

Table 2. Number of CLIP observations and 100% bundle adherence in ICUs by reason for central line insertion in general acute care hospitals, California, January 1, 2009 through March 31, 2010.

Reason for central line insertion	Number of CLIP observations, n (% of total)	Number of CLIP observations with 100% bundle adherence, n (%)
New indication for central line	68461 (86.9)	64197 (93.8)
Suspected central line-associated infection	1861 (2.4)	1711 (91.9)
Replace central line	2788 (3.5)	2538 (91.0)
Other	5638 (7.2)	4912 (87.1)
Unknown	148 (<1)	137 (92.6)
