“Accurately Reporting HAI by Patient Population: How to Review, Map, and Reassign Patient Care Locations in NHSN”

Course Description: Were you aware that hospitals must periodically review their location mapping information to ensure data are being compared to the correct patient populations? This class will guide you through identifying, evaluating and correcting location issues in NHSN using your OWN data in real-time. Classes will be presented via interactive conference calls. **Participants are expected to be logged in to NHSN and to have recently generated a dataset.** Review of the materials prior to the class may be helpful.

Pre-registration is **not** required, **but space is limited.** The course is being offered on a first-come, first-serve basis so be sure to log in on time.

Objectives:

By the end of the sessions, participants will be able to:

1. Generate a list of NHSN Location information to be reviewed / corrected to ensure complete and accurate location characterizations in NHSN.
2. Demonstrate that facility locations are correctly included in the Monthly Reporting Plans as a basis for information reported via NHSN.
3. Locations with Inpatient Psychiatric/Rehabilitation Facilities (IPF/IRF) are noted to correctly represent their locations by incorporating new NHSN reporting changes.
4. Discuss the importance of periodically reviewing/validating location data.
