies and messaging; the number of sites/SNAP-Ed eligible each Champion Physician touches with resources, materials and support; the changes in nutrition and physical activity promotion practices in health centers, clinics, offices and other community venue.

### 3. Evaluation Plans

The proposed plan for evaluating the effectiveness and impact of the first year of this project may include, but is not limited to: pre- and post-test surveys with identified Champion Physicians to measure their commitment to the project and ; evaluation efforts directed at identifying the quantity and composition of the target population that is reached by the Champion Physicians; surveys and/or focus group with SNAP-Ed eligible population to identify barriers to access of preventative care specifically the Latino and, African American populations; potential key informant interviews with physicians, sites, and organizations to evaluate process, efficiency and effectiveness. The evaluation plan will include methods to determine

whether the project was implemented as intended, the challenges and barriers that arose, and areas to strengthen in subsequent years.

#### **4. Coordination Efforts**

The purpose of this project is to align with, support and build on existing efforts by expanding the reach of the *Network* to key stakeholders, partners and sites that touch SNAP-Ed eligible populations. This project engages a critical and influential stakeholder group that will increase the reach and impact of obesity prevention efforts in low-income communities. This project will work closely in support of LHD contractors as well as other leadership projects focused on early childhood, health equity, health care, and health clinics/hospitals. In addition, this project will collaborate with multiple external partners such as (possible examples): the California Medical Association and its Foundation, American Academy of Family Physicians, American Academy of Pediatricians, California Primary Care Association, California School Health Centers Association, Let's Move, Latino Coalition for a Healthy California, and National Hispanic Medical Association.

<b>Federal Share Budget</b>	<b>FFY2014 Total</b>	<b>FFY2013 Total</b>
1. Personnel/Salaries/Benefits	\$235,000	\$0
2. Contracts/Grants/Agreements	\$35,000	\$0

**STATE LEVEL PROJECT SUMMARY**  
**FFY 2014**

1. **Goals & Objectives** (See *State Level Objectives*).
2. **Project Title:** Community and Youth Engagement Training

**Total PHI Budget:** \$500,000

**a. Related State Objectives:**

Related State Objectives include 1, 2, 3, 4

**b. Audience (SNAP-Ed/NEOP Intermediaries)**

Gender: Females and Males

Ethnicity: All races and ethnicities

Languages: English/Spanish

Ages: families (with children ages birth to five) participating in CalFresh and other SNAP eligibles, Youth 13+ and Adults

**c. Focus on SNAP Eligibles**

All activities funded will be delivered through an intermediary organization providing nutrition education and related support to LHDs and their partners who then serve SNAP-Ed-eligible

**d. Project Descriptions and d. Narrative Summary**

**Network Leaders on the Move: Center for Collaborative Planning (CCP)**

The FFY14 SNAP-Ed guidelines allow “activities that assist in advancing a nutrition education or obesity prevention-related community or environmental change for the low-income population.” Strong and healthy communities are created when residents are engaged and creating change in ways that matter to them. Engaging the residents is the challenge. Approximately 50% of the Local Health Department (LHD) responding to the training assessment conducted for the FFY14 plan identified Community Engagement (CE), Engaging Low Income Residents as Leaders as the #1 basic need. *Network Leaders on the Move* (NLOM) provides one solution to address that need.

In FFY14, NLOM will consist of two interventions:

1. Modeled after the FFY13 training, engage 15-20 leaders from across the *Network* in a one-year community engagement leadership training program where participants learn to employ tools such as social capital development,

asset-based community development, and collaborative leadership/collective impact to expand participation in nutrition education, and obesity prevention efforts.; and

2. Representatives from up to four LHDs participating in the 2013 cohort will host and recruit 10-15 community partners/resident leaders in SNAP-Ed qualifying communities who will engage in a local community leadership and engagement training program designed to deepen and extend reach of obesity prevention efforts in the local community.

### **NLOM Intervention 1:**

Engage 15-20 leaders from across the *Network* in a one-year community engagement leadership training program. Individuals and teams of 2-3 people who represent constituencies such as Champion Moms, Peer Leaders, Community Leaders, Community Health Outreach Workers, Community Health Educators, LHD Program Coordinators, and/or LHD Grant Managers from across the *Network* will be invited to register for NLOM. Participants will represent a variety of institutional and community stakeholders and leaders who together in dialogue will create a safe space for identifying solutions to real and tangible challenges to meaningful community/resident engaged nutrition education/obesity prevention. A tangible product from NLOM is the development of a Community Enhancement/Engagement Plan (CEEP) for LHD Policy, System and Environmental Change (PSE) efforts. Developed and implemented with expertise of the Center for Collaborative Planning (CCP), the training program is comprised of:

- leadership assessment and planning;
- in-residence leadership trainings;
- community building;
- distance learning;
- technical assistance; and
- case study/learning initiatives.

### **NLOM Intervention 2**

In FFY13, 20 individuals and teams of 2-3 people participated in NLOM. In FFY14, representatives from up to four LHDs participating in the 2013 cohort will, via a recruitment process, be selected to deepen the leadership skills gained in FFY13. The participating LHDs will host and recruit 10-15 community partners/resident leaders in their communities who will engage in a local community leadership and engagement training program designed to deepen and extend reach of obesity prevention efforts in the local community.

- LHD staff and community partners/resident leaders will participate in an onsite, 2-Day intensive training focused on community engagement tools as outlined above.
- Training cohorts from each of the four LHDs will develop and implement joint community engagement projects to support *Network* efforts in their communities (CX<sup>2</sup>, Peer Trainers, PSE, RYD, etc.) including mechanisms for engaging additional residents, community partners, and other sectors to work collaboratively with the LHD to support the *Network* efforts in their communities. The host LHD will serve as hub for communication and coordination of NLOM activities.
- One site visit in each of the four LHDs will be conducted to support application of training tools and achievement of joint community engagement projects.
- Two webinars/teleconferences will be offered to support peer learning and problem solving across the four LHDs.
- Technical assistance and coaching will be provided to each site via LHD staff and key site leaders to ensure progress and achievement of program outcomes.

In coordination with the *Network* for a Healthy California, CCP will develop the materials for and deliver the 2 day intensive training, conduct site visits, provide responsive technical assistance, and conduct continuous quality improvement and outcome evaluation activities.

### **Regional/Statewide Youth Engagement Forums through Local Health Departments – (I-SEED)**

For the past 8 years, the *Network* has engaged over 2000+ 13-18 year old youth across California through the Regional Networks around improving nutrition and physical activity using Y-PAR (Youth Participatory Action Research). In FFY13, 356 youth were engaged through Y-PAR with the *Network's* Children & Youth Team and shared their successes at two Regional Youth Forums. Over the past five years, the Children and Youth Team has been partnered with I-SEED on delivering these forums in which we plan to continue in FFY14.

I-SEED has done unparalleled work with low resource youth in the areas of health promotion and nutrition education and has extensive experience around Y-PAR in the fields of nutrition education, physical activity and obesity prevention. In partnership with the Children & Youth Team, I-SEED will plan, conduct and evaluate 3-4 regional youth and/or adults working with youth exchanges/forums to maximize sharing, coordination and collaboration among the LHDs with middle/high school youth engagement teams and their adult allies. These forums will allow middle/high school youth, their adult allies and *Network* youth partners (within the local health department infrastructure) to learn more about emerging youth-led nutrition and physical activity related policy, systems and environmental change approaches from their peers, examine local, regional and state-wide applications of this work, share lessons learned, receive training and share best practices with peers, families and their community. I-SEED staff has the unique experience and staff resources to facilitate these youth forums and will further support the *Network's*

youth leaders and adult allies, to further build the impact and effectiveness of each local project, focused on nutrition and physical activity policy, systems and environmental changes related to obesity prevention. I-SEED staff also has great familiarity working with the target population and have partnered with the Network's Youth Engagement projects on past Youth Engagement trainings, over the last five years, with great success and outcomes. Additionally, I-SEED has the ability to complete the project in an organized and prompt timeframe.

### **Statewide “Champion Youth” Councils to Engage Low-income Youth and Youth-Serving Agencies as Leaders in Nutrition and Physical Activity**

In FFY14, LHDs will be encouraged to have youth who are involved in their collaborative apply to be a member of the Statewide Champion Youth Council. Through a comprehensive selection process, the Statewide Champion Youth Council will consist of youth leaders across the state who are creating healthier environments through their involvement in the LHD youth engagement objective and/or schools/afterschool objective. The Youth Council will meet both in person and by phone (process TBD) to discuss their research projects, learn about community and peer-to-peer engagement, public policy and how they can create statewide awareness and education of their issues and promote policy implementation. The youth leaders will also be given the opportunity to train and speak to other youth statewide at conferences and meetings in youth-led participatory action research and be asked to help, co-lead, plan our regional or statewide *Network* Youth Forums in FFY14 and FFY15.

The Youth Council will also seek to create a stronger youth voice statewide by infusing and exposing them to the statewide obesity prevention dialogue while creating their own ways to message the issues to their peers and essentially involving more youth. Also, the Children and Youth Team will connect the Youth Council with other statewide youth collaborative partners (i.e., The California Endowment, Kaiser Permanente) in efforts to have a more connected statewide youth voice around nutrition education, physical activity and obesity prevention efforts.

#### *Create a Site Recognition System for Effectively Engaging Youth*

In order to strengthen and sustain the Statewide Champion Youth Council, the Children and Youth team will also explore creating Champion Youth Sites – schools, afterschool programs, community or faith-based programs and/or agencies partnered with LHD's who are playing a pivotal role in creating and ensuring youth leadership opportunities within our *Network* objectives and in coordination with our new Youth Continuum. The Children and Youth Team will develop an interactive Champion Youth Site Recognition System – a matrix of good, better, best model - to determine how effective each site is partnered with youth around our PSE change efforts.

### **Training & Technical Assistance in Strategic Communications for Schools, After School and Youth Serving Audiences – (Berkeley Media Studies Group)**

Berkeley Media Studies Group (BMSG) has worked with many departments of public health at all levels, and understands the unique challenges health departments face in promoting prevention. They understand that behavior change campaigns will be more effective if they are supported by efforts to create healthy environments. It is the challenge of public health departments to strike this balance and support the changes that will ensure all communities and youth can be healthy.

In FFY14, BMSG will assist *Network* leadership to provide LHDs, *Regional Networks*, and their youth-serving partners, agencies and organizations technical assistance building their capacity around strategic communications. The primary goal will be to build the communications capacity of adult professionals to help youth leaders bring change to their communities. BMSG will use interactive training and technical assistance formats to help participants gain strategic communication skills by giving them ample opportunity to take in new information but also for practice and feedback from their colleagues and from BMSG trainers.

BMSG's approach begins with an examination of how the media portray a given issue so our low-income audience can understand the starting point being outside of public health. With training, departments of public health, youth-serving organizations and other public health professionals can then apply this understanding and see how to better explain solutions to a wide range of audiences. BMSG has authored definitive content analyses on a wide range of public health issues including youth violence; alcohol, tobacco and other drugs; early care and education; nutrition and food; physical activity; and children's health, among others. BMSG will draw on this body of work to inform the trainings that are developed and delivered to the *Network*. BMSG staff have tremendous experience working with the target population delivering training and technical assistance to support various childhood obesity initiatives including The California Endowment's Healthy Eating Active Communities Initiative (HEAC), the Central California Obesity Prevention Program (CCROPP) and the Robert Wood Johnson Foundation's Communities Creating Healthy Environments (CCHE), to name a few.

### **Healthy Youth Career Pathways Project (Pilot) – (Alameda County Office of Education)**

In FFY13, the planning of the *Healthy Youth Career Pathways Pilot Project* began to select pilot sites, recruit interested youth, and focus on the overall planning and implementation of this project. The Alameda County Office of Education (ACOE) was chosen as a partner to implement and pilot this project due to their highly successful youth internship program, program capacity, relationships with local youth and youth serving agencies, relationships with partner organizations, fiscal management, and their ability to handle the detailed intricacies of the pilot.

In FFY14, the *Network*, ACOE and the Alameda County LHD will continue to collaborate on a pilot youth training program to connect older high school youth to

internship experience in healthy youth careers that can be emulated and shared with other LHD's the following year. Since 1997, the *Network for a Healthy California* has provided a variety of social marketing campaigns and programs designed to educate low-income families and youth in California to increase their fruit and vegetable consumption and physical activity levels. With the transition into a more environmental, system change and sustainable approach, this project aims to educate youth on nutrition and physical activity and provide them with real life experiences in their communities. This intervention will use different methods of teaching to engage youth around nutrition education and physical activity classes, increasing cooking and shopping skills, peer-to-peer exchanges and train-the-trainer methods to build self-efficacy and leadership experience. Youth will be engaged to conduct promotions like food demos, store tours, *CX<sup>3</sup>* assessments, and developing policy, system and/or environmental change strategies to increase access to fruit and vegetables and physical activity opportunities. These efforts would not only provide the youth with these skills, but increase the sales and foot traffic in the stores, farmers' markets and increase the use of park and recreation facilities. All materials will be developed in a LHD model so that it can be used and tailored by other LHD's in the future.

Partnerships will be essential to the project's success as ACOE and Alameda County LHD will work to seek local career pathway partners that can provide internships and entry level jobs for youth in nutrition, physical activity and food retail environments. Partners could include (but not limited to): food retailers, restaurants, farmers' markets, community centers, park and recreational departments. This will be similar to a past Youth Engagement project, known as Mandela Market Place. The *Network*, ACOE and LHD will also work to develop sustainable partnerships with local food retailers who can provide internships, and/or entry level jobs to provide the youth with real world experiences. It is also important that these partners act as socially responsible liaisons that are invested in authentically developing young leaders and are interested in working to create a healthy and economically thriving community. No SNAP-Ed funds will be used for the internships; this will be done strictly through partnerships with local organizations.

### Key Strategies:

#### Community Engagement

##### Intervention 1:

- Review the evaluation findings from the 2013 pilot intervention to make any modifications to the training materials. This may include adjustments to trainings conducted as well as technical assistance provided.
- Training materials for participants available on-line.
- Conduct assessments and four in-residence trainings with evaluation of the same.

## Intervention 2

- Develop/deepen training materials based on those for Intervention I
- Provide tailored technical assistance via phone calls, emails, and/or webinars/teleconference to each LHD staff and their local contractors.
- Maintain a technical assistance log.
- Evaluate the training sessions with the LHDs and their local contractors.

The Youth Engagement Projects will focus on building youth leadership in nutrition and physical activity policy, systems and environmental change that can lead to a peer-to-peer model; promote health as it leads to economic viability; frame Health, Food & Physical Activity Academies like Green Academies (California Department of Education) and institutionalize to create career pathways/opportunities; Create buy-in with non-traditional partners and organizations who can influence larger audiences into the building of healthier communities with youth involved; highlight youth efforts across the state to raise the level of awareness of youth involved in Obesity Prevention efforts.

### Key Educational Messages:

Fruit and Vegetable Promotion, Healthy Beverage Education, Physical Activity Promotion, Environmental Supports, Community & Youth Engagement Strategies, Cooking & Meal Planning Skills; Food Systems and Environmental Change; Youth Empowerment,

### Intervention Sites:

*Network Leaders on the Move* sites will be determined upon identification of participating LHDs.

The Youth Engagement Projects will work primarily with Local Health Departments and/or their youth serving partner organizations. For the Healthy Youth Career Pathways Project, the pilot may entail (but not limited to) working with Grocery and Food Retail Stores, Restaurants, Community Centers, Parks and Recreational Departments as intervention sites.

### Projected Number of Contacts

*Network Leaders on the Move*

Direct Contacts (unduplicated) 60

Indirect Contacts: 400 +

Total: 460

Youth Engagement:

Direct Contacts (unduplicated): 300

Indirect Contacts: 2000+

Total: 2300

**e. Modification of Project Methods/Strategies:**

NLOM: Intervention 1, requires no modification of training material. Intervention 2 will modify materials utilized in FFY13 based on LHD assessments

**f. Use of Existing Educational Materials**

*Network Leaders on the Move:* Participating LHD utilize a variety of Network approved materials including Network's Toolbox for Community Educators with a focus on nutrition, community empowerment, fruits and vegetables, healthier eating, and physical activity promotion (intergrated with nutrition education). Which educational materials LHD may use for this project is alligned with their LHD scopes of work.

The Youth Engagement Projects may use the following Network approved materials: Network Y-PAR Curriculum, Afterschool CX3 Tool, Modified PowerPlay Activities such as Photo Voice, the Fruit and Vegetable and Physical Activity Toolbox for Community Educators; Playing for Healthy Choices, Shape of Yoga, Power Up in 10, Food Demonstration Training Kit, Fruit and Vegetable Store Tour Guide, and Retail Fruit and Vegetable Marketing Guide, Media Smart Youth Curriculum, CANFIT's Empowering Youth Manual, CANFIT's SuperManual

**g. Development of New Educational Materials**

NLOM: No new educational materials will be developed in FFY14.

In FFY2014, the Youth Engagement Projects will develop a Health Career Pathways Guide specifically tailored to LHD's, a Champion Youth Site recognition system guide and toolkit, update our Y-PAR Curriculum to incorporate more policy, systems and environmental change aspects and content for a training module used for youth to better understand the policy, systems and environmental change approach.

**h. Key Performance Measures/Indicators**

NLOM: Process evaluation: to measure quantity and quality of training events, technical assistance/support, continuous quality improvement. Outcome evaluation: to measure completion and implementation of community engagement plan at the local LHD.

Youth Engagement: Increase consumption of fruits and vegetables, decreases in the consumption of sugar sweetened beverages and increased self-efficacy related to physical activity, meal planning, shopping cooking and successful completion of all youth trainings and projects. Also included is an evaluation tool administered by Alameda County Office of Education (ACOE) in which they measure whether youth are showing increases in "hope". In some of our current youth programs, this semi experimental evaluation has shown that levels of hope

increased at high school sites among the youth where there was garden based nutrition educational interventions.

### **3. Evaluation Plan**

*NLOM* Overarching Program Evaluation Question: Is *NLOM* a viable training model to help local teams make progress on community engagement efforts to influence systems and policies that impact nutrition education and obesity prevention? Sub questions: 1) Was *NLOM* a positive experience for participants? 2) How effective was the Personal Leadership Plan (PLP) as a tool to increase personal capacity to lead change? 3) How did having a continuous, shared, learning experience help to enhance personal capacity to lead change? 4) How well did focusing on the chosen content areas lead to increased capacity? 5) How valuable was the TA/coaching, webinars/teleconferences, and site visits to local application and implementation efforts? 6) How helpful was development of a collaborative plan to increase personal capacity to lead change? 7) How feasible is the CEEP (Community Engagement Enhance Plan) to implement? 8) How well did participating LHDs implement their community engagement projects? 9) How well did statewide trainings help to increase capacity to engage in policy, systems, and environmental change to promote nutrition education and prevent obesity?

For each of the Youth Engagement Projects, the evaluation plan will be gathered once key performance measures/indicators are determined and in accordance to the evaluation goals of the Local Health Departments. In coordination with the Network's Research and Evaluation team, the evaluation methods will consist of (but not limited to): pre and post testing of trainings, formative research to assess pilot programs/projects, social learning theory on how to change behavior outcomes with educational reform theory on instructional strategies (experiential situated learning, successful nutrition education), professional development (how to transfer knowledge to students, sustainable continuous professional learning, and scale (how to replicate success across local health departments, districts, etc). The projects will also align with previous Y-PAR evaluation methods and CX3 if necessary and feasible.

The goal of the youth engagement projects is for all low-income youth participants in California to achieve the following results:

- Statistically significant increases in the consumption of fruits and vegetables.*
- Statistically significant decreases in the consumption of sugar sweetened beverages.*
- Statistically significant increases in hope.*
- Statistically significant increase in self-efficacy related to physical activity, meal planning, shopping and cooking*

### **Coordination Efforts**

The *NLOM* and the Children & Youth Program and its partners are aligned with the Network's overall strategy, brand and messaging and the projects were all

designed to work synergistically with the Network's overall campaigns, programs and partnership initiatives and LHD goals and objectives.

The Champion Youth Councils Project will work in coordination with Local Health Departments and their youth serving partners such as schools, local groups, afterschool programs, community or faith-based organizations and agencies. Both BMSG and I-SEED will be sole sourced to provide specific support to Local Health Departments and the Network's Children and Youth team.

## **Early Childhood SNAP-Ed Project**

### **b. Project Description**

#### **Key Strategies**

Provide all LHDs that have selected early childhood as an intervention priority, and their partners, with the combination of a toolkit and other materials; trainings, workshops, large group sessions, meetings, webinars, and teleconferences; and one-on-one technical assistance as needed, with a recurring theme of policy, systems, and environmental change in conjunction with education.

#### **Key Educational Messages**

Early prevention of childhood obesity; dietary quality; fruits and vegetables; healthier eating (general); healthy beverages; physical activity promotion (integrated with nutrition education); the *Dietary Guidelines for Americans*; and *Let's Move Child Care*.

#### **Intervention Sites**

*Network*-funded LHDs, preschools and/or other early care and education programs, Federally Qualified Health Centers (FQHC) and other health clinics, family support agencies, community-based organizations, pre-existing community/preschool gardens, housing projects, and other sites as qualified through USDA-approved methods.

#### **Projected Number of Contacts**

Approximately 1,000 early childhood caregivers, health professionals, and other intermediaries serving low-income children (ages birth to five) and their families.

#### **Narrative Summary**

This project will continue to build upon a previously developed and tested focus on nutrition and physical activity best practices in early childhood environments, as well as state and national resources and recommendations (*Let's Move Child Care*, Report from the California Department of Education (CDE) titled "*Keeping Children Healthy in California's Child Care Environments*" and the White House Task Force on Childhood Obesity Report to the President), and the work of the *Regional Network Collaboratives* and *Fruit, Vegetable and Physical Activity Campaigns and Programs* in order to: increase capacity for incorporating quality

and age-appropriate nutrition education into programming for parents and their young children; to capitalize on the emerging and urgent interest of SNAP-Ed eligible early childhood (EC) providers in healthy beverage nutrition education; and, in partnership with state-level child-serving organizations, promote the importance of written nutrition and physical activity practices within the context of providing nutrition education and physical activity promotion efforts to both young children and their parents.

Specifically the project will:

1. Provide evidence-based, multi-level training and technical assistance (TA), for *Network*-funded LHDs and partners working with young SNAP-Ed eligible children and their adult caregivers (parents, child care providers, early care and education teachers, etc.). Training and TA will be provided through a variety of venues statewide and will use a toolkit, to be compiled as part of this project. The toolkit will be based largely on existing, approved materials, with selected additional components, the need for which will be identified by the contractor and state *Network* staff with the feedback from applicable LHDs.
2. Disseminate evidence-based nutrition education, training and marketing materials to *Network*-funded LHDs and other organizations providing early childhood nutrition education services. This project will rely heavily on existing materials (*Harvest of the Month (HOTM)*, *Rethink Your Drink (RYD)*, etc.) modifying those materials as needed. Key messages will be consistent with the *Best Practices for Child Care Nutrition and Physical Activity Environments* (also known as *Creating Healthy Opportunities in Child Care Environments or CHOICE*) and consistent with the United States Department of Agriculture's (USDA) messaging for parents and other adult caregivers of young children (Messages for Preschool Moms, etc.).
3. Provide consultation and leadership by connecting *Network*-funded LHDs and other organizations serving low-income families in the field to support and facilitate collaboration. Collaboration activities will help broaden the reach to CalFresh eligible families and intermediaries. The project will facilitate communication and best practices sharing to enhance nutrition, physical activity, and obesity prevention efforts for low-income families throughout the state, focused on early childhood. Coordinated efforts will promote the use of nutrition assistance programs such as CalFresh, WIC, and the Child and Adult Care Food Program (CACFP); Farm to School Programs; the National Farm to School *Network* including the Farm to Preschool Program; and food banks to help families extend their food dollars and obtain foods needed to maintain health.

No existing *Network*-funded contractors are currently engaged in these activities, as they are typically engaged in an identified set of site-specific, tailored direct

nutrition education activities, as opposed to intermediary training and partnership development activities that build capacity on a larger scale.

### **c. Summary of Research**

- a. 2011 Pediatric Nutrition Surveillance System data reveals that 33 percent of California's low-income children (ages 4-5) enter school already overweight or obese, reinforcing the importance of an increased set of activities designed to impact young children.
- b. Studies show that approximately one in five children are overweight or obese by the time they reach their 6th birthday, and over half of obese children become overweight at or before age 2 (White House Task Force on Childhood Obesity Report to the President).
- c. Even babies are affected. Between 1980 and 2001, the prevalence of overweight infants under six months almost doubled; from 3.4% to 5.9% (White House Task Force on Childhood Obesity Report to the President).
- d. There are more than 45,000 licensed child care facilities in California serving over one-million children, uniquely positioning child care providers to influence the health of our youngest residents (California Food Policy Advocates).
- e. Children begin to establish food preferences and dietary habits during the first six years of life ([http://healthymeals.nal.usda.gov/hsmrs/Alaska/HSSection\\_2A.pdf](http://healthymeals.nal.usda.gov/hsmrs/Alaska/HSSection_2A.pdf)).
- f. According to the Urban Institute (using National Survey of America's Families data), 42 percent of children under age 5 with employed mothers spent at least 35 hours a week in child care in 2002. The proportion is even greater (50.6 percent) among children whose mothers worked full-time (these are the most current data available from this survey). These findings reinforce the important role that early care and education settings play in the lives of America's youngest children and the need to pay close attention to the quality of nutrition and physical activity promotion provided in those settings.

To help address these troubling statistics, the President's Childhood Obesity Task Force recommended that actions be taken in several key areas, including improving the quality of our nation's child care settings so they can consistently support young children's healthy development and empowering parents and other adult caregivers with information about the current *Dietary Guidelines for Americans* through messaging and education.

The new local health department scope of work templates include an optional Early Childhood component and based on feedback received during an FFY 2013 webinar, a substantial number of these new contractors plan to engage in early childhood focused nutrition education activities.

### **d. Modification of Project Methods/Strategies**

Ongoing feedback is obtained by local agencies, relevant statewide partners, trainees, and consumers to ensure the effectiveness of the interventions.

**e. Use of Existing Educational Materials**

See *Fruit, Vegetable and Physical Activity Campaigns and Programs Project Summaries*.

**f. Development of New Educational Materials**

This project will rely heavily on existing materials (*HOTM, RYD*, etc.), modifying those materials as needed. No completely new materials will be developed without an extensive search for existing materials that can be used “as is” or modified to meet *Network* needs. Any such materials will be thoroughly vetted and will follow the established *Network* Branding Guidelines. Relevant national materials will be used as appropriate.

**g. Key Performance Measures/Indicators**

Key performance measures will include improvements in knowledge and changes in nutrition and physical activity promotion practices, policies, systems, and environments in early care and education settings.

Changes in the early care and education environment are expected as a result of training and materials received by early care and education providers through *Network* LHD activities. This project will document: how many have been trained; and how have trained contractors applied the information gained during the training?, With whom (target population, intermediary partners)? and How many of each?; Are more providers using promising and best practices to implement their programs than were doing so prior to training?

**3. Evaluation Plan**

Process Evaluation: Number and type of trainings and related activities provided and educational materials distributed to LHDs; Number of resulting policy, systems, and/or environmental changes.

Evaluation Tools: Early Childhood SNAP-Ed Project Scope of Work (SOW) objectives that are specific, measurable, appropriate, realistic and time specific; semi-annual, annual and final progress reports against SOW objectives. Project evaluation tools, training information and evaluations.

**4. Coordination Efforts**

Continuing collaborative efforts forged by past *Network* Leadership Project contractor Contra Costa Childcare Council, the Early Childhood SNAP-Ed Project will foster relationships with: the California Department of Education; First 5; the Women, Infant, and Children (WIC) Program; the California Child Care Resource

and Referral (R & R) Network; American Academy of Pediatrics (AAP); California Dental Association (CDA); and Child and Adult Care Food Program (CACFP) Sponsoring Agencies and California Food Policy Advocates.

<b>Federal Share Budget</b>	<b>FFY2014 Total</b>	<b>FFY2013 Total</b>

## STATE LEVEL PROEJCT SUMMARY

FFY 2014

1. **Goals & Objectives** (*See State Level Objectives*).

2. **Project Title:** Farm-to-Fork Nutrition Education  
**PHI Budget:** \$300,000

a. **Related State Objectives:**

Related State Objectives include 1, 2, 3, and 4

b. **Audience**

Gender: Male and Female

Ethnicity: All

Languages: English; Spanish

Ages: -0-adults

c. **Focus on SNAP Eligibles**

*Network*-funded projects and other Supplemental Nutrition Assistance Program Education (SNAP-Ed) Intermediaries; Schools with >50% Free and Reduced Price Meals (FRPM)

d. **Project Description**

The Farm-to-Fork Nutrition Education Project (the Project) builds upon existing efforts and supports the Office of Farm to Fork (Interagency agreement among CDFA, CDE, CDPH) to strengthen connections between Farm to School and Farm to Fork programs and SNAP-Ed efforts in California. The Project will enhance the Farm to School Program by incorporating *Harvest of the Month* and other *Network for a Healthy California* (*Network*) projects into intervention efforts through connecting the program to local producers delivering tasting kits to low-income schools, preschools and Summer Meal Programs by developing a support system among farmers, food service directors, educators and parents. Farm to Fork SNAP-Ed projects will work in partnership with key opinion leaders in the field to advance the Farm to Fork efforts providing support to the NEOP strategy to expand and encourage the availability of affordable and locally grown produce targeting low-income communities throughout California and supports the recommendations from the Strategic Growth Council and the Office of Farm to Fork. Farm to Fork efforts provide the opportunity to impact the school community, retail, worksite, institutions, farmers markets, community gardens and school gardens. By working with partners in the field we can leverage our resources to support LHDs with training, technical assistance, materials, coordination and connecting with partners. The partners in the field would also provide local health departments (LHDs) with support reaching schools, retailers, worksite, food banks, WIC and other areas of the community with the *Harvest of the Month (HOTM)*, nutrition education materials and produce for taste testing. Enhancing coordination between the existing groups the Farm to School

Taskforce, Farm to Preschool Taskforce, Community Alliance for Family Farmers, Occidental College, Health in All Policies (HiAP) Food Procurement Taskforce, and LHDs to help support in local efforts.

Key Strategies:

1. Provide technical assistance in the form of webinars and resource referrals to implement policy, systems and environmental changes to LHDs to reach low-income schools with nutrition education materials and locally grown fresh produce. Examples would include Farmer's Markets and EBT acceptance at these venues.
2. Bridging *HOTM* and Farm to School through curriculum and local sourcing. K-12 schools sign up to receive monthly tasting kits that package *HOTM* curriculum, farmer profiles, educational newsletter, and samples of the featured produce from local farmers.
3. Provide support in the development of a California chapter for Farm to Preschool Taskforce.
4. Disseminate evidence-based nutrition education, training and marketing materials to Network-funded local health departments and other organizations providing early childhood nutrition education services. This project will rely heavily on existing materials (*HOTM*, *Rethink Your Drink*, etc.) modifying those materials as needed. Key messages will be consistent with the Best Practices for Child Care Nutrition and Physical Activity Environments and consistent with the United States Department of Agriculture's (USDA) messaging for parents and other adult caregivers of young children (*Messages for Preschool Moms*, etc.).
5. Provide consultation and leadership by connecting *Network* funded LHDs, and organizations serving low-income SNAP-Ed eligible children in the field to support and facilitate collaboration. Collaboration activities will help broaden the reach to CalFresh eligible families and intermediaries. The project will facilitate communication and best practices sharing to enhance nutrition education and obesity prevention efforts throughout the state focused on early childhood. Coordinated efforts will promote the use of nutrition assistance programs such as CalFresh, WIC, USDA Child Nutrition Programs, including the Child and Adult Care Food Program (CACFP), USDA Farm to School Programs, the National Farm to School Network including the Farm to Preschool Program, and food banks to help families extend their food dollars and obtain foods needed to maintain health.
6. Provide support for expanding nutrition education through healthier school meals and summer meal programs through key farm to fork partnerships, local food procurement and farmers markets.
7. Convene a Stakeholder panel with representatives from agriculture, education, retail and land use to develop strategies to support the SNAP-Ed audience in obtaining locally grown produce and support the farm to school and farm to preschool movements. Education and outreach through the California Farm to School Taskforce and Food Policy Councils, which will develop a strategic plan for the working groups.

- [www.cfaitc.org](http://www.cfaitc.org)
- <http://www.caff.org/>
- <http://www.usda.gov/wps/portal/usda/knowyourfarmer?navid=knowyourfarmer>

Key Educational Messages:

Seasonal and local fruits and vegetables (*Harvest of the Month*); MyPlate; Promote Healthy Communities, Rethink Your Drink

Intervention Sites:

Women, Infants, and Children (WIC) Program food stores (Primetime Nutrition, Mothers' Nutritional Center, Siesta Plaza Nutrition), schools, farmers markets, early childhood, summer meal programs, retail, worksite, institutions.

Narrative Summary:

This project is a continuum of the efforts and successes that have progressed into the Farm to Fork movement. This Project is to ensure that Farm to School, Farm to Preschool, Farm to Fork and other programs that link agriculture and food are linked with SNAP-Ed in eligible California sites through social marketing, Food Policy Councils, County Nutrition Action Plans and other venues to maximize efforts by providing hands-on nutrition education that connects students and communities with where their food comes from. The Project will build upon previous efforts to promote nutrition education through Farm to School efforts in California as part of interagency collaboration and through the development of a strategic plan for the California Farm to School Nutrition Education Taskforce. The goal of the project is to increase consumption and accessibility of fruits and vegetables through strengthening the connection between initiatives that promote knowledge and appreciation of local agriculture with SNAP-Ed efforts in school districts and communities. The *Network* will work with subcontractors that have strong Farm to Fork connections.

The *Network* is utilizing support and existing infrastructure of state agencies as well as working with new ones such as the CDFA Office of Farm to Fork, National Farm to School Network, National Farm to Preschool, USDA's Know Your Farmer, Know Your Food initiative to make the most of the growing interest and momentum in Farm to Fork and other connections to agriculture. In addition to building on previous years' work and providing technical assistance, these contractors will help to continue strengthening connection between HOTM and nutrition education components of Farm to School programs, and sustain the momentum the California Farm to School Taskforce in three key areas of communication, policy, and technology.

These agencies and the *Network* will collaborate to further the scope of the Project. Partnering with the *Network's* HOTM Internal Working Group, project will support a pilot project which packages and delivers monthly tasting kits that include the *Network's* nutrition education curriculum, farmer profiles, and samples of featured produce to

schools with over 50% free and reduced price meal participation or other community sites in a qualifying census tracts with 50% or more residents at or below 185% federal poverty level. In addition, will work with the *Network* to develop a Champions for Change program for groups connecting the community with locally grown produce, highlighting individuals who work to bring healthy food into SNAP-Ed schools.

Work with school districts to develop a local sourcing strategy for the HOTM taste test items and highlight the nutritional, economic and environmental benefits of eating local, seasonal fruits and vegetables. This pilot will also help bridge Farm to School with a retail program aimed at WIC recipients by providing a continuity of messaging around eating seasonal, local foods. This will be accomplished by providing technical assistance to schools with over 50% FRPM, maintaining the California Farm to School website, representing Farm to School at conferences and events, and working with the National Farm to School Network to identify and outreach to school districts lacking Farm to School programs.

This project would provide support for nutrition education efforts/messaging, physical activity promotion and working in the areas access to healthy foods through model procurement processes for identified interventions by the Network and the LHDs. This will be accomplished through the methods identified by the USDA including working and developing Food Policy Councils and enhancing County Nutrition Action Plans (CNAP). Information gained from local Food Policy Councils and/or through the County Nutrition Action Plan (CNAP) will be the driving force in implementing strategies for interventions centered on policy, systems and environmental change in their community.

#### **e. Summary of Research**

Increasingly, community leaders are recognizing that Farm to School programs have potential to counteract obesity and other diet-related chronic diseases such as diabetes and hypertension among America's youth. (Dillon, Casey, National Association of Counties, A Publication of the NACo Center for Sustainable Communities, July 2007.)

Farm to Fork or Farm to Institutions programs are gaining in momentum as an avenue to align food service operations with increase access to healthy foods by tying the community with agriculture. Programs and policies that support local sourcing of produce are schools, hospitals, faith-based organizations and worksites. Nutritionists, health practitioners, and researchers can support communities to develop programs and policies that support Farm to Fork efforts.

#### **f. Modification of Project Methods/Strategies**

Diversified organizations will be recruited as part of a strategy to increase reach, provide additional support and expertise, centered on farm to school and agriculture issues. In addition tasting kits in schools and WIC stores, and Champion Farmers program model.

**g. Use of Existing Educational Materials**

*Harvest of the Month* educator, family and community newsletters, calendar templates, student assessment tools, botanical images, instructional guide, training tools, bar graphs, and marketing tools.

**h. Development of New Educational Materials**

Update HOTM educator and family newsletters to include MyPlate messages, develop tip sheets for implementation strategies, update training tools and monthly content updates for [www.harvestofthemonth.com](http://www.harvestofthemonth.com).

**i. Key Performance Measures/Indicators.**

Number and type (school, pre-school, summer meal, retail or worksite) of Network-funded projects and other SNAP-Ed eligible sites that received technical assistance to strengthen the connection between Farm to School or Farm to Fork and SNAP-Ed to improve the access and appeal for healthy eating, estimated reach to SNAP-Ed eligible audience of these projects and their feedback on assistance received dissemination of identified resources process evaluation of tasting kits; number of specific collaborative strategies and the number and types of partners involved at the state, regional and county-level to strengthen the integration of Farm to School or Farm to Fork with SNAP-Ed to improve the access and appeal for healthy eating.

**3. Evaluation Plan**

Network staff and technical assistance contractors will document technical assistance contacts and follow-up by type of SNAP-Ed eligible venue and implementation strategy to be used. SNAP-Ed reach and participant feedback on technical assistance will be collected through online surveys, interviews or training assessments. Building on the strategic planning done by the Farm to School Task Force members in FFY2012, determine specific performance measure targets and tracking approaches. Network staff will also identify opportunities to systematically collect and report for this project according to relevant indicators identified in the Western Region SNAP-Ed Nutrition, Physical Activity and Obesity Prevention Outcomes evaluation framework.

**4. Coordination Efforts**

The Farm to Fork Nutrition Education Project combines CAFF, UEPI at Occidental College, and CFAITC's connections with California farmers and knowledge of farm to school programs with the nutrition education resources and communications power of the *Network*. Occidental College manages the Farm to School website that connects school districts and other institutions to local producers, allowing schools that are not participating in the pilot project to be able to identify and access fresh fruits and vegetables directly from local growers.

<b>Federal Share Budget</b>	<b>FFY2014 Total</b>	<b>FFY2013 Total</b>

## STATE LEVEL PROJECT SUMMARY FFY 2014

### 1. **GOALS & OBJECTIVES** (*See State Level Objectives*).

Develop, produce, and distribute nutrition education materials including, brochures, reports, briefs, toolkits, cookbooks, posters, other publications, and allowable Nutrition Education Reinforcement Items (NERI) that are targeted to SNAP-Ed-eligible consumers through the *Network for a Healthy California (Network)* and University of California CalFresh Nutrition Education Program (UC-CNEP) funded partners. These materials are designed to inform, remind, and motivate SNAP-Ed-eligible adults and provide nutrition education messages in support of the 2010 Dietary Guidelines for Americans and the Nutrition Education Obesity Prevention (NEOP) Strategic Plan to increase access to and consumption of healthier foods through changes in food environments; decrease consumption of unhealthy foods and beverages, and increase consumption of water; and increase physical activity opportunities throughout the day.

### 2. **Project Title:** Print Material, Nutrition Education Reinforcement Items, Warehousing and Distribution

#### a. **Related State Objectives**

The Materials Unit supports 1, 2, 3 and 4 of the State Level objectives.

Specifically, the *Network* works to increase availability of new and existing materials to *Network*-funded contractors, especially those projects and activities of the Local Health Departments (LHDs) through the website, Communications Resource Library, the Online Ordering System, and the Online Catalog/Cost Recovery System.

- Maintain the Online Catalog/Cost Recovery System (Online Catalog) with appropriate *Network* materials. The Online Catalog allows the *Network* to reach a broader audience beyond SNAP-Ed-eligible consumers by making available *Network*-produced materials to funded and non-funded partners and to others in the general market at the current cost of production plus tax, freight, and handling.
- Continue to increase the reach by providing PDF downloads of nutrition education materials via *Network* websites, at no cost. Coordinate efforts for use and sharing of educational materials between UC-CNEP and the *Network* as well as other state SNAP-Ed programs. Continue to upload *Network* materials to SNAP-Ed Connection and AgriCola websites. Continue to coordinate efforts with the Women, Infants, and Children's Program (WIC) so that *Network* materials better support the new food package, the NEOP priority areas - above and beyond fruits and vegetables and inclusive of

Rethink Your Drink efforts, the 2010 Dietary Guidelines for Americans, and MyPlate messaging.

**b. Audience**

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for African American and Latino communities and selected materials available in Asian languages.

Languages: English, Spanish, and select Asian languages, which may include Chinese, Hmong, Korean, and/or Vietnamese.

Ages: Adults 18+, primarily women with children, and children ages 5-17 years with concentrated efforts aimed at young adolescents ages 9-11 years.

**c. Focus on SNAP Eligibles**

*See Fruit, Vegetable, and Physical Activity Campaign Project Summary.*

**d. Project Description**

Key Strategies: Continue expanding and improving the *Network's* online ordering system, especially the user interface and user experience. Develop, produce, distribute, and track existing and new nutrition education materials to all *Network*-funded projects. Expand the availability of materials beyond funded partners through the Online Catalog site for the purchase of nutrition education materials, at cost of production plus freight and handling, by other projects, sister programs, other state agencies, and entities targeting SNAP-Ed-eligible populations.

Key Educational Messages: Primary messages focus on chronic disease and obesity prevention through increased access and consumption of healthy foods, especially fruits and vegetables; decreasing consumption of unhealthy foods and beverages, and encouraging physical activity; including messages from the 2010 Dietary Guidelines for Americans, ChooseMyPlate promotional messages and reducing consumption of sugary drinks. Secondary messages include healthier eating, in general; food safety; and cooking skills.

*Each of the Projects in the various sections of the plan describe key educational message (e.g., Fruit, Vegetable, and Physical Activity Campaign Project Summary).*

Intervention Sites: SNAP-Ed-qualified churches, community-based organizations, community events, community youth organizations, direct health service providers, farmers' markets, flea markets, grocery stores, low-income housing units, low-wage worksites, grocery stores, food banks, and others as described by the projects in the various sections of the plan.

*See Fruit, Vegetable, and Physical Activity Campaign Project Summary for additional intervention sites.*

Projected Number of Contacts:

Direct Contacts: *See below for numbers of shipments and items distributed as well as the Fruit, Vegetable and Physical Activity Campaign Project Summary.*

Narrative Summary:

Management of materials for *Network* programs is provided by program and administrative staff who support the processes of development, production, warehousing, and fulfillment for all nutrition education materials. The *Fruit, Vegetable, and Physical Activity Campaign* Unit and the state media contract are the primary originators of these materials. The materials are produced and made available to all *Network*-funded projects and available on a cost recovery basis for non-funded partners and other organizations.

Efforts for FFY14 are intended to increase the reach, penetration, and use of appropriate materials for all *Network*-funded projects, including LHD's, Special Projects, *Regional Networks*, sister programs, SNAP-Ed projects in other states, and other interested stakeholders and consumers.

The frequency of the activities ranges from ongoing development work with *Network* program staff and intermediaries to periodic production of items to daily orders and shipments through the warehouse. A total of 12,020 shipments containing 2,537,828 items occurred during the FFY13 fiscal period, through June 3, 2013. This total includes 420 shipments containing 87,160 items sold, at cost, on the Cost Recovery/Online Catalog system.

*Also see Fruit, Vegetable, and Physical Activity Campaign Project Summary for details on how/where of implementation.*

**e. Summary of Research**

*See Fruit, Vegetable, and Physical Activity Campaign Project Summary and Communications-Advertising/Publications Project Summary.*

**f. Modification of Project Methods/Strategies**

*See Fruit, Vegetable, and Physical Activity Campaign Project Summary*

**g. Use of Existing Educational Materials**

*See State-Level New/Existing Educational Materials/Curricula List starting on page 5 and the Fruit, Vegetable, and Physical Activity Campaign Project Summary*

**h. Development of New Educational Materials**

*See State-Level New/Existing Educational Materials/Curricula List starting on page 6 and the Fruit, Vegetable, and Physical Activity Campaign Project Summary*

**j. Key Performance Measures/Indicators**

Use of well-developed, tested, and effective materials intended to support achievement of NEOPs objectives. Key performance measures will include improvements in knowledge and self-efficacy and increases in the key SNAP-Ed recommended behavioral outcomes; consumption of healthy foods, especially fruits and vegetables, and increases in physical activity. Additional performance measures will include target audience impressions.

**3. Evaluation Plan**

*Network* staff will continue to review and oversee the materials that are produced at the state and local levels. In addition, *Network* staff will evaluate appropriateness of all materials and adherence to SNAP-Ed-*Guidance* and *Network* print and graphic standards. Distribution and quantity of materials will be tracked via the online ordering system. The data will be reviewed and used to determine future material needs.

*Network* staff will also assess the *Network* fulfillment system and end-user utilization of materials and overall satisfaction with the system. Monthly review and accounting of material and NERI dissemination is conducted for all activities.

Evaluation Type:

Formative: *See Fruit, Vegetable, and Physical Activity Campaign Project Summary.*

Process: The data collected in FFY13 from the online ordering system will be used as a benchmark. In FFY14, this information will be compared year-to-date and will allow us to evaluate the effectiveness of the system, more accurately forecast the need for materials, monitor product usage, and evaluate ordering trends.

Outcome: The information collected will be used to make adjustments to improve the user experience, ensure adequate material is available to support local-level interventions performed by *Network*-funded projects, and confirm that the system is meeting the needs of the user.

Evaluation Tools: FFY13 Benchmark shipment data.

#### **4. Coordination Efforts**

- Continue to expand the system capabilities and offer, store, and distribute approved materials produced by non-funded programs such as United States Department of Agriculture (USDA), Produce for Better Health Foundation, and other appropriate entities to reduce duplication and redundancy in material development.
- Continue to submit materials to the USDA National Agriculture Library, SNAP-Ed Connection, *National Fruits and Veggies-More Matters™* Programs at the Centers for Disease Control and Prevention, and the Produce for Better Health Foundation.
- As appropriate, explore opportunities to expand the availability of materials (at no cost to government) via the Produce for Better Health's Online Catalog and other appropriate organizations as identified.

**STATE-LEVEL**

## NEW Materials Development

<b>Title</b>	<b>Description</b>	<b>Justification</b>
CHIS TREND SURVEY REPORT ON NETWORK PILLAR VARIABLES	Show trends (2001-2007) and disparities for low-income and FSP adults, teens, children in CA.	This will be the first report of CHIS data that focuses on these aspects of the CalFresh low-income population and looks at our targeted behaviors in all three age groups.
PARTICIPATORY EVALUATION CASE STUDY	Provide practitioner oriented examples for how to use participatory evaluation methods to assess and improve programs.	Responds to the needs identified in the US General Accounting Office report for more sharing of lessons learned across nutrition education efforts.
LOCAL FOOD AND NUTRITION EDUCATION PROJECTS – PROMISING APPROACHES AND ACHIEVEMENTS	Highlight the promising project approaches, achievements, lessons learned, and evaluation results from the non-profit Local Food and Nutrition Education projects based on their three-year retrospective reports.	Document will respond to the need identified in the US General Accounting Office report for more systematic sharing of lessons learned across nutrition education efforts.
REPORT ON THE LATINO BODY AND SOUL IMPACT EVALUATION AND FORMATIVE RESEARCH PROJECT	Describe findings on the experience of carrying out a control/intervention study adapting the NCI African-American Body and Soul faith-based nutrition and physical activity promotion program for the Latino community.	Document will respond to the need identified in the US General Accounting Office report for more systematic sharing of lessons learned across nutrition education efforts.
BEAUTY SALON SUPPLY STORE INTERVENTION -FAUX Magazine -Brochure -Mirror Messages -Poster	To equip SNAP-Ed eligible African American women with practical strategies for engaging in increased physical activity without sacrificing the quality of their hair.	Hair maintenance is a stumbling block to increased physical activity amongst African American women. A study conducted by Wakeforest University Baptist Medical Center found that many African-American women stay out of the gym to avoid damaging their hairdos. Thirty-one percent of the 103 African-American women surveyed said that they exercise less because it might harm their hairstyles.

<b>Title</b>	<b>Description</b>	<b>Justification</b>
WALKING BROCHURE	This brochure will give the SNAP-Ed population strategies and tips on how to successfully create and follow a walking plan.	This year walking is going to be released as a vital sign and emphasis and literature will be released on the need to walk. We need to be prepared to give our target population material to enable them to be successful.
1-MINUTE ENERGIZERS TOOLKIT	Provides K-6 teachers 1-minute physical activity energizers that can be done indoors or outdoors and are also designed to increase student knowledge of various anatomical physiological concepts.	1-Minute Energizers toolkit is linked to California's Science, PE, and Health Education content standards. They can be performed with little or no equipment and with very little prep time. They are designed to increase daily physical activity participation.
POSTERS - STRETCHING & STRENGTH	One poster will demonstrate 10-12 poses on stretching exercises and one poster will demonstrate 10-12 strength exercises for worksites.	These posters are needed for the workers to view as they go through their exercise regimen in their workout area at the worksites. They need a visual, as they may not always have an individual leading these exercises and/or may choose to do at their own time during breaks (useful in factory, and agricultural settings)
RYD GO FOR H2O POSTERS (English & Spanish)	Elementary-age targeted poster encouraging consumption of water instead of sugary drinks.	These posters are needed to educate and encourage drinking water over sugary drinks, which are one of the highest sources of additional calories for Americans.
BEVERAGE LABEL CARDS - Expansion Set (English & Spanish)	Resource for teachers and community event staff on reading nutrition labels on beverages.	These are needed as a nutrition education/label reading supplement in classrooms and community events.
RYD SIRK SUPPLEMENT (English & Spanish)	RYD lesson plan for elementary aged school children on choosing water instead of sugary drinks.	These are needed for teachers, after school programs, and early childhood educators to assist with nutrition educational efforts for beverage consumption.

<b>Title</b>	<b>Description</b>	<b>Justification</b>
RECIPE CARD EXPANSION SET (ENGLISH & SPANISH)	Beverage recipes.	These are needed so consumers have tasty, low-cost alternatives to sugary drinks.
WORKSITE RYD POSTERS	Worksite-targeted targeted poster encouraging consumption of water instead of sugary drinks.	These posters are needed to educate and encourage drinking water over sugary drinks, which are one of the highest sources of additional calories for Americans.
RETAIL POINT OF PURCHASE (POP) MERCHANDISING AND FOOD DEMONSTRATION MATERIAL, ENG/SPN	-Wobblers -Window Clings -Shelf Magnets -Signage -Other RYD/Retail Merchandising Materials	The merchandising materials are an integrated POP program that provides retailers with a variety of signage options that allow more customized promotion of water and healthy beverages instead of sugary drinks at the point-of-sale.
TELENOVELA DVDS FOR TOOLBOX	This new version of the Telenovela will be copied and inserted into every new <i>Toolbox for Community Health Educators</i> . In addition, we will mail the new Telenovela to all existing <i>Toolbox</i> partners.	The Telenovela was re-filmed in FFY12 to replace the current version that contained 5 A Day recommendations.
MYPLATE BROCHURE, ENG/SPN	These brochures outline “My Plate”/”Mi Plato” meals at breakfast, lunch, and dinner with a special emphasis on making half the plate fruits and vegetables. The foods and recipes will be familiar to African American and Latino families.	We know from focus groups that Latinos are challenged by the half-plate concept, especially at breakfast. Simple graphics and cultural relevance will address this challenge.

<b>Title</b>	<b>Description</b>	<b>Justification</b>
KID STORE ACTIVITY BOOKLET	<p>An activity booklet for children between the ages of 4-8 years old will be distributed statewide to children during family grocery shopping trips, food demonstrations, or store tours. This booklet will serve as an educational, fun, take away piece that helps young people make healthier food decisions.</p> <p>The theme of the activity booklet will be centered on fruit and vegetable consumption and the recently released My Plate concept from the United States Department of Agriculture. Elements could include educating youth about how to fill half their plate with fruits and vegetables, how things grow, produce tips, and making simple, nutritious snacks.</p>	<p>One of the top requested materials from the 2009 Retailer Satisfaction Survey was a nutrition education material targeting children (55%). This question will be asked again the 2013 Retailer Satisfaction Survey. Both the <i>Retail Program</i> and the <i>Children's Power Play! Campaign</i> does not have a material that meets this need.</p>
TABLE FLIP CHART FOR IN-STORE DINING	<p>Pilot this material in a Latino themed Retail Program partner/store that has in-store dining like Arteagas or Northgate. The material would be placed on dining tables to encourage low-income consumers to buy fruits/vegetables with the <i>Harvest of the Month/Rethink Your Drink</i> theme and be paired with a particular dining menu entree. This material can also be used in <i>Worksite Program</i> cafeterias.</p>	<p>This creates an additional opportunity in which the <i>Network for a Healthy California</i> can provide nutrition education to low-income consumers as those in grocery stores' dining areas and low-wage employees' cafeterias. It emphasizes eating healthy foods can occur at all occasions including when eating out/at work. If the Pilot is successful, this social marketing strategy can be practiced in restaurants that accept CalFresh.</p>
PAPER BOOK COVERS	<p>Book covers will have a nutrition education message and reinforce the intended behavior. Book covers are a requirement for middle school children so <i>Network</i> book covers offer a two-fold benefit – satisfies requirement of covering text books, and provides nutrition ed message.</p>	<p>Low-income students do not have the resources for book covers so this provides the <i>Network</i> with an opportunity to supply kids with a necessary item, while providing a constant reminder of the nutrition education message and intended behavior.</p>

<b>Title</b>	<b>Description</b>	<b>Justification</b>
NEW <i>HOTM</i> POSTER(S)	Design/develop 1-2 new <i>HOTM</i> posters with nutrition and MyPlate messages. Possibly include more culturally diverse produce and Farm to Fork content.	Current posters have been around for over 5 years and would like to add updated content and connections. These posters would also be used for retail and worksite (so would fit in retail display stands).
PHYSICAL ACTIVITY BRIEF REPORT (CaITEENS)	12-15 page research brief report with ~3 one-page data tables at the back. Layout for this report should be modeled after brief reports previously produced for Research in FFY13 (FV access) and 2011 (SSB consumption).	This report will report analyze evidence relating to the effectiveness of one of the three NEOP priority areas: Increase physical activity opportunities throughout the day. Brief reports produced from statewide survey results are a PHI Master Contract deliverable.
<i>AFRICAN AMERICAN CAMPAIGN</i> HAND FAN FOR CHURCHES	This health promotion resource is a simple hand held fan that will feature several health education messages as well as a call to action for AA church-goers.	According to a 2010 Gallup Poll, 55% of African Americans attend church frequently. Churches give us a way to reach a large proportion of African Americans including those most at-risk for health issues. In FFY 2014, the African American Campaign will continue to fund three Faith Projects. Additionally, local health departments across the state will implement Objective 17 (Faith) of the Local Health Department Scope of Work. The Hand Fan will serve as a valuable promotional resource for LHDs.

<b>Title</b>	<b>Description</b>	<b>Justification</b>
AFRICAN AMERICAN CAMPAIGN HEALTH STATS INSERT FOR CHURCH BULLETINS	Information on health status and disparities facing African Americans.	According to a 2010 Gallup Poll, 55% of African Americans attend church frequently. Churches give us a way to reach a large proportion of African Americans (AAs) including those most at-risk for health issues. In FFY 2014, the <i>African American Campaign</i> will continue to fund three Faith Projects. Additionally, local health departments across the state will implement Objective 17 (Faith) of the Local Health Department Scope of Work. The Health Stats insert for church bulletins will raise awareness and knowledge about preventable chronic diseases and encourage AAs to make healthy changes. It will be a critical resource for any local health department implementing Faith Objective 17 of the LHD scope of work.
AFRICAN AMERICAN CAMPAIGN UPDATED MUSIC FOR PHYSICAL ACTIVITY MUSIC ON TOOLBOX CD	This item is a physical activity friendly CD with music that will have cultural resonance with African American audiences.	The <i>Fruit, Vegetable and Physical Activity Toolbox for Educators</i> currently contains a CD with PA friendly music. Nonetheless, feedback from contractors indicates that the music on the CD is either outdated or uninspiring. New music is needed in order to continue to promote increased PA in AA communities.
RETAIL PROGRAM COOKBOOK VERSION 2	Develop new recipes for the general audience.	New recipes have not been developed since 2004 although in 2007 the cookbook was revised to meet the new branding guidelines.

<b>Title</b>	<b>Description</b>	<b>Justification</b>
RETAIL PROGRAM TRAINING VIDEOS	Develop a series (up to 5) of short web-based training videos for contractors working with retail interventions.	Surveys show that retail promotions can have a positive impact on how shoppers spend their food dollars. These short training videos will give contractors practical skills for working in the retail environment to impact choices at the point of purchase.
AFRICAN AMERICAN CAMPAIGN COOKBOOK VERSION 2	The cookbook features healthy versions of African American family-favorite meals and snacks, preparation tips, and photos of easy-to-prepare recipes that include a variety of colorful, culturally-appropriate fruits and vegetables. The cookbook is in English only.	The <i>African American Campaign</i> cookbook will feature traditional African American dishes modified to make the dishes healthier and more compliant with USDA 2010 Dietary Guidelines. It will be the second edition of the AA cookbook. Reports from contractors indicate that AA consumers are beginning to complain that they have seen the first edition cookbook too many times. The new cookbook will address issues of market over-saturation and incorporate Choose MyPlate messages.
PP! UTILIZING AFTERSCHOOL FOR NUTRITION ED	This will be a policy brief or white paper created in partnership with an external agency that is well-versed in the afterschool and out-of-school time environment. The paper will promote the importance and use of afterschool and out-of-school time policies and detail how to properly utilize and align with afterschool and out-of-school time agencies to further engage children in nutrition education and physical activity. The paper will be distributed to LHDs and other partners to expand the <i>Network's</i> role in the afterschool environment.	Afterschool and out-of-school time agencies are often overlooked and underutilized as a resource for engaging the target audience to give a general overview on the different aspects of working in the afterschool and out-of-school time environments. This brief will be used as a resource for the <i>Network</i> and its funded projects to provide the most current information on successes and challenges of working in afterschool and out-of-school time agencies and how to utilize it as an effective channel for nutrition education for children in California.

<b>Title</b>	<b>Description</b>	<b>Justification</b>
CHAMPION YOUTH GUIDE	This guide will serve as a resource for LHDs who play a pivotal role in creating and ensuring youth leadership opportunities and are working with youth who have demonstrated leadership in promoting and creating healthier nutrition and physical activity environments in their community. This guide will instruct how to create and utilize a peer-to-peer model for youth within the LHD structure, highlight youth efforts in general in accordance with existing media and ethnic campaigns, and tie youth efforts to specific LHD interventions for better creation of sustainable policy, system, and environmental changes that are youth-driven and youth-led.	Based on results from the Champion Youth Councils/Schools Pilot Project. With the recent NEOP transition into utilizing a LHD model which focuses on policy, system and environmental changes as a sustainable approach for nutrition education and physical activity, this guide aims to enhance youth leadership and messaging on nutrition and physical activity both locally and statewide. The <i>Network</i> for a Healthy California and the Children and Youth team see the environment in which choices about nutrition and physical activity are made by youth as a key resource to the success of those interventions.
PP! SIRK FOR K-3 GRADES	The <i>Power Play!</i> School Idea & Resource Kits for 4th & 5th grade students would serve as a model for development of K, 1st, 2nd, 3rd, and 6th grade kits. The kit would include activities related to fruits, vegetables and physical activity and link to the California Content Standards and National Common Core educational standards. The Kit would include the Teacher guide and student workbook. Available in English/Spanish.	In FFY 2013, the Children's <i>Power Play!</i> Campaign SOW was expanded from a target audience of 9-11 year olds to include all elementary school-aged children. To effectively accomplish reaching all elementary school-aged children, the materials must be age and grade appropriate and align with National Common Core educational standards.
ASIAN CAMPAIGN TOOLBOX	Translate the 16 current lessons + 5 newly developed lessons, handouts, and activity cards of the Fruit, Vegetable, and Physical Activity Toolbox for Community Educators in to Cantonese, Hmong, and Vietnamese languages.	Asians have a greater percentage of limited English language proficiency than other groups. Language and literacy factors affect label reading skills, making informed food and beverage selections difficult. Translated materials will help address this challenge.

<b>Title</b>	<b>Description</b>	<b>Justification</b>
AMERICAN INDIAN AND ALASKAN NATIVES (AIAN) CAMPAIGN PHYSICAL ACTIVITY BOOK	Develop a physical activity book for American Indians and Alaska Natives in California.	American Indians and Alaska Natives have a higher prevalence of diabetes and overweight/obese/morbidly obese adults and children than the general population. Cultural competent materials will help address eating and physical activity challenges in an effective manner.
AIAN COOKBOOK	Develop a cookbook for American Indians and Alaska Natives in California.	American Indians and Alaska Natives have a higher prevalence of diabetes and overweight, obese and morbidly obese adults and children than the general population. Cultural competent materials will help address eating and physical activity challenges in an effective manner to address these diseases.
PHYSICAL ACTIVITY FOR YOUNG CHILDREN, BIRTH TO 5 YEARS BROCHURE	Brochure on why physical activity is important for a young child, the difference between structured and unstructured activity, and example activities for infants, toddlers and preschoolers.	Brochure initially developed by the Desert Sierra region for the WIC program. We would like to revise the brochure and develop an interactive educational tool for LHDs to distribute to maternal and infant health and early childhood education programs.
LATINO CAMPAIGN INFOGRAPHIC ILLUSTRATION OF IMPACT EVALUATION FINDINGS	This infographic would highlight key findings from the <i>Latino Campaign</i> Impact Evaluation Study, completed in FF13.	We need a quick and easy way to share key findings from the <i>Latino Campaign</i> Impact Evaluation Study with stakeholders and community members.

<b>Title</b>	<b>Description</b>	<b>Justification</b>
<p><i>LATINO CAMPAIGN</i> FOOD BANK RECIPE CARDS</p>	<p>Using existing templates and recipes, the <i>Latino Campaign</i> will create recipe cards tailored for Latinos receiving food from pantries, shelters, and food banks.</p>	<p>Based on site visits and feedback from our Latino Advisory Group, there is a need to provide recipes and cooking tips to Latinos who are receiving unfamiliar food items. These simple cards will decrease food waste (as many simply leave produce they can't cook) and increase self-efficacy among Latinos using food banks.</p>
<p><i>LATINO CAMPAIGN &amp; PA</i> INTEGRATION - INTEGRATING PA INTO YOUR DAY FOR LATINOS</p>	<p>This will be a largely graphic piece (very little copy) using specific suggestions from our Regional Staff and their consumers:</p> <ul style="list-style-type: none"> <li>• Create a resource with familiar activities that families can do and how many calories it burns (e.g., sweeping, cleaning windows, walking to school, kicking a soccer ball, etc.)</li> <li>• Focus on the notion that PA can be broken up throughout the day—10 minutes here, 20 minutes there.</li> <li>• Show families ways to be active inside as well as outside.</li> </ul>	<p>We asked our Regional Managers, "Thinking about times you interacted with our target audience, what messages or materials have spurred behavior change around PA for the family?"</p> <p>Here is what they said:</p> <ul style="list-style-type: none"> <li>• Family games are a great way to get the whole family active. Even something simple like keeping a balloon in the air.</li> <li>• The PA empowerment brochure is too long and too abstract.</li> <li>• Parents want to know how to do it; they already know why they should do it.</li> <li>• Make it about incorporating PA, not looking at it as a separate activity.</li> </ul> <p>Existing models:</p> <ul style="list-style-type: none"> <li>• "Cookin' Up Physical Activity": Quick and inexpensive ways to get PA using items from the kitchen.</li> <li>• WIC brochure that shows how many minutes it will take to burn calories in unhealthy foods—also displays healthy options.</li> </ul>

<b>Title</b>	<b>Description</b>	<b>Justification</b>
BASIC NUTRITION AND PHYSICAL ACTIVITY CONCEPTS FOR COMMUNITY HEALTH LEADERS TRAINING MODULE	Physical Activity Integration Training module focusing on Nutrition and Physical Activity Recommendations, <i>Network</i> -approved Resources, Safety Precautions, Overcoming Barriers.	Training module for Local Health Department and <i>Network</i> -contractors. This module was originally developed in 2012 by an independent contractor. We would like to review, update, and include this module into a Physical Activity Integration Toolkit for Local Health Departments and <i>Network</i> -funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating <i>Network</i> -allowable physical activity interventions.
NUTRITION AND PHYSICAL ACTIVITY INTERVENTIONS IN THE WORKPLACE TRAINING MODULE	Physical Activity Integration Training module focusing on the importance of PA in the workplace and example evaluations, interventions, policy strategies, and resources.	Training module for Local Health Department and <i>Network</i> contractors. This module was originally developed in 2012 by an independent contractor. We would like to review, update and include this module into a Physical Activity Integration Toolkit for Local Health Departments and <i>Network</i> -funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating <i>Network</i> -allowable physical activity interventions.
AFTER SCHOOL PHYSICAL ACTIVITY PROGRAMMING AND RESOURCES TRAINING MODULE	Physical Activity Integration Training module focusing on the importance of PA in the workplace and example evaluations, interventions, and policy strategies.	Training module for Local Health Department and <i>Network</i> contractors. This module was originally developed in 2012 by an independent contractor. We would like to review, update and include this module into a Physical Activity Integration Toolkit for Local Health Departments and <i>Network</i> -funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating <i>Network</i> -allowable physical activity interventions.

<b>Title</b>	<b>Description</b>	<b>Justification</b>
PROMOTING PHYSICAL ACTIVITY AMONG SPECIAL POPULATIONS TRAINING MODULE	Physical Activity Integration Training module focusing on Physical Activity Recommendations: Special Populations, including Early Childhood, Overweight/Obese Adults and Children, Older Adults, strategies, and resources.	Training module for Local Health Department and <i>Network</i> -contractors. This module was originally developed in 2012 by an independent contractor. We would like to review, update, and include this module into a Physical Activity Integration Toolkit for Local Health Departments and <i>Network</i> -funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating <i>Network</i> -allowable physical activity interventions.
THE BASICS OF PHYSICAL ACTIVITY SAFETY TRAINING MODULE	Physical Activity Integration Training module focusing on Common Physical Activity Safety Concepts, adaptive physical activity, strategies and resources.	Training module for Local Health Department and <i>Network</i> -contractors. This module was originally developed in 2012 by an independent contractor. We would like to review, update and include this module into a Physical Activity Integration Toolkit for Local Health Departments and <i>Network</i> -funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating <i>Network</i> -allowable physical activity interventions.
PHYSICAL ACTIVITY INTEGRATION EARLY CHILDHOOD TRAINING MODULE	Physical Activity Integration training module focusing on The Role of the Child Care Setting, Types of Child Care Settings, Key Nutrition and Physical Activity Recommendations for Young Children, Sample Policies, Challenges and Opportunities, and Age-Appropriate Physical Activities.	Training module for Local Health Department and <i>Network</i> -contractors. This module was originally developed in 2013 by an independent contractor. We would like to review, update and include this module into a Physical Activity Integration Toolkit for Local Health Departments and <i>Network</i> -funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating <i>Network</i> -allowable physical activity interventions.

<b>Title</b>	<b>Description</b>	<b>Justification</b>
ESTABLISHING JOINT USE AGREEMENTS FOR IMPROVED ACCESS TO NUTRITION AND PHYSICAL ACTIVITY TRAINING MODULE	Physical Activity Integration training module focusing on What are Joint Use Agreements?, Challenges Implementing Joint Use Agreements, Funding Opportunities, Checklist for Developing Joint Use Agreements, strategies and resources.	Training module for Local Health Department and <i>Network</i> -contractors. This module was originally developed in 2013 by an independent contractor. We would like to review, update and include this module into a Physical Activity Integration Toolkit for Local Health Departments and <i>Network</i> -funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating <i>Network</i> -allowable physical activity interventions.
SCHOOL WELLNESS: IMPROVING SCHOOL NUTRITION AND PHYSICAL ACTIVITY TRAINING MODULE	Physical Activity Integration training module focusing on The Role of School Wellness Policies, Nutrition Strategies, Physical Activity Strategies, Challenges and Opportunities, Wellness Policy implementation and monitoring, strategies and resources.	Training module for Local Health Department and <i>Network</i> -contractors. This module was originally developed in 2013 by an independent contractor. We would like to review, update and include this module into a Physical Activity Integration Toolkit for Local Health Departments and <i>Network</i> -funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating <i>Network</i> -allowable physical activity interventions.
WORKING TOWARD A DEEPER UNDERSTANDING OF THE BENEFITS OF PHYSICAL ACTIVITY	Physical Activity Integration training module focusing on Physical Activity Guidelines, Physiological Responses to Physical Activity, Physical Activity and Caloric Balance, strategies and resources.	Training module for Local Health Department and <i>Network</i> -contractors. This module was originally developed in 2013 by an independent contractor. We would like to review, update and include this module into a Physical Activity Integration Toolkit for Local Health Departments and <i>Network</i> -funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating <i>Network</i> -allowable physical activity interventions.

<b><i>Title</i></b>	<b><i>Description</i></b>	<b><i>Justification</i></b>
PHYSICAL ACTIVITY INTEGRATION ACTIVE TRANSPORTATION TRAINING MODULE	Physical Activity Integration training module focusing on educational and encouragement approaches to increase active transportation to school and work, including increasing awareness of the benefits of active transportation, pedestrian/bicycle and personal safety skills, involving parents, students and other key partners, coordinating special events, such as Walk2School or bike to work events.	Training module for Local Health Department and <i>Network</i> -contractors currently under development by an independent contractor. We would like to review, update and include this module into a Physical Activity Integration Toolkit for Local Health Departments and <i>Network</i> -funded projects. This toolkit will assist LHDs with planning, implementing, and evaluating <i>Network</i> -allowable physical activity interventions.

<b>Title of the evaluation</b>	African American FVPA Campaign Beauty Salon Evaluation
<b>The project or projects with which it is associated</b>	African American Campaign and local health departments that provide SNAP-Ed to African Americans
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Outcome
<b>The question(s) to be addressed by the evaluation</b>	Do low-income African American women participating in a beauty salon-based intervention improve dietary and physical activity knowledge, attitudes and behaviors?
<b>The approach to conducting the evaluation, including scope, design, measures and data collection</b>	Women participating in this intervention will complete a personal health assessment before the intervention (pre-test) and again after (post-test). This pre-test/post-test design will assess change in knowledge, attitudes, and behaviors related to diet and physical activity in 100 or more matched pre- and post-tests selected from at least 15 beauty salons in the Los Angeles area.
<b>Plans for using the results</b>	This is a new channel being implemented by the African American Campaign; therefore, evaluation results will be key in helping to guide program planning for the future of the beauty salon channel.
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	Formative evaluation conducted in FFY 2011 provided evidence that beauty salons are promising sites for promoting healthy eating and physical activity among low-income African American women. An initial pilot study was begun in FFY 2012 but was unable to be completed satisfactorily due in part to delayed contracting processes.
<b>Project cost</b>	100,000

**STATE LEVEL PROJECT SUMMARY  
FFY 2014**

1. **Goals & Objectives** (See *State Level Objectives*).

2. **Project Title:** *African American Campaign Healthy Diva Beauty Salon Pilot Project*

	<b>Minimum Direct Contacts</b>	<b>PHI Budget</b>
Salon Contractor	150	\$100,000

**a. Related State Objectives**

Related State Objectives include 1, 2, and 3

**b. Audience**

Gender: Female

Ethnicity: African American

Languages: English

Ages: Adults 18-54 years, primarily with children

**c. Focus on SNAP Eligibles**

The *African American Campaign's* Healthy Diva Beauty Salon Pilot Project will be designed to reach SNAP-Ed eligible African American women ages 18-54 with children in low-income census tracts and census blocks.

Income Targeting Data Sources:

Site verification of 50% or greater SNAP-Ed-eligibles participating in *African American Campaign* activities will be based on the following data sources:

- Primary: *Network* GIS census tract and census block data.
- Secondary: Community-based organization and business record audits.
- Consumer surveys will be used where necessary to insure that the audience served is indeed low-income.

**d. Project Description**

Key Strategies: Nutrition education classes; print media; internet/websites; social media; training/workshops/conferences; nutrition education & community empowerment; research/evaluation; promotion of healthy communities (promotion will be directly linked, supportive of, and proportionate to direct nutrition education for SNAP-Ed-eligible families).

Key Educational Messages: Fruits and vegetables; healthier eating, in general; physical activity promotion (integrated with nutrition education); obesity and chronic disease prevention.

Intervention Sites: Delivery sites for the Healthy Diva Beauty Salon Pilot Project's SNAP-Ed eligible population include **15** beauty salons located in low-income census blocks and census tracts in the San Diego region.

Projected Number of Contacts:

Direct contacts: 150 (15 salons x 10 clients)

Indirect contacts: 2,450 (~35 weeks x 70 clients)

Narrative Summary:

Beauty salons are ideal locations for implementing public health interventions in the African American community for several reasons. A study conducted by Wakeforest University Baptist Medical Center found that many African-American women avoided high-sweat activities to prevent damage to their hairdos. In fact, 31% of the 103 African-American women surveyed said that they exercise less because it might harm their hairstyles. As one researcher who worked on the study stated, few women would head straight to the gym from the hair salon, but the dilemma appears to be more a factor for African-American women because they tend to spend a disproportionate amount of time and money on professional hair care.<sup>1</sup>

Secondly, beauty salons are common fixtures in African American communities. In the United States, there are 312,959 licensed beauty-centered salons, and owners report serving an average of 155 clients per week.<sup>2</sup> Third, salons are places that women frequent regularly—from weekly visits to at least once every 4 to 8 weeks. Fourth, women spend a lot of time in the salon during a typical visit—from 45 minutes to 5 hours, depending on the services received.<sup>3</sup>

Lastly, salons are places where health is a typical topic of conversation. Solomon and colleagues (2004)<sup>4</sup> observed 10 salons and found that approximately 18% of the talk that occurs in a salon is health related. Ninety-four percent of licensed cosmetologists report talking about health with their customers (Linnan, Kim, et al., 2001).<sup>5</sup>

<sup>5</sup> Linnan, L. A., Kim, A. E., Wasilewski, Y., Lee, A. M., Yang, J., & Solomon, F. (2001). "Working with licensed cosmetologists to promote health: Results from the North Carolina BEAUTY and Health pilot study." *Preventive Medicine*, 33, 606-612

Initial formative research was completed in FFY 2011, including a literature review of beauty salon-based health interventions, key informant interviews with others who have conducted beauty salon health interventions, and beauty industry opinion leaders in California. Continuing into FFY 2012, this project ascertained the suitability of using beauty salons/supply stores to engage African-American women where they are consistently cared for and where they shop often for hair supplies. It was determined that the hair stylist is seen as a credible messenger for nutrition and physical activity in her role as a trusted confidante, often with knowledge of the personal history of each of her clients and their families. Research concluded that it is feasible for stylists and shop owners to transmit nutrition and physical activity messages in a way that would stimulate behavior change. In FFY 2013, Regional Networks in San Diego and Desert Sierra implemented environmental change initiatives in salons located in low-income neighborhoods. As a part of the initiative, stylists agreed to establish guidelines on the types of foods available in the salon and to promote physical activity.

The key activities of the beauty salon/supply store channel include: (1) identifying and recruiting beauty salons located in qualifying (SNAP-Ed-eligible) census tracts and/or census blocks with high concentrations of SNAP-Ed-eligible African American families to participate in the pilot test study, (2) establishing formal relationships with the respective hair stylists and beauty supply store staff, and training them to participate in the pilot project and (3) identifying, designing, testing, and implementing nutrition education activities in qualifying salons. In FFY 14, we plan to introduce text messaging to clients at participating beauty salons and offer technical assistance to stylists on initiating, maintaining, and responding to health related dialogue in the Salon, encouraging consumers to create positive changes in their communities, and recruiting selected hair stylists for participation on the *Network's* statewide African American Advisory Council to provide direction and advice to the *African American Campaign*.

In salons that serve primarily African-American clientele, there are likely between two and eight stylists working at one time. Each stylist will see between 2 and 12 clients per day (on average, seven), and work 5 days per week. Thus, at one salon, we can expect to see between 70 and 280 client visits per week, or between 14 and 56 clients per day). We expect to recruit a minimum of 25 salons for this pilot project. Over the course of 8 months (Months 1 and 2 for recruitment and training, Month 11 and 12 for the draft report including, data collection, analysis and evaluation and the first month of FFY 2014 for submission of the final wrap-up report), we expect to reach a minimum of 150 low-income African-American women.

#### Outcomes:

- Increased knowledge of the acceptability, feasibility, and effectiveness of using beauty salons as a catalyst to working to reach low-income African American women ages 18-54 with children. using text messaging and Meet-Ups at beauty salons in California as part of a social marketing campaign for low-income African American women ages 18-54 with children.

- Knowledge of whether the Healthy Diva Beauty Salon Pilot Project can have a positive impact on the health knowledge, attitudes, and behaviors of low-income African-American women.

#### e. Summary of Research

During FFY 2011, the *African American Campaign*, in collaboration with the *Network's* Research and Evaluation Unit, conducted formative research on the use of beauty salons and beauty supply stores to convey health messages, with particular attention to beauty salons serving low-income women and health messages focused on nutrition and physical activity. In FFY 2012, the *Network* sponsored a pilot Beauty Salon Intervention. Beauty salon clients were very receptive to participation in the project and the materials provided to them and some indicated their appreciation that some materials were culturally relevant. Participating salons reported being happy to have participated, and almost all felt that the project had some form of a positive impact on their clients. In FFY 2013, Regional Networks in San Diego and Desert Sierra implemented environmental change initiatives in salons in low-income neighborhoods. The success of these initiatives confirms formative research findings that salons are good places to reach low-income AA women.

The *Network* has identified numerous published journal articles on utilizing hair salons as health promotion and education venues. Our initial research pointed to the work of Sadler and colleagues, Booker, Turner, DiAna and Browne, in the 1990s, who added to the groundbreaking trend of using hair salons as venues for health education.<sup>6-4</sup> Since then, salon-based health programs have emerged all over the country.<sup>5-11</sup> The Arthur Ash Institute of Urban Health (AAIUH) has developed the longest-running and most comprehensive salon-based health programs for African-American and Afro-Caribbean women, and has expanded the model to personal care establishments generally, including barbershops, body-piercing and tattoo salons and laundromats. The health

issues addressed by the AAIUH in these settings ranged from asthma, diabetes, cancer (breast, prostate and colorectal), heart health, sexual health, smoking and nutrition to organ donation education. The model has also been transcreated for Latina salons. In 2001, the National Cancer Institute (NCI) of the National Institutes of Health funded the AAIUH to expand the model even further through a program called A Soul Sense of Beauty. This program further engaged hair stylists in community health promotion by training them how to communicate with their customers about breast health. This effort moved the AAIUH's groundbreaking health education efforts to behavioral health interventions with potential for lasting community impact.

#### **f. Modification of Project Methods/Strategies**

The pilot test of FFY 2012 lacked nutrition education and physical activity materials specifically tailored for the salon setting. The new Pilot will incorporate a resource called *Stylin' for Life Magazine*, which will feature AA women and articles discussing healthier living.

#### **g. Use of Existing Educational Materials**

The *African American Campaign* uses materials that have been designed and tested for SNAP-Ed eligible audiences. These materials were modified to incorporate the Champions for Change brand and to improve upon the materials based on feedback from local projects. They were modified as appropriate to incorporate the *Fruits and Veggies—More Matters* brand and to improve upon the materials based upon feedback from local projects.

#### **Educational Activities/Curricula**

NEW: Network for a Healthy California—Stylin' for Life Toolkit: This new nutrition education resource is being developed in the spirit of the train the trainer model. It will be designed as a resource for Local Health Departments interested in reaching low-income African American women through salons. It will include: *Stylin' for Life Magazine*, designed in the style and format of a magazine that an African- American woman might find on the table in beauty salon; Mirror Messages, designed to be posted on the mirror near the stylist's work station and to elicit inquiries from patrons; Health Promotions Poster; and, basic nutrition education materials for the stylists. It will include tips for healthy eating as well as tips for maintaining a hairstyle in the face of light to moderate physical activity. This resource will be used by LHD staff to promote in Salon-based interventions.

Fruit, Vegetable, and Physical Activity Toolbox for Community Educators: Originally developed by the *Latino Campaign* in 2004, the *Toolbox* was designed so that community educators can easily teach eligible Latino adults how to increase their fruit and vegetable consumption and physical activity. Each item in the *Toolbox* was revised to meet the 2005 *Dietary Guidelines for Americans* and was tested in 2007 with eligible African American adults to ensure wider application of this educational tool. The *Toolbox* is in both English and Spanish. The *Toolbox* content was updated in FFY 2008, and a website was created ([www.network-toolbox.net](http://www.network-toolbox.net)) to allow broader access.

*A Day in the Life Video and Discussion Guide*: Produced by the *African American Campaign* in 2006, these English-language tools are designed to help community educators deliver a fun and effective educational lesson on ways to eat the recommended amount of fruits and vegetables and get the recommended levels of physical activity where they live, work, worship, play, and shop. In FFY 2008, the video and discussion guide was incorporated into the *Fruit, Vegetable, and Physical Activity Toolbox for Community Educators* and updated to reflect the new brand.

*Conducting Successful Nutrition Education and Physical Activity Promotion at Community Events Manual*: Produced by the *African American Campaign* in FFY 2006, then revised and re-branded in FFY 2008, the English-language manual provides guidance and tools to successfully reach members of the community through a variety of events, such as festivals, health fairs, farmers' markets, and flea markets. The newest edition includes both adult- and child-targeted interventions. It provides easy-to-implement activities that will help improve fruit and vegetable consumption and physical activity among the target audience.

*Advocating for the Health of our Communities: Consumer Empowerment Agenda of the Network for a Healthy California—African American Campaign Advisory Council*: This piece provides information on the priorities and methods recommended by the *African American Campaign Advisory Council* to increase nutrition education and physical activity promotion among African American families to promote behavior change. The agenda is in English only and was re-branded in FFY 2008.

## **Cookbooks**

*Soulful Recipes: Building Healthy Traditions*: The *African American Campaign* cookbook, adopted in-part from the National Cancer Institute, was completed in FFY 2008 and published in FFY 2009. The cookbook features healthy versions of African American family-favorite meals and snacks, preparation tips, and photos of easy-to-prepare recipes that include a variety of colorful, culturally-appropriate fruits and vegetables. The cookbook is in English only.

*Everyday Healthy Meals Cookbook*: A 2007 revision to the *Retail Program's 2004 Discover the Secrets to Healthy Living* cook booklet, this cookbook was created for eligible adults and their families. It is distributed through supermarkets and neighborhood grocery stores, festivals, health care organizations, low-wage worksites, farmers' markets, and flea markets. It contains recipes that encourage low-income consumers to eat more fruits and vegetables every day. The cookbook is in English and Spanish.

## **Brochures**

*Fruits and Vegetables for Your Health, Your Neighborhood, and Your Life and Physical Activity for Your Health, Your Neighborhood, and Your Life*: Developed and tested by the campaign in 2006 and produced in 2007, these educational brochures provide eligible consumers with positive strategies to create healthier homes and communities so that eating fruits and vegetables and enjoying physical activity every day are socially supported and easier to do. The brochures are available in English and Spanish.

## Posters

“Afternoon in the Park” Artwork: In 2001, the *African American Campaign* commissioned an original piece of artwork titled "Afternoon in the Park" by African American artist Michael Cunningham. “Afternoon in the Park” is a positive depiction of an African American family playing together and eating healthfully. The *African American Campaign* uses the artwork to inspire and build upon the African American culture’s overall appreciation of the arts to establish healthful eating and increased physical activity as a social norm. The artwork is featured on promotional pieces such as posters, recipe cards, and brochures and is in English only. The artwork was incorporated into the *Network’s “Our Playbook For a Strong Brand: Branding Guidelines Manual”* in FFY 2007.

Adult Cups of Fruits and Vegetables poster: Updated in FFY 2008, the poster uses adult hands to demonstrate different amounts of fruits and vegetables, allowing them to gauge their progress towards MyPyramid recommendations. The poster is available in both English and Spanish.

## Nutrition Education Reinforcement Items

The campaigns and programs use a limited number of nutrition education reinforcement items to enhance the interventions. All items include nutrition education messages and meet USDA cost criteria. Specific items are based upon feedback from intermediaries and the target audience.

### h. Development of New Educational Materials

In FFY 2013, the *Network for a Healthy California—African American Campaign* developed an interesting fact-based, informational and instructional *health-education magazine* to be left behind at beauty salons. The appropriateness of such a piece will be investigated through this pilot project research.

### i. Key Performance Measures/Indicators.

Key performance measures will include process data such as number of stylists, number of salons, number of women reached, and number of trainings and outcome data, including pre-test to post-test change in health knowledge, attitudes and behaviors of low-income African American women. If the channel is proven viable and introduced on a larger scale through the LHDs, data will be collected through the Activity Tracking Form.

## 3. Evaluation Plan

**Process:** Evaluation measures will identify the number of stylists, number of salons, number of beauty supply stores, number of women reached, and number of trainings.

**Outcome:** Evaluation measures will identify change from before to after intervention in health knowledge, attitudes, and behaviors. Specifically, participants will complete a personal health assessment before and after participating in the 60-day Healthy Diva Challenge to report their dietary and physical activity knowledge, attitudes, and behaviors. The subcontractor will administer and collect 100 or more matched pre- and post-health assessments selected from at least 15 beauty salons in the San Diego region.

#### **4. Coordination Efforts**

The *African American Campaign* beauty salon intervention will coordinate with LHDs who plan to target low-income African Americans in the Faith Channel. Specifically, they will cooperate to determine which salons and stylists in the region will be recruited and served by the contractor. They will also work to involve Champion Moms in activities occurring in the regions and collaborate as appropriate in planning and conducting events related to the Healthy Diva Beauty Salon Pilot Project. The *African American Campaign* beauty salon intervention will promote the use of nutrition assistance programs such as the CalFresh, WIC, and school meal programs to help families extend their food dollars and obtain the foods they need to maintain their health. They also will promote food banks and other charitable resources as appropriate. The beauty salon intervention will use flyers, brochures, and other educational materials to connect SNAP-Ed-eligible families with local resources for health information and physical activity options.

<b>Federal Share Budget</b>	<b>FFY2014 Total</b>	<b>FFY2013 Total</b>

**USDA  
POSITION DESCRIPTIONS**

<b>Position Number</b>	<b>USDA Position Title</b>	<b>LHD Position Title</b>	<b>Position Description</b>
1	Accountant/Finance Analyst		Serves as internal auditor and controller. Assists with processing purchase orders, invoices, preparation of vouchers for payment as related to the Network program, as well as monitoring the budgets.
2	Administrative Coordinator		Provides administrative and office support for the project staff and is responsible for the reporting requirements.
3	Administrator (e.g., Director of Programs)		Administer the nutrition education grant agreement and budget, supervising nutrition education staff, attend nutrition education and scope of work related meetings, program planning and participating in the Regional collaborative. Coordinate grant agreement reporting requirements.
4	After School Coordinator/Assistant		Plan and facilitate nutrition education activities for recreation programming, in after school setting for different age groups of children; seniors, teen; special populations, such as mothers with young children and families; nutrition education for special events and workshops. Prepare instructional plans for youth camps and field trips; and nutrition education for special events and workshops. Prepare instructional plans for nutrition activities, collect data related to nutrition education programming, prepare documentation for nutrition education grant agreement; and helps prepare interim and final progress report .
5	Chief Executive Officer		Provides overall guidance for the operations, personnel, and fiscal responsibilities required by the nutrition project.
6	Community Liaison		Conducts nutrition education, physical activity promotion interventions in the community setting. Works with Community Based Organizations to increase the reach of nutrition education interventions to Nutrition Education Obesity Program eligible.
7	Computer Specialist		The Computer Specialist will provide assistance with the nutrition database and tracking system.
8	Contract Manager		Manages the nutrition education grant agreement including budgets, invoices, local share documentation reports, time studies, fiscal reporting and adherence to funding requirements.
9	Coordinator of Other Program (e.g., Teen program, Healthy Start, etc.)		Supervises, coordinates, facilitates nutrition education activities, workshops, special events related to the recreation and community center planning and working together with other community center groups. Supervises staff implementing the nutrition education grant agreement, prepares invoices, prepares and collects documentation, prepares progress reports
10	Curriculum Specialist		Develops curriculum for nutrition education and physical activity interventions in a variety of different channels/venues.
11	Database Coordinator		Develops database used to track nutrition education, physical activity and food stamp promotion interventions in a variety of channels.
12	Dental/Medical Assistant		Conduct one-on-one nutrition education interventions prior to primary care visit.
13	Dietician		Oversees and supervises the nutrition education program including project administration, project coordination, the development of the nutrition education component and materials and other nutrition and physical activity promotion programs.
14	Family Advocate		Provides nutrition education to students and their families, and recruits NEOP eligible for group nutrition/cooking classes. Provides nutrition, physical activity and food stamp promotion resources to students and their parents.

**USDA  
POSITION DESCRIPTIONS**

15	<b>Food Service Worker (e.g., Director, Manager, Asst., Server, Cook)</b>		Assists with planning and preparing healthy food taste tests in the school setting in conjunction with classroom based nutrition education intervention. Works with teachers to increase student, teacher and parent knowledge of the importance of consuming more servings of fruits and vegetables and being active daily. Compiles documentation on taste testing activities and all reporting required for nutrition grants. In some cases, supervises staff that carry out activities.
16	<b>Graphic Illustrator</b>		Develop local promotional nutrition education materials such as community flyers/ newsletters and/or to develop local nutrition/physical activity promotional/educational materials under the direction of the nutrition staff.
17	<b>Health Educator (including Health Aide, Health Promotion Instructor, etc.)</b>		Develop materials and facilitate health education in both group and individual settings. Teaches general nutrition, the importance of fruits and vegetables, and health benefits of proper nutrition and physical activity.
18	<b>Legal Counsel</b>		Assist with development of policies, approval of grant agreements and Memorandums of Understanding and providing legal advice specifically related to the implementation of nutrition education and physical activity promotion
19	<b>Medical Assistant</b>		Demonstrates safe food handling and personal hygiene to prevent food borne illness, provide nutrition-related services to staff, parents, and students and promotes physical activity within the context of nutrition education. (This does not include any medical nutrition therapy).
20	<b>Nurse/Nurse Supervisor/Nurse Aide RN</b>		Provides nutrition and physical activity promotion to students enrolled in nutrition education programs and their families. Supports nutrition education goals through interventions; local, regional, and statewide collaboration and interventions. (This does not include any medical nutrition therapy).
21	<b>Nutritionist/Nutrition Educator/Nutrition Aide</b>		Provides nutrition education to the neop eligible population. Specific duties include: one-on-one general nutrition education, delivery of general nutrition education in a classroom or group setting, staffing health fairs and other community or promotional events where nutrition education messages are delivered, distribution of linguistically and culturally appropriate nutrition education materials, documentation of educational and other encounters, assisting with writing project reports and preparation of quarterly reports, maintaining program reporting and tracking systems.
22	<b>Office Manager/Secretary/Admin Assistant</b>		Provides general clerical support to the Program. Assists in development and maintenance of a data collection system with emphasis on fiscal information. Arranges meetings and trainings, orders supplies and materials, creates correspondence, photocopies, etc.
23	<b>Pharmacist</b>		Promotes nutrition education and physical activity to NEOP eligible population through displays, distributing literature, and supervising staff to update nutrition education bulletin board.
24	<b>Physician</b>		Supervises professional staff including Dieticians, Nurses and Nutrition/Project Coordinators that provide nutrition education and promotes physical activity to NEOP eligibles in a variety of channels. Provides direction on strategic planning of nutrition and physical activity programs to NEOP eligible clients. In some cases, provides nutrition education to NEOP eligibles. (This does not include any medical nutrition therapy).
25	<b>Professor</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for the NEOP eligible community, and students with their families. Supports nutrition education Program goals and local, regional, and statewide collaboration.

**USDA  
POSITION DESCRIPTIONS**

<b>26</b>	<b>Program Assistant</b>		Assists the Project Coordinator with nutrition education program planning and development. Under the direction of Project Coordinator, works directly with individuals and small groups providing curriculum-based, prevention-oriented general nutrition education and physical activity targeted to NEOP eligibles.
<b>27</b>	<b>Project Coordinator</b>		Coordinate program staff and nutrition education activities; plan and follow through on outreach and educational events at health fairs, schools, and other promotional activities; work with schools, churches, farm worker organizations, and community organizations in planning and promoting good health through dissemination of nutrition education materials; actively acquire and develop culturally and linguistically competent nutrition curriculum and educational materials; to promote existing and/or to develop new physical activity promotional components of nutrition education; and expand our existing community outreach program to encompass nutritional components to increase community awareness and knowledge of good nutrition and healthy active lifestyles.
<b>28</b>	<b>Promotora</b>		Works with the Project Coordinator in NEOP communities to conduct nutrition education interventions and participate in local events to promote health eating and physical activity for NEOP eligibles.
<b>29</b>	<b>Recreation Leader</b>		Mentors and trains staff on integration of physical activity into nutrition education interventions. Coordinates one-time physical activity demonstrations. Chooses nutrition and physical activity resources to distribute with nutrition education interventions.
<b>30</b>	<b>Research Specialist</b>		Evaluates nutrition education, and physical activity promotion interventions in a variety of community channels. Methods can include process and impact evaluations, pre and post tests, surveys, focus/discussion roundtables, photo documentaries, case studies, etc.
<b>31</b>	<b>School Administrator (e.g., Principal, Superintendent)</b>		Provides oversight and coordination of the nutrition education conducted in participating classrooms of all schools.
<b>32</b>	<b>Teacher/Student Aide/Assistant</b>		Assists the Nutritionists, Health Educators, and Project Coordinator with nutrition education activities and community events that promote healthy eating and physical activity for low-income families, the target population, Food Stamp recipients and other similar households. 100% direct delivery of educational services.
<b>33</b>	<b>Teacher (preK-12 Classroom, PE, Speech, etc.)</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for students and their families. Supports nutrition education program goals through promotion; local, regional, and statewide collaboration; and close coordination with the Registered Dietitian to train staff.
<b>34</b>	<b>Translator</b>		Translates approved curriculum and materials into Spanish or other languages. Reviews translation for cultural appropriateness. Interprets nutrition education interventions (one-on-one and group) in the community for dietitians, health educators and others .
<b>35</b>	<b>Tutor</b>		Assist teachers and/or students with nutrition education and physical activity promotion.
<b>36</b>	<b>Web Designer</b>		Develops and maintains website containing nutrition education resources, gardening and health related topics and issues.

7 Other Costs	\$88,000.00	\$308,000.00	\$220,000.00	71.43%
8 Indirect Costs		\$0.00	\$0.00	0.00%
<b>Totals:</b>	<b>\$88,000.00</b>	<b>\$308,000.00</b>	<b>\$220,000.00</b>	<b>71.43%</b>

Budget Categories	Reason for difference greater than 5%
1 Salaries	
2 Benefits	
3 Operating	
4 Equipment	
5 Travel & Per Diem	
6 Subcontractors	
7 Other Costs	1) Last year we only needed to purchase 13 questions on the BRFSS (fast food, sugar sweetened beverage, food insecurity, and SNAP/WIC participation) because the fruit and vegetable (6 Q) and physical activity (8 Q) questions were part of the standard CDC questionnaire. This year we have to pay for those questions since it is their "off" year on the national survey. 2) Last year CDSB charged us \$5,000/question; this year they will be charging \$5,500/question. 3) Last year we also spent an additional \$136,500 on the CA Women's Health Survey for a total of \$224,700 on BRFSS and CA Women's Health Survey combined. Since CWHS was incorporated onto the BRFSS last year we do not feel it necessary to buy those questions separately. We feel it would be a better investment to purchase a double sample of BRFSS which will should give us the same ability to analyze data by gender by income. The difference between this year and the two surveys together is 27%.
8 Indirect Costs

<b>33</b>	<b>Teacher (preK-12 Classroom, PE, Speech, etc.)</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for students and their families. Supports nutrition education program goals through promotion; local, regional, and statewide collaboration; and close coordination with the Registered Dietitian to train staff.
<b>34</b>	<b>Translator</b>		Translates approved curriculum and materials into Spanish or other languages. Reviews translation for cultural appropriateness. Interprets nutrition education interventions (one-on-one and group) in the community for dietitians, health educators and others .
<b>35</b>	<b>Tutor</b>		Assist teachers and/or students with nutrition education and physical activity promotion.
<b>36</b>	<b>Web Designer</b>		Develops and maintains website containing nutrition education resources, gardening and health related topics and issues.
<b>37</b>	Research Program Director II		Oversees all administrative matters regarding the final deliverable of the dataset and documentation, communicates directly with client regarding fiscal matters and scope changes. Supervises administrative and research staff.
<b>38</b>	Financial Analyst		This position is responsible for financial reports, IPA processing, and is the communication link with Grants and Contracts.

**USDA  
POSITION DESCRIPTIONS**

<b>39</b>	Administrative Assistant	This position is responsible for administrative matters, scheduling, communicating, providing materials, and assisting the unit with all aspects of logistical and organizational requests. Assists with timesheet processing.
<b>40</b>	Research Scientist	This position produces the deliverables of cleaned and formatted datasets, programs changes to the questionnaire, runs quality assurance and data completeness checks. Runs productivity and reports.
<b>41</b>	Research Associate II	This position assists in gathering data needed to produce the technical documentation: running data queries, formatting tables, and updating variable and formats.
<b>42</b>	Research Associate III	This position will oversee database downloads and troubleshoot any file structure issues. Oversees and assists with programming tasks, manage, clean and transmit data through secure and established protocols.
<b>43</b>	Research Assistant II	This position assist in recoding brand lists and open text responses. Provides quality assurance of interviewer data entry.

## Budget Coversheet

----------------------	--	--	--------------------

<b>Title of the evaluation</b>	California Dietary Practices Survey (CDPS) & Other Adult Surveillance (incl. California Behavior Risk Factor Survey, and California Health Interview Survey)
<b>The project or projects with which it is associated</b>	All local projects that provide SNAP-Ed to adults, Latino Campaign, African American Campaign, Retail Program, Worksite Program
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Outcome
<b>The question(s) to be addressed by the evaluation</b>	What are California adults' dietary and physical activity practices on a typical day? What are adults' knowledge, attitudes, and beliefs toward healthy eating and physical activity? What other factors relate to adults' diet and physical activity practices? What is the status of food insecurity among California adults?
<b>The approach to conducting the evaluation, including scope, design, measures and data collection</b>	The CDPS was designed to monitor dietary trends, especially fruit and vegetable consumption, among California adults for evaluating their progress toward meeting the Dietary Guidelines for Americans, the Healthy People 2020 objectives, and the CA Daily Food Guide recommendations. Fruit and vegetable consumption is collected using a simplified 24-hour recall which queries about each meal on the previous day, including breakfast, lunch, dinner, and all snacks. Consumption questions are followed by questions that assess motivations, barriers, knowledge, attitudes, and behavior related to healthy eating and health practices. The California BRFSS findings on fruit and vegetable consumption, body weight status, food security (beginning in 2003), and participation in physical activity are used in conjunction with <i>Network</i> survey findings to examine health behaviors and are useful markers for comparisons with other states. CHIS does not cover diet and physical activity in the same depth as the <i>Network</i> surveys, but its sample size permits the development of county and county group-level data that cannot be done with data from other state surveys.
	The CDPS uses a random digit dial (RDD) phone survey, approximately 1,500 adults (ages 18 and over) are interviewed between the months of July and October. Demographic data includes gender, age, ethnicity, education level, income, physical activity level, overweight status, and Supplemental Nutrition Assistance Program eligibility status. Data are oversampled for low-income Latino adults, low-income African American adults, and other low-income adults to provide greater sensitivity for analyzing these underrepresented population segments. BRFSS and CHIS use similar RDD methods. Sample sizes for these surveys are approximately 4,000, 5,000, and 50,000, respectively.
<b>Plans for using the results</b>	Survey data identify <i>Network</i> progress towards meeting Plan objectives. The results will be used to inform <i>Network</i> programs and campaigns to assist in program planning and refinement. Survey data help guide the development and enhancement of the <i>Network</i> and its targeted statewide social marketing campaigns. Results inform the needs assessment component of the <i>Network's</i> annual plan, are compiled into data tables for public use, are presented in fact sheets and topline reports, and are used for presentations at state and/or national conferences.
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	The CDPS has been conducted biennially in odd years since 1989. Each year the survey is conducted, it is updated to reflect current issues, and existing questions are refined. Both CDPS and CHIS occur in odd years. BRFSS is an annual surveys. Only BRFSS will be in the field in FFY 14.
<b>Project cost</b>	\$26,859 (CDPS), \$308,000 (BRFSS)

## STATE LEVEL PROJECT SUMMARY

FFY 2014

### 1. Goals & Objectives (See State Level Objectives).

### 2. Project Title: Adult Surveillance Surveys – Statewide, Low-Income Segments Behavioral Risk Factor Surveillance System (BRFS) - \$308,000 – State California Dietary Practices Survey - \$26,826 - PHI

#### a. Related State Objectives

Related State Objectives includes #1, #2, #3, #4

#### b. Audience

Gender: Female and male (CDPS,<sup>1#\*</sup> CA BRFS,<sup>2#\*</sup> CHIS,<sup>3#\*</sup>)

Ethnicity: All races and ethnicities with specific targeting for African American and Latino/Hispanic populations (specific targeting for CDPS only)

Languages: English, Spanish, and select Asian languages (CDPS, CA BRFS – English and Spanish); (CHIS - English, Spanish, Cantonese, Mandarin, Vietnamese, and Korean)

Ages: 18+ years (CDPS, CA BRFS, CHIS)

#### c. Focus on SNAP Eligibles

All of the surveillance funded through the *Network* by USDA SNAP funds is designed to pay only for Supplemental Nutrition Education Program (SNAP) or SNAP-Ed-eligible consumers; other sources are sought to pay for the SNAP-Ed 130-185% Federal Poverty Level (FPL) and >185% reference populations.

#### Income Targeting Data Source:

Besides obtaining participation at location-based proxy sites, other surveillance activities will be based on the following data sources:

SNAP telephone listing without identifying information; non-identified household size and income; and *Network* GIS Census Tract Data. State surveillance includes those with household incomes  $\leq 130\%$  FPL.

#### d. Project Description

Key Strategies: This surveillance project collects critical information used in the design, refinement, and evaluation of State SNAP-Ed interventions to ensure the greatest impact on SNAP eligibles across California. *Network* conducts a statewide survey to monitor trends and, where possible, compare changes among SNAP-Ed-eligible population segments of adults. This is supplemented with data from two external statewide surveys of the general population (costs are pro-rated), each contributing unique information.

---

<sup>1</sup> California Dietary Practices Survey

<sup>2</sup> California Behavioral Risk Factor Survey

<sup>3</sup> California Health Interview Survey

Key Educational Messages: These surveys help SNAP-Ed providers gain a better understanding of dietary quality, physical activity, food security, and weight status among SNAP-Ed audiences. They also assess related beliefs, attitudes, and knowledge and upstream factors that influence these issues such as poverty, social norms, and barriers in the home, community, worksites, and schools that influence intervention success on prevention of obesity and other chronic disease.

Intervention Sites: Households statewide with over-samples of SNAP participants and other persons with household incomes  $\leq$  130% FPL

Projected Number of Contacts:<sup>4</sup>

*Projected Total Contacts:* **58,782** – 1,420 (CDPS); 47,614 (CHIS adults); 9,748 (BRFS)

Direct Contacts: **13,820** very low-income persons  
*SNAP-Ed (<130% FPL):* **13,820** – 855 (CDPS); 10,427 (CHIS adults); 2,538 (BRFS)

*Non SNAP-Ed (>130% FPL)*<sup>5</sup>: **44,962** – 565 (CDPS); 37,187 (CHIS adults); 7,210 (BRFS)

Narrative Summary:

This project will focus on obtaining a comprehensive picture of the SNAP-Ed-eligible population in California with focus on current and likely SNAP participants where appropriate, to maximize the effectiveness of SNAP-Ed and track SNAP-Ed successes. The BRFS will be administered in FFY 2014. State surveillance efforts will focus on testing and refining the survey instruments, administering the surveys, collecting and processing the data for CDPS, and conducting statistical analysis and disseminating the findings for all surveys. If it is a year when a given survey is not being administered, planning and data analysis activities take place for that survey, and analyses of the prior year's survey is prepared.

For the CDPS, computer-assisted telephone interviews are administered to adults from randomly-selected SNAP households. CHIS and BRFS include general statewide samples of adults. For the final time in FFY 13, CDPS will also include a general statewide sample in addition to the SNAP households.

#### e. Summary of Research

Surveillance is vital to demonstrate impacts of California SNAP-Ed interventions and provide key insights to improve the effectiveness of SNAP-Ed programs that target an estimated population of over 12 million SNAP-Ed eligible persons ( $\leq$

---

<sup>4</sup> For CDPS the estimate used for SNAP-Ed was based on the 2011 CDPS response rate. For the BRFS, the estimate used for SNAP-Ed was the observed 26.0% of adults  $\leq$  130% FPL of the 2012 BRFS sample. For CHIS, the estimate used for SNAP-Ed was the 21.9% of adults  $\leq$  130% FPL in the 2009 CHIS sample.

<sup>5</sup> The amount of *Network* SNAP-Ed funding requested has been pro-rated from total survey costs based on a percentage equal to (for *Network* surveys) or less than (for external surveys) the proportion of the sample population coming from households living at incomes  $\leq$  130% FPL. *Network* funding for BRFS is less than 10%; for CHIS –significantly less than the 20% of the State population representing SNAP-Ed eligible persons (<130% FPL). In all cases, non-SNAP-Ed funding is obtained for the comparison non-SNAP-Ed samples.

185% FPL).<sup>6,7</sup> It provides the *Network* with the necessary means to develop a thorough picture of the SNAP-Ed-eligible population of the state of California. The availability of the SNAP-participating household telephone list for random digit dialed surveys has made it feasible to survey this segment. See **Section A. b. Nutrition-related behavioral and lifestyle characteristics of Supplemental Nutrition Assistance Program-eligible adults in California** for a thorough description of recent findings from the surveillance surveys described in this project.

**f. Modification of Project Methods/Strategies**

State surveillance instruments are revised annually (BRFS) or biennially (CDPS, CHIS) to incorporate the most relevant nutrition, physical and sedentary activity, food security, and weight-related issues facing SNAP-Ed-groups and help refine *Network* programs and campaigns. Literature reviews, scientific peer review, cognitive testing, and field testing are used to determine the final survey questions.

**g. Use of Existing Educational Materials**

State surveillance educational materials include survey instruments, data tables, survey reports, fact sheets, presentations, consumer briefs/newsletters. Several survey instruments are available in Spanish (CDPS, BRFS, CHIS). CHIS is also produced in Cantonese, Mandarin, Vietnamese, and Korean.

Publications of findings from the CDPS are available on the website <http://www.cdph.ca.gov/programs/cpns/Pages/CaliforniaStatewideSurveys.aspx> and from the BRFS and CHIS at <http://www.cdph.ca.gov/programs/cpns/Pages/DataSources.aspx> ; CHIS data is used extensively to provide formative data to our counties and *Regions* and for statewide planning for special populations.

**h. Development of New Educational Materials**

Existing materials will be updated as more recent survey data become available (See i).

**i. Key Performance Measures/Indicators**

The *Network* maintains an extensive Research and Evaluation Statewide Surveys webpage.<sup>8</sup> The most basic, straightforward performance measure is data tables. The webpage contains completed sets of data tables for CDPS that describe status and changes in dietary intake, physical activity, and food insecurity of California SNAP-eligible adults. Data tables from the 2011 CDPS are complete and currently undergoing approval for posting to the website.

Oral presentations and posters are another key performance measure; in FFY 2013, a poster entitled *The Regional Distribution of BMI in California Using the*

---

<sup>6</sup> 2010 American Community Survey, California <185% FPL

<sup>7</sup> McClelland JW, Keenan DP, Lewis J, Foerster S, Sugerman S, Mara P, Wu S, Lee S, Keller K, Hersey J, Lindquist C. Review of evaluation tools used to assess the impact of nutrition education on dietary intake and quality, weight management practices, and physical activity of low-income audiences. *J Nutr Educ*. 2001; 33 Suppl 1:S35-48. Review.

<sup>8</sup> <http://www.cdph.ca.gov/programs/cpns/Pages/CaliforniaStatewideSurveys.aspx>

2010 BRFSS was presented at the Behavior Risk Factor Surveillance System Conference. On an ongoing basis, data in the form of graphs, tables, and data points from all the surveys are requested and used by upper management in presentations at gatherings like the *Network* Statewide Conference and the NEOP Statewide Collaborative meeting.

Publishing findings is a third key performance measure. In FFY 2013, work was completed on a fruit and vegetable access regression analysis. Findings will be presented in a brief topline report. Also in FFY 13, work is underway on a fact sheet using 2011 CDPS data. This fact sheet will highlight the healthy and less healthy eating and physical activity practices of SNAP-Ed-eligible adults in the state. Production of additional surveillance reports will occur during FFY 2014 if findings indicate a need and staffing permits.

### 3. Evaluation Plan

#### Project for which evaluation is associated:

Surveillance is associated with the overall *Network for a Healthy California* interventions, including local, regional, and media efforts.

#### Evaluation Type:

Surveillance and Outcome: Annual and biennial survey findings evaluate the current impacts of SNAP-Ed. In addition, the ongoing surveillance methods provide evidence of the cumulative effects of *Network* and other interventions over time.

#### Questions that will be addressed

These surveys are used to gain a better understanding of and answer questions about SNAP-Ed-eligible California adults' dietary practices (especially fruit and vegetable consumption), physical and sedentary activity, food insecurity, body weight, knowledge and awareness of the *Campaign*, and modifiable factors that may influence these behaviors including out-of-home eating, social norms, school, neighborhood, and worksite environments, poverty status, as well as related knowledge, attitudes, and beliefs. These findings inform planning, delivery, refinement, and evaluation of *Network* interventions.

Specifically, the data allow us to monitor changes in dietary, physical activity, food security, and weight status trends over time; correlate key behavioral measures with (1) knowledge, attitudes, and beliefs, (2) positive/negative lifestyle choices, (3) supporting/inhibiting environmental factors, (4) demographic factors, and (5) health indicators and outcomes; and investigate relationships between the target populations and *Campaign* activities.

#### Scope, Design, Measures, and Data Collection:

Three surveillance and monitoring surveys are used. Each makes a unique contribution due to comparability with other state and national data (BRFS), ability to follow the population at a more localized level (CHIS), or provide the opportunity to investigate a broad range of topics that relate to the areas of our intervention and communications activity (CDPS).

See **d. Project Description**, Narrative Summary for more details about conduct of these surveys.

#### Plans for using the results

Investigating and compiling results for the SNAP-Ed eligible populations is the primary focus of this project. Surveillance results will be used to identify key characteristics of SNAP-Ed eligible populations and changing trends; evaluate California's progress toward meeting the 2010 *Dietary Guidelines for Americans*, *Healthy People 2020* objectives, and Objectives in the *Network* State Plan; inform and prioritize *Campaign* and program activities; and triangulate data with other similar data sources to contribute to evaluation of the *Network* as a whole, increasing program integrity and impact. They also link knowledge, attitudes, and beliefs to key behaviors and identify disparities and gaps in consumer knowledge and awareness, enabling our contractors to best determine where to direct their resources and intervention efforts.

#### Previous Evaluation:

State surveillance has been used to evaluate the *Network* as a whole. Supplemental trend data (the California BRFSS) comparable to national data (BRFSS) supported data triangulation and allowed more latitude to examine emerging issues among SNAP-Ed eligible and low-income food insecure populations. Large data sets (CHIS) across age groups allowed staff to examine factors affecting SNAP-Ed eligibles in more detail and provide our contractors with county strata and regional level data. All of these surveillance systems contain questions to assess fruit and vegetable consumption, which thereby allows us to monitor California's progress towards meeting the 2010 *Dietary Guidelines for Americans*, especially for the fruit and vegetable consumption of SNAP-Ed-targeted populations.

## **4. Coordination Efforts**

The *Network* requests representatives from WIC, UC Berkeley Center for Weight & Health, UCLA, National Cancer Institute, National Institutes of Health, Centers for Disease Control, Office of Women's Health, UC CalFresh, academics, representatives from local and regional projects, and other experts in the field to review and contribute to revisions of the CDPS. Stakeholder interviews or meetings with state-level department personnel, projects, and local contractors for relevant surveys are conducted to gain insight into needs for data collection and reporting activities. Information gained from stakeholder interviews is utilized to develop potential data reporting and topics that are relative to needs of SNAP-Ed-related project activities on the statewide and local level.

*Network* staff participate in the users' group committees of external surveys: CHIS and BRFSS. The *Network* also provides SNAP-Ed-eligible population data for WIC programs. It is through the *Network's* efforts that for the first time, there is now a mechanism by which to analyze California BRFSS data both by SNAP participation and by SNAP-qualifying income level.

Data are widely disseminated through all the mechanisms described under **i. Key Performance Measures/Indicators**, and the *Network* is readily responsive to requests for information from WIC, and other members of the State Nutrition Action Plan working group.

<b>Title of the evaluation</b>	Media Tracking Survey of Low-Income Segments
<b>The project or projects with which it is associated</b>	Media and Communications
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Outcome
<b>The question(s) to be addressed by the evaluation</b>	What levels of media campaign recall for TV, radio and billboard are present among SNAP recipient and SNAP eligible mothers? How well did the media campaign perform among SNAP recipient and eligible mothers and is it related to behavioral determinants such as fruit and vegetable consumption? How does the campaign recall vary between target populations and sub-populations? What are dietary and physical activity practices among SNAP recipient and eligible mothers relative to media exposure and psychosocial determinants? What are their knowledge, attitudes, and beliefs toward healthy eating and physical activity? What percent of SNAP recipient and eligible mothers have knowledge of recommendations to make 1/2 their plate fruit and vegetables?
<b>The approach to conducting the evaluation, including scope, design, measures and data collection</b>	The Media Tracking Survey was designed to evaluate the media campaign among the target populations of SNAP recipient and eligible mothers. Computer-assisted telephone interviews are administered to mothers from randomly selected households from a list of households participating in the FSP for 1,000 of the participants, and face-to-face interviews are collected from another 1,000 intercepted at malls in low-income areas. The surveys include questions regarding the campaign ads to test for recall levels. The surveys collect data on dietary and physical activity behaviors, specifically fruit and vegetable consumption. Questions are administered to learn knowledge of the Dietary Guidelines for Americans and MyPlate. Sections of the survey include other questions that assess self-efficacy for consumption of fruits and vegetables and physical activity as well as social norms related to healthy eating and physical activity practices. Other questions such as access to workplace programs, exposure to non-ad interventions and interest in nutrition education resources are included.
<b>Plans for using the results</b>	Survey data identify Network progress towards meeting Plan objectives. The results will be used to inform <i>Network</i> programs and campaigns to assist in program planning and refinement. Survey data help guide the development and enhancement of the <i>Network</i> media and communications strategies and its targeted statewide social marketing campaigns. Results inform the needs assessment component of the <i>Network's</i> annual plan, are presented in fact sheets and topline reports, and are used for presentations at state and/or national conferences.
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	The Media Tracking Survey has been conducted annually since 2004 and was formerly known as the Benchmark Media Tracking Survey. Each year the survey is conducted, it is updated to reflect current issues, and existing questions are refined. The most recent survey was conducted in 2012.
<b>Project cost</b>	\$360,000

**STATE LEVEL PROJECT SUMMARY FORM**  
**FFY 2014**

1. **Goals & Objectives** (See *State Level Objectives*).

2. **Project Title:** Benchmark Survey (Evaluation)  
\$350,000 - PHI

**a. Related State Objectives**

Related State Objectives includes #1, #2, #3

**b. Audience**

Gender: Female only

Ethnicity: All races and ethnicities with specific targeting for African American and Latino/Hispanic populations

Languages: English and Spanish

Ages: 18+ years

**c. Focus on SNAP Eligibles**

All of the surveillance funded through the *Network* by USDA SNAP-Ed funds is designed to reach Supplemental Nutrition Education Program (SNAP) or SNAP-Ed-likely eligible consumers. In addition to surveillance of SNAP recipients, SNAP-Ed eligibles are included in the sample

Income Targeting Data Source:

Besides obtaining participation at location-based proxy sites, other surveillance activities will be based on the following data sources:

SNAP telephone listing without identifying information; non-identified household size and income. State surveillance includes those with household incomes  $\leq 130\%$  FPL.

**d. Project Description**

**Key Strategies:** This project collects critical information used in the design, refinement, and evaluation of State SNAP-Ed interventions to ensure the greatest impact on SNAP eligibles across California. The *Network* conducts the annual Benchmark Survey to examine exposure to key elements of the media campaign and their relationship to behavioral determinants for fruit and vegetable consumption, physical activity, and other Network priority areas of interest.

**Key Educational Messages:** The survey helps identify exposure to and recall of *Network* mass media messaging among SNAP-eligible Californians and sub-groups within the population. It measures and enables SNAP-Ed providers to gain a better understanding of specific dietary and physical activity behaviors, food related beliefs, attitudes, and knowledge and upstream factors that influence these issues such as poverty, social norms, and barriers in the home,

community, and worksites that influence intervention success on prevention of obesity and other chronic disease.

Intervention Sites: Households statewide with over-samples of FSP participants and other persons with household incomes  $\leq$  130% FPL

Projected Number of Contacts:<sup>1</sup>

*Projected Total Contacts: 1,000 (Network Benchmark Survey)*

Direct Contacts: very low-income persons- SNAP-Ed (<130% FPL): 1,000  
(Network Benchmark Survey)

Narrative Summary:

This project will focus on obtaining campaign recall and insight into the eligible populations in California with focus on SNAP participants and likely eligible persons, to maximize the effectiveness of SNAP-Ed and track SNAP-Ed successes. The Benchmark survey is administered annually and will be administered again in FFY 2014. For FFY 2014, the survey will be administered at two points in time, right after the campaign and then again approximately three months later. This will allow for assessing changes over time in relation to levels of exposure to campaign messages. State efforts will focus on testing and refining the survey instruments, administering the surveys, collecting and processing the data, conducting statistical analysis, and disseminating the findings.

Computer-assisted telephone interviews are administered to mothers from randomly selected households drawn from a list of households participating in SNAP for 1,000 of the participants.

**e. Summary of Research**

The Benchmark Survey is vital to demonstrate impacts of California SNAP-Ed media campaign and provide key insights to improve the effectiveness of SNAP-Ed media efforts that target an estimated population of 2 million Californian households in the *Network's* priority population, which includes people living in households with children and having a gross annual income less than 185% FPL.<sup>2,3</sup> It provides the *Network* with the necessary means to develop a thorough picture of the SNAP-Ed-eligible population of the state of California. The availability of the SNAP participating household telephone list for random-digit-dialed surveys has made it feasible to survey much of this segment, those populations whose household income is <130% FPL. See **Section A. b. Nutrition-related behavioral and lifestyle characteristics of Food Stamp Program-eligible children, adolescents, and adults in California** for a

<sup>1</sup> The projected 2012 *Network* Benchmark Survey protocol was used for SNAP-Ed estimates.

<sup>2</sup> U.S. General Accounting Office. (2004). *Nutrition education: USDA provides services through multiple programs, but stronger linkages among programs are needed* (GAO-04-528). Washington, DC: U.S. Government Printing Office.

Review of evaluation tools used to assess the impact of nutrition education on dietary intake and quality, weight management practices, and physical activity of low-income audiences. *J Nutr Educ*. 2001; 33 Suppl 1:S35-48. Review.

thorough description of recent findings from the surveillance surveys described in this project.

**f. Modification of Project Methods/Strategies**

The Benchmark Survey instruments are revised annually to incorporate the most relevant nutrition, physical and sedentary activity, food security, and weight-related issues facing SNAP-Ed-groups and help refine *Network* programs and campaigns. Literature reviews, scientific peer review, cognitive testing, and field testing are used to determine the final survey questions.

**g. Use of Existing Educational Materials**

State surveillance educational materials include survey instruments, data tables, survey reports, and presentations. Survey instruments are available in English and Spanish.

**h. Development of New Educational Materials**

Existing materials will be updated as more recent survey data become available (See i).

**i. Key Performance Measures/Indicators**

The most basic, straightforward performance measure is the set of data tables. The data tables from the Benchmark Survey are critical to evaluation of *Network* campaigns through comparison of recall and evidence in any shift in social norms, knowledge of Dietary Guidelines for Americans, or self-efficacy to improve individual or family dietary change behaviors. These will be updated and administered during FFY2014.

Oral presentations and posters are another key performance measure; in FFY 2008, an oral presentation on implementing a new method for measuring income on the BRFSS that enabled us to analyze data at the SNAP-eligible level at the 2008 national BRFSS conference,<sup>4</sup> and a presentation on how findings from the Benchmark Survey led to the development of a new, stronger media campaign was delivered at the 2007 National Prevention and Health Promotion Summit.<sup>5</sup> A presentation featuring self-efficacy as an important piece of the statewide media campaign strategy and highlighting Benchmark Survey findings was presented at the 2010 *Network* conference and as part of a teleconference for *Network* staff and partners. Appropriate venues for presentation of surveillance data will continue to be identified and employed during FFY2014.

Publishing findings is a third key performance measure. A scientific manuscript has been prepared for submission to appropriate peer reviewed journals in 2013. Production of additional surveillance reports will occur during FFY 2014 if findings indicate a need and staffing permits.

### 3. Evaluation Plan

#### Project for which evaluation is associated:

Surveillance is associated with the overall *Network for a Healthy California* interventions, including local, regional, and media efforts.

#### Evaluation Type:

Surveillance and Outcome: The annual survey findings evaluate the current impacts of SNAP-Ed statewide media campaigns. In addition, the ongoing surveillance methods provide evidence of the cumulative effects of *Network* and other interventions over time.

#### Questions that will be addressed

The survey is used to gain a better understanding of and answer questions about SNAP-Ed-eligible California adults' and family dietary practices (especially fruit and vegetable consumption), physical activity, knowledge and awareness of the *Campaign*, and upstream factors that influence these behaviors including out-of-home eating, social norms, school, neighborhood, and worksite environments, poverty status, as well as related knowledge, attitudes, and beliefs. These findings inform planning, delivery, refinement, and evaluation of *Network* interventions.

Specifically, the data allow us to monitor changes in dietary, physical activity trends over time; correlate key behavioral measures with (1) knowledge, attitudes, and beliefs, (2) positive/negative lifestyle choices, (3) supporting/inhibiting environmental factors, (4) demographic factors, and (5) health indicators and outcomes; and investigate relationships between the target populations and *Campaign* activities.

#### Scope, Design, Measures, and Data Collection:

The monitoring survey provides the opportunity to investigate a broad range of topics that relate to the areas of our intervention and communications activity.

Respondents in the study are 1,000 mothers age 18-54 who are California SNAP recipients and have children age 0-18.

#### Plans for using the results

Investigating and compiling results for the very low income SNAP-Ed populations is the primary focus of this project. Surveillance results will be used to identify key characteristics of these populations and changing trends; evaluate California's progress toward meeting the 2010 *Dietary Guidelines for Americans*, *Healthy People 2020* objectives, and objectives in the *Network* State Plan; inform and prioritize *Campaign* and program activities; and triangulate data with other similar data sources to contribute to evaluation of the *Network* as a whole, increasing program integrity and impact. They also link knowledge, attitudes, and beliefs to key behaviors and identify disparities and gaps in consumer knowledge and awareness, enabling our contractors to best determine where to direct their resources and intervention efforts.

Previous Evaluation:

State surveillance has been used to evaluate the *California 5 a Day Campaign* and *Network for a Healthy California Champions for Change Campaign*. Supplemental trend data (the California BRFSS) comparable to national data (BRFSS) supported data triangulation and allowed more latitude to examine emerging issues among SNAP-Ed eligible mothers. The survey contains questions to assess fruit and vegetable consumption, which thereby allows us to monitor California's progress towards meeting the 2010 *Dietary Guidelines for Americans*, especially for the fruit and vegetable consumption of SNAP-Ed-targeted populations.

#### 4. Coordination Efforts

Stakeholder interviews or meetings with state-level department personnel, projects, and local contractors for relevant surveys are conducted to gain insight into needs for data collection and reporting activities. Information gained from stakeholder interviews is utilized to develop potential data reporting and topics that are relative to needs of SNAP-Ed-related project activities on the statewide and local level.

The *Network* staff uses CDPS as a comparison for measures of fruit and vegetable consumption and formative work done to refine measures is ongoing. The *Network* collaborates with other researchers in the field with expertise in psychosocial predictors of fruit and vegetable consumption to inform dietary behavior measures

Data are disseminated through appropriate mechanisms described under **i. Key Performance Measures/Indicators**, and the *Network* is readily responsive to requests for information from WIC and other members of the State Nutrition Action Plan working group.

**STATE LEVEL PROJECT SUMMARY**  
**FFY 2014**

**1. Goals & Objectives** (*See State Level Objectives*).

**2. Project Title:** Comprehensive Four-Year Evaluation of California's SNAP-Ed Projects  
Year Two

Semi-Structured Interviews - \$250,000 – PHI  
SNAP Household Interviews - \$1,163,973 – PHI

**a. Related State Objectives**

Related State Objectives include #1, 2, 3, 4

**b. Audience**

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for African American, Caucasian/White, and Latino/Hispanic populations

Languages: English and Spanish

Ages: Teenagers 12-17 years and adults 18 -54 years

**c. Focus on SNAP Eligibles**

All of the targeted activities funded by USDA are designed for eligible consumers where they shop, learn, work, recreate and live. Activities also reach SNAP-Ed intermediaries so that they in turn can more effectively provide nutrition education to the eligible consumers.

Income Targeting Data Source:

Besides activities at location-based proxy sites, site verification of 50% or greater SNAP-Ed eligibles participating in projects taking part in outcome/impact evaluation will be based on the following data sources:

*Network* GIS Census Tract Data; School Free/Reduced Price Meal Program Percentages; and WIC Income Guideline Qualifications  
SNAP telephone listing without identifying information

**d. Project Description**

Key Strategies: FFY 2014 will represent the second year of implementation of qualitative and quantitative data collection activities to comprehensively evaluate the evolution and success of centralizing funding and program decisions related to nutrition education and obesity prevention among SNAP-Ed participants at the local health department level. The quantitative component will again include structured interviews with mothers, teenagers, and children (proxy interviews)

from randomly selected SNAP households. The program and administrative leads, as well as subcontractors and consultants, will participate in semi-structured interviews. These interviews will expand from the current 41 to all participating (57-59) local health departments in FFY 2014.

Key Educational Messages: N/A.

Intervention Sites: Staff, subcontractors, and consultants from 57-59 local health departments will participate in semi-structured qualitative interviews. Survey data will be obtained from SNAP participants in 17 selected local health departments.

Projected Number of Contacts:

Projected Total Contacts: 8,775 SNAP participants and 250 administrative and program staff

Direct Contacts:

*SNAP-Ed (<130% FPL)* 8,775

*Non SNAP-Ed (>130% FPL)* 250 local health department and subcontractor staff

Indirect Contacts: None

Narrative Summary:

FFY 2014 will mark the second year of a comprehensive evaluation that will combine process and short- and long-term outcome data from existing and new sources over a four-year period. The primary data collection activities will be:

- Annual, semi-structured interviews with local health department and subcontractor staff. Information collected in FFY 2014 will continue to focus on plans for capacity building and implementation of new strategies and perceived barriers (e.g., staffing) to program and intervention success. Interviews in FFY 2014 will begin to provide data on planned versus actual implementation, perceived impacts, successes, and lessons learned.
- Annual interviews with mothers and teenagers from randomly-sampled SNAP households in 17 selected California local health departments. A series of questions related to core measures pertinent to SNAP-Ed strategies will be collected from mothers and teenagers, and about children through proxy interviews with mothers. Changes over time can be observed in fruit and vegetable consumption, and other key variables across four years among cohorts of adults (FFY 2013 through 2016). Interviewers will also record responses on self-reported height and weight. Interviews will be conducted in English and Spanish. Mothers and teens who participated in interviews in FFY 2013 and agreed to follow-up will be recontacted in FFY 2014. Thus, FFY 2014 will include a combination of one-year follow-up and baseline interviews.

The objectives are to correlate types and levels of intervention activities with outcomes such as fruit and vegetable consumption and BMI. In subsequent years, health outcomes will be examined with the hypothesized increases in levels of fruit and vegetable consumption and reductions in BMI. Economic analyses will also focus on levels of fruit and vegetable consumption in relation to increases in revenue for California's agricultural industry.

#### **e. Summary of Research**

This research design has been implemented in large-scale community-level evaluations, such as the Minnesota Heart Health Program and the Stanford Five-City Project, both of which specifically examined obesity as a primary outcome variable.<sup>1,2</sup>

The semi-structured qualitative interviews conducted in FFY 2014 will be summarized in a report and will provide important information to the *Network* for identifying challenges experienced by certain and all contractors. The intent is to provide information on which to base decisions on assisting local health departments to improve service delivery and the success of programs and interventions by training and technical assistance. Interview data will also be used towards the end of the current four-year funding cycle to provide qualitative information on the impacts and successess.

The most robust quantitative data will come from Impact/Outcome Evaluation (project 2) representing short-term attitude and behaviors changes at the individual level, and the annual surveys within selected counties representing longer-term attitude and behaviors changes at the community level. Analyses will be conducted by key demographic variables such as race/ethnicity. The intent of these analyses will be to examine whether behavior change is more prominent among certain demographic groups and to investigate the impacts of programs and interventions on reducing health disparities.

The comprehensive analytic plan for these data will be identifying the types and levels of intensity of local health department approaches in relationship to changes over time in key outcome measures among the cohorts of adults, teens, and children from SNAP-Ed households.

#### **f. Modification of Project Methods/Strategies**

The *Network's* ongoing statewide surveillance surveys (CDPS, CalTEENS, and CalCHEEPS) collect and compare detailed information related to levels of fruit and vegetable consumption, levels of physical activity, and other important

---

<sup>2</sup> Taylor CB, Fortmann SP, Flora J, Kayman S, Barrett DC, Jatulis D, Farquhar JW. Effect of long-term community health education on body mass index. The Stanford Five-City Project. *Am J Epidemiol.* 1991 Aug 1; 134(3):235-49.

outcomes. The objective behind the new surveys conducted in selected counties will be to assess important outcomes from mothers and children/teens within a relatively short period of time, approximately 30 minutes. Detecting change over time rather than estimating point prevalences required much larger sample sizes than our statewide surveillance surveys, and to reduce costs we have identified a core set of questionnaire items central to the goals of SNAP-Ed.

**g. Use of Existing Educational Materials**

No educational materials will be required.

**h. Development of New Educational Materials**

None.

**i. Key Performance Measures/Indicators**

The primary indicators are consumption of healthier foods, access to healthier foods, consumption of water, levels of physical activity, consumption of unhealthy foods, and consumption of unhealthy beverages?

**3. Evaluation Plan**

Comprehensive process evaluation data about each of the 61 local health departments will come from numerous sources and will include:

- Selected initiatives, objectives, strategies, partners, and target population, as identified in SOW, reports, and other documents.
- Number and types of direct, social marketing, and indirect client contacts from EARS.
- Access to healthier foods and beverages documented in structured reporting documents.
- Media and marketing campaign exposure through local and state sources.
- Environmental and community changes, capacity building, leveraging, policies, community involvement, non-SNAP-Ed programs and intervention, and other factors through key staff interviews.
- Environmental changes as documented from CX3.

Short- and long-term outcomes will be gathered from:

- Pre and post nutrition education surveys.
- Annual surveys within selected local health departments (n=17) to assess self-reported behavioral changes over time among mothers, teens, and children.
- Changes in levels of BMI.

#### 4. Coordination Efforts

Internal and external coordination of efforts and information will be an integral part of this comprehensive evaluation. Internal coordinator will ensure that the scheduling of qualitative interviews of local health department and subcontractor staff occur with consideration of other deadlines and on-site activities. External coordination of efforts will be centralized with the required evaluation staff lead at each funded agency.

A significant element of the qualitative evaluation is the identification of the extent to which the County Nutrition Action Plan group or its alternate is effective in coordinating the efforts of the FNS-funded programs within the county. In addition, the qualitative aspects of the evaluation will enable the *Network* to identify and examine how SNAP-Ed collaborates with and complements obesity-prevention work funded by other entities such as the CDC, Kaiser Permanente, and The California Endowment.

<b>The approach to conducting the evaluation, including scope, design, measures and data collection</b>	Conduct a pilot test of the system with Network contractor workgroup and update the system as needed based on the results. Once system and user acceptance testing is completed, conduct user training prior to Network-wide system implementation. Improve and update the system as needed based on user feedback and system maintenance plans.
<b>Plans for using the results</b>	The results will be used to improve the usability and effectiveness of the online system.
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	This project is in development and has not previously been evaluated.
<b>Project cost</b>	No additional costs beyond staff time are associated with this evaluation.

## STATE LEVEL PROJECT SUMMARY

FFY 2014

1. **Goals & Objectives** (*See State Level Objectives*).

2. **Project Title: The Educational and Administrative Reporting System (EARS) – Online System:**

Online database and data collection system for EARS, currently in development phase of the project system, working with CDPH IT to provide an automated collection and tracking of information, related to providing nutritional education to California's SNAP-Ed-eligible population, to meet federal reporting requirements.

(Cross Reference to Information Technology Project **Information Technology Operations**; Budget is in IT Operations, State-funded)

a. **Related State Objectives**

Related State Objectives include #1, 2, 3, 4

b. **Audience**<sup>1</sup>

Gender: Female and Male

Ethnicity: All races and ethnicities

Languages: English

Ages: All ages.

c. **Focus on SNAP Eligibles**

All of the activities funded by USDA are designed to reach Supplemental Nutrition Assistance Program-Education (SNAP-Ed)-eligible consumers and this project is to provide evaluation and evaluation resources to the *Network* and SNAP-Ed intermediaries so that they can better identify the extent to which they are providing services to SNAP and SNAP-eligible consumers and develop a description of those consumers and the education *Network* is providing.

Income Targeting Data Source:

Site data will be built into the database developed for the system, including census tract data and school Free/Reduced Price Meal Program Percentages.

d. **Project Description**

The following key strategies will be employed; we will...

- Work with CDPH IT to develop a system for collecting EARS data on-line.
- Complete system and user acceptance testing.
- Pilot test the system with state, Network staff and external contractor workgroup

---

<sup>1</sup> The intended audience for this project is staff of Network-funded projects.

- Train the system users (state staff and *Network* contractors/subcontractors)
- Implement the system
- Plan for system maintenance and future updates

Key Educational Messages: N/A

Intervention Sites: After development, all

Projected Number of Contacts:

Direct Contacts: 0<sup>2</sup>

Indirect Contacts: 0

Narrative Summary:

Develop a web-based application that meets USDA's mandated EARS reporting criteria. The *Network* will work in conjunction with CDPH IT to design, develop, pilot test, refine, and implement an EARS reporting system for the *Network*. CDPH IT will work in conjunction with the *Network* to develop training materials and provide training to *Network* staff, contractors and sub-contractors.

Key factors leading to the success of this effort include the ability to:

- Develop a web-based data collection system with a database backend that can be modified to meet the new USDA reporting requirements and accommodate any future changes and enhancements in those requirements;
- House the EARS system on state owned servers; ability to utilize secure web based interface to store and organize the OMB-required data into the database;
- Produce a product that meets the USDA EARS reporting guidelines;
- Monitor and verify partner data entered into the system as a USDA requirement for implementation.

Summary of Research

It is our goal to be able to use this system to integrate data collection of EARS, the Semi-Annual Activity Report, and Activity Tracking Forms (See #1. Project Summary RES – Process Evaluation). This project is a process evaluation to inform the State and local projects of the annual scope of their activities for reflection and application to the projects in the future, part of the feedback loop for social marketing. The Office of Analysis, Nutrition, and Evaluation identifies process evaluation as useful for tracking implementation and identifying if the

---

<sup>2</sup> This project is intended to collect process evaluation data from *Network* projects, No direct or indirect services will be provided to the target audience of the *Network*.

intervention is being delivered as intended.<sup>3</sup> Baranowski and Stables (2000) found process measures to directly relate to success of nine state 5 a Day projects.<sup>4</sup> Examples of process evaluation and activity tracking from previous years can be found in interim and final reports from FFY 2000–2012.

The use of EARS itself as a tracking measure has been researched by USDA through pilot studies. California first piloted EARS tracking in FFY05, providing USDA with feedback identifying concerns about the time burden. In FFY08 the *Network* participated in the USDA's retroactive EARS pilot test to confirm the utility of the FPRS data collection system. From our implementing agency point of view it was challenging to do this after the fact, as the *Network* format of data collection was not in congruence with that of EARS. However, the FPRS system worked, so the test was successful from the USDA perspective.

*Network's* endeavor's with its Excel system have served as formative research for the development of this online system. They have provided us with a great deal of insight about the challenges of documenting EARS data—issues our contractors raise, decisions that need to be made, ambiguities, etc.

#### **e. Modification of Project Methods/Strategies**

- This is a new development for EARS data collection that will replace the Excel-based data collection tool that is currently operational.
- A contractor workgroup met regularly with us throughout FFY 2012 to help guide development of the EARS FSR and JAD sessions; they will be engaged in an even more active role once the system is ready to pilot.

#### **Use of Existing Educational Materials**

The graphical user interface of the system will change, however to the extent that any EARS data collection materials from the current Excel system have relevance to the new system, we will use them for training.

#### **f. Development of New Educational Materials**

Since this will be a new system, new system documentation and training materials will be developed for use with an online EARS data collection system.

#### **g. Key Performance Measures/Indicators**

- All technical and functional requirements of the proposed EARS project will be met.
- Reduce EARS data reporting process time by at least 65% from previous reporting period.

---

<sup>3</sup> USDA Food and Nutrition Service, Office of Analysis, Nutrition and Evaluation. Nutrition Education: Principles of Sound Evaluation, Sept 2005.

<sup>4</sup> Baranowski T, Stables G, Process evaluations of the 5 a Day projects. Health Education and Behavior 2000 27(2) 157-166.

- Reduce EARS data cleaning and compiling by at least 50% from previous reporting period.
- Increase the amount of *Network* contractor's time conducting programs on SNAP-Ed activities by at least 30%.
- Ability of system to add fields to report other events as required and collect non-mandated information for analysis and research.
- Built-in authentication with users only seeing information pertaining to their educational activity reporting.

**Evaluation Plan (See also Information Technology Project Information Technology Operations)**

Projects it is associated with:

All *Network* local and regional projects will participate in EARS

Evaluation type: Primarily process evaluation

Questions that will be addressed:

- Is the system easier to use than the FFY 2013 Excel system?
- Does it offer as much flexibility as the FFY 2013 Excel system?
- Is it sufficiently robust to simultaneously serve as many contractors who need to be able to use it?
- Is its physical appearance acceptable?
- Have all major data collection issues been addressed?

Design and Measures:

The prototype will be tested by a workgroup of interested contractors. At present, about 14 contractors have been engaged in participating in the development of the Excel EARS data collection system and have expressed interest in continued engagement. Their feedback will be obtained on the questions above and they will surely also have other issues to raise.

Plans for using the results:

The results will guide the further development of the online system and beta-testing – it will let us know the extent to which we can move forward with complete system implementation or need to work to correct system errors.

Previous evaluation:

Since we are evaluating the system itself and it is a new system, there are no previous evaluations.

**4. Coordination Efforts**

*Network*, CDSS and UC-CalFresh have been exchanging ideas about our respective Excel-based EARS data collection systems throughout FFY 2013. Plans include for UC-CalFresh and CDSS to use the *Network*-developed online reporting system in a Phase II of the project.

EVALUATION PLAN  
FFY 2014

<b>Title of the evaluation</b>	<i>FQHC Latino Campaign Toolbox-Texting Pilot</i>
<b>The project or projects with which it is associated</b>	<i>Latino Campaign</i>
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	outcome
<b>The question(s) to be addressed by the evaluation</b>	<p>The Toolbox-Texting Pilot will help us determine whether text messages paired with existing nutrition education curricula can increase positive behavior change among low-income Latinos in California related to:</p> <ul style="list-style-type: none"> <li>a. Increased fruit and vegetable consumption,</li> <li>b. Increased physical activity, and</li> <li>c. Decreased sugar sweetened beverage consumption.</li> </ul>
<b>Key Performance Measures/Indicators - List the key measures/indicators of implementation or performance that you will capture or collect.</b>	<p>The behavioral changes we will measure:</p> <ul style="list-style-type: none"> <li>• Frequency in consumption of healthy beverages and reduction in consumption of SSBs</li> <li>• Frequency in filling half the plate with fruits and vegetables</li> <li>• Days each week in which participants are physically active.</li> </ul> <p>We will also collect the following biometrics, but they will not be significant data points used in our final analysis:</p> <ul style="list-style-type: none"> <li>• BMI</li> <li>• Waist circumference</li> </ul>

<b>Estimated Evaluation Cost</b>	total budget: \$150,000

## STATE LEVEL PROJECT SUMMARY FORM

1. **Goals & Objectives** (see *State Level Objectives*)

2. **Project Title: FQHC Texting Pilot**

**PHI Budget:** \$150,000

### **Project Title:**

a. **Related State Objectives.**

1, 2, 3, 4

b. **Audience.**

Gender: Primary: Women; Secondary: Men

Ethnicity: Latino

Languages: Spanish, English

Ages: 18 to 54

c. **Focus on SNAP-Ed Eligible.**

According to data provided by the HRSA, 70% of patients visiting the 121 FQHCs in California live at 100% and below the Federal Poverty Level (FPL). An additional 15% live at 200% and below the FPL.

d. **Project Description.**

Key Strategies/Methods: This intervention will combine in-person health education classes reinforced by text messages. We will work with groups of 20 participants at each of six FQHCs. The clinics will provide the site for classes and participants. The *Network* will provide *Toolbox* curriculum, text messages and platform, and evaluation support. Local Health Departments will assist with the intervention and stay engaged through evaluation. BMI will be collected pre- and post-intervention, but evaluation metrics are around self-reported changes in behavior.

Key Educational Messages: Make half your plate fruits and vegetables, increase physical activity opportunities throughout the day, decrease consumption of unhealthy foods and beverages, and increase consumption of water.

Intervention Sites: A non-profit corporation or network consisting of six or more FQHC clinic sites in Los Angeles County. The corporation or network must currently provide patient education at a minimum of six clinic sites that serve a population of at least 75% Latino/Hispanic.

Projected Number of Contacts:

Direct Contacts: 160

Indirect Contacts: ~300

Narrative: Last year, we were able to show self-reported behavior changes among subscribers to a healthy food and beverage texting pilot. We now wish to assess the impact of text messages coupled with three months of nutrition education classes.

e. **Summary of Research.**

Text messages have been used by other non-nutrition education agencies to successfully reach Latinos. In one study assessing the usefulness of text messages for medication adherence and appointment reminders, “Black and Hispanic subjects were more likely to feel that text message reminders for appointments or medications were helpful than White subjects.” The study found that these two populations were also more receptive to healthcare-related educational text messages when compared to Whites.<sup>1</sup>

In California, Latinos often work seasonally in different parts of the state. For this reason, Latinos rely more on cell phones than other low-income Californians. “Compared to the general U.S. population, Latinos account for more minutes used and for a higher percentage of cell-phone ownership despite their comparatively low incomes.”<sup>2</sup> This is especially true of text messaging. Compared with non-Hispanic White cell phone owners, African Americans and Latinos are significantly more likely to use their mobile devices to send and receive text messages. According to the Pew Internet Center, 70% of English-speaking African Americans and Latinos report frequent text messaging, versus just over 50% of non-Hispanic Whites.<sup>3</sup> Texting rates in Mexico, the country of origin for 84% of Latinos in California<sup>4</sup>, exceed those in the US. When surveyed by the Pew Research Center, 82% of Mexican cell phone owners said they use their phones for texting.<sup>5</sup>

The *Network* recently piloted a Text Message Program. We sent tailored messages to subscribers for up to 16 weeks. Content included prompts to eat more fruits and vegetables, recipes and ideas for healthy meals and beverages, links to helpful websites, and information about upcoming events in their area. Questions about fruit,

<sup>5</sup> Pew Research Center. *Global Digital Communication: Texting, Social Networking Popular Worldwide.* Updated February 29, 2012. <http://www.pewglobal.org/2011/12/20/global-digital-communication-texting-social-networking-popular-worldwide/>

vegetable (FV), and sugar sweetened beverage (SSB) consumption habits were included in the text messages at the beginning and end of the text intervention.

Results of this pilot included a 17 percent increase in frequency of subscribers filling half their plates with FV ( $p=0.006$ ). Seventy percent of participants who set healthy beverage goals reported meeting or exceeding them. Unprompted, some participants replied with text messages indicating they had lost weight or their children had stopped drinking SSBs as a result of the program. From this and an exhaustive literature review, we assert that text messaging is a feasible, effective method for reaching low-income Latinos with health messages that warrants future study.

f. **Modification of Project Methods/Strategies.**

No modifications necessary

g. **Use of Existing Educational Materials.**

The primary vehicle for nutrition education will be the *Toolbox for Community Educators (Toolbox)*, a curriculum created by and for low-income Latinos in California. In FFY 2012, more than 110,000 low-income Latinos participated in *Toolbox* classes led by the *Latino Campaign* and its community partners. The *Toolbox* has been used for classes in health clinics for many years and these clinics are great partners for our campaign. A link to the lessons can be found here: <http://www.network-toolbox.cdph.ca.gov/en/index.asp>. We will also use text messages that were approved and piloted in FFY 2012.

h. **Development of New Educational Materials.**

We do not anticipate the need to develop new materials for this project.

i. **Key Performance Measures/Indicators.**

The behavioral changes we will measure:

- Frequency in consumption of healthy beverages and reduction in consumption of SSBs
- Frequency in filling half the plate with fruits and vegetables
- Days each week in which participants are physically active.

We will also collect the following biometrics, but they will not be significant data points used in our final analysis:

- BMI
- Waist circumference

### **3. Evaluation Plans**

The Network will provide curriculum, materials, and texting support to groups of Latino patients at health clinics. The clinics will provide the site for classes, participants, and health education staff. The Network will provide curricula, texting messages and platform, and evaluation support. We will engage 160 participants over 12 weeks to be part of one of the four groups listed below:

- Two classes (20 participants each): 1 hour of *Toolbox* classes per week and 3 text messages/week.

- Two classes (20 participants each): 1 hour of Toolbox classes per with no text messages.
- Two classes (20 participants each): 1 hour per week in other health classes and no text messages.
- 40 participants: 3 text messages per week.

The *Network* will administer a text-based pre- and post-participation survey. The same questions will be administered through a paper survey at clinics for those not participating in the texting component. Clinical staff will collect height, weight, and waist circumference for each participant at the beginning and end of the three-month Toolbox-Texting Pilot. These measurements will be secured by a clinical staff member with experience collecting these data.

#### **4. Coordination Efforts**

We will invite Federally-Qualified Health Centers to bid on this project through a competitive bid process. We will work closely to engage the Department of Public Health- Los Angeles County. Their staff will attend select training and we will engage them in the evaluation portion of the intervention. We will also secure involvement of our *Latino Campaign* Statewide Advisory Council in designing and promoting this intervention.

Federally Qualifying Health Clinic (FQHC) Texting Pilot

<b>Federal Share Budget</b>	<b>FFY2014 Total</b>	<b>FFY2013 Total</b>

FFY 2014

<b>Title of the evaluation</b>	Process and Formative Evaluation for the Healthy Retailer Certification Program
<b>The project or projects with which it is associated</b>	<i>Network for a Healthy California-Retail Program</i>
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Process, Formative
<b>The question(s) to be addressed by the evaluation</b>	<p>1) What are some of the most common certification measures or standards and "rewards" used by other well established Healthy Retailer Certification Programs?</p> <p>2) Which LHD's are interested in participating in a healthy retailer certification program; what is their level of experience and interest to pilot an approach based on CX3?</p> <p>3) Building principally on the CX3 store assessment tool, what would be the best approach for developing and testing a healthy retailer certification program that is responsive to key stakeholders interests and concerns e.g. LHD's, Retailers, SNAP-Ed shoppers?</p> <p>4) What are retailers and shoppers reaction to the proposed Healthy Retailer Certification approach?</p> <p>5) What are LHD's reaction and opinion about the usefulness and next steps needed for the healthy Retailer Certification Program training and technical assistance?</p>
<b>Key Performance Measures/Indicators - List the key measures/indicators of implementation or performance that you will capture or collect.</b>	Key performance measures in FFY 2014 will include the store requirements for participating, defined rewards for the stores, the number of LHDs and stores participating in the pilot, and the number of webinars conducted, participants trained and training evaluations. Specific measures of store and consumer feedback will be determined.
<b>Describe the approach to conducting the evaluation</b>	Identification of the most common and appropriate to SNAP-Ed certification standards and rewards based on established programs profiled in "Health on a Shelf" publication and CX3 store assessment tool and scores. Online surveys, structured group discussions and/or interviews to solicit input, opinions and experience of the major stakeholders for this project on proposed certification approach: a) Local Health Departments, b) retailers participating in CX3, c) SNAP-Ed shoppers, d) technical experts in the area of healthy retail. Participant training assessments.
<b>Design</b>	Prospective
<b>Data collection and instruments</b>	Interview guides, CX3 store assessment tool, training and technical assistance assessments
<b>Data analysis</b>	Summary of major themes and recommendations from stakeholders and LHD training participants, change over time in CX3 store scores
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	New project
<b>Estimated Program Cost</b>	\$70,000

## STATE LEVEL PROJECT SUMMARY FFY 2014

1. **Goals & Objectives:** *(See State Level Objectives)*

2. **Project Title:** Healthy Retail Recognition  
\$70,000 - PHI

**a. Related State Objectives:** Objectives 1 and 4

### **b. Audience**

Gender: Female and Male Ethnicity: All Ethnic Groups Languages: English and Spanish Ages: Adults 18+

### **c. Focus on SNAP Eligibles**

The Healthy Retail Recognition Program activities are designed to reach CalFresh participants and SNAP-Ed-eligible consumers where they shop to increase access to fruits and vegetables and other healthy foods. These sites are identified using the data sources described below.

Income Targeting Data Sources: Site verification of 50 percent or greater SNAP-Ed-eligible persons participating in program activities will be based on the following data sources:

*Network* GIS Census Tract Data and retail sites on the USDA-approved list.

### **d. Project Description**

Key Purpose: Stores in SNAP-Ed eligible census tracts that apply to the program, agree to meet defined implementation steps, and in exchange receive benefits, including free publicity and help implementing healthy changes.

Key Strategies: Retail promotions; community events; nutrition education research/evaluation; promotion of healthy communities.

Key Educational Messages: Fruits and vegetables; healthier eating, in general; chronic disease and obesity prevention; healthy beverage promotion; food safety; and cooking skills.

Intervention Sites: Grocery stores

### **Narrative Summary:**

The changes in the funding guidance from the USDA SNAP-Ed program and the strategic shift in the *Network's* direction have created the need for a statewide Healthy Food Retail Recognition Program. The Recognition Program would include intervention stores participating in the CX<sup>3</sup> improvements as well as other SNAP-Ed eligible stores in qualifying census tracts. Local Health Departments would recruit retailers or retailers themselves would agree to participate in the program, agree to meet make healthy changes, and in exchange receive benefits, including free publicity, merchandising and promotional materials and help implementing healthy changes. This program would support the new LHD infrastructure and CX<sup>3</sup>. In FFY 2014, a much heavier investment in the LHDs who will be instrumental

in enabling the *Network* reach its state level goal of increasing access and consumption of fruits and vegetables for low-income Californians. This program will also provide recognition to small business owners and a program for low resource consumers to easily identify stores that stock healthier foods and beverages.

Improving diets and reducing obesity rates requires many different strategies that address food access, food retailer operations, nutrition literacy, and social norms about eating. A Healthy Food Retailer Recognition program is a win-win-win approach to improving community health. Participating stores get free publicity and support for increasing availability of healthy foods. Community members gain access to healthier food choices and information about nutrition. It creates positive relationships with local businesses, which can lead to future collaboration to benefit the public's health. The success of a Healthy Food Retailer Recognition program can demonstrate to businesses that residents want healthier choices in their neighborhoods, making the case for future local policies that reduce unhealthy food options and incentivize healthy ones. Participating stores may also influence other local small stores to want to get participate in the program.

A Healthy Food Retailer Recognition Program will be developed using the food retailer assessment scorecard developed by the Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) to assess the current level of the store's environment. The Recognition Program will include intervention stores participating in the CX3 improvements as well as other SNAP-Ed eligible stores in qualifying census tracts that want to participate in the program. This program is a voluntary program open to any interested store that qualifies as a SNAP-Ed intervention site. Local Health Departments on the behalf of retailer or retailers themselves that apply to the program, would agree to carrying the minimum staple goods that a store must carry in order to be considered having healthy options, and in exchange receive technical assistance, including free publicity and help implementing healthy changes. There would be a minimum requirement that would be committed to participating in the program such as agreeing to carry two fresh fruit and vegetable options in the store at all times. This could then be expanded to include two healthy items from each food group and then going above and beyond by carrying healthy low cost grab and go options. While the store works to increase the inventory of healthy items, they may also commit to decreasing the amount of less healthy items that they choose to carry in their stores. Stores participating in the program would receive a Champion for Change Healthy Retail Participant sticker which not only recognizes the store owner's efforts, but be easily identified by consumer's.

The approach will focus on helping store owners increase their score to a minimum of 75 out of 100 points, addressing many aspects of a healthy store environment – including products stocked, marketing and promotion, participation in food assistance programs, placement of healthy items and safety and accessibility. Stores can continue to make improvements reaching 100 points.

When the program is developed, the two main stakeholder groups – community members' and store owners – will have their needs balanced through the store requirements and the incentives for participation. The incentives provided through the Recognition program will be considered a short-term bridge from the retailers' existing business model to a healthier one.

A pilot project of the recognition program will happen in two or more CX3 neighborhood within a local jurisdiction will be implemented to build relationships with retailers and neighbors, understand the

challenges of selling healthy food, test store Recognition implementation steps, experiment with promoting the program, and estimate the cost of a full-scale program.

The store owner and local health department will agree on a time frame during which the store will make changes to meet the minimum requirements of carrying two fresh fruits and vegetables at all times (e.g., the store will meet the requirements within six months). The agency administering the program and the store owner will then sign an agreement that outlines the Recognition implementation steps the business is willing to implement. The LHD will ask to receive information about the store sales data related to the healthy changes at this time. The agreement will also demonstrate to the store owner that he or she will receive the promised assistance with the Recognition process. Annually, the store would be encouraged to make additional healthy changes to continue to be considered an active participant in the Healthy Retail Recognition Program.

This project will also seek other funding sources, local resources, partners, or other local assistance programs that can help the store owners implement infrastructure changes as desired. These other resources will supplement the technical assistance and promotional resource that the SNAP-Ed funding provides. Making connections with local farmers and produce distributions centers will also be key partners related to the requirement to carry fresh fruits and vegetables. WIC authorized stores will already meet these requirements, but will still receive the technical assistance and promotional resources by participating in this program.

#### **e. Summary of Research**

The guide, *Health on the Shelf* has a section on why to focus on small food retailers. The section includes arguments that can be used in fact sheets, talking points, and other program materials. It cites appropriate research for the following topics:

- Low-income neighborhoods have more small food retailers than high income neighborhoods.
- Small food retailers congregate near schools and attract school children.
- Small food stores that do not sell healthy food have a negative effect on the diets and health of nearby residents.
- People who live closer to stores that sell healthy food have better diets.
- Small food store interventions show promise in increasing healthy food sales, improving store offerings, and promoting good nutrition.

The Bodor et al article titled, “The rationale behind small food store interventions in low-income urban neighborhoods”<sup>2</sup> reveals that low-income communities are considered food swamps because the availability of healthy foods in small food stores are low; therefore, these communities have disproportionately high rates of obesity. Environmental approaches such as changing the store infrastructure and marketing strategies influence the sale of available foods. This type of small food store intervention has to take into consideration whether the healthy food offerings are cost effective for the store.

The O'Malley et al article titled, "Feasibility of Increasing Access to Healthy Foods in Neighborhood Corner Stores" discusses that most community members are more likely to buy fresh fruits and vegetables at corner stores if they were available<sup>3</sup>. Typically most corner stores do not carry fresh produce due to challenges of distribution, price, equipment, and absence of customer demand. A system change like a healthy retail recognition program that includes incentives may be more feasible and increases the likelihood of fresh fruits and vegetables in corner stores.

The Healthy Corner Stores Issue Brief is a quarterly publication created by The Food Trust for the Healthy Corner Stores Network. Each thematic issue includes an introduction to the topic, project profiles, best practices, and resources.

The Issue Brief, *Fresh Food Retail Development: Corner Store Conversions*<sup>4</sup> addresses increasing the access of healthy foods by forming relationships with small food retailers. By working with retailers, the goal would be to expand their quality and quantity of healthy foods, and, in turn, sustainably increase profits. This approach would benefit community members because they would have more options of healthy foods available. Some suggested strategies to create a healthy store include updating a business plan, changes to the interior e.g. store layout, and healthy product training. Technical assistance, marketing training, and community involvement are critical components in a store conversion. As a result, the partnerships with retailers can provide low-income communities with access to healthy, affordable foods and community pride.

#### **c. Modification of Project Methods/Strategies N/A**

#### **d. Use of Existing Educational Materials**

*Health on the Shelf*, ChangeLab Solution's guide to healthy food retailer certification will be a major source of guidance and best practices used for this project. The toolkit describes how to increase the variety of healthy foods they sell, reduce the offerings of unhealthy foods, and proactively market healthy options. It provides step-by-step instructions for developing a healthy retail program, with numerous ideas and examples from existing programs.

To increase the CX3 score to a minimum of 75 out of 100 points, marketing, placement and promotion through the *Retail Program* merchandising materials provides retailers with a variety of signage options and allows more customized promotion of fruits and vegetables at the point-of-sale. Options include a floor stand display with seasonal posters, a spinning kiosk sign that holds 300 recipe cards, recipe card holders for the canned fruit and vegetable aisles, *Harvest of the Month* community newsletters, produce signs that highlights the nutritional benefit of the item, freezer clings for the frozen produce section, cross promotional signs to provide preparation tips in every aisle, shopping cart signs to display the call to action message to make half your plate fruits and vegetables, and in-store audio to remind customers to pick up fresh, tasty produce. Merchandising materials are produced in both English and Spanish. The program uses materials that have been designed and tested for the target audience. These materials incorporate the Champions for Change brand and the CalFresh logos. When the national license is obtained, the national *Fruits and Veggies—More Matters*<sup>®</sup> brand will be added prior to reprinting. The materials also may be modified to improve their content based upon feedback from local projects.

The *Retail Fruit and Vegetable Marketing Guide* serves as a resource for independent retailers who are seeking information on how to merchandise and promote their selection of fresh produce. The *Guide*, based on information gleaned from the *Produce Quick Tips*, *Produce Handling Guide*, and the successes and challenges learned from various corner store conversion projects, provides the retailer with information about produce storage and display, cross promotion merchandising techniques, and promotional activities to educate low-income consumers on how to purchase, store, and prepare fresh produce. The *Guide* also has a section written for community-based organizations interested in providing hands-on technical assistance to retailers making improvements to their fresh produce selection.

#### **e. Development of New Educational Materials**

To provide training and technical assistance to health departments around the state working with food retailers and to increase fruit and vegetable options and healthier alternatives in food deserts, webinars with will be offered. The webinars will build the capacity of health department staff that are working with retailers in the Healthy Retail Recognition Program.

#### **f. Key Performance Measures/Indicators**

Key performance measures in FFY 2014 will include defined technical assistance for stores participating in the program, the number of LHDs and stores actively participating in the pilot, and the number of webinars conducted, participants trained and training evaluations. Specific measures of store and consumer feedback will be determined. Store sales data of new items will be requested from small stores.

### **3. Evaluation Plan**

The project will include periodic opportunities for evaluation throughout the fiscal year. At the beginning of the fiscal year, a survey will be developed to receive feedback from the local health departments on technical assistance needs and proposed topics for webinars. At the conclusion of each webinar, a survey will be conducted to receive feedback from Network staff and LHDs on the effectiveness of the webinar. The results will identify areas of for possible improvement in training and technical assistance activities. The number store agreements for participating, before and after photos of store changes will be shared and available sales data of new items will be analyzed.

### **4. Coordination Efforts**

Coordination efforts will be made at the state and local levels. The state level will include but it is not limited to the following: *Retail Program*, Tobacco Control Program, Prevention First, CX3, Retail Policy, System and Environmental Change Workgroup, WIC and Change Lab Solutions. The local level will include but is not limited to the following: the Project Officers, local health departments, interested store owners, community members, and additional partners.

<b>Title of the evaluation</b>	Impact/Outcome Evaluations of Larger Local Contractor Projects
<b>The project or projects with which it is associated</b>	See full list below
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Outcome or impact depending on the resources of the contractor
<b>The question(s) to be addressed by the evaluation</b>	<p>Is fruit and vegetable consumption associated with increased consumption improving among SNAP-Education eligibles participating in the nutrition education provided by local contractor projects? Are fruit and vegetable factors associated with increased consumption improving among SNAP-Education eligibles participating in the nutrition education provided by local contractor projects? Is consumption of other healthy foods improving among SNAP-Education eligibles participating in the nutrition education provided by local contractor projects? Is consumption of low nutrient and/or sweetened beverages decreasing among SNAP-Education eligibles participating in the nutrition education provided by local contractor projects?</p>
<b>The approach to conducting the evaluation, including scope, design, measures and data collection</b>	<p>Each contractor receiving more than \$350,000 in federal reimbursement carries out its own outcome/impact evaluation using recommended validated surveys. Contractors receiving less reimbursement can participate in this project if they so choose. The usual design is pre-test/post-test with 100 or more matched pairs of respondents who have participated in at least 5 significant education contacts. Data is collected through self-administered surveys in the classroom, school program, or other program setting. Nearly all contractors use a pre-test/post-test approach, although sometimes contractors have used supplemental data sources such as direct observation or food service purchases of selected items.</p> <p>Contractors are expected to use an age-appropriate validated instrument to measure consumption selected from the following:  The following two were adapted from the School Physical Activity and Nutrition Project instrument, Baylor University:  -- Network Youth Survey – 3rd-8th grades  -- Network High School Survey – high school students (Dietary intake from YRBS)  -- Beverage and Snack Questionnaire (BSQ - only in high schools implementing the RYD curriculum)</p> <p>The following two were developed by Marilyn Townsend and colleagues, UC Davis, and validated for low literacy white, African-American, and Spanish-speaking low-income Californians:  -- Food Behavior Checklist (FBC) - Adults  -- Fruit and Vegetable Checklist (FVC) - Adults</p> <p>All the instruments above, except for the Network High School Survey and the BSQ, are available in both English and Spanish. They may use other validated instrument scales to measure psychosocial constructs. The scales have been assembled in a compendium found at <a href="http://www.cdph.ca.gov/programs/cpns/Pages/ImpactEvaluation.aspx">http://www.cdph.ca.gov/programs/cpns/Pages/ImpactEvaluation.aspx</a>. The Network's RES provides contractors instruction in the data entry process and a data entry template in Excel that automates the process of calculating basic statistics to minimize data errors.</p>

<b>Title of the evaluation</b>	Impact/Outcome Evaluations of Larger Local Contractor Projects
	The specifics of the approach are worked out by the contractor in conjunction with the Research and Evaluation Section and their Program Manager (PM). Extensive data on the actual activities conducted by a given contractor is collected. Data is augmented by a qualitative assessment on the part of the contractor regarding successes, challenges, and ideas for future intervention.
<b>Plans for using the results</b>	Each contractor uses its results as guidance for the next year's planning. Evaluation reports are submitted annually at the end of July to the State along with a draft plan for the upcoming year's evaluation. Each contractor meets via teleconference individually or in small groups with a group composed of Network state evaluation staff and their PM, to consider the programmatic implications of the results. In addition to providing project-specific guidance, evaluation findings are examined as a whole to identify best practices. These projects also help us identify if we have met the goal.
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	Yes, projects are evaluated annually. The most recent evaluations for each one is ongoing in FFY 2013
<b>Project cost</b>	In FFY 2011, evaluation costs per contractor ranged from as low as about \$500 to \$148,000, averaging \$17,193, depending on factors such as number of participants, hiring outside evaluators, value of staff time allocated to evaluation, reproduction costs, and cost of data entry. It is expected that costs for continuing contractors will be similar for FFY 2014. Due to the large number of new Local Health Department contracts, sub-contracting of work that has not yet started, and unknown scope of these projects, a total project cost estimate is not possible at this time.

**STATE LEVEL PROJECT SUMMARY**  
**FFY 2014**

**1. Goals & Objectives** (*See State Level Objectives*).

**2. Project Title:** Impact Outcome Evaluation of *Network*-Funded Projects  
Evaluation Work Conducted by the Local Contractors – No stand-alone funds

**a. Related State Objectives**

Related State Objectives include #1, 2, and 3

**b. Audience**

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for African American, Caucasian/White, and Latino/Hispanic populations

Languages: English and Spanish

Ages: All ages.

**c. Focus on SNAP Eligibles**

All of the targeted activities funded by USDA are designed for eligible consumers where they shop, learn, work, recreate and live. Activities also reach SNAP-Ed intermediaries so that they in turn can more effectively provide nutrition education to the eligible consumers.

Income Targeting Data Source:

Besides activities at location-based proxy sites, site verification of 50% or greater SNAP-Ed eligibles participating in projects taking part in outcome/impact evaluation will be based on the following data sources:

*Network* GIS Census Tract Data; School Free/Reduced Price Meal Program Percentages; and WIC Income Guideline Qualifications

**d. Project Description**

Key Strategies: the *Network* will continue to use a comprehensive set of strategies to build contractors' outcome/impact evaluation capacity, provide oversight to conduct of outcome/impact evaluation, compile results as a whole, and engage contractors in a feedback discussion regarding program and evaluation method improvement. This unique approach will enable contractors to conduct comprehensive impact evaluation using science-based principles. These strategies include one-on-one technical assistance, webinar training sessions, teleconferences to promote utilization of findings, and the development and distribution of evaluation materials and tools like surveys, report templates and data entry templates (See REU Project #4 for materials).

Key Educational Messages: This project will convey how to conduct outcome/impact evaluation using sound principles of evaluation, interpret results and use findings to refine nutrition education activities.

Intervention Sites:

Impact evaluation takes place in the local health departments and at their sub-contractors. These could include: Schools, Faith Organizations, Federally Qualified Health Centers, and Other sites where direct nutrition education is provided.

Projected Number of Contacts:<sup>1</sup>

Direct Contacts: 68 evaluation trainees

Indirect Contacts: 10,987subjects

Narrative Summary:

During FFY 2014 all local health departments participating in FFY 2013 (n = 23) will continue to conduct outcome/impact evaluation to measure change in fruit and vegetable consumption, sugar sweetened beverage consumption, physical activity and factors that influence those behaviors; 12 additional contractors will be added to the project. Network Local Projects that have participated in FFY 2013 (n = 34) and previously will no longer participate. As per carefully designed plan and timeline, one-on-one and group evaluation trainings and technical assistance will be provided (one-on-one ongoing; group webinars and in-person training classes scheduled depending on need) to develop evaluation plans for individual contractors. These contractors will conduct pretests, implement nutrition education activities, conduct posttests then enter, analyze and report findings using surveys, data entry templates, report templates and other resources provided by the *Network*. Subsequently they will work with the Research and Evaluation and Community Development teams to interpret the results and help improve programs for SNAP-Ed eligible populations. Contractors will produce individual evaluation reports, and the Research and Evaluation Section will produce an overall FFY 2014 evaluation report based on findings.

**e. Summary of Research**

The design that will be implemented employs scientifically-based methods. These can be clustered into three areas. The first, evaluation planning, includes elements like securing buy-in<sup>2</sup>, using logic models to plan evaluations, and employing sound evaluation designs.<sup>3</sup> The second area concerns evaluation

---

<sup>1</sup> Direct was estimated based on FFY 2013 outcome/impact evaluation workshop attendees (58-from-28 agencies and 10 Network staff; indirect is based on FFY 2012 outcome/impact evaluation matched pair sample size. (10,987).

<sup>2</sup> Patton MQ. Utilization Focused Evaluation: the New Century Text, 3rd Ed. Sage Thousand Oaks, CA (1997)

<sup>3</sup> Cook TD, Campbell DT, Quasi-Experimentation Design & Analysis Issues for Field Settings. Houghton Mifflin Company, Boston 1979.

implementation and includes elements like using proper survey administration methods<sup>4</sup>, ensuring accurate data entry, and rigorous data analysis techniques. The third concerns proper reporting and utilization. Consequently, these evaluations are grounded in sound evaluation principles<sup>5</sup> and provide results that can be validly used for program improvement.

**f. Modification of Project Methods/Strategies**

Over the past 8 years contractors have become smarter evaluators and have started to critically think about the methods they use, including the survey tools. During this time an increasing number of contractors have expressed interest in exploring additional methods to capture success.

Each year continuing contractors are expected to conduct an evaluation that is more rigorous than the one conducted in the prior year. In FFY 13, all contractors measured consumption using one of a four standardized instruments designed for their target age group so that standardized comparisons can be made across contractors. Contractors working with children in grades 3 through 8 used one consumption survey, based on the Baylor University School Physical Activity and Nutrition Project instrument; contractors working with high school students used a similar instrument. Those working with adults used the Food Behavior Checklist (FBC) or Fruit and Vegetable Checklist; the Fruit and Vegetable Checklist is a subset of the FBC. Rigor may be enhanced by measuring a greater number of indicators, increasing sample size, or adding an income-eligible comparison group. This ensures adherence to sound principles of evaluation.

The findings from these evaluation activities lead to changes in nutrition education like concentrating nutrition education in a shorter period of time rather than longer, increasing the number of times participants attend a class, or refining nutrition education activities. These also result in more standardized activities, sharing ideas and practices, and a broader use of existing materials. Modifications vary based on the evaluation findings of a given contractor.

In FFY 2013 a set of policy, systems, and environment questions were developed to accompany the collection of outcome/impact data from local projects to further examine differences in findings between contractors.

**g. Use of Existing Educational Materials**

All of the standard materials are available in English. Some of the surveys in the compendium are also available in Spanish. In addition to the standard surveys, *Network* has assembled a Compendium of Surveys for those projects that wish to explore additional psychosocial measures or areas of interest. The surveys in the compendium have been validated by other researchers or represent

modifications thereof to be more appropriate for *Network* program participants. Available existing materials include:

1. A Compendium of Surveys  
<http://www.cdph.ca.gov/programs/cpns/Pages/ImpactEvaluation.aspx>
2. Evaluation report templates<sup>7</sup>
3. Evaluation plan templates<sup>6</sup>
4. MS Excel-based data entry templates<sup>6</sup>
5. Scope of Work impact objective template<sup>7</sup>

#### **h. Development of New Educational Materials**

See also RES Project #6, Technical Assistance.

#### **i. Key Performance Measures/Indicators**

- The primary indicators are fruit and vegetable or sugar sweetened beverage consumption, upstream measurements, such as social norms, and related factors like parental support, accessibility of fruit and vegetables in the home, knowledge, preferences, familiarity, self-efficacy, and outcome expectations. Contractors must measure individual level consumption change and may measure other factors as well. In addition, measures of dosage, multiple types of nutrition education provided, and other barriers/facilitators to FV consumption in the venue are compiled.
- Contractor performance indicators are 1) the percent of contractors fulfilling their evaluation responsibilities in a complete and accurate manner and 2) the percent actively engaged in follow-up teleconferences or web-based meetings using the evaluation findings to improve their future efforts

### **3. Evaluation Plan**

#### **See also**

- **FFY 2014 Evaluation Plan\_Impact Outcome Evaluation Youth**
- **FFY 2014 Evaluation Plan\_Impact Outcome Evaluation Adult**

Outcome/impact evaluation is conducted in order to identify successful interventions, potential best practices, and provide contractors direction for program refinement, improvement, and redirection of effort. Many contractors have not received extensive training in evaluation during their professional education; this project provides standardized evaluation guidance and provides contractors with quality evaluation tools and resources. State level analysis of data enables the *Network* to better look at overall project accomplishment.

All Local Health Departments receiving over \$350,000 in FFY 2014 (n = 35) will be required to conduct outcome/impact evaluation by measuring change in fruit

---

<sup>6</sup> Available upon request from the Research and Evaluation Section

and vegetable consumption or change in healthy/unhealthy beverage consumption and/or related knowledge, attitudes, beliefs. This will include pre-tests and post-tests using validated surveys or metrics adapted from validated surveys. Some contractors may add comparison groups, and others will assess impact resulting from varied dosages of nutrition education. All will provide qualitative data on standardized reports to further describe the impact of nutrition education. Teleconferences and one-on-one assistance will be provided to ensure results are used to refine nutrition education activities. The most recent year of evaluation was FFY 2013.

#### 4. Coordination Efforts

The *Network* has involved SNAP partners, like UC-CalFresh, in the evaluation project and shared results via teleconferences with project participants to improve programs, refine evaluation plans, and diffuse promising practices. Evaluation resources created and compiled to promote coordination have been shared via the *Network's* website. These include the Impact Evaluation Handbook, the Compendium of Surveys, report template and other materials. The Compendium includes two surveys, the illustrated Food Behavior Checklist and the illustrated Fruit and Vegetable Checklist, that were developed jointly by the *Network* and University of California Cooperative Extension. The resources, evaluation results and methods of evaluation, as conducted by the *Network*, have been described in peer-reviewed scientific publications, and presented at national conferences<sup>7,8,9,10,11,12</sup> and with other SNAP-Ed social marketing nutrition networks in the Western Region, including HI, WA, and AZ. Regional *Network* staff have used the resources as have the LIAs and Special Projects, like the Local Food and Nutrition Education channel.

We will offer training as needed via webinar to CA staff operating *Network* interventions throughout the year. New materials, evaluation methods and results will be shared with other state networks to strengthen their nutrition education activities and evaluation practices.

<b>Title of the evaluation</b>	Educational and Administrative Reporting System (EARS)
<b>The project or projects with which it is associated</b>	Local Health Departments, Local Food Nutrition Education, all other Local Network Projects
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Process
<b>The question(s) to be addressed by the evaluation</b>	In California, for those who participated in <i>Network</i> activities: What are the unduplicated counts and contacts by SNAP status? What are the SNAP-Ed participant ages and genders by SNAP status? What is the racial/ethnic composition of SNAP-Ed participants? What are the major nutrition educational activities for the current year? In what settings did SNAP-Ed activities take place? What are the variety of materials distributed by implementing agencies? What are the SNAP-Ed expenditures by category of spending?
<b>The approach to conducting the evaluation, including scope, design, measures and data collection</b>	Over 130 <i>Network</i> contractors are projected to complete self-reported data into an online reporting system from which the Network is able to summarize their activities according to the EARS reporting requirements. State staff conduct the data analysis to produce the data sent to CDSS for the annual EARS report via the FPIR's database system.
<b>Plans for using the results</b>	Inform management decisions; support policy initiatives; provide documentation for legislative, budget & other requests; support the planning function
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	This project was done in its entirety for the first time in FFY10; we have provided fiscal information since FFY08.
<b>Project cost</b>	There are no additional costs. This project uses existing evaluation resources and staff.

## STATE LEVEL PROJECT SUMMARY

FFY 2014

### 1. Goals & Objectives (See State Level Objectives).

### 2. Project Title: Process Evaluation Reporting System:

Data collection; Development and preparation of data collection system for current, Semi-Annual Activity Report (SAAR) and Education and Administrative Reporting System (EARS); reporting and compilation of process evaluation data.

(Cross Reference to Information Technology Project **Information Technology Operations**; Budget is in IT Operations, State-funded)

#### a. Related State Objectives

Related State Objectives include – #1, 2, 3, 4

#### b. Audience<sup>1</sup>

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for African American, Caucasian/White, and Latino/Hispanic populations

Languages: English, Spanish, and select Asian languages, which may include Chinese, Vietnamese, Korean, and/or Hmong.

Ages: All ages. Primary focus is on families, especially mothers, with children.

#### c. Focus on SNAP Eligibles

All of the activities funded by USDA are designed to reach Supplemental Nutrition Assistance Program-Education (SNAP-Ed)-eligible consumers and this project is to provide evaluation and evaluation resources to the *Network* and SNAP-Ed intermediaries so that they, in turn, can more effectively provide nutrition education to the SNAP-Ed eligible consumers that they serve, with SNAP-Ed eligibility based on income and other USDA-approved targeting criteria.

#### Income Targeting Data Source:

Intervention sites are verified to reach persons where at least 50% of persons have gross incomes at or below 185% of the poverty threshold based on the following data sources:

*Network* GIS Census Tract Data; School Free/Reduced Price Meal Program Percentages; Participant Data Collection Cards; income-based means-tested

---

<sup>1</sup> The intended audience for this project is staff of Network funded projects.

Federal Assistance Programs; Location-based sites; grocery stores redeeming an average monthly SNAP benefits of \$50,000 or more.

#### **d. Project Description**

The following key strategies will be employed; we will...

- collect program tracking data for all locally health departments and their subcontractors;
- collect program tracking data for other Network contractors providing direct and indirect nutrition education to SNAP-eligible participants
- continue to engage key staff in ongoing work groups to continue to improve the collection of EARS data, incorporating collection of SAAR data into EARS data collection system;
- Complete work with CDPH IT to develop, pilot and implement an online system to collect EARS and SAAR data; collaborate with other SNAP-Ed states where appropriate; and
- maintain and enhance computer systems for collecting and analyzing current process data in full compliance of State information technology requirements until the transition can be completed.

Key Educational Messages: N/A

Intervention Sites: All

Projected Number of Contacts:

Direct Contacts: 0<sup>2</sup>

Indirect Contacts: 0

Narrative Summary:

Until the online reporting system (Project #7) is operational all programs funded by *Network* funds will report activities via an Excel-based reporting system, allowing RES staff to produce the Semi-Annual Activity Report for internal evaluation and the EARS for annual reporting to the USDA.

In FFY14, staff will complete work with CDPH IT to develop, pilot and implement an online system for collecting and managing SAAR and EARS data that are integrated with other *Network* progress reports. RES staff will conduct webinar-based trainings for all system users and provide ongoing technical assistance.

Summary of Research

This project is a process evaluation to inform the State and local projects of the annual scope of their activities for reflection and application to the projects in the future, part of the feedback loop for social marketing. The Office of Analysis, Nutrition, and Evaluation identifies process evaluation as useful for tracking

---

<sup>2</sup> This project is intended to collect process evaluation data from *Network* projects, No direct or indirect services will be provided to the target audience of the *Network*.

implementation and identifying if the intervention is being delivered as intended.<sup>3</sup> Baranowski and Stables (2000) found process measures to directly relate to success of nine state 5 a Day projects.<sup>4</sup> Examples of process evaluation and activity tracking from previous years can be found in interim and final reports from FFY 2000- 2012.

With the addition of EARS requirements, tracking documents were modified in 2010 and continue to be updated based on current *Network* reporting requirements. All process data is reported via a single reporting instrument, reducing data collection. These program needs closely model what Michael Quinn Patton<sup>5</sup> calls “Utilization-Focused Evaluation”, which emphasizes that evaluation data should be judged by their utility and actual use. Evaluation priorities are determined by what primary users and stakeholders want to know. All program and fiscal data collected by the *Network* are being assessed for: 1) the ability or gaps in the ability to respond to EARS reporting requirements; 2) the utility of current activity tracking and program data to respond to *Network* evaluation projects that are of high interest, are frequently used, and have a strong theoretical foundation and excluding items that are simply interesting or nice to know; and 3) elimination of duplicative reporting.

Use of EARS tracking is mandated by USDA and was first piloted by California volunteers during FFY05. In FFY08 the *Network* participated in the USDA’s retroactive EARS pilot test. The *Network* has collected and reported data formatted for EARS since FFY10. In order to report such data, the *Network* had to significantly modify their Excel-based data collection process. For FFY14 data collection is planned to move from Excel-based to an online reporting system.

Since the California Department of Education classifies racial and ethnic data differently than the Federal Government, some work was not included at all in the EARS report and other work which theoretically fit the Direct Education classification was either not counted or classified as Indirect Education. The Department of Education was able to provide the *Network* with the school demographic data beginning in FFY10 and will continue doing so in FFY14. We have been working diligently with our contractors to correctly classify their activities.

Development of a relational database to collect and analyze EARS and *Network* data is currently in process with implementation expected in FFY14. The *Network* will continue to use the Excel-based reporting system until the online system is implemented.

<sup>5</sup> Quinn Patton Michael. (2002). Utilization-focused Evaluation Checklist. [www.umich.edu/evalctr/checklists](http://www.umich.edu/evalctr/checklists) .

#### **e. Modification of Project Methods/Strategies**

- We have retained the semi-annual data collection period
- The Excel-based system is operational and we will continue to use it until the online system is implemented.
- A robust contractor workgroup was formed to provide feedback on the modified Excel-based system in 2010 and will be our beta testers once the online system is ready to pilot in July 2013.
- We will continue to review and modify as necessary all *Network* fiscal and programmatic data that are collected. Duplications will be eliminated and data sources linked wherever possible

#### **f. Use of Existing Educational Materials**

No educational materials will be purchased; existing data collection materials will be modified to reduce contractor workload.

Annual trainings regarding semi-annual and final reports and the Activity Tracking Forms are conducted on a regular basis throughout the fiscal year. Supporting instructive documentation was also developed and continues to be disseminated.

#### **g. Development of New Educational Materials**

No new educational materials will be developed; as needed, new data collection training materials, which currently do not exist, will be developed for use with an online EARS data collection system.

#### **h. Key Performance Measures/Indicators**

- Activity tracking and social marketing program summary data reported by local health departments, their sub-contractors, and all other *Network for a Healthy California* contractors providing direct and indirect nutrition education to the target population.
- Fiscal data related to EARS
- Data for EARS: direct education population demographics, direct education program data, social marketing data, indirect education data

### **Evaluation Plan**

#### **See also**

- **1a FFY 2014 Evaluation Plan\_EARS**
- **1b FFY 2014 Evaluation Plan\_SAAR**

All *Network* local and regional projects must report their activities in an ATF or online system once it is implemented. State staff analyze the data to produce the SAAR and EARS.

Evaluation type: Primarily process evaluation

Questions that will be addressed:

- Activity Tracking Form (ATF) – What individual events with what populations are conducted by the local agencies?
- Semi-Annual Activity Report (SAAR) - How many impressions are generated by the different types of major social marketing activities? How are partnerships growing and changing within the *Network*?
- Data streamlining- How can we consolidate and eliminate some of the information we are currently collecting from contractors to reduce contractor burden when the EARS online system is implemented?
- Educational and Administrative Reporting System (EARS) – What is the best way to collect programmatic EARS data in lieu of a web-based system? What populations is the *Network* serving? Through what type of education? In what settings? What does providing nutrition education cost?
- Beta-testing EARS data collection: What are the issues involved in collecting the following, and how can they collaboratively be resolved: unduplicated person counts, direct education population demographics, direct education program data, social marketing data, and indirect education data?

Design and Measures:

The major measurement instrument being used is the ATF until the online system is implemented, with activity information entered on an ongoing basis and automatically calculated onto summary spreadsheets (separately) for the SAAR and for EARS. RES staff will work with the EARS data directly from the ATFs until the online system is implemented. At that time, the online system will replace the ATFs as the data collection tool.

Plans for using the results:

A four-year trend report of results of the SAARs for the State and for the 11 *Regional Networks* was prepared in FFY 2013 and was provided to the contractors and local health departments in the USDA FFY 12 Final Report to enable them to get a better picture of where as a whole, their efforts had been directed since FFY 2009. A carefully designed online system will enable each contractor to receive a report of its own population, setting, and program picture.

Decisions resulting from data streamlining will change the reporting requirements from contractors as the online system is developed and implemented, hopefully reducing respondent burden and maximizing use of data that are reported.

Previous evaluation:

- Previous process and activity tracking reports can be found in previous year-end reports to USDA; the SAAR is currently being collected in and will be tabulated for FFY 2014.
- The local and the RN SAARs were subjected to a content review in FFY 06, which resulted in a reduction of reporting requirements by nearly half in FFY 07 and a new, automated activity tracking form that greatly reduced the person-hours required to compile summary reports.
- Evaluation using the EARS system has involved pilot tests conducted for USDA in FFY 05 and FFY 08, Data for the fiscal questions on EARS (Q9 and Q10) were compiled for the first time in FFY 07 and have been submitted routinely starting with our Final Report for FFY 2008. The complete EARS report was submitted for the first time in FFY10 with a successful submission each year since.

#### **4. Coordination Efforts**

Detailed information on *Network* local contractors' partnerships was added to the FFY13 ATF. The partnership log serves as a directory and includes: partner organization name, role of the partnership, focus of the partnership, type of partner, and general contact information. Additionally, each time an entry is made in the ATF, contractors report the partner organization in attendance and describe the role of the partner for each particular event. This will assist programmatic staff in understanding the *Network's* reach beyond its funded projects as well as the frequency and types of *Network* events partners are involved with. It demonstrates the linkages among organizations working in the same geographic area focused on nutrition education and obesity prevention for the SNAP population.

<b>Title of the evaluation</b>	Semi-Annual Activity Report (SAAR)
<b>The project or projects with which it is associated</b>	Local Health Departments, Local Food Nutrition Education, all other Local Network Projects
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Process
<b>The question(s) to be addressed by the evaluation</b>	<p>What changes occurred in the extent and type of social marketing activities conducted by <i>Network</i> local projects during this fiscal year?</p> <p>-- Will there be an increase in reach, impressions, and type of activity from <i>Network</i>-funded activities such as retail outlet interventions, farmers' market interventions, nutrition education classes and promotional events?</p> <p>-- Will there be an increase in the number of impressions generated from <i>Network</i> advertising on television, radio and print outlets?</p> <p>Will there be changes indicative of strengthening of partnerships among <i>Network</i> local contractors?</p> <p>Will local contractors observe any changes to environment and policies for physical activity, food security and healthy diet due to <i>Network</i> consumer nutrition education?</p>
<b>The approach to conducting the evaluation, including scope, design, measures and data collection</b>	Over 130 <i>Network</i> contractors are projected to complete the SAAR which is a planned survey instrument based on contractors' conduct of allowable activities each fiscal year. Data are self-reported into an Excel document called the Activity Tracking Form (ATF), which uses auto-calculation to summarize each contractor's <i>Network</i> activities, including contacts and by type of activity. In FFY14 data collection is scheduled to be done via an online reporting system, eliminating the use of Excel. State staff conduct the data analysis; data from each contractor is combined to produce an annual summative report.
<b>Plans for using the results</b>	Provide feedback to local contractors and regional lead agencies about the extent and type of their social marketing activities; demonstrate the efforts made to achieve <i>Network</i> goals and objectives through social marketing. Determine the <i>Network</i> 's reach, impressions and trends in impressions. Evaluate the relationship between social marketing activities and statewide changes in behavior over time.
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	Yes, most recently in FFY12.
<b>Project cost</b>	There are no additional costs. This project uses existing evaluation resources and staff.

Evaluation Plan  
FFY2014  
Research Evaluation Unit (Project #6)

<b>Title of the evaluation</b>	Local Food and Nutrition Education Projects - outcome evaluation
<b>The project or projects with which it is associated</b>	<ol style="list-style-type: none"> <li>1. Asian Health Services</li> <li>2. California State University, Chico, Research Foundation - SCNAC</li> <li>3. Community Alliance with Family Farmers</li> <li>4. Community Partners for Rootdown LA</li> <li>5. Education and Leadership Foundation</li> <li>6. FAME Assistance Corporation</li> <li>7. Familia Center</li> <li>8. Family HealthCare Network</li> <li>9. San Ysidro Health Center</li> <li>10. Vista Community Clinic</li> </ol>
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Outcome Evaluation
<b>The question(s) to be addressed by the evaluation</b>	Are fruit and vegetable consumption and/or factors associated with increased consumption improving among SNAP-Education eligibles participating in the nutrition education provided by LFNE projects?
<b>The approach to conducting the evaluation, including scope, design, measures and data collection</b>	All LFNE projects are expected to conduct outcome or impact evaluation in their second and third year's of funding. Projects are provided technical assistance during their first year to finalize their evaluation plans. In most cases, projects conduct pre- and post-survey outcome evaluation with participants of multiple nutrition education sessions. However, some projects elect to conduct post-surveys only and several projects use verbal interviews or interactive verbal group sessions to assess outcomes, in part, due to low literacy levels. Most LFNE projects also elect to collect qualitative information regarding project outcomes either through focus group discussion or in-depth interview. Each LFNE project will present orally and submit a written retrospective report summarizing their projects' major accomplishments- including evaluation findings- and lessons learned over the three years of SNAP-Ed funding.
<b>Plans for using the results</b>	Outcome evaluation results are used to assess progress toward the intended results and identify areas for possible improvement. All LFNE projects in their second and third years must report at least one way they have used the evaluation results to adjust project implementation.
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	These ten LFNE projects were first funded in FFY 12. They began conducting outcome evaluation in FFY2013 and will continue to do so in FFY2014.
<b>Project cost</b>	\$55,000 (evaluation technical assistance).

**STATE LEVEL PROJECT SUMMARY**  
**FFY 2014**

**1. Goals & Objectives** (*See State Level Objectives*).

**2. Project Title:** Technical Assistance and Resource Development for Targeting, Program Planning, and Evaluation for SNAP-Ed Providers  
Multiple Projects – Includes:  
LFNE Evaluation Technical Assistance Consultant - \$55,000 – PHI  
CX<sup>3</sup> School Site Scoring Tool Pilot - \$36,500 – PHI

**a. Related State Objectives**

Related State Objectives include #1, #2, #3, and #4.

**b. Audience**

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for African American, Caucasian/White and Latino/Hispanic

Languages: English and Spanish

Ages: All ages

**c. Focus on SNAP Eligibles**

All of the activities funded through the *Network* are designed to reach eligible consumers. This project is to provide evaluation and evaluation resources to the *Network* and other SNAP-Ed intermediaries so that they, in turn, can more effectively provide nutrition education to the eligible consumers that they serve, with eligibility based on income targeting.

Income Targeting Data Source:

Besides activities at location-based means-tested sites and high-volume grocery stores, site verification of 50% or greater, SNAP-Ed eligibles participating in projects participating in collection of tracking data will be based on the following data sources:

*Network* GIS Census Tract Data; School Free/Reduced Price Meal Program Percentages; and WIC Income Guideline Qualifications.

**d. Project Description**

**Key Strategies:** Develop and disseminate information regarding best evaluation practices and standardized methods and tools for contractors using reports, group approaches and online systems; provide guidance, direction, and feedback on best strategies for practical evaluation strategies: Policy/Systems/Environmental Change; CX3; case studies of Local Food and Nutrition Education

project accomplishments; development of outcome/ impact evaluation templates, survey instruments, and other evaluation tools.

**Key Educational Messages:** The key educational message is the importance of using well thought out methods and standardized, high quality protocols and tools and expert technical assistance for planning and evaluation purposes. The focus will be placed on strategies to improve program planning, targeting, priority setting, and evaluation through standardized methods and tools and the identification of promising practices. Messages will be directed to contractors and will encompass documenting promising practices for implementation of nutrition education in a variety of settings. However, recognizing that some contractors have felt limited by the validated survey method of evaluation, we will also explore additional, more participatory, more qualitative evaluation methods on which to provide technical assistance, still within the constraints of best practices as taught by practitioners in the field.

**Intervention Sites:** Sites include program personnel among all contractors, in particular LHD and LFNE staff working with SNAP-Ed programs and interventions.

**Projected Number of Contacts:**<sup>1</sup>

Direct Contacts: 5,388  
Indirect Contacts: 360,210

**Narrative Summary:**

- Training will be provided to LHDs to understand the new policy, systems, and environmental change (PSE) direction of SNAP-Ed funding. Drawing primarily from *SNAP-Ed Interventions: A Toolkit for States* and the Center for Training and Research Translation, the *Network* has identified thirteen recommended PSE strategies that support nutrition education and healthy community change. A PSE Resource Guide is being created to support LHDs in identifying evidence-based obesity prevention interventions, including relevant assessment tools. The Research and Evaluation Section will provide technical assistance in creating an evaluation plan for each of the two PSEs chosen by each LHD. The basic framework for the evaluation plans will be the RE-AIM program planning and evaluation tool used by CDC,

---

<sup>1</sup> Direct includes an estimated 44 Local Health Departments with 2-3 staff each for at least 88 health department staff CX<sup>3</sup> trained and technical assistance provided. In addition, in FFY14, 4-6 new LHDs will be trained in CX3 and 6 LHDs will receive training and technical assistance for the School Scoring Pilot Project; for each of these we might expect a team of 10 community surveyors, for a total of at least 40 community members directly involved with the project. Using the most detailed case study available from 07-08, it is indicated that about 100 low-income community members in that neighborhood were reached by presentations about findings in order to develop partnerships among community members--with 44 health departments engaged in forums in 3-10 neighborhoods with community members to share recent data, at least 132 neighborhoods might be expected to reach 13,200 low-income community residents indirectly. In FFY14, LHDs will be in the planning stages for their two required PSE interventions. Based on a preliminary estimate, PSE interventions will reach a minimum of 265,260 indirect contacts with SNAP-Ed eligible adults and 69,850 indirect contacts with SNAP-Ed eligible children. The ten LFNE projects are estimated to have 5,200 direct contacts (unduplicated) and 11,900 indirect contacts applying the average of 2.3 persons per household from CalFresh FFY2011 information. Fifty-four LHDs will participate in the online RYD survey to assess capacity and training needs for use of RYD materials.

which includes Reach, Effectiveness, Adoption, Implementation, and Maintenance considerations. Throughout the PSE evaluation process, strong community engagement principles will be central in our approach to effective and sustainable interventions.

- Communities of Excellence<sup>3</sup> (CX<sup>3</sup>) is a program planning framework for evaluating neighborhood food environment factors used to guide resource allocations and potential interventions for the local health department (LHD) grantees. Local health departments are the focus because (1) CX<sup>3</sup> fits within their purview as guardians of the health of residents in their county, and (2) they have multi-year contracts to deliver community-based nutrition education and policy, systems and environmental change strategies. Utilizing this program planning framework, they focus on 3–10 low-income neighborhoods in their county that meet USDA SNAP-Ed eligibility. The standardization across neighborhoods means local health departments' SNAP-Ed projects have an objective way to evaluate how to prioritize funding. For example, as the condition in poor neighborhoods can vary dramatically, local projects may find that one neighborhood warrants more SNAP-Ed resource allocation than others. In addition, local SNAP-Ed staff may promote ideas for improving access to healthier foods in their low-income neighborhoods within the context of tailored nutrition education interventions. In FFY 06 pilot work was begun with six large county health department contractors to implement CX<sup>3</sup> indicator data collection; in FFY 07, six new counties implemented CX<sup>3</sup> and data analysis work began, which led to some instrument modification and simplification; in FFY 08, CX<sup>3</sup> was implemented with nine health department contractors that had renewed *Network* contracts. In FFY09 three more health department contractors implemented CX<sup>3</sup>. In addition, a contractor that had taken part in the FFY06 pilot project expanded into additional neighborhoods using revised tools. In FFY12 twenty-two health departments conducted initial surveys of low-income neighborhoods and in FFY13, sixteen health departments implemented CX<sup>3</sup>, including three that returned to collect follow up data to identify potential changes. In FFY14 an additional 4-6 new counties will begin the CX<sup>3</sup> process, thereby having most *Network*-funded LHDs/counties participating in some stage of the five-year CX<sup>3</sup> process. Technical assistance and training will be provided to all 44 LHDs/counties in the various stages of the CX<sup>3</sup> process from initial assessment, to sharing the data with the community, to implementing CX<sup>3</sup>-data-driven and community-prioritized interventions. Additional statewide CX<sup>3</sup> projects include: analyzing aggregated data from the FFY12 and FFY13 assessing cohorts, analyzing store nutrition data from the California Tobacco Control Program's Statewide Retail Campaign Survey and modifying existing resources for the worksite, childcare, and physical activity environment to incorporate into CX<sup>3</sup>'s suite of environmental assessment tools and developing communications pieces to accompany them.
- Piloting of a CX<sup>3</sup> School Site Scoring Tool with six local health departments will continue into FFY14 from prior work in FFY13 to develop training and

tools, working collaboratively with an established contracting agency. In person interviews conducted by contractor will continue into FFY14 to capture qualitative process data that informs the future of the school scoring analysis.

- Technical assistance will be provided for PSE interventions, Local Food and Nutrition Education (LFNE) projects, *Regional Network* activities, and other *Network* funded projects as needed.
- In FFY2014, ten LFNE projects will be in their third year of program implement. All are required to conduct outcome or impact evaluation according to an approved evaluation plan. LFNE projects are provided evaluation technical assistance in the areas of evaluation planning, instrument select and development, analysis and presentation. The evaluation results are used to assess progress toward the intended results and identify areas for possible improvement.
- Technical assistance will be provided for evaluation of ReThink Your Drink nutrition education initiatives using standardized tools and methods adapted from the Orange County model implemented in FFY11. Analysis of data from surveillance research conducted in FFY13 using Amendment 2 expansion funding will inform statewide and local tools and methods used in FFY14 and technical assistance will be provided to manage analysis process and interpret findings. Findings from surveillance research in FFY13 will be shared with *Network* and local health department staff to create meaningful social marketing and communication materials developed in FFY14 and beyond for low-income audiences. Analysis of data from baseline surveillance will continue in FFY14 and as social marketing campaigns are implemented, previously tested tools and methods from FFY13 will be utilized to evaluate changes in attitudes, beliefs, outcome evaluations and behaviors related to beverage consumption. One beverage assessment tool for youth and several for adults were added to *Network's* Compendium of Surveys in FFY13 and will be valuable for LHDs working on that priority area. An online survey will be conducted with local health departments to assess capacity and training needs of staff for RYD materials. Technical assistance will be provided for creation of the online survey, implementation and interpretation.
- Capacity building and skill development for outcome/ impact evaluation are key components of the technical assistance provided contractors. LHDs need strong evaluation skills to integrate evaluative thinking and activities into an organization.<sup>2</sup> These skills enable LHD staff to articulate evaluation questions, develop and implement sound principles of evaluation, and collect, analyze,

---

<sup>2</sup> Duignan P. Mainstreaming Evaluation or Building Evaluation Capability? Three Key Elements. *New Directions for Evaluation*, 99, Fall, 2003.

report and use findings.<sup>3</sup> Strong, standardized tools are needed to carry this out effectively. Trainings, technical assistance, written materials, and online resources are strategies that the state will use to build evaluation skills. These evaluation materials and training approaches are particularly suited to contractors providing nutrition education for low-income populations because they are inexpensive, easily diffused and readily accessible. Evaluation report templates for ongoing conduct of outcome/impact evaluation were updated in 2013 and are ready for use in 2014.

#### e. Summary of Research

Each of the resources and tools that is part of *Network* projects is well-documented as being a research-based effective program planning, targeting, and/or evaluation adjunct. The community-level indicators that are the basis for CX<sup>3</sup> were developed using the model CDC used to do the same for cardiovascular disease risk factors.<sup>4</sup> Case studies are a well-established approach of qualitative or mixed-method evaluation of public health programs.<sup>5</sup> Marilyn Townsend of UC Davis has established a website to more widely disseminate the evaluation instruments she has developed and validated specifically for the SNAP-Ed low-literacy population at <http://townsendlab.ucdavis.edu/>, including the Food Behavior Checklist (FBC),<sup>6</sup> the Fruit Vegetable Checklist (FVC) adapted from the FBC specifically for the *Network*, and the Fruit and Vegetable Inventory to measure psychosocial determinants, which was shown to be “moderately sensitive”.<sup>7</sup> The FBC has been translated into Spanish and modified to be culturally appropriate; reliability and validity testing of it with a low-literacy Spanish-speaking population was completed during FFY 2008, and the instrument is being used by *Network* contractors. During FFY 2008, the “servings” questions on the FBC and FVC were modified to reflect “cups.” The new self-efficacy work in FFY 11 built upon the foundation established by Henry and colleagues.<sup>8</sup> and was used to validate self-efficacy for fruit and vegetable behavior scales used in the *Network* Benchmark Tracking Survey. PSE-related direction was largely guided by two main resources: the USDA-developed *SNAP-Ed Interventions: A Toolkit for States* and the Center for Training and Research Translation.

#### **f. Modification of Project Methods/Strategies**

Existing methods and strategies will be updated by refining tools and systems as knowledge in the field of evaluation continues to grow and as our contractors usage of the resources indicates need. As additional standardized outcome/impact measures are implemented, new data entry templates for use by local partners will be developed to expedite their evaluation work. When updates occur, improved materials and methods will be disseminated to all contractors along with training and technical assistance to keep them current in the field. As LHDs begin work on their PSE interventions, additional state technical assistance will support this emerging new area of SNAP-Ed work.

#### **g. Use of Existing Educational Materials**

- PSE direction was largely guided by two resources: *SNAP-Ed Interventions: A Toolkit for States* and the Center for Training and Research Translation. PSE assessment tools and interventions were drawn from these growing evidence bases.
- CX<sup>3</sup> Program Planning Tools were developed in-house by the CX<sup>3</sup> Internal work group –These community program planning tools were developed and piloted during FFY 2006. Planning tools include PowerPoint training presentations on how to use the GIS for program planning and how to conduct field surveys, as well as field survey instruments for grocery stores, fast food establishments, and outdoor advertising (English and Spanish). In FFY 2012 a new CX<sup>3</sup> tool, for assessment of the After School Environment in high schools was developed and successfully pilot tested. In FFY14, additional CX<sup>3</sup> tools will be adapted from existing tools such as the *Network for a Healthy California-Worksite Program's* Check for Health for the worksite environment and the *Network-funded Contra Costa Child Care Council's* Self-Assessment Questionnaire for the child care environment. The existing CX<sup>3</sup> Safety and Walkability Survey and the Afterschool environment Tool together provide a strong starting point for the creation of the physical activity environment tool.
- A *Compendium of Survey Instruments* has been developed by the Outcome/Impact Evaluation internal work group. It consists of a handbook outlining outcome/impact evaluation methods and materials and a set of validated and/or well-tested instruments for measuring behavioral objectives and predictors. It is used by contractors to ensure they are using quality evaluation methods. The handbook is produced in-house; a major distribution channel for instruments is online. (English) (See h.)
- Selected participatory evaluation approaches and tools being used by *Network* contractors will also be compiled in a practitioner oriented handbook.

## **h. Development of New Educational Materials**

- A reporting template for PSEs that captures the elements of the RE-AIM is in development and will be ready for contractor use in FFY14. In addition, a comprehensive compilation of PSE resources by channel and for each of the 13 designated Network priority PSE is being assembled to aid the LHDs develop their PSE interventions and evaluation plans.
- New education and communications materials will be developed to support communities in presenting their CX<sup>3</sup> findings and PSE-related work.
- New surveys will be added to the existing *Compendium* to increase the diversity of tools available to contractors; some potential measures have already been identified.<sup>9,10</sup> These would not need to be purchased. The *Compendium* has been updated with more diverse measures to meet contractor needs and address new *Network* priorities; the validated self-efficacy measures are included. If interventions warrant the identification of additional validated measures, we will do so.

## **i. Key Performance Measures/Indicators**

PSE – The initial performance measures will be completion of two satisfactory draft PSE plans that include both an initial assessment and community input and working in conjunction with Network evaluation staff on identifying preliminary components of the RE-AIM templates for both plans.

CX<sup>3</sup>– Local staff implementing project activities will continue to provide input into process and measures as projects move forward with activities. Intensive process evaluation was conducted over the pilot phase in FFY 06-07 with the revision of tools and methods based on results. Following updates to tools and methods, evaluation of training has occurred to gain insight into best methods for informing contractors of community-based approaches. Training evaluation results have continued to show the majority of the ratings of training segments as “excellent”. Evaluation of training will continue as planned for additional contractors and as needed for updates with new staff. An evaluation survey collecting quantitative and qualitative information from contractors who had implemented CX<sup>3</sup> was administered in FFY09. Questions collected “from the field” feedback on the CX<sup>3</sup> training and technical assistance has provided an increased capacity for use of GIS, as well as interpretation and communication of data. Application of findings, future skill building and professional development based on CX<sup>3</sup> experience, and next steps and directions for CX<sup>3</sup> will also be explored. Another evaluation survey is scheduled for implementation in FFY13; findings will be available early in FFY14 to inform future direction of efforts to

---

<sup>9</sup> Townsend MS, Kaiser LL. Development of an evaluation tool to assess psychosocial indicators of fruit and vegetable intake for two federal programs. *J Nutrition Education & Behavior*. 2005;37:170-184.

<sup>10</sup> Townsend MS, Kaiser LL. Brief psychosocial fruit and vegetable tool is sensitive for United States Department of Agriculture nutrition education programs. *J Am Dietet Assoc*. 2007 Dec;107(12):2120-2124.

improve application and interpretation of data by health departments. In FFY14, LHDs who have completed initial assessments will be re-surveyed.

*Compendium of Survey Instruments* and IOE templated tools - The addition of useful new measures and the extent of usage of surveys will be tracked. Surveys are disseminated in hard copy and are also available for download on the *Network* website. A thorough monitoring system tracks the surveys that are used and the progress of contractors in implementing their evaluation plan, collecting, processing and analyzing their data, and reporting on their findings. Contractor training on use of templated tools will be provided both in-person and on the web. Training evaluation that examines meeting training objectives and acquiring skills-based competencies will be evaluated.

### **3. Evaluation Plan**

This State Level Project Summary does not have an outcome evaluation plan per se as a whole since all the activities proposed for this project are themselves either evaluations or resources that enable us to determine what technical assistance is needed and how best to provide it. Informal and formal methods will be used to solicit contractor feedback on whether they have the evaluation resources they want and how to satisfy technical assistance needs. Telephone calls, emails and interviews will provide information about the type of assistance contractors are seeking. Online and hard copy surveys and group level oral evaluation following technical assistance workshops and events will assess utility. There are continued opportunities for use of significant local health department feedback, such as the CX<sup>3</sup> “from the field” survey which has provided direct feedback on the training and technical assistance they receive.

### **4. Coordination Efforts**

Sharing of tools and methods will continue among other federal and state-funded programs working with the same target population. Results from the evaluation of combined intervention efforts by the *Network*, CDSS, and UC-FSNEP will be shared and disseminated to improve message delivery to the SNAP-Ed target audience. WIC and CDE staff contributed to the development of indicator items for CX<sup>3</sup>. During FFY 2008, CX<sup>3</sup> instruments were modified so as to allow analysis about the extent of availability of foods on the new WIC food package in different types of retail food stores. With the new food package implementation early in FFY 2010, as CX<sup>3</sup> contractors went into the field again, the identification of presence or absence of WIC foods in neighborhood stores took on even greater significance, with findings shared with staff at the state WIC office in FFY2011. Case study report dissemination will contribute to better coordination by directly responding to the need identified in the United States General Accounting Office (GAO) report for more systematic sharing of lessons learned

across nutrition education efforts.<sup>11</sup> The Spanish language Food Behavior Checklist and the earlier English language Food Behavior Checklist represent a direct collaboration of *Network* and UC-FSNEP to produce evaluation instruments needed by both programs. The validation of self-efficacy instruments for this population has similar utility. The updated Compendium available on the *Network* website is a resource available to CDSS and UC-CalFresh for their work as well. The Retail Store Environment is becoming a popular topic with organizations looking to create healthier communities. Coordinated efforts have begun with the California Tobacco Control Program's Retail Campaign, the *Network's* Retail Program, and other grant-funded community projects.

---

<sup>11</sup> U.S. General Accounting Office. (2004). *Nutrition education: USDA provides services through multiple programs, but stronger linkages among programs are needed* (GAO-04-528). Washington, DC: U.S. Government Printing Office.

<b>Title of the evaluation</b>	Benchmark Tracking Survey of Low-Income Segments
<b>The project or projects with which it is associated</b>	Media and Communications
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Outcome
<b>The question(s) to be addressed by the evaluation</b>	What levels of media campaign recall for TV, radio and billboard are present among SNAP recipient and SNAP eligible mothers? How well did the media campaign perform among SNAP recipient and eligible mothers and is it related to behavioral determinants such as fruit and vegetable consumption? How does the campaign recall vary between target populations and sub-populations? What are dietary and physical activity practices among SNAP recipient and eligible mothers relative to media exposure and psychosocial determinants? What are their knowledge, attitudes, and beliefs toward healthy eating and physical activity? What percent of SNAP recipient and eligible mothers have knowledge of recommendations to make 1/2 their plate fruit and vegetables?
<b>The approach to conducting the evaluation, including scope, design, measures and data collection</b>	The Benchmark Tracking Survey was designed to evaluate the media campaign among the target populations of SNAP recipient and eligible mothers. Computer-assisted telephone interviews are administered to mothers from randomly selected households from a list of households participating in SNAP for 1,000 of the participants. The surveys include questions regarding the campaign ads to test for recall levels. The surveys collect data on dietary and physical activity behaviors, specifically fruit and vegetable consumption. Questions are administered to learn knowledge of the Dietary Guidelines for Americans and MyPlate. Sections of the survey include other questions that assess self-efficacy for consumption of fruits and vegetables and physical activity as well as social norms related to healthy eating and physical activity practices. Other questions such as access to workplace programs, exposure to non-ad interventions and interest in nutrition education resources are included. A second survey, omitting the recall questions, but retaining the others, is administered 3-4 months after the initial survey to see if behavioral and psychosocial changes continue after the respondents have had a chance to integrate the media messages more fully.
<b>Plans for using the results</b>	Survey data identify Network progress towards meeting Plan objectives. The results will be used to inform <i>Network</i> programs and campaigns to assist in program planning and refinement. Survey data help guide the development and enhancement of the <i>Network</i> media and communications strategies and its targeted statewide social marketing campaigns. Results inform the needs assessment component of the <i>Network's</i> annual plan, are presented in fact sheets and topline reports, and are used for presentations at state and/or national conferences.
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	The Benchmark Tracking Survey has been conducted annually since 2004. Each year the survey is conducted, it is updated to reflect current issues, and existing questions are refined. The most recent survey was conducted in 2012.
<b>Project cost</b>	\$350,000

## STATE LEVEL PROJECT SUMMARY FORM

### Project #3

UC Berkeley, Center for Weight and Health

FFY 2012 Augment Funding through December 2013

1. **Goals & OBJECTIVES** (See *State Level Objectives*).

2. **Project Title: Innovative Intervention, Evaluation Planning, and Resource Development**

a. **Related Objectives**

Objectives 5 (training) and 7 (evaluation)

b. **Audience:** Intermediaries providing services to Californians participating in CalFresh and other SNAP-Ed eligibles.

Gender: Male/Female

Ethnicity: All ethnic groups

Languages: Primarily English and Spanish

Ages: Adults, teens, children

c. **Focus on SNAP Eligibles**

All activities funded through the *Network* are delivered through intermediaries who provide nutrition education and related support to SNAP-Ed-eligible adults and children and are designed to reach low-income, SNAP-Ed-eligible populations with nutrition education messages that will increase fruit and vegetable consumption and physical activity. A number of the activities in these projects are designed to enhance the capacity of these intermediaries to provide and evaluate nutrition education including public health approaches. Evaluation results will be shared with Nutrition Education Obesity Prevention (NEOP) decision makers to inform the FFY 2013 planning process.

In addition, SNAP-Ed consumers will be reached directly through the Mother's Taking Action pilot project.

Income Targeting Data Source for Intermediaries

Contractors and other staff serving low-income persons meeting the following criteria: 2005-2009 American Community Survey Census Tract Data; CDE Free/Reduced Price Meal eligibility data; School and Child and Adult Care Food Program (CACFP); WIC Income Guidelines; MediCal data, and other proxy measures such as food banks and CalFresh offices.

Income Targeting Data Source for Mothers Taking Action

Sites in San Joaquin and Ventura Counties qualified through American Communities Survey 2005-2009 census tract data and other SNAP-Ed qualified sites such as public housing, food banks/food pantries and schools with 50 percent or greater Free/Reduced Price Meal eligible students.

#### d. Project Description

##### **Key Strategies:**

Technical assistance; literature review and synthesis; plan development; formative and process research/evaluation; surveillance data analysis; synthesis of findings; report writing and dissemination.

##### **Key Educational Messages:**

Bringing best-practice public health intervention and evaluation approaches to integrate with SNAP-Ed practices; effective SNAP-Ed-eligible parent empowerment strategies for educating change leaders to promote healthy eating; dietary quality, fruits and vegetables, healthier eating (general), nutrition education integrated with physical activity promotion, food shopping/preparation, *Dietary Guidelines for Americans, MyPlate* etc.; linkage between neighborhood environment and risk factors for obesity; promotion of healthy neighborhood environments; leadership development to promote healthy communities.

##### **Intervention Sites:**

SNAP-Ed intermediaries that are reaching qualified participants in multiple sectors including: schools; after school programs; adult education and training sites; community-based organizations; community clinics; community centers; community youth organizations; Head Start programs; child care centers and family day care homes; emergency food assistance sites; farmers' markets; festivals; food stamp offices; food banks/pantries; community gardens; grocery stores and markets; health care facilities/providers; housing projects; libraries; restaurants/diners/fast food establishments; parks and recreation centers; public health departments; summer meal service sites; and WIC sites.

##### **Projected Number of Contacts:**

We will potentially reach—directly and/or indirectly—every *Network* contractor in the state. Currently there are about 100 *Network* contractors in California, as well as additional UCD-FSNEP county educators who provide direct nutrition education with an estimated total of nearly one million SNAP-Ed-eligible adults, teens and children.

##### Direct Contacts:

- 1,200 (Mothers Taking Action), with mothers participating in peer-to-peer groups
- 50 direct contacts (5 projects, with at least 5 parents and 5 staff per project) through the overarching parent empowerment project

##### Indirect Contacts:

- 3,000 (Mothers Taking Action) - estimated additional 3,000 family numbers (based on CDSS estimate that 2.5 persons per CalFresh household)

##### **Narrative Summary:**

*Network* Special Projects represent a wide range of channels and partners and are designed to complement and work synergistically with the *Network's* funded projects, *Fruit, Vegetable and Physical Activity Campaigns*, and other partnership initiatives. The Special Projects act as an incubator for new ideas and channels, working to enhance, focus, and channel the *Network* Leadership infrastructure to help expand and strengthen selected priority initiatives and programs focused on the *Network* target populations. As

these projects grow, they will allow the *Network* to extend the reach and effectiveness of SNAP-Ed in California. The three primary goals of this Special Project are to:

1. Improve access to healthy foods and beverages and physical activity by low-income populations in California through assisting the *Network* with its intervention and evaluation plan.
2. Empower parents and build local capacity and leadership for the promotion of healthy eating and physical activity including improving food and physical activity environments to augment SNAP-Ed services.
3. Build capacity among leadership organizations and *Network* partners in state-of-the-art and emerging evidence-based community intervention approaches to promote healthy eating and physical activities that may be associated with positive behavioral outcomes in low-income Californians as evidenced by trends in the California Health Interview Survey (CHIS) data.

Each of these objectives is supported by specific required activities with clear deliverables as outlined below:

1. By September 30, 2012, provide assistance to the *Network* and conduct specific formative research tasks on its integrated *Network* intervention and evaluation plan for FY 2013.
2. By September 30, 2012, expand the Mothers Taking Action pilots in San Joaquin and Ventura Counties and evaluate pilot using a survey and peer leaders dialogue sessions with SNAP-Ed eligible mothers to assess the process of ongoing *Network*-funded interventions to empower parents as community leaders and change agents and disseminate findings on best practices and recommended applications for various models.
3. By September 30, 2012, evaluate if a concentration of *Network* activities is associated with positive behavioral outcomes in low-income Californians through secondary data analysis of California Health Interview Survey data.

The Special Projects will include:

- **Healthy Foods, Beverages and Physical Activity Intervention and Evaluation Plan:**

The purpose of this project is to create an evaluation plan guided by expert critiques for FY 2013. The new guidance will be released in January 2012, and this work will begin then. The goal of the planned intervention and evaluation plans will be to improve access to healthy foods and beverages and physical activity by low-income populations in California. Intervention and evaluation plan development will be done in conjunction and collaboration with Network Leadership, Network research staff, and the expertise of researchers at the University of California, Berkeley - Atkins Center for Weight and Health. Based on extensive knowledge of the literature and state-of-the-art on-going interventions in the fields of nutrition and food insecurity, obesity prevention, health disparities, and community-based initiatives, UCB-CWH senior staff will attend meetings with *Network* leadership and research staff on intervention and evaluation plan development, advise on critical research needs and priority directions for the state; provide reviews of relevant literature and best practices across multiple settings (e.g., childcare, schools, local health departments, communities) as needed; identify technical assistance needs and relevant intervention and evaluation tools; and assist in crafting an evaluation plan for

intervention activities. UCB-CWH senior staff will also disseminate the evaluation plan to experts in specific content and research methodology, elicit critiques from the external experts, and facilitate discussions with Network staff on how to incorporate expert recommendations. This planning will enable the *Network* to integrate intervention and evaluation activities to more effectively and cohesively target SNAP-Ed-eligible populations.

- **Process, Formative, and Outcome Evaluation of Parent Empowerment Project:**

The purpose of this project is to assess several on-going *Network*-funded programs designed to empower parents as community leaders and change agents to improve healthy eating and active living practices and community food and physical activity environments. Ongoing projects include: Central Valley Promotora project; Mothers Taking Action; Local Food and Nutrition Evaluation (LFNE) peer-educator based projects; Latino and African American campaigns' Community Health Leaders. The various projects have involved different implementation models. An integrated evaluation will be undertaken to identify best practices and make recommendations for future activities to maximize the potential of parent empowerment for community change in future *Network* activities. Working in collaboration with UCB-CWH, first a review of relevant literature for best practices in parent empowerment will be completed, followed by site visits for direct observations and key informant interviews with project staff and parents. The strategies from the various models will be examined for potential impact including community change. Most promising factors will be identified and recommendations made for applications of the strategies from the various models.

In addition, the Mothers Taking Action pilot begun in FFY 2011 will be expanded to reach an additional 1,200 SNAP-Ed eligible moms. This community engagement and leadership development approach is tailored to local health departments which have conducted a Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX<sup>3</sup>) assessment. This model is being tested with San Joaquin County Public Health Services and Ventura County Public Health Department. SNAP-eligible mothers are supported to take on leadership roles by leading peer learning group sessions which incorporate local data on the seriousness of the obesity epidemic, what steps mothers are taking and what each participant will do after the session. Formal outcome evaluation will be conducted to determine what effects participation has on the personal and family practices and communities of leaders, volunteers and session attendees. (Note: Leadership training will continue to be provided by the California Food and Justice Coalition through the Public Health Institute (PHI) contracts see Section VIII.)

- **New Surveillance Project: Comparison of people in census tracts with and without Network interventions:**

The purpose of this project is to maximize the opportunity for a natural experiment by comparing outcomes of people in low income, SNAP-Ed eligible census tracts with and without *Network* interventions using secondary data analysis of California Health Interview Survey (CHIS; <http://www.chis.ucla.edu/>) data. A retrospective evaluation led by CDPH and supported by UCB will examine if a concentration of *Network* activities is associated with positive dietary outcomes related to fruit and vegetable consumption and physical activity. A prospective evaluation led by UCB, based on a conceptual framework also to be developed by UCB, will be developed to examine behavioral

outcomes related to obesity in low-income Californians. This analysis could be considered a baseline assessment for future natural experiments. Multivariate analyses of 2009 CHIS data will be conducted to compare low-income adults, adolescents and children living in census tracts served by *Network* non-advertising interventions with those in non-intervention comparison tracts. Census tracts that have been exposed to *Network* interventions will be selected by cross referencing tract numbers with *Network* program data. A multi-level analysis can demonstrate the influence of environmental variables on an individual outcome; for example, does the level of *Network* program activity influence BMI, fruit and vegetable and sugar-sweetened beverage consumption, and/or physical activity level. The analysis would be conducted by the UCLA Center for Health Policy Research with expertise in CHIS analysis with input on the evaluation of nutrition and obesity measures from UCB-CWH.

#### e. Summary of Research

- The *Network* builds its advertising campaign around Champions for Change mothers, role model low-income women who have made personal life changes to improve eating and physical activity behaviors. Peer-led nutrition education models have proven effective at improving knowledge, attitudes, and behavior of target audiences, all while remaining cost-effective.<sup>1</sup> Findings suggest that positive changes in knowledge, skills and behavior may be realized by both the audiences receiving nutrition education as well as the peer educators themselves.<sup>1,2,3</sup>
- As emphasized recently in numerous highly influential reports,<sup>4,5,6,7,8</sup> improving eating and physical activity behaviors requires comprehensive, multi-sectoral approaches that address both education and social norms as well the environment within which food and activity opportunities occur.
- Studies have shown that improvements in health outcomes is best achieved when community members are empowered to work collectively to exert positive influence

on their health environment.<sup>9</sup> Further, impacts on behaviors are greatest when nutrition education messages are linked to reinforcing policy and environmental change strategies.

- Research demonstrates that the proportion of the *Network* target audience who has engaged with school or community leaders/neighbor groups to encourage positive change is very low—10-20 percent for schools and 4-9 percent at the community level.<sup>10</sup>
- Likewise, while online databases are available that provide sector-specific listings of nutrition education resources (e.g., the USDA's Nutrition Education website<sup>11</sup>), there is a need for a searchable database that can be used to identify resources according to specific criteria (e.g., by target messages, usability and relevancy for various population groups, efficacy in achieving behavior change).

**f. Modification of Project Methods/Strategies**

Not applicable, as these are new projects, except for Mothers Taking Action. In FFY2012, the Mothers Taking Action training materials and implementation strategies will be modified based on the lessons learned and evaluation findings from FFY2011.

**g. Use of Existing Educational Materials**

Parent empowerment educators use a variety of *Network*-approved nutrition education materials, including *Network's Toolbox for Community Educators*

**h. Development of New Educational Materials**

Manual on use of nutrition education database.

Training for intermediaries on promoting policy/environment best-practices linked to nutrition education.

**i. Key Performance Measures/Indicators**

A more detailed list of evaluation measures for specific projects are listed in the evaluation plans.

Below is a summary list of the types of measures used for these projects:

- Assistance with updated and cohesive *Network* intervention plan for FY2013;
- Assistance with and formative evaluation of, an integrated evaluation plan;
- Number of evaluation tools/protocols recommended to *Network*-funded projects;
- Number of intermediaries recruited to assess parent empowerment best-practices;
- Number of intermediaries interviewed to assess parent empowerment best-practices;
- Number of intermediaries observed to assess parent empowerment best-practices;
- Number of best-practice parent empowerment strategies identified;

### 3. Evaluation Plan

<sup>10</sup> Bye, L. and Wertlieb, S. *Network for a Healthy California 2009 Tracking Survey*, Field Research Corporation, San Francisco, CA, April 2010.

<sup>11</sup> Available at:

[http://healthymeals.nal.usda.gov/nal\\_display/index.php?info\\_center=14&tax\\_level=1&tax\\_subject=526](http://healthymeals.nal.usda.gov/nal_display/index.php?info_center=14&tax_level=1&tax_subject=526).

Detailed Evaluation Plans are provided on attached individual Project Evaluation Forms:

Program Evaluation Tools include:

- Scope of Work (SOW) objectives that are specific, measurable, appropriate, realistic and time specific;
- Final report of accomplishments on the SOW objectives.

Project Evaluation Tools and Analyses include the preparation of the:

- Qualitative, formative evaluation of the integrated intervention and evaluation plan through expert critiques
- Parent empowerment intervention site visit checklist and key informant interview guide; activity process tracking documenting implementation, challenges faced, major accomplishments and areas for future strengthening, coordination and expansion;
- Mothers Taking Action interview guides pertaining to recruitment, training and support of the peer leaders, effectiveness of the dialogue sessions and what effect they had on session attendees' practices and communities;
- Multivariate analyses of 2009 CHIS data comparing dietary, physical activity and obesity-related risk behaviors in low-income adults, adolescents, and children living in census tracts served by *Network* non-advertising interventions with those in non-intervention comparison tracts

#### **4. Coordination Efforts**

The *Network* will share these project products and outcomes when participating in the development and implementation of the California State Nutrition Action Plan to increase fruit and vegetable consumption in SNAP-Ed target populations. State agencies collaborating: CDPH (WIC, *Network*), CDSS (Food Stamp Program and Temporary Emergency Food Assistance Program), CDE (Child Nutrition Programs), UC-FSNEP, and CDFA.

By working with an experienced contractor, and by beginning with a thorough review of evidence-based community intervention approaches to promote healthy eating and physical activity, coordination of message, method and approach will be ensured.

**BUDGET COVER SHEET  
FFY 2013**

<b>Organization: UCB</b>				
<b>Contract Number: TBD</b>				
	<b>FFY 2012</b>	<b>FFY 2013</b>	<b>Amount Difference</b>	<b>% Difference</b>
<b>Personnel Salaries</b>	\$ 66,200	\$ 25,840	\$ (33,206)	-50.16%
<b>Fringe Benefits</b>	\$ 26,811	\$ 9,846	\$ (15,233)	-56.82%
<b>Operating</b>	\$ 673	\$ 1,608	\$ 1,404	208.67%
<b>Equipment &amp; Other Capital</b>		\$ -	\$ -	0.00%
<b>Travel</b>	\$ -	\$ 343	\$ 266	0.00%
<b>Subcontractors</b>		\$ -	\$ -	0.00%
<b>Other Costs</b>	\$ 65	\$ -	\$ (65)	-100.00%
<b>Indirect Costs</b>		\$ 9,278	\$ -	0.00%
<b>Total Budget</b>	\$ 93,749	\$ 46,915	\$ (46,834)	-49.96%
<b>Reason for +/- 5% Difference:</b>				
FFY 2012 is the subcontractor-only cost; it does not show the additional cost for UCB				
Personnel salaries and fringe are lower because in FFY 2013 Network is only seeking assistance from UCB;				
Operating costs are higher because UCB requires off-campus office space (\$1,105) be covered; the subcontractor did not				
Other Costs are lower since there is nothing for conference calls between subcontractor and UCB				
<b>Note:</b> If the Total Federal Share Percentage difference is greater than 5%, please provide an explanation.				
If the total percentage difference is greater than 5% consult your Contract Manager.				
FFY 2012 Network Growth Policy restricts contract growth.

EVALUATION PLAN  
FFY 2014

<b>Title of the evaluation</b>	<i>Healthy Vending Social Marketing in Low-Wage Worksites</i>
<b>The project or projects with which it is associated</b>	<i>Network for a Healthy California-Worksite Program</i>
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Impact evaluation
<b>The question(s) to be addressed by the evaluation</b>	<ol style="list-style-type: none"> <li>1) To what extent does a defined social marketing strategy affect vending sales of healthy items in California low-wage worksites?</li> <li>2) To what extent does it affect overall vending sales?</li> <li>3) To what extent does an increase in healthy items available affect overall sales?</li> <li>4) To what extent does it affect employee attitudes about healthy snack options?</li> </ol>
<b>Key Performance Measures/Indicators - List the key measures/indicators of implementation or performance that you will capture or collect.</b>	<ol style="list-style-type: none"> <li>1) Vending sales data</li> <li>2) Employee attitudes &amp; self-reported behavior</li> </ol>
<b>Describe the approach to conducting the evaluation</b>	
<b>Design</b>	Quasi-experimental design with pre & post intervention data collection, using comparison groups with a 3 month and 6 month follow-up
<b>Data collection and instruments</b>	<ol style="list-style-type: none"> <li>1) Vending sales data</li> <li>2) Employee attitudes &amp; behavior survey</li> </ol>
<b>Data analysis</b>	<ol style="list-style-type: none"> <li>1) comparison between control and intervention groups</li> <li>2) comparison over time</li> </ol>
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	The California Fit Business Kit's Healthy Vending tool has not been formally evaluated for effectiveness. This study will contribute to the scientific literature by having an emphasis on low-wage worksites.
<b>Estimated Evaluation Cost</b>	\$49,500

<b>Title of the evaluation</b>	California Children's Healthy Eating and Exercise Practices Survey (CalCHEEPS), and California Teen Eating, Exercise, and Nutrition Survey (CalTEENS), California Health Interview Survey (CHIS), and Youth Risk Behavior Survey (YRBS)
<b>The project or projects with which it is associated</b>	All local projects that provide SNAP-Ed to children and teens. Surveillance is associated with the overall <i>Network for a Healthy California</i> interventions, particularly those targeting children and youth. These include the <i>Power Play! Campaign</i> , <i>Harvest of the Month</i> , youth empowerment work, Rethink Your Drink, as well as other local and regional efforts focused on children and youth.
<b>The type of evaluation as primarily a formative, process, outcome or impact assessment</b>	Outcome
<b>The question(s) to be addressed by the evaluation</b>	What are California children and teens' dietary and physical activity (PA) practices on a typical day? What is the prevalence of overweight and obesity among California children and teens? What are children and teens' knowledge, attitudes, and beliefs toward healthy eating and PA? What other factors (e.g., school environment, social norms, etc.) relate to children and teens' diet and PA practices and overweight? What is the status of food insecurity among California teens?
<b>The approach to conducting the evaluation, including scope, design, measures and data collection</b>	<p>The CalCHEEPS and CalTEENS were designed to monitor dietary trends, especially fruit and vegetable (FV) consumption, among California children and teens for evaluating their progress toward meeting the Dietary Guidelines for Americans (2010), Healthy People 2020 objectives, and 2008 Physical Activity Guidelines for Americans. FV consumption is collected using a 24-hour recall (simplified method for CalTEENS) which queries about each meal on the previous day, including breakfast, lunch, dinner, and all snacks. This is followed by questions that assess motivations, barriers, knowledge, attitudes, environmental factors, and behavior related to healthy eating and health practices. The California YRBS findings on FV consumption, body weight status, food security, and participation in physical activity are used in conjunction with <i>Network</i> survey findings to examine health behaviors and are useful markers for comparisons with other states and nationally. CHIS does not cover diet and physical activity in the same depth as the <i>Network</i> surveys, but its sample size permits the development of county and county group-level data that cannot be done with data from other state surveys.</p> <p>The CalCHEEPS uses a phone survey with a random dial of SNAP households (participation in the past 12 months), approximately 900 children (ages 6-11) are interviewed. The CalTEENS use a random digit dial (RDD) phone survey (funded with non-SNAP funds) combined with a random dial of SNAP households (participation in the past 12 months); 1,200 teens (ages 12-17) are interviewed. Demographic data include gender, age, ethnicity, education level, household income and size, physical activity level, overweight status, and Supplemental Nutrition Assistance Program eligibility status. Data are oversampled for low-income and ethnic groups, as needed, to provide greater sensitivity for analyzing these underrepresented population segments. CHIS (0-17 years) uses similar RDD methods and YRBS (12-18 years) uses school-based data collection with sample sizes of approximately 12,500 and 1,500, respectively.</p>
<b>Plans for using the results</b>	<p>Survey data identify <i>Network</i> progress towards meeting Plan objectives. The results will be used to inform <i>Network</i> LHDs and their subcontractors to assist them in program planning and refinement. Survey data help guide the development and enhancement of the <i>Network</i> and its targeted statewide social marketing campaigns. Results inform the needs assessment component of the <i>Network's</i> annual plan, are compiled into data tables for public use, are presented in fact sheets and topline reports, and are used for presentations at state and/or national conferences.</p>
<b>Whether or not the project/projects have been evaluated previously, along with the most recent year in which the evaluation was done</b>	<p>The CalCHEEPS and CalTEENS have been conducted biennially since 1999 and 1998, respectively. Each year the survey is conducted, it is updated to reflect current issues, and existing questions are refined. The most recent in-house surveys were conducted in 2013 (CalCHEEPS) and 2012 (CalTEENS), respectively. The surveys will be completed again in FFY 2015 and FFY 2014, respectively. CHIS and YRBS are also conducted biennially in odd years, with the most recent surveys conducted in 2013.</p>
<b>Project cost</b>	\$337,680

# STATE LEVEL PROJECT SUMMARY

FFY 2014

1. **Goals & Objectives** (See *State Level Objectives*).

2. **Project Title:** Youth Surveillance – Statewide, Low-Income Segments  
CalTEENS - \$337,687 - PHI

**a. Related State Objectives**

Related State Objectives includes #1, #2, #3, #4

**b. Audience**

Gender: Female and male (*CalCHEEPS*, *CalTEENS*, CHIS, YRBS)<sup>1</sup>

Ethnicity: All races and ethnicities with specific targeting for CalFresh participants, African American, and Latino/Hispanic populations

Languages: English, Spanish, and select Asian languages

(*CalCHEEPS*, *CalTEENS*, YRBS – English and Spanish); (CHIS - English, Spanish, Chinese [Cantonese and Mandarin], Vietnamese, and Korean)

Ages: All ages, 0-18 years: 0-11 (CHIS), 6-11 years (*CalCHEEPS*); 12-17 years (*CalTEENS*, CHIS); 12-18 years (YRBS)

**c. Focus on SNAP Eligibles**

All of the surveillance funded through the *Network* by USDA SNAP funds is designed to pay only for Supplemental Nutrition Education Program (SNAP) or SNAP-Ed-likely eligible consumers; other sources are sought to pay for the SNAP-Ed 130-185% Federal Poverty Level (FPL) and >185% FPL reference populations.

Income Targeting Data Source:

Income targeting for surveillance activities will be based on the following data sources:

SNAP telephone listing without identifying information; non-identified household size and income; *Network* GIS Census Tract Data; and School Free/Reduced Price Meal Program Percentages. State surveillance includes those with household incomes  $\leq$ 130% FPL.

**d. Project Description**

Key Strategies: This surveillance project collects critical information used in the design, refinement, and evaluation of State SNAP-Ed interventions to ensure the greatest impact on eligible children and adolescents across California. *Network* conducts two statewide surveys to monitor trends and, where possible, compare

---

<sup>1</sup> California Children's Healthy Eating and Exercise Practices Survey (*CalCHEEPS*), and California Teen Eating, Exercise, and Nutrition Survey (*CalTEENS*), California Health Interview Survey (CHIS), and Youth Risk Behavior Survey (YRBS). *CalTEENS* is only partially funded by SNAP-Ed with additional funding provided through other sources such as CDPH, CDSS, etc. CHIS and YRBS data are available at no cost to the *Network*.

changes among SNAP-Ed-eligible population segments of children and teens. This is supplemented with data from two external statewide surveys of the general population (costs are pro-rated), each contributing unique information.

Key Educational Messages: These surveys help SNAP-Ed providers gain a better understanding of dietary quality, physical activity, food security, and weight status among SNAP-Ed audiences. They also assess related beliefs, attitudes, and knowledge and upstream factors that influence these issues such as poverty, social norms, and barriers in the home, community, and schools that influence intervention success on prevention of obesity and other chronic disease.

Intervention Sites: Households statewide with over-samples of SNAP participants and other persons with household incomes  $\leq$ 130% FPL.

Projected Number of Contacts:<sup>2</sup>

*Projected Total Contacts:* **15,624** – 600 (*CaICHEEPS*); 8,945 (CHIS children); 1,200 (*CaITEENS*); 3,379 (CHIS teens); 1,500 (YRBS)

Direct Contacts: **6,058** children and adolescents from very low-income households

*SNAP-Ed (<130% FPL):* **6,058** – 1,041 (CHIS teens); 2,755 (CHIS children); 1,200 (*CaITEENS*); 600 (*CaICHEEPS*); 462 (YRBS)

*Non SNAP-Ed (>130% FPL)*<sup>3</sup>: **9,566** – 2,338 (CHIS teens); 6,190 (CHIS children); 1,038 (YRBS)

Narrative Summary:

This project will focus on obtaining a comprehensive picture of the SNAP-Ed-eligible children and adolescents in California with focus on SNAP participants where appropriate, to maximize the effectiveness of SNAP-Ed and track SNAP-Ed successes. The *CaICHEEPS*, YRBS, and CHIS will wrap up data collection in FFY 2013 and report on findings in FFY 2014; *CaITEENS* will be administered in FFY 2014. State surveillance efforts will focus on testing and refining the survey instruments and sampling methods; administering the surveys including collecting, processing, and cleaning the survey data (*CaICHEEPS*, *CaITEENS*); conducting statistical analysis; and compiling and disseminating the findings. If it is a year when a given survey is not being administered, planning and data analysis activities take place for the next survey and analyses are run on the prior year's data.

---

<sup>2</sup> For *CaICHEEPS*, the estimates provided for SNAP-Ed were based on completes from the 2013 administration. For *CaITEENS*, the estimates provided for SNAP-Ed were based on projections for the 2014 administration. For CHIS and YRBS, the estimate used for SNAP-Ed was 30.8% representing the proportion of California youth 0-17 years <125% FPL based on the American Community Survey 2007-2011 Public Use Micro Sample (PUMS); Needs Assessment (Table 2).

<sup>3</sup> The amount of *Network* SNAP-Ed funding requested has been pro-rated from total survey costs based on a percentage equal to (for *Network* surveys) or less than (for external surveys) the proportion of the sample population coming from households living at incomes  $\leq$  130% FPL. *Network* funding for YRBS is less than 10% and 0% for CHIS --significantly less than the 30.8% of the State youth population representing SNAP-Ed eligible persons (<125% FPL). In all cases, non-SNAP-Ed funding is obtained for the comparison of non-SNAP-Ed samples.

Computer-assisted telephone interviews (CATIs) are administered to children and teens from randomly-selected SNAP households (*CalCHEEPS*, *CalTEENS*). Similarly, CATIs are administered to teens from randomly selected households in the general population (CHIS). For children, CHIS uses CATIs administered to parent proxies. The YRBS includes a statewide representative sample of students in grades 9-12; trained data collectors work with high schools to ensure that the students complete the self-administered questionnaire during a single class period following the administration protocol.

#### Budget Information:

Total FFY 14 Budget: \$337,680

CalCHEEPS FFY 14 Budget: \$0<sup>4</sup>

CalTEENS FFY 14 Budget: \$337,680

#### **e. Summary of Research**

Surveillance is vital to demonstrate impacts of California SNAP-Ed interventions and provide key insights to improve the effectiveness of SNAP-Ed programs that target an estimated population of 12.8 million SNAP-Ed eligible persons ( $\leq 185\%$  FPL) in California.<sup>5,6</sup> It provides the *Network* with the necessary means to develop a thorough picture of the SNAP-Ed-eligible child and teen population in the state of California. The availability of the SNAP-participating household telephone list for random-digit-dialed surveys has made it feasible to survey this segment of the population. See **Section A. Needs Assessment; Needs Assessment Findings. 2. Related Behavioral and Lifestyle Characteristics of Supplemental Nutrition Assistance Program (SNAP) Target Audience** for a thorough description of recent findings from the surveillance surveys described in this project.

#### **f. Modification of Project Methods/Strategies**

State surveillance instruments are revised biennially (*CalCHEEPS*, *CalTEENS*, CHIS) to incorporate the most relevant nutrition, physical and sedentary activity, food security, and weight-related issues facing SNAP-Ed participants and help refine *Network* programs and activities. Literature reviews, scientific peer review, cognitive testing, field testing and periodic formative evaluation studies are used to determine the final sampling techniques, study methods, and survey questions. YRBS was administered for the third time as a statewide survey of California teens in FFY 2013. This instrument collects data on teen risk behaviors and is conducted in most states, allowing investigators to make state-to-state and national comparisons and to track trends. This is particularly important among very low-income teens who report a disproportionate number of risky behaviors.

---

<sup>4</sup> CalCHEEPS is administered biennially. The most recent survey was completed in FFY 2013 and will not be administered again until FFY 2015.

<sup>5</sup> U.S. General Accounting Office. (2004). *Nutrition education: USDA provides services through multiple programs, but stronger linkages among programs are needed* (GAO-04-528). Washington, DC: U.S. Government Printing Office.

<sup>6</sup> McClelland JW, Keenan DP, Lewis J, Foerster S, Sugerman S, Mara P, Wu S, Lee S, Keller K, Hersey J, Lindquist C. Review of evaluation tools used to assess the impact of nutrition education on dietary intake and quality, weight management practices, and physical activity of low-income audiences. *J Nutr Educ*. 2001; 33 Suppl 1:S35-48. Review.

#### **g. Use of Existing Educational Materials**

State surveillance educational materials include survey instruments, data tables, survey reports, fact sheets, research briefs, and presentations. Several survey instruments are available in Spanish (*CaICHEEPS*, *CaITEENS*, CHIS, YRBS). CHIS instruments are also produced in Chinese (Cantonese and Mandarin), Vietnamese, and Korean.

Publications of findings from the 1998-2006 *CaITEENS* and 1999-2009 *CaICHEEPS* are available on the website <http://www.cdph.ca.gov/programs/CPNS/Pages/default.aspx> (See below **Key Performance Measures**). California 2011 YRBS data are only available as unweighted data at this time; data weighted to the California population may be released in the future. 2001-2009 CHIS data are available on the website <http://www.chis.ucla.edu/main/default.asp> and used extensively to provide formative data to counties and *Network Regions* and for statewide planning for special populations. CHIS 2011 data were released online July 2013.

#### **h. Development of New Educational Materials**

Existing materials will be updated as more recent survey data become available (See i).

#### **i. Key Performance Measures/Indicators**

The *Network* maintains an extensive Research and Evaluation Statewide Surveys webpage.<sup>7</sup> The most basic, straightforward performance measure is data tables. The webpage contains completed sets of a minimum of 40 data tables each for *CaICHEEPS* and *CaITEENS* that describe status and changes in dietary intake, physical activity, and food insecurity of California SNAP-eligible children and teens. These will continue to be updated during FFY 2014.

Oral presentations and posters are another key performance measure. In FFY 2013, a poster presentation at the *2013 Childhood Obesity Conference* highlighted the strong positive relationship between eating fast food and consuming empty calories (solid fat and added sugar) among children from households using SNAP. In contrast, those children who reported participating in nutrition lessons at school were less likely to exceed the daily limit for empty calories recommended in MyPlate.<sup>8</sup> At this same conference, a poster was presented from *CaITEENS* data highlighting parental and family factors associated with adolescent BMI, including parent education, frequency of family dinners, and frequency of eating meals with the television on. Appropriate venues for presentation of surveillance data will continue to be identified and employed during FFY 2014.

Publishing findings is a third key performance measure. In FFY 2013, we published a research brief utilizing *CaICHEEPS* and *CaITEENS* that presents differences in fruit and vegetable intake among low-income children and teens

<sup>8</sup> Keihner AJ, Mitchell PR. Fast Food and Lack of Nutrition Education Relates to Empty Calories in Poor Children. Presented at the 2013 Childhood Obesity Conference, Long Beach, CA, June 2013.

from households receiving SNAP based on their access to fruits and vegetables where they live, learn, and play. Effective strategies to improve access to fresh, healthy foods were highlighted for local/regional/county programs working with youth in low-income communities. FFY 2013 publications also included a 2010 *CalTEENS* fact sheet focused on youth empowerment and findings related to teen-focused projects. In FFY 2014, work will continue on a research brief using 2012 *CalTEENS* data to identify differences in frequency and duration of physical activity based on opportunities for adolescents to be physically active. Findings will either be presented by presentation, brief report, or both methods. Production of additional surveillance reports will occur during FFY 2014 if findings indicate a need and staffing permits.

### 3. Evaluation Plan

#### Project for which evaluation is associated:

Surveillance is associated with the overall *Network for a Healthy California* interventions, including local, regional, and media efforts.

#### Evaluation Type:

Surveillance and Outcome: Biennial survey findings evaluate the current impacts of SNAP-Ed. In addition, the ongoing surveillance methods provide evidence of the cumulative effects of *Network* and other interventions over time.

#### Questions that will be addressed

These surveys are used to gain a better understanding of and answer questions about eligible California children and teens' dietary practices (especially fruit and vegetable consumption), physical and sedentary activity, food insecurity, body weight, knowledge and awareness of *Campaigns*, and upstream factors that influence these behaviors including out-of-home eating, social norms, school and neighborhood environments, parent education, poverty status, as well as related knowledge, attitudes, and beliefs. Information about ideas to improve local community and school nutrition environments, current youth advocacy activities related to nutrition, youth empowerment, and perceptions of food marketing are also collected from teens. These findings inform planning, delivery, refinement, and evaluation of *Network* interventions.

Specifically, the data allow us to monitor changes in dietary, physical activity, food security, and weight status trends over time; correlate key behavioral measures with (1) knowledge, attitudes, and beliefs, (2) positive/negative lifestyle choices, (3) supporting/inhibiting environmental factors, (4) demographic and socioeconomic factors, and (5) health indicators and outcomes; and investigate relationships between the target populations and *Campaign* activities.

#### Scope, Design, Measures, and Data Collection:

Four surveillance and monitoring surveys are used for children and teens. Each makes a unique contribution, either due to age group (*CalCHEEPS*, *CalTEENS*, YRBS), comparability with other state and national data (YRBS), ability to follow the population at a more localized level (CHIS), or provide the opportunity to investigate a broad range of topics that relate to the areas of our intervention and communications activity (*CalCHEEPS*, *CalTEENS*).

See **d. Project Description**, Narrative Summary for more details about conduct of these surveys.

#### Plans for using the results

Investigating and compiling results for the SNAP-Ed eligible children and adolescents is the primary focus of this project. Surveillance results will be used to identify key characteristics of SNAP-Ed eligible populations and changing trends; evaluate California's progress toward meeting the 2010 *Dietary Guidelines for Americans*, *Healthy People 2020* objectives, the 2008 Physical Activity Guidelines, and Objectives in the *Network* State Plan; inform and prioritize *Campaign* and program activities; and triangulate data with other similar data sources to contribute to evaluation of the *Network* as a whole, increasing program integrity and impact. They also link knowledge, attitudes, and beliefs to key behaviors and identify disparities and gaps in consumer knowledge and awareness. This enables both the State and local health departments to determine where are best to direct their resources and intervention efforts.

#### Previous Evaluation:

State surveillance has been used to evaluate the *California 5 a Day Campaign* and *California Nutrition Network for Healthy, Active Families* as a whole. Supplemental trend data (California YRBS) comparable to national data (YRBS) supported data triangulation and allowed more latitude to examine emerging issues among SNAP-Ed eligible teens. Large data sets (CHIS) across child and adolescent age groups allowed staff to examine data for SNAP-Ed eligibles in more detail and provide our contractors county strata and regional level data. All of these surveillance systems contain questions to assess fruit and vegetable consumption, which thereby allows us to monitor California's progress towards meeting the 2010 *Dietary Guidelines for Americans*, especially for the fruit and vegetable consumption of SNAP-Ed-targeted populations.

## **4. Coordination Efforts**

The *Network* requests representatives from WIC, Project LEAN, School Health Connections, Maternal and Child Health, the Department of Education, UC-FSNEP, academics, representatives from local and regional projects, and other experts in the field to review and contribute to revisions of the *CalCHEEPS* and *CalTEENS*. Stakeholder interviews or meetings with state-level department personnel, projects, and local contractors for relevant surveys are conducted to gain insight into needs for data collection and reporting activities. Information gained from stakeholder interviews is utilized to develop potential data reporting and topics that are relative to needs of SNAP-Ed-related project activities on the statewide, regional, and local level.

The *Network* staff participates in the users' group committees of external surveys including CHIS. The *Network* collaborates closely with WIC and Maternal and Child Health when preparing for participating on the CHIS Technical Advisory Committees. The *Network* worked collaboratively with Project LEAN and WIC to submit a joint set of questions for child and adolescent dietary and physical activity for the 2011-2012 CHIS Child and Adolescent Questionnaires on behalf

of CDPH. The *Network* also provides SNAP-Ed-eligible population data for WIC programs.

California data on children and teens from the *Network* will be triangulated with similar measures from the CDE's physical fitness test (i.e. Fitnessgram) and the CDPH's Pediatric Nutrition Surveillance System (PedNSS) to reinforce the trends observed in these populations.

*CaICHEEPS* and *CaITEENS* data are available to stakeholders when new legislation is proposed for school meals, e.g., removal of soft drinks from school vending machines or the addition of fresh fruits and vegetables to school meal programs.

Data are widely disseminated through all the mechanisms described under **i. Key Performance Measures/Indicators**, and the *Network* is readily responsive to requests for information from WIC, the California Department of Education, and other members of the State Nutrition Action Plan working group.

**USDA  
POSITION DESCRIPTIONS**

<b>Position Number</b>	<b>USDA Position Title</b>	<b>LHD Position Title</b>	<b>Position Description</b>
1	Accountant/Finance Analyst		Serves as internal auditor and controller. Assists with processing purchase orders, invoices, preparation of vouchers for payment as related to the Network program, as well as monitoring the budgets.
2	Administrative Coordinator		Provides administrative and office support for the project staff and is responsible for the reporting requirements.
3	Administrator (e.g., Director of Programs)		Administer the nutrition education grant agreement and budget, supervising nutrition education staff, attend nutrition education and scope of work related meetings, program planning and participating in the Regional collaborative. Coordinate grant agreement reporting requirements.
4	After School Coordinator/Assistant		Plan and facilitate nutrition education activities for recreation programming, in after school setting for different age groups of children; seniors, teen; special populations, such as mothers with young children and families; nutrition education for special events and workshops. Prepare instructional plans for youth camps and field trips; and nutrition education for special events and workshops. Prepare instructional plans for nutrition activities, collect data related to nutrition education programming, prepare documentation for nutrition education grant agreement; and helps prepare interim and final progress report .
5	Chief Executive Officer		Provides overall guidance for the operations, personnel, and fiscal responsibilities required by the nutrition project.
6	Community Liaison		Conducts nutrition education, physical activity promotion interventions in the community setting. Works with Community Based Organizations to increase the reach of nutrition education interventions to Nutrition Education Obesity Program eligible.
7	Computer Specialist		The Computer Specialist will provide assistance with the nutrition database and tracking system.
8	Contract Manager		Manages the nutrition education grant agreement including budgets, invoices, local share documentation reports, time studies, fiscal reporting and adherence to funding requirements.
9	Coordinator of Other Program (e.g., Teen program, Healthy Start, etc.)		Supervises, coordinates, facilitates nutrition education activities, workshops, special events related to the recreation and community center planning and working together with other community center groups. Supervises staff implementing the nutrition education grant agreement, prepares invoices, prepares and collects documentation, prepares progress reports
10	Curriculum Specialist		Develops curriculum for nutrition education and physical activity interventions in a variety of different channels/venues.
11	Database Coordinator		Develops database used to track nutrition education, physical activity and food stamp promotion interventions in a variety of channels.
12	Dental/Medical Assistant		Conduct one-on-one nutrition education interventions prior to primary care visit.
13	Dietician		Oversees and supervises the nutrition education program including project administration, project coordination, the development of the nutrition education component and materials and other nutrition and physical activity promotion programs.
14	Family Advocate		Provides nutrition education to students and their families, and recruits NEOP eligible for group nutrition/cooking classes. Provides nutrition, physical activity and food stamp promotion resources to students and their parents.

**USDA  
POSITION DESCRIPTIONS**

15	<b>Food Service Worker (e.g., Director, Manager, Asst., Server, Cook)</b>		Assists with planning and preparing healthy food taste tests in the school setting in conjunction with classroom based nutrition education intervention. Works with teachers to increase student, teacher and parent knowledge of the importance of consuming more servings of fruits and vegetables and being active daily. Compiles documentation on taste testing activities and all reporting required for nutrition grants. In some cases, supervises staff that carry out activities.
16	<b>Graphic Illustrator</b>		Develop local promotional nutrition education materials such as community flyers/ newsletters and/or to develop local nutrition/physical activity promotional/educational materials under the direction of the nutrition staff.
17	<b>Health Educator (including Health Aide, Health Promotion Instructor, etc.)</b>		Develop materials and facilitate health education in both group and individual settings. Teaches general nutrition, the importance of fruits and vegetables, and health benefits of proper nutrition and physical activity.
18	<b>Legal Counsel</b>		Assist with development of policies, approval of grant agreements and Memorandums of Understanding and providing legal advice specifically related to the implementation of nutrition education and physical activity promotion
19	<b>Medical Assistant</b>		Demonstrates safe food handling and personal hygiene to prevent food borne illness, provide nutrition-related services to staff, parents, and students and promotes physical activity within the context of nutrition education. (This does not include any medical nutrition therapy).
20	<b>Nurse/Nurse Supervisor/Nurse Aide RN</b>		Provides nutrition and physical activity promotion to students enrolled in nutrition education programs and their families. Supports nutrition education goals through interventions; local, regional, and statewide collaboration and interventions. (This does not include any medical nutrition therapy).
21	<b>Nutritionist/Nutrition Educator/Nutrition Aide</b>		Provides nutrition education to the neop eligible population. Specific duties include: one-on-one general nutrition education, delivery of general nutrition education in a classroom or group setting, staffing health fairs and other community or promotional events where nutrition education messages are delivered, distribution of linguistically and culturally appropriate nutrition education materials, documentation of educational and other encounters, assisting with writing project reports and preparation of quarterly reports, maintaining program reporting and tracking systems.
22	<b>Office Manager/Secretary/Admin Assistant</b>		Provides general clerical support to the Program. Assists in development and maintenance of a data collection system with emphasis on fiscal information. Arranges meetings and trainings, orders supplies and materials, creates correspondence, photocopies, etc.
23	<b>Pharmacist</b>		Promotes nutrition education and physical activity to NEOP eligible population through displays, distributing literature, and supervising staff to update nutrition education bulletin board.
24	<b>Physician</b>		Supervises professional staff including Dieticians, Nurses and Nutrition/Project Coordinators that provide nutrition education and promotes physical activity to NEOP eligibles in a variety of channels. Provides direction on strategic planning of nutrition and physical activity programs to NEOP eligible clients. In some cases, provides nutrition education to NEOP eligibles. (This does not include any medical nutrition therapy).
25	<b>Professor</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for the NEOP eligible community, and students with their families. Supports nutrition education Program goals and local, regional, and statewide collaboration.

**USDA  
POSITION DESCRIPTIONS**

<b>26</b>	<b>Program Assistant</b>		Assists the Project Coordinator with nutrition education program planning and development. Under the direction of Project Coordinator, works directly with individuals and small groups providing curriculum-based, prevention-oriented general nutrition education and physical activity targeted to NEOP eligibles.
<b>27</b>	<b>Project Coordinator</b>		Coordinate program staff and nutrition education activities; plan and follow through on outreach and educational events at health fairs, schools, and other promotional activities; work with schools, churches, farm worker organizations, and community organizations in planning and promoting good health through dissemination of nutrition education materials; actively acquire and develop culturally and linguistically competent nutrition curriculum and educational materials; to promote existing and/or to develop new physical activity promotional components of nutrition education; and expand our existing community outreach program to encompass nutritional components to increase community awareness and knowledge of good nutrition and healthy active lifestyles.
<b>28</b>	<b>Promotora</b>		Works with the Project Coordinator in NEOP communities to conduct nutrition education interventions and participate in local events to promote health eating and physical activity for NEOP eligibles.
<b>29</b>	<b>Recreation Leader</b>		Mentors and trains staff on integration of physical activity into nutrition education interventions. Coordinates one-time physical activity demonstrations. Chooses nutrition and physical activity resources to distribute with nutrition education interventions.
<b>30</b>	<b>Research Specialist</b>		Evaluates nutrition education, and physical activity promotion interventions in a variety of community channels. Methods can include process and impact evaluations, pre and post tests, surveys, focus/discussion roundtables, photo documentaries, case studies, etc.
<b>31</b>	<b>School Administrator (e.g., Principal, Superintendent)</b>		Provides oversight and coordination of the nutrition education conducted in participating classrooms of all schools.
<b>32</b>	<b>Teacher/Student Aide/Assistant</b>		Assists the Nutritionists, Health Educators, and Project Coordinator with nutrition education activities and community events that promote healthy eating and physical activity for low-income families, the target population, Food Stamp recipients and other similar households. 100% direct delivery of educational services.
<b>33</b>	<b>Teacher (preK-12 Classroom, PE, Speech, etc.)</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for students and their families. Supports nutrition education program goals through promotion; local, regional, and statewide collaboration; and close coordination with the Registered Dietitian to train staff.
<b>34</b>	<b>Translator</b>		Translates approved curriculum and materials into Spanish or other languages. Reviews translation for cultural appropriateness. Interprets nutrition education interventions (one-on-one and group) in the community for dietitians, health educators and others .
<b>35</b>	<b>Tutor</b>		Assist teachers and/or students with nutrition education and physical activity promotion.
<b>36</b>	<b>Web Designer</b>		Develops and maintains website containing nutrition education resources, gardening and health related topics and issues.
<b>37</b>	<b>Research Program Director II</b>		Oversees all administrative matters regarding the data collection piece of the project, communicates directly with client regarding fiscal matters and scope changes. Assists in the development or change requests of questionnaire, protocols, and tracking. Supervises administrative and data collection staff.

**USDA  
POSITION DESCRIPTIONS**

<b>38</b>	<b>System Support Manager</b>		Mr. Hamma will maintain the CATI system and associated telephone and data networks used for the project. The CATI system and related components provides data collection, scheduling of call attempts, and precise records of all call attempts to calculate response rates. If needed, he will program additional activities in the CATI system for the project. Mr. Hamma will lead simple and complex programming tasks that pertain to sample uploading, communication media, and telephony.
<b>39</b>	<b>SI1</b>		This position will be responsible for interviewing respondents, following established protocols, set appointments, and utilize refusal conversions when necessary.
<b>40</b>	<b>SI2</b>		This position will be responsible for quality control - monitoring and assisting SI1s with technical issues. Also interviews difficult respondents and verifies survey to callers-in.
<b>41</b>	<b>Financial Analyst</b>		This position is responsible for financial reports, IPA processing, and is the communication link with Grants and Contracts.
<b>42</b>	<b>Adminsitrative Assistant</b>		This position is reposnible for adminisitrative matters, scheduling, communicating, providing materials, and assisting the unit with all aspects of logistical and orgnaizational requests. Assists with timesheet processing.
<b>43</b>	<b>Research Scientist</b>		This position is responsible for administrative matters, scheduling, communicating, providing materials, and assisting the unit with all aspects of logistical and organizational requests. Assists with timesheet processing.
<b>44</b>	<b>Research Associate II</b>		This position produces the deliverables of cleaned and formatted datasets, programs changes to the questionnaire, runs quality assurance and data completeness checks. Runs productivity and reports
<b>45</b>	<b>Research Associate IV</b>		This position will oversee day-to-day operations of the call-center, lead call-center management, human resource issues, and will be quality control lead for this project. Leads all aspects of call-center interviewer staff training, develop and implement protocols, oversees and assists with programming tasks, manage, clean and transmit data through secure and established protocols.
<b>46</b>	<b>Research Assistant II</b>		This position assist in recoding brand lists and open text responses. Provides quality assurance of interviewer data entry.

**STATE LEVEL PROJECT SUMMARY FORM**  
**FFY2014**

1. **Goals & Objectives** (See *State Level Objectives*).

2. **Project Title:** Afterschool Engagement Training

**PHI Budget:** \$200,000

**a. Related State Objectives:**

Related State Objectives include 1, 2, 3 and 4

**b. Audience**

Gender: Male and Female

Ethnicity: 32% Hispanic, 11.2% NH White, 29.1% Black, 27.4% Asian and other PI, .3% Other

Languages: English, Spanish

Ages: Students served in afterschool programs: 5-17 years old. Students' families ages range from 0-75. Afterschool program staff ranges in age from 17-65. Local Health Department program staff ranging in age from 18-65.

**c. Focus on SNAP-Ed Eligibles**

Location-Based Proxy Sites: Publicly-funded afterschool programs serving schools or sites with at least 50 percent free and reduced priced meals

**Project Description**

The Center for Collaborative Solutions (CCS) is responsible for the statewide effort known as the *Healthy Behaviors Initiative (HBI)* that has established Learning Centers across the state to serve as coaches, spokespeople and trainers for other afterschool programs targeting SNAP-Ed eligible students. Under this Initiative, afterschool programs are being transformed into environments that support and encourage healthy behaviors. *Changing Lives, Saving Lives—A Step-by-Step Guide to Developing Exemplary Practices in Healthy Eating, Physical Activity and Food Security in Afterschool Programs* was created by CCS in consultation with expert stakeholders, grounded in research and deep afterschool experience, and tested and implemented by a learning community of multi-site afterschool programs selected for their outstanding work in nutrition and/or physical activity.

In FFY 14, in coordination with Children and Youth staff at the *Network for a Healthy California (Network)*, CCS will provide support, technical assistance, training and consultation to local health departments (LHDs) around supporting

afterschool programs and building capacity as noted in the School and Afterschool Scope of Work Objective 12. CCS will assist LHD's in ensuring that afterschool is included in the *Network's* PSE priority strategies particularly in addressing model wellness policies that extend throughout the school day, joint-use, policy for structured PA opportunities, school gardens, etc. CCS will create one to two afterschool resources and/or briefs and host and develop in-person and/or online forums highlighting afterschool efforts within the LHD structure.

In addition, CCS will continue to support its existing Learning Centers and strengthen its state level partnerships to promote statewide support for healthy eating, food security, and associated physical activity (PA) in afterschool programs. CCS will also investigate coordination and/or a potential partnership supplementation with Team California Healthy After School (TCHAS) which will be in year 2 of a pilot program focusing on training and coaching strategies for after school teams to develop healthy after school environments and mentoring skills. This pilot program being administered by the California After School Resource Center (CASRC), in collaboration with the California Department of Education, Nutrition Services Division (NSD) is geared to provide an opportunity for after school educators to access strategically focused training, technical assistance, tools and resources that will assist them in 1) improving the nutrition and physical activity afterschool environment and 2) providing mentoring to other after school programs.

#### Key Strategies:

Project strategies include afterschool program learning centers; afterschool learning communities; large and small group trainings/workshops; hosted site visits; one-on-one meetings; coaching and mentoring; use of social media; articles; participation in large public events and conferences; interagency work groups; community education events; needs assessments; policy forums; nutrition education classes; and internet/Web sites.

#### Key Educational Messages:

Fruits and vegetables; physical activity; MyPlate-Healthy Eating Plan; *Children's Power Play! Campaign (Power Play!)*; Harvest of the Month (*HOTM*); food shopping/preparation; food safety; implementing the *Changing Lives, Saving Lives* guide for afterschool programs can improve nutrition and physical activity behaviors of students, staff and families; leadership and collaboration with schools, families, and the community are powerful vehicles for healthy behavior change; engagement of staff and students can achieve greater change than "top-down" approaches; youth development strategies are critical to improved nutrition/physical activity in afterschool; food security is a critical element for eating more fruits and vegetables; adequate, diversified and sustainable funding is critical for an afterschool program to implement and carry out the exemplary practices of the *Changing Lives, Saving Lives* guide.

#### Intervention Sites:

Local Health Departments (LHDs); Schools-students (afterschool programs); schools-parents; other youth education sites (including community centers and parks and recreation); Community-based Organizations; Faith-based Organizations. Other approaches to disseminate information and resources and/or engage partners include, but are not limited to conferences; trainings; workshops; policy-making and resource-development settings (California Department of Education [CDE]-funded task forces and steering committees, such as the California Afterschool Network's Nutrition and Physical Activity Committee and Leadership Team; Team California for Healthy After School [TCHAS], as well as other statewide organizations such as California Action for Healthy Kids, Summer Meal Coalition, and *Summer Matters* Campaign).

Projected Number of Contacts:

Unduplicated Participants: 110,000 students (includes new Healthy Behaviors Learning Centers in Los Angeles, Sacramento and Northern California), an equal number of families and over 5,000 staff, as well as three new TCHAS programs in Southern California and the Central Valley serving an estimated 21,000 students, an equal number of families, and 1,000 staff.

Direct Contacts: 390 publicly funded, multi-site programs (out of 900 programs statewide) based on assumption of a minimum of 15 contacts through trainings/site visits/coaching by each learning center.

Indirect Contacts: Through the *Network's* LHD structure, afterschool program leads and word-of-mouth, we expect to reach thousands more individuals (children, families, staff and other key intermediaries).

Narrative Summary:

CCS will share comprehensive, multi-level strategies with LHDs on how to integrate afterschool in their scope and the *Network's* PSE Priority Strategies. Some of the issues where the agency would provide support are (but not limited to): ensuring that afterschool programs in the LHD regions are included in school wellness policy as an extension of the school day, addressing joint-use agreements, aligning afterschool with summer programming (i.e. summer meals), providing support around skill-based nutrition and physical activity lessons (i.e. cooking, meal planning), model teaching strategies and best practices and helping to create an accountability and monitoring structure to ensure that afterschool programs within the LHD regions are providing healthy meals and moderate to vigorous physical activity for youth.

CCS will help to build the capacity for afterschool work within the *Network* while providing TA and support to *Network* staff around how to properly align afterschool with the new LHD structure and in support of the *Network's* new Youth Continuum. The agency will be also asked to provide technical assistance and support around how afterschool can play a more prominent role within the

*Network* tying into health education, youth engagement and potential youth career pathways during afterschool/out of school time.

CCS will work in partnership with afterschool program leads to reach out to publicly-funded afterschool programs in low-resource schools; leverage *Network* funds with other funding sources and facilitate collaboration between *Network* region staff and afterschool regional staff; increase connections between *HBI* Learning Centers and associated LHDs to enhance the quality and promote the sustainability of nutrition education and provide support for schools and afterschool/out of school time programs; continue support of existing *HBI* learning center sites to strengthen the practice of being learning centers with a focus on nutrition education (including one Learning Community meeting); disseminate the *Step-by-Step* guide to assist additional programs in implementing exemplary practices; work with the *HBI* statewide stakeholder advisory group including *Network* representatives to leverage their spheres of influence to champion afterschool (non-*Network* funded); promote *Changing Lives, Saving Lives* guide as a vehicle for increased fruit/vegetable consumption and physical activity; partner with statewide organizations like the California AfterSchool Network [Nutrition and Physical Activity Committee, Leadership Team, Executive Team], the Summer Meal Coalition, the *Summer Matters* Campaign and the California After School Resource Center located in the Alameda County Office of Education. Key strategies are the use of afterschool learning centers as coaches, mentors and spokespeople to their peers; collaboration with the *Network* and afterschool regional leads; participation in statewide and regional conferences and trainings; participation in statewide policy and resource development task forces and steering committees; and publishing on the outcomes of this work.

**Reaching SNAP-Ed Consumers:**

This project will reach SNAP-Ed Consumers through several channels, including but not limited to State-funded afterschool programs (After School Education and Safety [ASES]) and federally funded programs (21<sup>st</sup> Century Community Learning Centers [CCLC]), community-based organizations, and faith-based organizations), which serve low-resource schools (target population is 50 percent free and reduced lunch), using *Network* GIS Qualifying Census Tract Data and School Sites with 50 percent or more participation in Free and Reduced Price Meal Programs.

**d. Summary of Research:**

CCS originally introduced and tested the concept of using Learning Communities to develop 14 Exemplary Practices in Afterschool Programs during 2002-2005 and demonstrated the effectiveness of this type of approach using practices with the afterschool programs in the Learning Community. That work was done in partnership with the Community Network for Youth Development, and published in *A Guide to Developing Exemplary Practices in Afterschool Programs* in March

2006. These practices have been widely used in California and several other states.

The report, *Improving Afterschool Program Quality*, Granger, R., Durlak, J.A., Yohalem, N. & Reisner, E. (April 2007), New York, N.Y. William T. Grant Foundation, [www.wtgrantfoundation.org](http://www.wtgrantfoundation.org), found in its analysis of research on quality afterschool programs that programs incorporating sequenced, active, focused and explicit (SAFE) practices had significant positive effects in school performance, social behaviors, and attitudes and beliefs. The Exemplary Practices that form the core of CCS' tools for improving nutrition and physical activity in afterschool programs are SAFE practices.

"Effectiveness of interventions to promote physical activity in children and adolescents: systematic review of controlled trials," published in *BMJ (British Medical Journal)*/ ONLINE FIRST, van Sluijs, Esther M.F., McMinn, Alison M., Griffin, Simon J. (October 2007) ([www.bmj.com](http://www.bmj.com)) concluded from a review of 57 studies, 33 aimed at children and 24 at adolescents, that there was strong evidence that school-based interventions with involvement of the family or community and multi-component interventions can increase physical activity in adolescents. The Exemplary Practices support a multi-component intervention to increase both healthy food and physical activity that involves family and community.

**e. Modification of Project Methods/Strategies:**

CCS will continue to use the existing Healthy Behaviors Learning Centers to act as coaches, mentors and spokespeople to the LHDs; expand support for healthy afterschool environment where students increase their consumption of fruits and vegetables, decrease their consumption of sugary beverages and are more physically active; build capacity and disseminate the *Step-by-Step* guide to help LHDs support programs that implement the exemplary practices, and strengthen collaboration with *Network* School and Afterschool channels through LHDs. CCS will also engage in preliminary formative research to seek best practices for how LHDs can work best in integrating afterschool withing the new *Network* LHD model.

**f. Use of Existing Educational Materials**

CCS will continue using the *Changing Lives, Saving Lives* guide, and will promote other California AfterSchool Resource Center (CASRC)-approved nutrition and physical activity resources, including *Power Play!*, *HOTM*, Dairy Council's *Deal Me In*, SPARK, CATCH, Team Nutrition's *Empowering Youth with Nutrition and Physical Activity*, and other materials approved by the *Network*. CCS will also promote the CASRC-developed Healthy Snacks and Physical Activity E-Guides (that include contributions from the *HBI* Learning Center programs), as well as their on-line trainings in nutrition and physical activity.

**g. Development of New Educational Materials:**

### *Create 1-2 Afterschool Resources or Briefs*

CCS will work in partnership with the *Network* to create (or update) one to two afterschool resources (white paper and/or policy brief) that can be distributed and disseminated to LHDs and others in the field impacting the afterschool environment. These resources will be used to promote the importance of afterschool, highlight afterschool efforts within the LHD's and/or expand the *Network's* role in the afterschool environment.

### *Host and Develop in-person and/or online forums for LHD Afterschool partners*

In coordination with *Network* staff, CCS will develop up to two in-person and/or online forums for LHDs, afterschool partners, afterschool policy groups, leaders, faith-based organizations, community centers, etc. to build their capacity to promote nutrition and physical activity during afterschool and out-of-school time. These forums are intended to strengthen the role that afterschool plays within the *Network*, connect programs and staff to existing afterschool collaborative groups statewide and expand the capacity for these organizations to serve as leaders for other after school agencies across the state.

#### **h. Key Performance Measures/Indicators.**

- Number of hosted site visits/trainings with LHDs
- Dissemination of *Changing Lives, Saving Lives* guide
- Implementation of and adherence to wellness policies at afterschool sites
- Integration of afterschool by LHD's in addressing the *Network's* PSE Priority Strategies
- Report of changes implemented by newer Healthy Behaviors Learning Centers
- Increased participation by LHDs with statewide organizations such as California Action for Healthy Kids, Summer Meal Coalition, and *Summer Matters* Campaign
- Anecdotal reporting (success stories) on increased fruit and vegetable consumption, increased physical activity, and improved food security
- Increased participation by LHDs with afterschool sites, both school and community based sites
- Effectiveness of LHD trainings as evidenced by pre/post surveys
- Creation of 1-2 afterschool resources/briefs

### **3. Evaluation Plan**

See attached Project Evaluation Plan: Afterschool Integration Project

#### **4. Coordination Efforts:**

This effort is designed to work synergistically, build capacity, and provide technical support for state-funded afterschool programs and through LHDs in order to increase their adoption of policies and practices that increase and improve nutrition education/physical activity. Partners include, but are not limited to, LHD program coordinators, CDE (Nutrition Services Division, Coordinated School Health and the After School Programs Division); Afterschool Regional Leads; California School Boards Association; Project LEAN; California Action for Healthy Kids, California AfterSchool Network (especially the Nutrition and Physical Activity Committee, the Executive Committee and the Leadership Team), the Summer Meal Coalition, and the *Summer Matters* Campaign.

Examples of coordination include membership in and active participation on leadership bodies and work groups of the California Action for Healthy Kids executive committee, participation in the California AfterSchool Network's Nutrition and Physical Activity Committee, Executive Committee and Leadership Team; work with CDE's Afterschool Regional Leads, participation on the advisory team for CDE's TCHAS initiative and participation on the advisory team of ASAPconnect (statewide after school technical assistance organization).

**STATE LEVEL PROJECT SUMMARY**  
**FFY 2014**

**1. Goals & Objectives** (See *State Level Objectives*).

**2. Project Title:** California Conference of Local Health Department Nutritionists (CCLHDN) Leadership Training

**PHI Budget:** \$135,000

**a. Related State Objectives:**

Objectives 1 (Fruit and Vegetables), 2 (Healthy Beverages), 3 (Physical Activity), and 4 (Environmental Supports)

**b. Audience (SNAP-Ed Intermediaries in LHDs)**

Gender: Primarily female

Ethnicity: All races and ethnicities

Languages: English

Ages: Adults

**c. Focus on SNAP Eligibles**

SNAP-Ed service providers - this project targets Local Health Department (LHD) nutrition managers and leaders statewide to expand the number of organizations that partner with the *Network* to provide services directly to SNAP-Ed eligibles.

This unique and specialized project will be carried out by the California Conference of Local Health Department Nutritionists (CCLHDN), an affiliate of the California Conference of Local Health Officers (CCLHO).

**d. Project Description**

Key Strategies:

This project addresses a unique and specific niche. CCLHDN will address the needs of local health department nutritionists in California. CCLHDN is committed to mutual problem solving, peer-to-peer support across county lines, and exchange of information. Members are nutrition program experts who are effective change agents that work within the local health department arena to establish networks and implement creative nutrition programs.

This project will focus on public health nutrition practice specific to the county environment. It will also focus on broader aspects of the county infrastructure, and strategies that cross county lines.

This project will provide resources to strengthen the capacity of CCLHDN members, which include nutrition directors and their local health department staff. It will provide county and state-wide leadership around nutrition issues affecting SNAP-Ed eligibles served by the *Network* in the following ways:

1. Enhance the CCLHDN Learning Collaborative established in FFY 12. The Learning Collaborative provides opportunities to share successes and best practices regarding increasing fruit and vegetable consumption, increased physical activity, and increased food security among low-income Californians. The Learning Collaborative will be open to nutrition directors from the 61 local health departments in California, with intentional outreach to nutrition directors in counties operating SNAP-Ed programs.
2. Host quarterly content and skill-building opportunities around topical areas directly relevant to *Network* county functions and relating to *Network* core goals. Identified nutrition directors and their local health department staff will participate. Archived resources will also be available through the Learning Collaborative.
3. Provide information (through materials, PowerPoint presentations, etc., as appropriate) on evidence-based intervention strategies and operational issues regarding governmental nutrition policies during appropriate events of the California Conference of Local Health Officers, County Health Executives Association of California, County Welfare Directors Association, and similar statewide bodies.
4. Provide support to existing County Nutrition Action Partnerships (CNAP), and help establish new ones in counties currently without CNAPs. CCLHDN will continue to offer guidance, CNAP toolkit and templates, and this year will offer facilitation of the CNAP to the counties. Key to this process are community assessments to identify local needs, priorities, and players. The partnerships will include: CalFresh, Child Nutrition (School Breakfast, School Lunch, Summer Lunch), WIC, Ag Extension, and other appropriate county entities.
5. The CCLHDN's Executive Board will establish criteria to identify best practices in California counties that exemplify excellent nutrition programs for low-income families. The board will identify those counties in California and develop a system for offering intercounty or regional peer exchange opportunities, especially targeting the new small counties that will start *Network* contracts Oct. 1<sup>st</sup>. The Board will establish a range of technical assistance and mentoring activities (such as on-site visits to other counties to observe activities, learn administrative systems, cultivate new leadership skills, and establish mentorships with experienced colleagues). CCLHDN members will provide the on-site technical assistance and mentoring (similar to intergovernmental exchange). Develop peer mentoring for the new Registered Dietician (RD) in the LHD. Pair the new RD with a more experienced RD to provide ongoing counsel. Out-of-county travel expenses

may be subsidized. The technical assistance and mentor program model will be posted as a resource on the CCLHDN website.

6. Support ongoing recruitment of RDs to meet the *Network* staffing requirement by assisting with the development of position announcements and posting these to [www.cclhdn.org](http://www.cclhdn.org); establishing relationships with RD internship preceptors, and identifying opportunities for members to actively promote jobs in *Network*-funded projects in LHDs among nutrition students.
7. Plan, convene and evaluate the LHD annual 2014 conference that will synergize CCLHDN members around key CCLHDN nutrition issues and train members to establish local CNAP partnership teams in at least 40 local health departments for the development of county-wide plans for the coordination of USDA funded programs and projects.

This conference will construct and strengthen collaboration with multi-sector partners and increase favorable outcomes in the competitive subcontracting process.

The conference will also provide the opportunity to build action-oriented relationships with other *Network* leadership projects. Registration will be charged to partially offset conference costs.

#### Key Educational Messages:

Chronic disease prevention; obesity prevention; fruit and vegetable promotion; promoting healthy weight; food assistance programs for public health; Dietary Guidelines for Americans; MyPlate; physical activity promotion integrated with nutrition education; drink more water; limit added sugars; through promotion of policy, systems, and environmental change nutrition education messages.

#### Intervention Sites:

*Network*-funded LHDs, and other qualified SNAP-Ed sites working with intermediaries across the entire jurisdiction.

#### Projected Number of Contacts:

Provide services to all *Network*-funded LHDs and up to 100 SNAP-Ed intermediaries who have direct reach to thousands of target population members.

#### Narrative Summary:

CCLHDN is the nutrition affiliate to CCLHO and provides statewide leadership for nutrition, physical activity, food security and obesity prevention and is able through the *Network* to develop a strong infrastructure and technical capacity on behalf of low-income residents and communities.

As SNAP-Ed transitions into a grant program under new guidance, we must build LHD for existing and new contractors to implement comprehensive, multi-level interventions using the full spectrum of public health approaches to help low-income families with children move toward healthy eating and active living.

Through this project, CCLHDN members will use their ability to leverage support from community leaders and decision makers to identify new partners/ collaborators and resources for building sustainable efforts to improve diet and physical activity practices among low income Californians.

**e. Summary of the Research**

This project was evaluated the beginning of FFY12 and evaluation activities continued into FFY 13. The formative evaluation efforts in FFY 12 included a baseline and post-exchange capacity assessment for all participating counties to assess their capacity to address key NEOP initiatives and meet *Network* objectives. In addition, all counties who are mentored participate in a 15-minute telephone-based process evaluation to assess their experience with the exchange process, logistics, and to determine the usefulness of the exchange format.

**f. Modification of Project Methods/Strategies:**

This project will use previous conferences as a foundation to perpetuate the learning community via an electronic format (a digital learning collaborative). The project will create and strengthen partnerships with other statewide organizations, support new and existing County Nutrition Action Partnerships, provide expertise to LHDs on specific projects and efforts, continue a peer or regional exchange program to provide peer mentorship to county nutritionists, and plan an annual meeting and leadership summit that will provide skill building as well as opportunities to build relationships with other *Network* Leadership Projects.

**g. Use of Existing Educational Materials**

The full array of existing, approved materials will be used, including those for consumer and policy, systems and environmental change messaging.

**h. Development of New Educational Materials:**

This project will rely heavily on existing, previously approved materials. Newly developed materials will include; development of a Learning Collaborative for CCLHDN; and webinars materials for nutrition and leadership.

**i. Key Performance Measures/Indicators**

Measures include self-assessment of various aspects of *Network* administrative capacity; the post-assessment asks about the peer exchange impact on those measures of administrative capacity.

**3. Evaluation Plan**

Process evaluation indicators will include meeting and training agendas and notes, completed work products, and summary of pre-and post- assessment tools that accompany leadership capacity building. *Network* staff worked with CCLHDN to collaboratively develop a pre and post survey instrument to assess the capacity of staff participating in the peer exchange including, technical assistance and mentoring activities, designed to deliver *Network* programs. The scope is limited to those 18 counties (participating in FY13: Shasta, Alameda, Monterey, Fresno, San Joaquin, Riverside, Yuba, Yolo, Nevada, Solano, Butte, Siskiyou, Humboldt, Trinity, Del Norte, San Francisco, Contra Costa and Sacramento. FY14-participating counties will vary-focus on the small counties).

#### **4. Coordination Efforts:**

CCLHDN will work with *Network* staff, California Department of Social Services, Local Social Services, UC Davis-CalFresh, WIC, schools, and may bring in other disciplines for LHDs where there are no RD's on staff to coordinate implementation of this project and get feedback on work products as appropriate. Among the desired outcomes of this project is to increase capacity of local agencies to provide comprehensive services under NEOP funding and collaboration among local program leaders.

<b>Federal Share Budget</b>	<b>FFY2014 Total</b>	<b>FFY2013 Total</b>

**STATE LEVEL PROJECT SUMMARY****FFY 2014**

1. **Goals & Objectives** (*See State Level Objectives*).
2. **Project Title: NEOP Branch Strategic Partnership Plan and Public Relations**

**PHI Budget:** \$200,000**a. Related State Objectives:**

Objectives 1, 2, 3, and 4

**b. Audience**

The services provided through this technical assistance project are designed primarily to support the Nutrition Education and Obesity Prevention (NEOP) Branch and the local health departments (LHDs), with some additional support for *Regional Networks* and other *Network*-funded projects. The project will support completion of the new *Network for a Healthy California* strategic partnership plan and assist LHDs in implementing local-level components of the plan. In addition, it will provide strategic counsel to the state-level *Network* regarding communications and partnerships, as well as communications counsel and technical assistance to regional and local level *Network* contractors.

Gender: Female and Male

Ethnicity: All races and ethnicities

Languages: Primarily English and Spanish

Ages: All ages. Focus is on state, regional, and local level staff, with a primary emphasis on local health department staff who will be responsible for establishing and maintaining community partnerships to reach SNAP-Ed eligible families, especially women with children.

**c. Focus on SNAP-Ed Eligibles**

The strategic partnership plan and implementation plans will focus on leveraging SNAP-Ed funds by working with a wider array of stakeholder organizations to reach more SNAP-Ed eligible consumers in low-income communities throughout California. LHD partnership implementation plans will seek to extend and complement the *Network's* funding to implement evidence-based approaches to improving nutrition, physical activity, and food security among SNAP-Ed eligible audiences. The communications counsel and technical assistance will build the capacity of regional and local *Network*-funded staff to work with media outlets to reach SNAP-Ed audiences and intermediaries with *Network* messages. LHDs focus their work in SNAP-Ed eligible communities, as per qualifying census tract and census block designations, and in location-based proxy sites, as denoted in USDA Guidance and including but not limited to food banks, food pantries, CalFresh (SNAP) offices, and emergency food distribution sites.

#### d. Project Description

Key Strategies: 1:1 technical assistance, internet/webinar trainings; in person trainings/workshops; meetings/teleconferences, media publicity and outreach, promotion of healthy communities

Key Educational Messages: Key educational messages will vary based on region-specific nutrition education priorities, though all will be based on, and in support of, MyPlate and the Dietary Guidelines for Americans and may include: childhood obesity prevention, health equity, chronic disease and obesity prevention, dietary quality, fruits and vegetables, healthier eating (general), healthy beverage promotion, physical activity promotion (integrated with nutrition education), promotion of healthy communities, SNAP promotion (brief promotional message).

Intervention Sites:

Intervention sites will vary based on nutrition education priority messages and SNAP-Ed target audience segment. All sites will qualify as per USDA Guidelines using census tract and census block information, location-based proxy sites, and other methods as outlined and approved by USDA. Common intervention sites for previous campaigns include: afterschool programs, adult education and training sites, community based organizations, community clinics, community centers, community youth organizations, emergency food assistance sites, faith organizations, farmers' markets, libraries, Head Start programs, parks and recreation centers, Public Health Departments, retail sites, WIC programs, and worksites.

Projected Number of Contacts:

Direct Contacts: Technical assistance and training will be provided to an estimated 11 *Regional Network* Project Directors, 100 local health department staff, and 100 state-level NEOP Branch staff.

Indirect Contacts: 1 million\*

\*Occurs as a result of train-the-trainer nutrition education opportunities and media coverage generated through this technical assistance. These indirect numbers are repeated in other sections of the FFY 2014 Plan, including the Communications project summary, and will be reported under those areas in the EARS report.

Narrative Summary:

The *Network* and Brown Miller Communications (BMC) will, in accordance with USDA Guidance, provide communications counsel and technical assistance to *Regional Networks*, local health departments, and state-level NEOP Branch staff to build on the strategic partnership plan process that began in FFY 2013 and to support regional and local-level public relations efforts.

BMC will provide communications counsel, facilitation, and technical expertise to ensure completion of the NEOP Branch's new strategic partnership plan. This project was initiated in FFY 2013 to help the *Network* capitalize on new directions made possible by the Healthy, Hunger Free Kids Act and the updated SNAP-Ed Guidance, including a stronger emphasis on obesity prevention and additional opportunities to address physical activity. To date, the process has included a series of key informant interviews and

internal leadership meetings to inform the partnership plan. In FFY 2014, the partnership plan will be finalized and will include an implementation plan for local health departments. BMC will develop partnership tools to assist with implementation and will train both state-level *Network* staff and local health department staff on the partnership plan and tools and to strengthen skills in communicating with current and potential partners. Additional counsel and technical assistance will be applied to develop a communications plan regarding the transition of the NEOP Branch to a revised internal configuration that better supports the NEOP implementation model.

With the *Network's* State master media and public relations contract scheduled to expire in September 2013, BMC and state-level *Network* staff will collaborate to support the public relations technical assistance needs of *Regional Networks* and their Regional Collaboratives, local health departments, and other *Network*-funded projects. BMC will provide communications counsel, technical assistance and training, and will monitor media coverage for approximately six months during FFY 2014 until a new master media contractor is selected and a contract is executed by the State. The technical assistance will link local initiatives to State *Network* media activities and message points and promote and encourage the infusion and activation of the state network of Champion Moms. The technical assistance will build the capacity of local health departments to successfully execute signature public relations initiatives and work with the media to promote the *Network's* nutrition, physical activity, and food security messages to SNAP-Ed eligible consumers and key intermediaries.

#### e. Summary of Research

The partnership plan is informed by formative research, including a self-assessment conducted within the NEOP Branch and a series of key informant interviews with both traditional public health partners and potential non-traditional partners. The key informant interviews will be completed in late FFY 2013. The partnership plan also will be based on successful partnership models and practices from the field of public health. The partnership plan will support the 2010 California Obesity Prevention Plan's Goal 1: State-Level Leadership and Coordination, as well as a variety of other statewide and national initiatives including Let's Get Healthy California, Health in All Policies, Team California for Healthy Kids, and Let's Move. The plan also is intended to contribute to one of the Centers for Disease Control and Prevention's 10 Essential Public Health Services: 4. Mobilize community partnerships and action to identify and solve health problems.

Public relations efforts support another of the 10 Essential Public Health Services: 3. Inform, educate, and empower people about health issues. For this, the *Network* uses the principles of social marketing. One traditional definition of social marketing is "The application of commercial marketing technologies to the analysis, planning, execution, and evaluation of programs designed to influence voluntary behavior of target audiences in order to improve their personal welfare and that of society." (Andreasen, AR. *Marketing Social Change: Changing Behavior to Promote Health, Social Development, and the Environment*. San Francisco, CA: Jossey-Bass; 1995.) A commercial marketer looks for ways to convince customers to purchase a product. Similarly, a social marketer tries to influence the behavior of a target audience. One element of the *Network's* social

marketing mix is public relations. In FFY 2012, public relations technical assistance provided to *Regional Networks* and other *Network*-funded partners helped garner over 42 million media impressions from media outlets throughout California and nationally. This media coverage helped spread the *Network* messages to a broader audience and encourage more Champions to join the movement for healthy change.

**f. Modification of Project Methods/Strategies**

As described above, the partnership plan will be based upon the formative research conducted in FFY 2013. The public relations technical assistance will be modified as appropriate based upon feedback received from participants in public relations trainings (e.g., spokesperson trainings) and wrap-up reports prepared by the *Network*'s public relations team following each of the signature public relations initiatives (e.g., Black History Month, Fruit and Veggie Fest).

**g. Use of Existing Educational Materials**

Wherever possible, previously approved and existing materials and resources are used to support the partnership and public relations activities. Materials will be updated as needed to reflect current *Network* priorities and activities.

**h. Development of New Educational Materials**

Consumer educational materials promoted through these efforts will be either already existing or described as new educational materials elsewhere within this FFY 2014 Plan. Public relations activities may include new press releases and supporting media materials.

**i. Key Performance Measures/Indicators.**

Key deliverables that will be measured include the number of meetings, trainings, and webinars; number of participants; amount and type of technical assistance provided as reported on contractor activity reports; evaluation feedback from trainings and webinars; and media coverage obtained through public relations activities, including number of stories and estimated consumer impressions.

**3. Evaluation Plan**

The final partnership plan will have evaluation metrics embedded within it. These will be determined based upon the final content of the plan and will align with the overall evaluation activities of the *Network*. The evaluation may include measures related to number and type of partnerships, level of coordination, leveraging of efforts, and progress on the "ladder of collaboration."

For public relations activities, a Benchmark Survey is conducted annually to track measurements such as campaign awareness, self efficacy, knowledge levels, behavioral intentions, social normative beliefs, and other important measures. The survey includes questions related to the paid advertising campaign and also to respondents' exposure to other *Network* interventions.

The specific activities of this project also will be evaluated through process measures. Following each training and webinar, feedback will be solicited from participants through an evaluation form. Results will be summarized and used to guide future training efforts.

#### **4. Coordination Efforts**

The partnership plan is intended to enhance collaboration within California among organizations and intermediaries that serve SNAP-Ed eligible consumers and similar audiences, including those not previously working with the *Network*. The partnership plan will seek to improve coordination of messages, reduce duplication of effort, and leverage resources of non-funded partners to more effectively reach the SNAP-Ed audience with nutrition, physical activity, food security, and obesity prevention messages, as well as create policies, systems, and environments that support the *Network's* priorities.

The communications technical assistance will promote coordination of messages to the media, especially within each media market, to demonstrate collaboration among the *Network's* funded projects and maximize media opportunities. Local health departments will be encouraged to work together with *Regional Networks* to develop a cohesive approach to pitching to the media within each of California's media markets and to connect their media efforts with larger statewide efforts such as the paid advertising campaign and statewide signature public relations initiatives.

Prepare instructional plans for youth camps and field trips; and nutrition education for special events and workshops. Prepare instructional plans for nutrition activities, collect data related to nutrition education programming, prepare documentation for nutrition education grant agreement; and helps prepare interim and final progress report .
5	Chief Executive Officer		Provides overall guidance for the operations, personnel, and fiscal responsibilities required by the nutrition project.
6	Community Liaison		Conducts nutrition education, physical activity promotion interventions in the community setting. Works with Community Based Organizations to increase the reach of nutrition education interventions to Nutrition Education Obesity Program eligible.
7	Computer Specialist		The Computer Specialist will provide assistance with the nutrition database and tracking system.
8	Contract Manager		Manages the nutrition education grant agreement including budgets, invoices, local share documentation reports, time studies, fiscal reporting and adherence to funding requirements.
9	Coordinator of Other Program (e.g., Teen program, Healthy Start, etc.)		Supervises, coordinates, facilitates nutrition education activities, workshops, special events related to the recreation and community center planning and working together with other community center groups. Supervises staff implementing the nutrition education grant agreement, prepares invoices, prepares and collects documentation, prepares progress reports
10	Curriculum Specialist		Develops curriculum for nutrition education and physical activity interventions in a variety of different channels/venues.
11	Database Coordinator		Develops database used to track nutrition education, physical activity and food stamp promotion interventions in a variety of channels.
12	Dental/Medical Assistant		Conduct one-on-one nutrition education interventions prior to primary care visit.
13	Dietician		Oversees and supervises the nutrition education program including project administration, project coordination, the development of the nutrition education component and materials and other nutrition and physical activity promotion programs.
14	Family Advocate		Provides nutrition education to students and their families, and recruits NEOP eligible for group nutrition/cooking classes. Provides nutrition, physical activity and food stamp promotion resources to students and their parents.

**USDA  
POSITION DESCRIPTIONS**

15	<b>Food Service Worker (e.g., Director, Manager, Asst., Server, Cook)</b>		Assists with planning and preparing healthy food taste tests in the school setting in conjunction with classroom based nutrition education intervention. Works with teachers to increase student, teacher and parent knowledge of the importance of consuming more servings of fruits and vegetables and being active daily. Compiles documentation on taste testing activities and all reporting required for nutrition grants. In some cases, supervises staff that carry out activities.
16	<b>Graphic Illustrator</b>		Develop local promotional nutrition education materials such as community flyers/ newsletters and/or to develop local nutrition/physical activity promotional/educational materials under the direction of the nutrition staff.
17	<b>Health Educator (including Health Aide, Health Promotion Instructor, etc.)</b>		Develop materials and facilitate health education in both group and individual settings. Teaches general nutrition, the importance of fruits and vegetables, and health benefits of proper nutrition and physical activity.
18	<b>Legal Counsel</b>		Assist with development of policies, approval of grant agreements and Memorandums of Understanding and providing legal advice specifically related to the implementation of nutrition education and physical activity promotion
19	<b>Medical Assistant</b>		Demonstrates safe food handling and personal hygiene to prevent food borne illness, provide nutrition-related services to staff, parents, and students and promotes physical activity within the context of nutrition education. (This does not include any medical nutrition therapy).
20	<b>Nurse/Nurse Supervisor/Nurse Aide RN</b>		Provides nutrition and physical activity promotion to students enrolled in nutrition education programs and their families. Supports nutrition education goals through interventions; local, regional, and statewide collaboration and interventions. (This does not include any medical nutrition therapy).
21	<b>Nutritionist/Nutrition Educator/Nutrition Aide</b>		Provides nutrition education to the neop eligible population. Specific duties include: one-on-one general nutrition education, delivery of general nutrition education in a classroom or group setting, staffing health fairs and other community or promotional events where nutrition education messages are delivered, distribution of linguistically and culturally appropriate nutrition education materials, documentation of educational and other encounters, assisting with writing project reports and preparation of quarterly reports, maintaining program reporting and tracking systems.
22	<b>Office Manager/Secretary/Admin Assistant</b>		Provides general clerical support to the Program. Assists in development and maintenance of a data collection system with emphasis on fiscal information. Arranges meetings and trainings, orders supplies and materials, creates correspondence, photocopies, etc.
23	<b>Pharmacist</b>		Promotes nutrition education and physical activity to NEOP eligible population through displays, distributing literature, and supervising staff to update nutrition education bulletin board.
24	<b>Physician</b>		Supervises professional staff including Dietitians, Nurses and Nutrition/Project Coordinators that provide nutrition education and promotes physical activity to NEOP eligibles in a variety of channels. Provides direction on strategic planning of nutrition and physical activity programs to NEOP eligible clients. In some cases, provides nutrition education to NEOP eligibles. (This does not include any medical nutrition therapy).
25	<b>Professor</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for the NEOP eligible community, and students with their families. Supports nutrition education Program goals and local, regional, and statewide collaboration.

**USDA  
POSITION DESCRIPTIONS**

<b>26</b>	<b>Program Assistant</b>		Assists the Project Coordinator with nutrition education program planning and development. Under the direction of Project Coordinator, works directly with individuals and small groups providing curriculum-based, prevention-oriented general nutrition education and physical activity targeted to NEOP eligibles.
<b>27</b>	<b>Project Coordinator</b>		Coordinate program staff and nutrition education activities; plan and follow through on outreach and educational events at health fairs, schools, and other promotional activities; work with schools, churches, farm worker organizations, and community organizations in planning and promoting good health through dissemination of nutrition education materials; actively acquire and develop culturally and linguistically competent nutrition curriculum and educational materials; to promote existing and/or to develop new physical activity promotional components of nutrition education; and expand our existing community outreach program to encompass nutritional components to increase community awareness and knowledge of good nutrition and healthy active lifestyles.
<b>28</b>	<b>Promotora</b>		Works with the Project Coordinator in NEOP communities to conduct nutrition education interventions and participate in local events to promote health eating and physical activity for NEOP eligibles.
<b>29</b>	<b>Recreation Leader</b>		Mentors and trains staff on integration of physical activity into nutrition education interventions. Coordinates one-time physical activity demonstrations. Chooses nutrition and physical activity resources to distribute with nutrition education interventions.
<b>30</b>	<b>Research Specialist</b>		Evaluates nutrition education, and physical activity promotion interventions in a variety of community channels. Methods can include process and impact evaluations, pre and post tests, surveys, focus/discussion roundtables, photo documentaries, case studies, etc.
<b>31</b>	<b>School Administrator (e.g., Principal, Superintendent)</b>		Provides oversight and coordination of the nutrition education conducted in participating classrooms of all schools.
<b>32</b>	<b>Teacher/Student Aide/Assistant</b>		Assists the Nutritionists, Health Educators, and Project Coordinator with nutrition education activities and community events that promote healthy eating and physical activity for low-income families, the target population, Food Stamp recipients and other similar households. 100% direct delivery of educational services.
<b>33</b>	<b>Teacher (preK-12 Classroom, PE, Speech, etc.)</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for students and their families. Supports nutrition education program goals through promotion; local, regional, and statewide collaboration; and close coordination with the Registered Dietitian to train staff.
<b>34</b>	<b>Translator</b>		Translates approved curriculum and materials into Spanish or other languages. Reviews translation for cultural appropriateness. Interprets nutrition education interventions (one-on-one and group) in the community for dietitians, health educators and others .
<b>35</b>	<b>Tutor</b>		Assist teachers and/or students with nutrition education and physical activity promotion.
<b>36</b>	<b>Web Designer</b>		Develops and maintains website containing nutrition education resources, gardening and health related topics and issues.

**USDA  
POSITION DESCRIPTIONS**

<b>Position Number</b>	<b>USDA Position Title</b>	<b>LHD Position Title</b>	<b>Position Description</b>
1	Accountant/Finance Analyst		Serves as internal auditor and controller. Assists with processing purchase orders, invoices, preparation of vouchers for payment as related to the Network program, as well as monitoring the budgets.
2	Administrative Coordinator		Provides administrative and office support for the project staff and is responsible for the reporting requirements.
3	Administrator (e.g., Director of Programs)		Administer the nutrition education grant agreement and budget, supervising nutrition education staff, attend nutrition education and scope of work related meetings, program planning and participating in the Regional collaborative. Coordinate grant agreement reporting requirements.
4	After School Coordinator/Assistant		Plan and facilitate nutrition education activities for recreation programming, in after school setting for different age groups of children; seniors, teen; special populations, such as mothers with young children and families; nutrition education for special events and workshops. Prepare instructional plans for youth camps and field trips; and nutrition education for special events and workshops. Prepare instructional plans for nutrition activities, collect data related to nutrition education programming, prepare documentation for nutrition education grant agreement; and helps prepare interim and final progress report .
5	Chief Executive Officer		Provides overall guidance for the operations, personnel, and fiscal responsibilities required by the nutrition project.
6	Community Liaison		Conducts nutrition education, physical activity promotion interventions in the community setting. Works with Community Based Organizations to increase the reach of nutrition education interventions to Nutrition Education Obesity Program eligible.
7	Computer Specialist		The Computer Specialist will provide assistance with the nutrition database and tracking system.
8	Contract Manager		Manages the nutrition education grant agreement including budgets, invoices, local share documentation reports, time studies, fiscal reporting and adherence to funding requirements.
9	Coordinator of Other Program (e.g., Teen program, Healthy Start, etc.)		Supervises, coordinates, facilitates nutrition education activities, workshops, special events related to the recreation and community center planning and working together with other community center groups. Supervises staff implementing the nutrition education grant agreement, prepares invoices, prepares and collects documentation, prepares progress reports
10	Curriculum Specialist		Develops curriculum for nutrition education and physical activity interventions in a variety of different channels/venues.
11	Database Coordinator		Develops database used to track nutrition education, physical activity and food stamp promotion interventions in a variety of channels.
12	Dental/Medical Assistant		Conduct one-on-one nutrition education interventions prior to primary care visit.
13	Dietician		Oversees and supervises the nutrition education program including project administration, project coordination, the development of the nutrition education component and materials and other nutrition and physical activity promotion programs.
14	Family Advocate		Provides nutrition education to students and their families, and recruits NEOP eligible for group nutrition/cooking classes. Provides nutrition, physical activity and food stamp promotion resources to students and their parents.

**USDA  
POSITION DESCRIPTIONS**

15	<b>Food Service Worker (e.g., Director, Manager, Asst., Server, Cook)</b>		Assists with planning and preparing healthy food taste tests in the school setting in conjunction with classroom based nutrition education intervention. Works with teachers to increase student, teacher and parent knowledge of the importance of consuming more servings of fruits and vegetables and being active daily. Compiles documentation on taste testing activities and all reporting required for nutrition grants. In some cases, supervises staff that carry out activities.
16	<b>Graphic Illustrator</b>		Develop local promotional nutrition education materials such as community flyers/ newsletters and/or to develop local nutrition/physical activity promotional/educational materials under the direction of the nutrition staff.
17	<b>Health Educator (including Health Aide, Health Promotion Instructor, etc.)</b>		Develop materials and facilitate health education in both group and individual settings. Teaches general nutrition, the importance of fruits and vegetables, and health benefits of proper nutrition and physical activity.
18	<b>Legal Counsel</b>		Assist with development of policies, approval of grant agreements and Memorandums of Understanding and providing legal advice specifically related to the implementation of nutrition education and physical activity promotion
19	<b>Medical Assistant</b>		Demonstrates safe food handling and personal hygiene to prevent food borne illness, provide nutrition-related services to staff, parents, and students and promotes physical activity within the context of nutrition education. (This does not include any medical nutrition therapy).
20	<b>Nurse/Nurse Supervisor/Nurse Aide RN</b>		Provides nutrition and physical activity promotion to students enrolled in nutrition education programs and their families. Supports nutrition education goals through interventions; local, regional, and statewide collaboration and interventions. (This does not include any medical nutrition therapy).
21	<b>Nutritionist/Nutrition Educator/Nutrition Aide</b>		Provides nutrition education to the neop eligible population. Specific duties include: one-on-one general nutrition education, delivery of general nutrition education in a classroom or group setting, staffing health fairs and other community or promotional events where nutrition education messages are delivered, distribution of linguistically and culturally appropriate nutrition education materials, documentation of educational and other encounters, assisting with writing project reports and preparation of quarterly reports, maintaining program reporting and tracking systems.
22	<b>Office Manager/Secretary/Admin Assistant</b>		Provides general clerical support to the Program. Assists in development and maintenance of a data collection system with emphasis on fiscal information. Arranges meetings and trainings, orders supplies and materials, creates correspondence, photocopies, etc.
23	<b>Pharmacist</b>		Promotes nutrition education and physical activity to NEOP eligible population through displays, distributing literature, and supervising staff to update nutrition education bulletin board.
24	<b>Physician</b>		Supervises professional staff including Dietitians, Nurses and Nutrition/Project Coordinators that provide nutrition education and promotes physical activity to NEOP eligibles in a variety of channels. Provides direction on strategic planning of nutrition and physical activity programs to NEOP eligible clients. In some cases, provides nutrition education to NEOP eligibles. (This does not include any medical nutrition therapy).
25	<b>Professor</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for the NEOP eligible community, and students with their families. Supports nutrition education Program goals and local, regional, and statewide collaboration.

**USDA  
POSITION DESCRIPTIONS**

<b>26</b>	<b>Program Assistant</b>		Assists the Project Coordinator with nutrition education program planning and development. Under the direction of Project Coordinator, works directly with individuals and small groups providing curriculum-based, prevention-oriented general nutrition education and physical activity targeted to NEOP eligibles.
<b>27</b>	<b>Project Coordinator</b>		Coordinate program staff and nutrition education activities; plan and follow through on outreach and educational events at health fairs, schools, and other promotional activities; work with schools, churches, farm worker organizations, and community organizations in planning and promoting good health through dissemination of nutrition education materials; actively acquire and develop culturally and linguistically competent nutrition curriculum and educational materials; to promote existing and/or to develop new physical activity promotional components of nutrition education; and expand our existing community outreach program to encompass nutritional components to increase community awareness and knowledge of good nutrition and healthy active lifestyles.
<b>28</b>	<b>Promotora</b>		Works with the Project Coordinator in NEOP communities to conduct nutrition education interventions and participate in local events to promote health eating and physical activity for NEOP eligibles.
<b>29</b>	<b>Recreation Leader</b>		Mentors and trains staff on integration of physical activity into nutrition education interventions. Coordinates one-time physical activity demonstrations. Chooses nutrition and physical activity resources to distribute with nutrition education interventions.
<b>30</b>	<b>Research Specialist</b>		Evaluates nutrition education, and physical activity promotion interventions in a variety of community channels. Methods can include process and impact evaluations, pre and post tests, surveys, focus/discussion roundtables, photo documentaries, case studies, etc.
<b>31</b>	<b>School Administrator (e.g., Principal, Superintendent)</b>		Provides oversight and coordination of the nutrition education conducted in participating classrooms of all schools.
<b>32</b>	<b>Teacher/Student Aide/Assistant</b>		Assists the Nutritionists, Health Educators, and Project Coordinator with nutrition education activities and community events that promote healthy eating and physical activity for low-income families, the target population, Food Stamp recipients and other similar households. 100% direct delivery of educational services.
<b>33</b>	<b>Teacher (preK-12 Classroom, PE, Speech, etc.)</b>		Coordinates, facilitates, modifies, develops, and demonstrates lessons on nutrition and promotes physical activity for students and their families. Supports nutrition education program goals through promotion; local, regional, and statewide collaboration; and close coordination with the Registered Dietitian to train staff.
<b>34</b>	<b>Translator</b>		Translates approved curriculum and materials into Spanish or other languages. Reviews translation for cultural appropriateness. Interprets nutrition education interventions (one-on-one and group) in the community for dietitians, health educators and others .
<b>35</b>	<b>Tutor</b>		Assist teachers and/or students with nutrition education and physical activity promotion.
<b>36</b>	<b>Web Designer</b>		Develops and maintains website containing nutrition education resources, gardening and health related topics and issues.

## STATE LEVEL PROJECT SUMMARY FORM

### Training and Resource TRCs (TRCs) – Building Capacity

**1. GOALS & OBJECTIVES** (See *State Level Objectives*)

**2. Project Title: Training and Resource TRCs (TRCs)**

State budget for \$9 million dollars

**a. Related State Objectives**

Related State Objectives include 1, 2, 3, and 4

**b. Audience**

Primary - Local Health Department Grantees (54), Non Profit Contracts (7) and (10) Local Food and Nutrition Education (LFNE) projects that provide nutrition education and obesity prevention services to all ages and ethnicities of Californians participating in the Supplemental Nutrition Assistance Program (SNAP) and SNAP-Ed eligibles at 185 percent or below the Federal Poverty Level (FPL).

Secondary SNAP-Ed eligibles at or below 185 percent FPL throughout California.

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for African American, Caucasian/White, and Latino/Hispanic populations

Languages: English, Spanish, and select Asian languages, which may include Chinese, Vietnamese, Korean, and/or Hmong

Ages: All ages, primary focus is on families, especially women with children

**c. Focus on Food Stamp Program (FSP) Eligibles**

All of the program activities by the United States Department of Agriculture (USDA), SNAP-Ed local contractors are designed to reach SNAP-Ed-eligible consumers and their families where they learn, work, shop, worship, live and receive other services.

Income Targeting Data Source:

Primary: *Network* American Communities Survey (ACS) Census Tract Data all races at 185 percent FPL, ACS Census Tract Data at 100 percent FPL for specific race/ethnicities. California Department of Education Free/Reduced Price Meal Participation rates, California Department of Education Child and Adult Care Food Program (CACFP) participation rates when applicable and Other Means-Tested Low-Income Programs.

**d. Project Description**

The seven TRCs are responsible for providing services to Nutrition Education and Obesity Prevention Branch funded (NEOPB-funded) projects and SNAP-Ed intermediaries who serve the above target audience.

**#1 North Coast and Cascades Center**

Mendocino, Humboldt, Del Norte, Siskiyou, Trinity, Shasta, Tehama, Glenn, Colusa, Butte, Sierra, Plumas, Lassen, Modoc, and Lake Counties

**#2 San Francisco Bay Area Center**

Marin, Napa, Solano, Sonoma, Contra Costa, Alameda, Berkeley, Santa Clara, San Mateo, and San Francisco Counties

**#3 Delta and Gold Country Center**

Stanislaus, San Joaquin, Sacramento, Yolo, Sutter, Yuba, Nevada, Placer, Mono, Tuolumne, Mariposa, Alpine, Amador, Calaveras, and El Dorado Counties

**#4 Central Coast Center**

Santa Cruz, Santa Barbara, Monterey, San Benito, and San Luis Obispo Counties

**#5 Central Valley Center**

Kern, Kings, Fresno, Madera, Merced, and Tulare Counties

**#6 Greater Los Angeles Center**

Ventura, Los Angeles, and Orange Counties

**#7 Inland Desert Center**

San Bernardino, Riverside, Inyo, San Diego and Imperial Counties

The California Department of Public Health (CDPH), Nutrition Education and Obesity Prevention Program (NEOP), is seeking to award up to seven contractor(s) to support Local Health Departments (LHDs), individually and as part of a multi-county TRCs. The TRCs are responsible for completing the three objectives listed below:

**Objective 1: Local Health Department Training and Technical Assistance:** Under the direction of CDPH NEOP, Contractor(s) will provide SNAP-Ed training and technical assistance to local health departments (LHDs) in all the applicable service areas to promote the delivery of the SNAP-Ed nutrition education and physical activity. This includes, but is not limited to, training in the following topics: orientation to the array of evidence-based nutrition education and physical activity materials available through CDPH NEOP; the delivery of SNAP-Ed to target audiences; training and technical assistance to SNAP-Ed providers regarding the collection of Education and Administrative Reporting Systems (EARS) data; SNAP-Ed related training for program delivery staff; workshops, conferences, individual and group trainings for SNAP-Ed that encourages physical activity with a focus on promotion of healthy eating behaviors; use of SNAP-Ed Connection Web Site curricula, lesson plans, recipes, photos, research, training tools, and participant materials; use of State of California developed SNAP-Ed education and training materials; local projects; and any other topic that CDPH NEOP determines is necessary to accomplish objective, goals and activities contained in the USDA approved State Plan.

**Objective 2: Multi-County Coalitions for Community Engagement:** Under the direction of CDPH NEOP, Contractor(s) will develop one or more multi-county coalitions within the service area and will actively identify, engage, recruit, and sustain, contact and form working relationships with other governmental and non-governmental entities to exchange information, share best practices, extend mutual support, and explore mutual interventions and cooperative efforts to provide nutrition education and obesity prevention services as authorized by SNAP-Ed and the State Plan.

**Objective 3: Media Coordination:** Under the supervision of the CDPH NEOP Media and Communications Unit, Contractor(s) will assist in the coordination of media/public relations campaigns and public service announcements conducted by CDPH and the LHDs in the service area as permitted under SNAP-Ed and the State Plan. Under the supervision of CDPH/NEOP, the Contractor(s) will create and implement a multi-county Media and Public Relations Plan to maximize support and public exposure of issues affecting nutrition, healthy beverages, and physical activity promotion, and food security among the SNAP-Ed eligible audience.

The TRCs will:

1. Support the LHDs in defining the number and types of services needed for their Center(s). Contractor(s) will identify training needs and strategies for the LHDs.
2. Provide training and technical assistance to the LHDs in their service areas on evidence-based nutrition education interventions in multiple settings, peer-to-peer and youth engagement approaches, community engagement, retail and worksite interventions, Communities of Excellence (CX<sup>3</sup>), assessment and related activities, policy, systems and environmental change strategies, *Rethink Your Drink* campaign, and ethnic targeted campaigns.
3. Assist the LHDs in identifying activities of coalitions and partnerships established and maintained with CDPH NEOP funded contractor(s) and partners. The activities support the purpose of enhancing consistency of food and nutrition messaging, improving access to healthy foods, beverages and physical activity with other TRCs.
4. Support the LHDs to collect and submit community assessments and assess data bases on SNAP-Ed eligible neighborhoods. Together, Contractor(s) will decide which programs and practices work best for their community.
5. Provide support to the LHDs in the service area to assist the LHDs with localized coordination of media and public relations efforts on issues affecting nutrition, healthy beverages, physical activity promotion, and food security among the SNAP-Ed eligible population. The support shall include, but is not limited to, media training, spokesperson trainings, message development, support of promotional events, assistance leveraging added value opportunities, assistance with developing press releases, and assistance pitching to the media.

6. Coordinate with the LHDs to provide public presentations related to organizational practices, systems, and/or environmental supports based on assessments and community feedback.
7. Support the LHDs to achieve sustainable policy, systems and/or environmental changes realizing access to healthy foods, beverages, and/or physical activity in their communities. Contractor(s) will assist with identifying traditional and non-traditional partners to help LHDs achieve their goals.

Key Educational Messages:

1. Nutrition Education messages for target audience will be based on 2010 Dietary Guidelines for Americans and [www.ChooseMyPlate.gov](http://www.ChooseMyPlate.gov) with focus on increasing fruit and vegetable consumption, increasing physical activity to 60 minutes a day for children and 30 minutes a day for adults, achieving balanced caloric intake and expenditure, and promotion of SNAP (known as CalFresh in California) to help those with low resources obtain healthy food choices.
2. Successful projects require compliance with 2014 SNAP-Ed Plan *Guidance*.
3. Documentation of allowable expenditures and accurate time reporting is required for reimbursement.
4. Encourage and support the promotion of the Champions for Change and *Network* brand.

Intervention Sites:

Schools, afterschool programs, community-based organizations, community clinics, community youth organizations, direct health service providers, faith organizations/churches, food closets/pantries/banks, farmers' markets, festivals, CalFresh offices, community gardens, grocery stores, Head Start, health care facilities/providers, Healthy Start, public/community health TRCs, other preschools or daycares, parks & recreation, restaurants/food service, Women, Infants and Children (WIC) sites, low-wage worksites.

Projected Number of Contacts: 1-7 centers

Direct (unduplicated) Contacts:

- 70 new partners
- 50 Champions trained
- 58 trained LHDs, Non-profit Lead Agencies, Local Food and Nutrition Education (LFNE) Agencies

Indirect Contacts

- Mass Media: 53,000,000 duplicated targeted impressions received by the <185 percent FPL adult target population. These Center media impressions are also encompassed in the Communications State Level Project
- 30 trainings and 24 webinars for a total of 5,400 unduplicated contacts

**e. Summary of Research**

Research includes statewide and special surveys; *Network for a Healthy California 2012 Tracking Survey*, Annual the Semi-Annual Activity Reporting System (SAAR), the California Dietary Practices Survey of adults, the California Children's Healthy Eating and Exercise Survey, and the California Health Interview Survey (CHIS), the California Teen Eating, Exercise and Nutrition Survey. Other annual data sources include UC's Food Behavior Checklist for adults, the Evaluation and Reporting System (EARS), survey for youth, impact evaluation conducted by the 40 largest local projects, (CX3).

**g. Modification of Project Methods/Strategies**

This project represents a more cost-effective and efficient strategy by reducing the number of TRCs to seven. The TRCs will act as hubs for the LHDs, and funded projects to provide training, technical assistance, multi-county collaboratives for engaging SNAP-Ed clients and local media and public relations coordination.

**h. Use of Existing Educational Materials**

See: *Network for a Healthy California Nutrition Education Materials List* submitted in State plan.

**i. Development of New Educational Materials**

There will be no new materials developed under the TRCs.

**j. Key Performance Measures/Indicators.**

Key performance measures will include improvements in knowledge and increases in the key SNAP-Ed recommended behavioral outcomes: consumption of fruits and vegetables, increase in healthy beverages/reduction of sugar sweetened beverages, and increases in physical activity. Additional performance measures will include direct and indirect contacts with members of the target audience. Performance measures on the amount of collaboration taking place among agencies within a service area will be analyzed through a networking analysis.

**3. Evaluation Plan**

**Formative:** The TRCs will use formative research methods (e.g., consumer focus groups, key informant interviews, needs assessment surveys, etc.) to determine effectiveness of messages, learn more about potential strategies that can be used by SNAP-Ed eligible consumers and intermediaries, and identify key places where SNAP-Ed eligible consumers may be reached.

**Process:** Measures will be collected by TRCs via activity tracking forms and semi-annual activity reporting forms. Measures will include number of classes/events conducted, number of contacts, and amount of media coverage generated. In addition, the seven TRCs submit semi-annual progress reports which include narrative descriptions and notations on Scope of Work forms. TRCs evaluate their service area skills-based trainings and showcases geared toward intermediaries to determine effectiveness.

Outcome: All of the TRCs will complete case studies on their nutrition education and obesity prevention initiatives, noting changes that make it easier for SNAP-Ed eligibles to adopt healthy eating and physical activity lifestyles in their communities. The approach of the case studies will be primarily qualitative in nature (e.g., interviewing key staff) to document the process of how the educational campaign was conducted, but will also utilize indicators of effectiveness (e.g., media coverage, resulting changes). Results from the case studies will be shared with other TRCs and *NEOPB* funded projects so that all can learn about how the campaigns, programs and nutrition education initiatives were conducted, as well as determine their relative effectiveness, feasibility, and replicability.

Evaluation Tools: Case Study Guidelines; adapted consumer surveys and questionnaires, activity tracking forms, SAAR forms, progress reports, training evaluation guidelines, and EARS.

#### **4. Coordination Efforts**

The TRCs will continue coordination with USDA funded programs, namely WIC, CDE, UC-CalFresh and the California Department of Social Services. The Nutrition Education and Obesity Prevention Branch will continue to work with both internal and external partners to promote consistent nutrition education messages to SNAP participants and other SNAP-Ed eligible audiences, to conduct activities that promote increased consumption of fruits and vegetables, increased physical activity opportunities and increased access to healthy foods.

## Budget Coversheet

Position Number	USDA Position Title	LHD Position Title	Position Description
3	Administrator (e.g., Director of Programs)		Administer the nutrition education grant agreement and budget, supervising nutrition education staff, attend nutrition education and scope of work related meetings, program planning and participating in the Regional collaborative. Coordinate grant agreement reporting requirements.
6	Community Liaison		Conducts nutrition education, physical activity promotion interventions in the community setting. Works with Community Based Organizations to increase the reach of nutrition education interventions to Nutrition Education Obesity Program eligible.
9	Coordinator of Other Program (e.g., Teen program, Healthy Start, etc.)		Supervises, coordinates, facilitates nutrition education activities, workshops, special events related to the recreation and community center planning and working together with other community center groups. Supervises staff implementing the nutrition education grant agreement, prepares invoices, prepares and collects documentation, prepares progress reports
13	Dietician		Oversees and supervises the nutrition education program including project administration, project coordination, the development of the nutrition education component and materials and other nutrition and physical activity promotion programs.
17	Health Educator (including Health Aide, Health Promotion Instructor, etc.)		Develop materials and facilitate health education in both group and individual settings. Teaches general nutrition, the importance of fruits and vegetables, and health benefits of proper nutrition and physical activity.
21	Nutritionist/Nutrition Educator/Nutrition Aide		Provides nutrition education to the neop eligible population. Specific duties include: one-on-one general nutrition education, delivery of general nutrition education in a classroom or group setting, staffing health fairs and other community or promotional events where nutrition education messages are delivered, distribution of linguistically and culturally appropriate nutrition education materials, documentation of educational and other encounters, assisting with writing project reports and preparation of quarterly reports, maintaining program reporting and tracking systems.
30	Research Specialist		Evaluates nutrition education, and physical activity promotion interventions in a variety of community channels. Methods can include process and impact evaluations, pre and post tests, surveys, focus/discussion roundtables, photo documentaries, case studies, etc.
