

Who We Serve

CHVP

California Home Visiting Program

Demographic Summary

Federal Fiscal Year 2013-2014 (10/1/2013—9/30/2014)

Early child home visiting matches parents with trained professionals who provide information and support during pregnancy and throughout the child's first few years. The California Home Visiting Program (CHVP) uses two models, Nurse Family Partnership and Healthy Families America, both of which target high-risk, low-income families with pregnant or newly parenting women. In these models, 93% of all slots are filled. In Federal Fiscal Year 2013-2014, the typical mother served was Latina, age 21 or under, single, on Medi-Cal and with a household income under 50 percent of the Federal Poverty Level. Since 2012, 4,047 families have been served. The following charts offer comprehensive data about the families we serve.

Families Served in FFY 13-14	
Mothers	2,756
Children	1,942

Ethnicities of Mothers Served	
Hispanic/Latina	59.5%
Not Hispanic Latina	37.0%
Unknown	3.4%
