

CLABSI Table 36. Central Line-Associated Bloodstream Infection (CLABSI) Rates Related to Permanent-Type Central Lines in Bone Marrow Transplant Pediatric Care Units, Reported by California Hospitals, January - December 2014

County	Hospital Name	CLABSI count	Central line-days	Rate per 1000*	95% Confidence Interval**	Statistical Interpretation***
	STATE OF CALIFORNIA POOLED DATA	17	4699	3.62		
Alameda	Children's Hospital & Research Center Oakland	6	1144	5.24	(1.92,11.42)	---
Los Angeles	Childrens Hospital Los Angeles	10	2826	3.54	(1.70,6.51)	---
Los Angeles	Ronald Reagan UCLA Medical Center	1	729	1.37	(0.03,7.64)	---

*Rate per 1000 central line days.

**95% confidence interval calculated for rates based on exact Poisson distribution.

*** Statistical interpretation indicates hospital-specific rates that were statistically higher (H), lower (L), or no different (N) than California average rates, or rates that were not tested due to too few central line-days or too few hospitals reported (---).
