*Rate per 1000 central line days

**95% confidence interval calculated for rates based on exact Poisson distribution.

*** Statistical interpretation indicates hospital-specific rates that were statistically higher (H), lower (L), or no different (N) than California average rates, or rates that were not tested due to too few central line-days or too few hospitals reported (---).

^The CLIP bundle includes eight components: hand hygiene, recommend skin preparation agent, allowing the skin preparation agent to dry, and five maximal sterile barriers (cap, mask, gown, gloves, and drape).
