Mothers under 25 years and without a high school diploma[3]	**Too few events**
Number of At Risk Communities to Target in Part B of Survey	**Consortia to One***
NFP Client Number	**8**
HFA Client Number	**36**

Summary of Home Visiting Needs Assessment Indicator Performance

The following table summarizes indicators from the *California Statewide Home Visiting Needs Assessment* , specific to the indicated county. Indicators presented, except those marked with "†", were required by the first federal Supplemental Information Request (SIR). The indicators not federally required were included for at least one of the following reasons: a key stakeholder identified it as a priority, the literature demonstrates the ability of its being altered by home visiting intervention, and/or the indicator is measured on state and county levels. Indicators are grouped by six domains.

The table also presents the indicated county's percentile range for each of the Needs Assessment indicators. For every indicator, the indicated county's rate is assigned a percentile based on the distribution of all counties. The percentile could fall into the following categories: Too few events[4]; up to the 49th percentile; 50th to 74th percentile; 75th to 89th percentile; and 90th percentile and above.

Domains	Indicators	Percentile
Newborn/Infant Health	Premature birth	Too few events
	Low birth weight infants	Too few events
	Infant mortality	Too few events
	Prenatal care†	50th - 74th
	Breastfeeding†	< 50th
Child Health	Children with special needs†	> 90th
	Foster care†	50th - 74th
Maternal Health	Prenatal substance use†	Too few events
	Maternal depression†	Too few events
	Short birth interval†	50th - 74th
Family Characteristics	Domestic violence	> 90th
	Child maltreatment	> 90th
Community Characteristics	Poverty	50th - 74th
	All crime rate	< 50th
	Juvenile crime rate	< 50th
	School drop-out rate	< 50th
	Unemployment	< 50th
Substance Abuse	Marijuana use	< 50th
	Non-medical pain reliever use	< 50th
	Illicit drug use	50th - 74th
	Binge alcohol use	< 50th

Note(s):

1. Source: American Community Survey, 2005-2009. Rate calculated by dividing families below 185% FPL with children under 5 by all families with children under 5.
2. Source: Birth Statistical Master File, 2009. First time mothers had no previous live births. Mothers used MediCal either for payment of delivery or prenatal care services.
3. Source: Birth Statistical Master File, 2009.
4. Events <20 are designated as too few events, removed due to unstable rates.

*Although listed as a consortia county, the Local Health Jurisdiction can elect to identify a community and respond to the RSI alone. Please review the categorization process in Appendix E.
