

## Geographic Information System (GIS) Information and Use

The *Network for a Healthy California* mapping application is an interactive, internet-based Geographic Information System (GIS) that allows users to view and query mapped nutrition data. The application contains a rich set of nutrition and other health related data, including:

- Nutrition and school health programs
- WIC grocery stores and other local nutrition resources
- Demographics (race and spoken language) of general and at-risk populations
- Various California Department of Public Health regions
- Political (senate and assembly) districts

The GIS tutorial and *Network for a Healthy California* GIS Map Viewer can be accessed via the following link: <http://gis.cdph.ca.gov/cnn/>
