\*All hospitals reported 12 months of data.

\*\*Incidence rate for hospitals compared to pooled mean rate using 95% confidence intervals:  
N = no difference, H = significantly higher, L = significantly lower than pooled mean rate.

\*\*\*Mean of all hospitals case mix indices

‡ Hospitals reported infection data separately by acute care campus

**Notes:** Rate per 10,000 patient days; 95% confidence interval calculated based on exact Poisson distribution;  
case mix index was available and listed for most but not all acute care campuses
