\*Reported 11 months of data; all other hospitals reported 12 months of data

\*\*Incidence rate for hospital compared to pooled mean using 95% confidence intervals: N = no different, H = significantly higher, L = significantly lower than pooled mean

\*\*\* Mean of all hospitals case mix indices

‡ Hospital reported infection data separately by acute care campus

**Notes:** Rate per 10,000 patient days; 95% confidence interval calculated based on exact Poisson distribution; case mix index was available and listed for most but not all acute care campuses
