

Which reactors go where?

Does the person reside in your Jurisdiction?	Is this reactor indicative of a new case?	Was a new incident created for this reactor?	Should I create a new incident in CalREDIE?	Disease Condition (Patient tab)	Secondary Jurisdiction (Case Invest.tab)	Process Status (Case Invest.tab)	Resolution Status (Case Invest. tab)	Imported Status (case Invest. tab)
No	Follow Out of State protocols found on the CalREDIE Help page or Non-Participating Jurisdiction protocols found in the CalREDIE reference guide							
Yes	No, not a new case	Yes	n/a	Same stage as existing case	If applicable, Jurisdiction of the previous case	Closed by LHD	Previously reported	If applicable, Out of State or other jurisdiction
		No	No - If previous case was in your jurisdiction, exists in CalREDIE, and patient address is unchanged then attach to existing incident	n/a	n/a	n/a	n/a	n/a
			Yes - If previous case originated OoJ ¹ or case was in your jurisdiction and patient address has changed	Same stage as existing case	Jurisdiction of the previous case	Closed by LHD	Previously reported	If applicable, Out of State or other jurisdiction
	Yes, indicative of a new case	No	Yes	Syphilis Initial Report ² , or appropriate stage	n/a	Select appropriate workflow status	Select appropriate status (default is Suspect)	Follow local protocols
		Yes	n/a					

¹ Out of Jurisdiction (OOJ) includes Non-Participating Jurisdiction (NPJ, i.e., Los Angeles and San Francisco), Out of Country, Out of State, legacy system and local database.

² Syphilis: Initial Report should not be set as the final disease condition for closed incidents. Refer to “Acceptable Process and Resolution Status for Closure” document for additional guidance.
