

To get percent of individuals at less than 185% FPL by age at the county level  
**Example using Nevada County**

<http://factfinder2.census.gov/faces/nav/jsf/pages/index.xhtml>

**B17024**

**AGE BY RATIO OF INCOME TO POVERTY LEVEL IN THE PAST 12 MONTHS**

Universe: Population for whom poverty status is determined 

2010 American Community Survey 1-Year Estimates

To get percent of individuals at less than 185% FPL by age in Nevada County:

- For Under 6 years old – Add all the yellows in the Estimate column
  - divide by 4,796 then multiply by 100 to get percent of under 6 at less than 185% FPL
  - divide by 97,591 then multiply by 100 to get percent of total Nevada County population under 6 at less than 185% FPL
- For 6-17 –Add all the blues in the Estimate column
  - divide by (6,543+7,734); then multiply by 100 to get percent of 6-17 year olds at less than 185% FPL
  - divide by 97,591 then multiply by 100 to get percent of total Nevada County population 6-17 years old at less than 185% FPL
- For 18-54 – Add all the greys in the Estimate column
  - divide by (6,574+9,389+10,847+15,369) ); then multiply by 100 to get percent of 18-54 year olds at less than 185% FPL
  - divide by 97,591 then multiply by 100 to get percent of total Nevada County population 18-54 years old at less than 185% FPL
- For 55+ - Add all the greens in the Estimate column;
  - divide by (18,560+10,322+7,457); then multiply by 100 to get percent of 55 years and older at less than 185% FPL
  - divide by 97,591 then multiply by 100 to get percent of total Nevada County population at 55 years and older at less than 185% FPL

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the [official counts of the population and housing units for the nation, states, counties, cities and towns.](#)

	Nevada County, California	
	Estimate	Margin of Error

Explanation of Symbols:

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
