

**CLABSI Table 46. California Hospitals Excluded from Central Line-Associated Bloodstream Infection (CLABSI) Analysis, January - December 2014**

*Hospitals highlighted in red did not participate in 2014 data validation; completeness of reported infections has not been evaluated*

County	Hospital	Reason for exclusion*	CLABSI excluded from public reports
San Bernardino	Loma Linda University Medical Center	Mixed acuity unit	6
<i>Los Angeles</i>	<i>LAC/Harbor-UCLA Medical Center</i>	<i>Mixed acuity unit</i>	<i>4</i>
Kern	Delano Regional Medical Center	Mixed acuity unit	2
Alameda	Children's Hospital & Research Center Oakland	Mixed acuity unit	1
Los Angeles	Centinela Hospital Medical Center	Mixed acuity unit	4
Los Angeles	Los Angeles Community Hospital	Mixed acuity unit	1
Los Angeles	PIH Hospital - Downey	Mixed acuity unit	3
Los Angeles	Motion Picture & Television Hospital	Mixed acuity units only	0
<i>San Bernardino</i>	<i>Mountains Community Hospital</i>	<i>Mixed acuity units only</i>	<i>0</i>
Inyo	Southern Inyo Hospital	Mixed acuity units only	0
Shasta	Patients' Hospital of Redding	No central line-days reported	0
<i>Modoc</i>	<i>Surprise Valley Community Hospital</i>	<i>No central line-days reported</i>	<i>0</i>
Humboldt	Jerold Phelps Community Hospital	No central line-days reported	0
Orange	Fairview Developmental Center	No central line-days reported	0
Kings	Central Valley General Hospital	No central line-days reported	0
Plumas	Eastern Plumas Hospital - Portola Campus	No central line-days reported	0
Los Angeles	Catalina Island Medical Center	No central line-days reported	0
<i>Plumas</i>	<i>Seneca Healthcare District</i>	<i>No central line-days reported</i>	<i>0</i>
Los Angeles	Miracle Mile Medical Center	No central line-days reported	0
<i>Los Angeles</i>	<i>Shriners Hospitals for Children</i>	<i>No central line-days reported</i>	<i>0</i>

\*Reasons for exclusion: Mixed acuity patient care locations cannot be stratified into specific patient care location types nor risk adjusted; data from these units are excluded from Tables 1-43; Hospitals that reported zero central lines do not have patients at risk for CLABSI
