

## Recommended Patient Safety Reading

**ASAP** believes Patient Safety should be first and foremost in the curriculum of continuing medical education. According to the Institute of Medicine, medical errors kill an estimated 98,000 people each year - more deaths than breast cancer, AIDS and traffic accidents combined! Ensuring patient safety is an ongoing and continuous learning process for all healthcare providers.

*“The education of the doctor which goes on after he has his degree is, after all, the most important part of his education.”*

~ John Shaw Billings
