CHAPTER 100 INTRODUCTION

101 Overview of the Policy Section

The information in this policy section of the Administrative and Policy Manual is provided by the California Department of Public Health (CDPH), California Tobacco Control Program (CTCP) to guide the operation and functioning of local tobacco control programs. This includes Local Lead Agencies and competitive grantees. Most of the policies in this section of the manual apply to all local programs funded by CDPH/CTCP. However, a few are specific to Local Lead Agencies or competitive grantees.

In addition to programmatic and administrative requirements, this section contains background information on California's tobacco education campaign, the mission and philosophy statements of CDPH/CTCP, and principles of planning. This section should be reviewed prior to the development and implementation of interventions, evaluation activities, project staffing, and administration of tobacco control programs. As staff turnover occurs within your agency, please provide new staff with a copy of the entire Administrative and Policy Manual to ensure they are familiar with CDPH/CTCP program and administrative expectations.

102 Proposition 99 and Legislative Mandates

In November 1988, California voters approved the Tobacco Tax and Health Promotion Act of 1988 (Proposition 99) which added a 25-cent tax to each pack of cigarettes sold in the state. Revenues from this additional tobacco tax are directed toward tobacco-related research, health education, and health care. Twenty percent of the taxes generated were earmarked for health education efforts aimed at the prevention and reduction of tobacco use with a legislatively mandated goal of reducing tobacco consumption by 75 percent in the State of California by the year 1999. The Tobacco Education Research Oversight Committee (TEROC) has since established a goal of reducing adult smoking prevalence to 10% and high-school age youth smoking to 8% by the end of 2008.

The scope of the health education campaign launched by CDPH/CTCP is addressed in Health and Safety Code, Chapter 1.2 commencing with Section 104350. These statutes require CDPH to fund a variety of innovative approaches to reduce tobacco use which include funding for a statewide media campaign, local health departments, competitively selected state and community-based projects, as well as an extensive evaluation of the entire tobacco education campaign.

Enabling legislation for Proposition 99 requires programs administered by CDPH/CTCP to:

1. Conduct health education interventions and behavior change programs at the state level, in the community, and other non-school settings;
2. Apply the most current research findings; and
3. Give priority to programs that demonstrate an understanding of the role community norm change has in influencing behavioral change regarding tobacco use.

103 California's Tobacco Control Program Goals

To reduce smoking among adults and youth in California and to eliminate exposure to secondhand smoke, California Tobacco Control Program (CTCP) focuses on four broad goals. These are as follows:

1. Counter Pro-Tobacco Influences in the Community

Tobacco industry advertising and promotions are major social and economic forces aimed at promoting tobacco use. While the 1998 Master Settlement Agreement (MSA) with the tobacco companies mandated changes in the behavior of the industry, including specific prohibitions against advertising and promotional strategies that target youth, eliminating tobacco industry influence in local communities remains one of the highest priorities for CTCP. The tobacco industry continues to maintain massive expenditures on advertising and promotional campaigns. As a result, Californians are exposed to saturation levels of media, which both stimulate adult consumption of cigarettes and increase the risk of youth initiation. Tobacco companies sponsor and strategically target specific community events, such as rodeos, festivals, concerts, and ethnic-specific cultural events to create the perception that the use of tobacco is condoned by those events and is glamorous, social, and normal. In addition, the motion picture industry has increasingly dramatized the use of tobacco in movies, thus aiding in recruiting thousands of new adolescent smokers.

2. Reduce Exposure to Secondhand Smoke (SHS) and Increase the Number of Smoke-Free Public Spaces, Worksites, Schools, and Communities

The risks of tobacco use extend beyond the actual user. Exposure to SHS increases risk for lung cancer and heart disease. Among children, SHS is also associated with serious respiratory problems, including asthma, pneumonia and bronchitis, sudden infant death syndrome, and low-birth weight. Protecting

California workers and the public from the effects of SHS and helping large numbers of smokers to get the environmental support they need to quit smoking remains a high priority for CTCP.

3. Reduce Availability of Tobacco Products

Widespread availability of tobacco products reinforces a social norm that promotes tobacco use by youth and young adults. This priority seeks to reduce the sale and availability of tobacco to youth as well as decreasing the overall availability of tobacco products to adults. Efforts to reduce the sale and availability of tobacco products to youth have historically focused on improving compliance with state laws prohibiting the sale of tobacco to persons under age eighteen.

4. Promote Availability of Cessation Services (optional)

Smoking cessation is the desired outcome of all initiatives and activities of CTCP that create new social norms around the use of tobacco. Since social norms have shifted from the acceptability of smoking, and cigarette prices have risen substantially, more smokers than ever are trying to quit. More than three out of every four California smokers say they would like to stop smoking.

Past experience demonstrates that the media campaign, coupled with the California's Smokers' Helpline and supported at the community level by cessation programs, successfully assists smokers in quitting. Smoking cessation is a complex and often-extended process with several repeated quit attempts until success is achieved. As social norms shift away from the acceptability of smoking, and more smokers become aware of health issues related to smoking, the level of motivation to quit across the entire population of smokers increases, and motivation by smokers to quit on their own increases. As such, cessation becomes the outcome rather than the intervention. However, there is a downside. Some smokers may switch to smokeless tobacco or "harm reduction products" to avoid exposing others to SHS. They may be misled into believing that such products may reduce risk of disease, when in reality, there are no safe tobacco products.

While recognizing that in California, the majority of former smokers report quitting without direct cessation services, the provision of direct cessation is primarily funded through the California Smokers' Helpline, which offers counseling in English, Spanish, Vietnamese, Korean, Mandarin and Cantonese, and has tailored services for chew tobacco users, hearing impaired, youth, and pregnant women. Many CDPH/CTCP-funded projects also provide direct cessation services at no cost or for a nominal fee. Additionally, some CDPH/CTCP-funded projects promote system changes that support population-based cessation services, such as introducing cessation in large managed health care plans, coordinating with clinics providing health care to indigent populations and

university/college health centers that serve priority populations, providing physicians, nurses, dentists, and dental hygienists with training to establish systematized patient education and treatment programs in private offices and clinics, cooperating with the American Cancer Society to sponsor the local Great American Smokeout, etc.

104 Local Lead Agency Responsibilities

Each of the 58 county and three city health departments are designated as “Local Lead Agencies” (LLAs). Health and Safety Code Sections 104375, 104380, 104405, 104410, 104415, and 104440 address the LLA requirements. LLAs are responsible for planning, implementing, and coordinating a comprehensive tobacco control plan. As the lead tobacco control agency at the community level, the primary legislated responsibilities of LLAs are to:

- Obtain the involvement and participation of local community organizations with special expertise in tobacco control and representatives of high-risk populations.
- Provide for or contract for tobacco control activities.
- Establish a coordinated information, referral, outreach, and intake system for preventive health education against tobacco.
- Coordinate services between county service providers, government agencies, and the county office of education.
- Provide technical assistance to tobacco control service providers.
- Review county office of education anti-tobacco education plans and provide written comment to the county office of education.
- Establish a uniform data collection system in compliance with State requirements and ensure systematic compatibility and the capacity to expand their computer software and hardware systems.
- Develop a local plan and budget.

Each LLA fosters and involves a community coalition to engage in grass roots community mobilization activities that promote social norm changes and educate the public about health issues related to tobacco use and tobacco industry strategies that promote tobacco use. In general, LLAs take the lead on local community policy development, facilitation of enforcement of tobacco control laws and local provision of tobacco cessation services.

105 Competitive Grants Program

The Competitive Grants Program is authorized by Health and Safety Code Section 104385. The Competitive Grants Program funds a variety of statewide, regional, local, and pilot projects. The agencies funded by the Competitive Grants Program are non-profit agencies and include community-based organizations, health clinics, and agencies addressing priority populations, alcohol and drug centers, labor organizations, youth organizations, and colleges/universities.

Statewide Grants

Several grants are funded that are designed to have a statewide impact, by providing technical assistance and training or direct services throughout California. As of January 2007 the following grants are funded to provide training and technical assistance or direct services statewide.

Training and Technical Assistance Providers

- Buck Tobacco Sponsorship Project: The Buck Tobacco Sponsorship Project supports local-level efforts to restrict tobacco sponsorship of California rodeos. This project provides resources which include: tip sheets on tobacco industry sponsorship, documentation of tobacco industry sponsored California rodeos held in 2006, sample media advocacy materials and ads, policy tools, training, and hosted technical assistance calls that provide access to experts and opportunities for networking.
- California's Clean Air Program (C-CAP): C-CAP provides technical assistance, training and educational materials related to secondhand smoke (SHS) issues. C-CAP creates and implements educational programs, policy and advocacy initiatives, develops and distributes materials. They respond to requests for assistance from county and city health departments, competitive grantees, members of the hospitality and housing industry, policymakers, law enforcement agencies, and the general public throughout California.
- California Youth Advocacy Network (CYAN): CYAN is dedicated to supporting youth and young adult tobacco prevention advocates and tobacco control agencies throughout California. Major statewide projects include:
 - The **Campuses Organized and United for Good Health (COUGH) Coalition**, this is a college campaign that works with all public college and university students, faculty, staff, campus health centers and tobacco control professionals to advocate for tobacco-free campuses.

- The **Tobacco and Hollywood Campaign**, this campaign seeks to work with youth, parents, and community organizations to eliminate the negative impact of pro-tobacco messages in movies on California’s youth.
 - The **Tobacco Retail Licensing (TRL) Campaign**, this campaign, is dedicated to expanding youth involvement in local licensing campaigns.
 - **Project UNIFORM**, this project focuses on tobacco use by active military personnel in California. The mission of Project UNIFORM is to build collaborative relationships to promote tobacco cessation resources to active military personnel.
- Counsel for Responsible Public Investment (CRPI): CRPI assists organizations and individuals advocating for anti-tobacco investment policies in California. By challenging Big Tobacco directly in their pocketbook, CRPI attempts to weaken the grip tobacco companies have on communities at large. CRPI assists with investment or divestment related advocacy projects. These include pension funds, universities, cities, foundations, and other large investment pools.
 - Technical Assistance Legal Center (TALC): TALC is a clearinghouse on tobacco policy issues in California, a place for “one-stop shopping” for solid legal advice and information. TALC provides model ordinances and policies on a variety of tobacco control topics; comments on draft ordinances, resolutions, or policies, consults directly with city attorneys and county counsels; and prepares and distributes a variety of informational materials and tools related to tobacco control and legal issues.
 - The Center for Tobacco Policy and Organizing (The Center): The Center serves as a state and local tobacco policy resource. It provides technical assistance to CDPH/TCS funded projects in achieving policy objectives using community organizing strategies. The resources offered by The Center include: briefs on pending tobacco control legislation, tobacco industry campaign contributions, and emerging local issues; assistance to develop and maintain relationships with legislators at the Capitol and in their district offices; campaign consultation and planning assistance; training on the use of the Midwest Academy Strategy Chart; and training and technical assistance with assessing the local political environment and coalition member recruitment.
 - Tobacco Control Evaluation Center (TCEC): The TC Evaluation Center is a resource for all aspects of project evaluation for tobacco control projects. They offer individual technical assistance to design evaluation plans, manage a database of data collection instruments; provide training on specific evaluation tasks such as sampling or writing a final evaluation report; and develop and disseminate a variety of tip sheets on evaluation-related topics including writing interview questions, using qualitative data collection methods, and selecting data collection methods.

- Capacity Building Network (CBN):

The Tobacco Control Section established the CBN to centralize the provision of training and technical assistance services that were previously provided by the seven target population-specific statewide projects. The mission of the CBN is to increase the capacity of CTCP-funded agencies to effectively work with identified priority populations on tobacco control policies and prevention programs.

The CBN is a “one stop” provider of training and technical assistance services to enhance and improve the ability of California tobacco control funded agencies in California to engage, work with, conduct, and evaluate culturally appropriate and competent evidence-based tobacco control interventions addressing the following populations: 1) African American (AA); 2) American Indian/Alaska Native (AI/AN); 3) Asian and Pacific Islander (API); 4) Hispanic/Latino (H/L); 5) Lesbian, Gay, Bisexual, and Transgender (LGBT); 6) Low Socio-Economic Status (Low SES); 7) Blue and Pink Collar Workers; and, 8) Rural Residents.

The CBN will phase in services beginning January 1, 2008. The training and technical assistance services will include: 1) a network of technical assistance experts available via telephone and electronic media; 2) intensive leadership training; 3) distance learning training opportunities; 4) multiple face-to-face trainings/workshops/conferences; 5) peer-to-peer electronic technical assistance services; 6) cultural competency diversity audits; and, 7) resource guides.

Direct Service Providers

- California Smokers' Helpline: The California Smokers' Helpline (1-800-NO-BUTTS) is a free, statewide, research based tobacco cessation program operated by UCSD. Callers are offered self-help materials, a local resource listing, and on-the-spot customized telephone counseling. By choosing counseling, smokers may have coverage for quitting aids such as the patch or Zyban through MediCal or their private insurance. Those who choose counseling will receive up to five follow-up calls after their initial call. Helpline services are available in five languages: English, Spanish, Korean, Vietnamese, and Chinese (Mandarin and Cantonese), as well as a TDD line for the deaf and hard-of-hearing. There are specialized services for teens, pregnant women, and tobacco chewers.

For more information about the California Smokers' Helpline go to www.nobutts.edu or for cessation help call:

English	1-800-NO-BUTTS (1-800-662-8887)
Spanish	1-800-NO-FUME (1-800-456-6386)
Mandarin & Cantonese	1-800-838-8917
Vietnamese	1-800-778-8440
Korean	1-800-556-5564

TDD/TTY
Chewing Tobacco

1-800-933-4TDD (1-800-933-4833)
1-800-844-CHEW (1-800-844-2439)

- Tobacco Education Clearinghouse of California (TECC): TECC offers the following services to CDPH/TCS-funded projects:
 - low and no cost tobacco education materials through a print and online sales catalog (www.TobaccoFreeCatalog.org);
 - locally customized materials from the TECC sales catalog;
 - technical assistance to develop educational, promotional and incentive items including online guides and forms accessible at www.tecc.org; and,
 - a full-service lending library with a collection of over 25,000 tobacco education, program management, and material development resources accessible through an online catalog known as “Rover” – www.tcsrover.org. (Rover allows for quick and easy searching of the entire collection as well as announcements and e-notices to keep users current with new tobacco control research, program, and educational resources.

106 Statewide Media Campaign

The statewide Tobacco Control Media Campaign (TCMC) consists of a Tobacco Control Media Campaign (TCMC) and a Tobacco Control Public Relations Campaign (TCPRC). Both include linguistically and culturally relevant ethnic-specific campaigns. The media campaign utilizes thought-provoking messages to effectively communicate the dangers of tobacco use, the impact of secondhand smoke (SHS), and the tobacco industry’s marketing ploys. Public relations efforts include communications planning and implementation, media relations and advocacy, technical assistance to local programs, grassroots coalition building, promotional event development, news conference coordination, media alerts and press releases, and media monitoring. The advertising and public relations components work synergistically to delivering clear, powerful messages, with the greatest reach and frequency possible.

107 Evaluation

Adult and youth tobacco knowledge, attitudes, and behavior are tracked through telephone, web-based, and in-school surveys. These surveys also provide information about public opinion and knowledge related to tobacco use, which enables the other tobacco control components to appropriately target their education and media outreach. Additionally, both in-house and independent evaluations of all tobacco control components are conducted to monitor progress towards reaching program goals and objectives, and to determine which strategies are most effective in reducing tobacco use.

CHAPTER 200

PROGRAM OPERATING PRINCIPLES

CDPH/CTCP has developed the following program operating principles for tobacco education activities in the state.

CDPH/CTCP is committed to providing leadership and resources to achieve a 75 percent reduction in tobacco use in California (currently at 60 percent). CDPH/CTCP advocates a social norm that creates a tobacco-free lifestyle and environment for all Californians. Toward these ends, CDPH/CTCP encourages programs to:

1. Empower local decision-making through broad-based community participation.
2. Recognize cultural diversity and maintain respect for cultural traditions.
3. Encourage innovative and multi-dimensional models for health education.
4. Create a partnership among communities, schools, worksites, health care organizations, and government.
5. Recognize individual and community rights to self-determination.
6. Recognize the likely need and prepare for major shifts in program emphases as conditions change.
7. Recognize the critical importance of using interventions that focus on involving the family and community rather than only individuals. Programs must tap into the social context of individual behavior. Individuals, whether young people or adults, interact within a vast complex of relationships, organizations, peer and reference groups, as well as work, personal growth, religious, and recreational activities.
8. Recognize the paramount importance of program cost-effectiveness. In order for programs to be replicable throughout California, they must be financially feasible. There are a number of ways cost-effectiveness can be enhanced:
 - a. Institutionalize interventions into worksites, schools, community networks and the health care system.
 - b. Emphasize interventions that create generational change. This is particularly important in regard to young people. We know, for example, that youth are more likely to use tobacco if their parents use tobacco.

Therefore, reaching parents and other intermediaries such as coaches can help break the chain and reduce program costs over time.

- c. Emphasize interventions that last. Policy development is of key importance to changing community norms about tobacco. Social norm change through organizational, community, and business policies, whether creating a smoke-free workplace or school, a community ordinance to restrict the tobacco industry, or a commitment from a community or educational institution NOT to accept tobacco industry money to support sports or cultural events, all have lasting impact on thousands of people.
- d. High risk priority populations must be major targets of programs since they are major targets of the tobacco industry. The tobacco industry is a heavy sponsor of organizations that target these populations and is responsible for the proliferation of advertising directed to priority population communities.

#01 TOBACCO CONTROL COALITION/ADVISORY COMMITTEE REQUIREMENTS

Chapter 300

Adopted 02/94
Revised 12/08

1. Local Lead Agencies shall establish a tobacco control coalition or integrate issues of tobacco control into an existing coalition. Additionally, some competitive grant procurements may require projects to recruit and maintain an advisory committee. Projects that are required to form and maintain a coalition or advisory committee are to organize these bodies in such a way that they:
 - Obtain the participation and involvement of local community organizations with special experience and expertise in community health education against tobacco use and representatives of high-risk populations.
 - Assist in the development and implementation of community tobacco control efforts.
 - Develop and demonstrate widespread public support for issues, actions, and unmet needs.
 - Maximize the power of individuals and single groups and agencies through joint action for the purpose of creating a "critical mass."
 - Mobilize the talents and resources of multiple individuals, groups, and agencies to promote tobacco education and control strategies.
 - Provide a united voice to respond to the tobacco industry.
2. The organizational structure of the coalition or advisory committee is flexible and may include:
 - Forming a centralized coalition or advisory committee that serves the entire health jurisdiction, region or state.
 - Forming a decentralized coalition or advisory committee based in communities or based on issues.
 - Integrating tobacco control issues into an existing coalition or advisory committee.
 - Creating a separate campaign committee to focus on passage of policies or enforcement of existing polices.

3. Membership: Coalitions and advisory committees are to recruit a diverse membership and strive to include representatives beyond traditional health, education, and social service organizations. Local Lead Agency coalition membership should be geographically balanced and include ethnic and other priority population representation comparable to the make-up of the area. Outreach should be made to include CDPH/CTCP funded grantees in the Local Lead Agency coalition.
4. Coalition and advisory committee members shall serve without compensation, but members may be reimbursed for necessary travel expenses incurred in the performance of their duties as a coalition member.
5. Tobacco control coalitions and advisory committees are to have formalized operating rules and procedures (e.g., by-laws) that include:
 - A description of the coalition's or advisory committee organizational structure;
 - A mission statement;
 - A definition of the roles and responsibilities of members, appointment to the coalition/advisory committee, length of membership, and meeting frequency;
 - A process for new member orientation;
 - An assessment of members, no less frequently than every 18 months, to monitor coalition/advisory committee functioning and member satisfaction using assessment instruments identified by CDPH/CTCP or others acceptable to the coalition/advisory committee.
 - The creation of a standing committee charged with recruiting new members.
6. The chair of the coalition/advisory committee may not be from the administrative agency that functions as the facilitator of the coalition/advisory committee.
7. Agencies responsible for facilitating the coalition/advisory committee are to develop a process for recruiting and orienting new coalition/advisory committee members.
8. Agencies responsible for facilitating the coalition/advisory committee are to periodically provide training on coalitions/advisory committees to members and review operational procedures with coalition/advisory committee members.
9. Agencies responsible for facilitating the coalition/advisory committee are to develop communication systems to keep coalition/advisory committee members fully informed for both urgent (rapid response) and routine communication needs.

10. Agencies responsible for facilitating the coalition/advisory committee shall provide staff, logistical assistance, training, budget support, and other assistance as needed by the coalition/advisory committee.

#02 HEALTH EDUCATION PROGRAM REQUIREMENTS

Chapter 300

Adopted 02/94
Revised 12/08

The following are health education program requirements which are to be used by CDPH/CTCP funded agencies and their subcontractors to design and implement health education strategies. Programs are to:

1. Focus on community norm strategies which are likely to be institutionalized and to apply current research findings regarding the effectiveness of policy, media, and program strategies.
2. Focus greatest effort and resources toward the priorities of: 1) countering pro-tobacco influences; 2) reducing exposure to environmental tobacco smoke; and, 3) reducing the demand and availability of tobacco products through commercial sources.
3. Be comprehensive in nature and use community education, paid media, media advocacy, policy, training, surveys, and other activities to work in a coordinated and focused fashioned to achieve outcome-oriented objectives.
4. Reflect coordination and collaboration with the efforts of Local Lead Agencies, competitive grants, statewide projects, priority population partnerships, pilot projects, and statewide initiatives.
5. Reach out to and include groups having access to, knowledge of, and experience with target groups, but who are not currently involved or receive tobacco tax funding. Such groups include, but are not limited to churches, housing projects, law enforcement agencies, professional organizations, youth groups, schools, chambers of commerce, business groups, and unions.
6. Be designed with the assistance of representatives of target populations and intervention groups. They shall be conducted with the participation or support of organizations or individuals from the target populations or from organizations serving those populations.
7. Mobilize the community to demonstrate support for educational, policy, and enforcement activities. This may include: conducting letter writing campaigns, press conferences, community forums, obtaining resolutions from community groups, obtaining organizational endorsements, generating opinion editorials, meetings with key community leaders or agencies, creating new alliances with groups such as civil rights organizations, chambers of commerce, women's groups, community beautification groups, law enforcement agencies, alcohol and drug professionals, mental health organizations, etc.

8. Build the capacity of communities to address tobacco issues through training, surveying, coalition, leadership, and media opportunities, e.g., spokesperson training, conducting surveys, providing leadership opportunities to youth, etc.
9. Identify, document and publicize the presence of tobacco-related problems and demonstrate public support for tobacco control interventions through the media. Documentation of the problem may include youth tobacco purchase surveys, surveys of tobacco advertising, key informant interviews, intercept surveys, telephone surveys, etc.
10. Use paid media, public service announcements and media advocacy opportunities in a coordinated fashion to support national, state, regional, and local policy and educational activities.
11. Pursuant to National Cancer Institute recommendations, tobacco use prevention curricula for youth are to include the following components:
 - a. Concentrate primarily on tobacco use and keep separate from other drug, alcohol, or general health issues;
 - b. Contain information on the social consequences and immediate physiological effects of tobacco use, particularly as related to peers, parents, marketing, and media influences;
 - c. Provide learning experiences related to decision-making, problem solving, and refusal skills;
 - d. Include at least two or more sessions; and
 - e. Include an evaluation.
12. Tobacco control programs are to be culturally and linguistically appropriate for the target populations and intervention groups.
13. Program evaluation shall be built into tobacco control activities with the minimum percentage, defined in the procurement, to which you responded, of the budget directed toward evaluation activities. Evaluation activities are to be focused on outcomes, but also may include process evaluation and formative research.

#03 EDUCATIONAL AND MEDIA MATERIALS, INCENTIVE AND PROMOTIONAL ITEMS

Chapter 300

Adopted 02/94
Revised 12/08

The following requirements apply to the use and development of: 1) educational materials, 2) media materials (advertising efforts and public relations efforts), 3) promotional items, and 4) incentive items developed with funds from CDPH/CTCP. When all four types of materials are referenced, they will be referenced as “materials,” otherwise the type of materials will be specified as described below.

1. Examples of Materials

- a. Educational materials are items such as brochures, books, booklets, curricula, tip sheets, fact sheets, posters, videos, and games.
- b. Advertising materials (Ads) are items such as television (TV), radio, print, web, outdoor or in-store advertising.
- c. Public Relations (PR) materials are items such as press releases, newspaper/magazine/online articles, and media events/news conferences.
- d. Promotional and incentive materials are items such as T-shirts, pencils, stickers, balloons, water bottles, etc.

2. Technical Assistance

a. Educational, Promotional and Incentive Materials

The Tobacco Education Clearinghouse of California (TECC) is responsible for the coordination, review and statewide distribution of selected materials.

Required: Contact TECC to search for existing materials.

PRIOR to developing educational, promotional or incentive materials, agencies must first contact TECC Resource Library staff at 1-800-258-9090 to conduct a materials search to determine if similar, topic-related or audience appropriate materials were previously developed. This is a **MANDATORY** requirement in order for CDPH/CTCP to ensure non-duplication and statewide coordination.

Recommended: Contact TECC for free technical assistance. Projects that receive funding for materials development are to work with TECC on the development of new material to ensure: facts are correctly cited; pre-

testing of the material is completed for accuracy, effectiveness, literacy level and cultural appropriateness; and overall high professional production quality.

Note: For more extensive policy information on the adaptation of materials developed with CDPH/CTCP funds, see Policy #17, *Process to Request Use and/or Adaptation of Educational or Media Materials Produced with CDPH/CTCP Funds*.

b. Media Materials (Advertising and Public Relations)

The Tobacco Control Program's Media Unit (MU) is available to assist funded projects in creative concept development, strategy, or to provide creative feedback of TV, radio, print, web, or outdoor concepts. The MU is also available to provide concept development or strategy feedback for funded projects' PR related efforts. Contact the MU at 916-449-5500.

3. Development of Materials

Projects that are a part of the Online Tobacco Information System (OTIS) and that are developing substantive original materials must complete the Materials Development Form in OTIS. These materials include educational, advertising, promotional items, and incentive items having the potential for use and distribution statewide and that reflect a high quality development process.

The Materials Development Form is not completed for materials such as a flyer, press release, or packet of materials containing brochures and policies already available through the TECC catalog. It is not completed for one-of-a-kind materials not meant for mass distribution such as posters created by youth for a poster contest. Each material for which the Materials Development Form is completed must also be described in the body of the Intervention Activity Plan. Projects developing materials are required to ensure that:

- Information included in the material is factually correct, with appropriate citation of source material using a standard method for citing sources such as the *Chicago Manual of Style*.
- The material is free of grammatical, punctuation, and spelling errors.
- The material is appropriate for the target audience, as confirmed through field/pilot testing.
- The reading level of the material is appropriate for the target audience.
- Permission to use copyrighted material and artistic, photograph, and model releases are obtained and retained.

Note: All materials, even those not requiring the completion of a Materials Development Form in OTIS, should be submitted to TECC. TECC keeps a Resource Library of all developed materials for projects to access.

4. Acknowledgement

a. Educational Materials

Educational materials developed with CDPH/CTCP funds must include the following wording, “This material was made possible by funds received from the California Department of Public Health, under contract # XX-XXXX.”

b. Media Materials

Media materials (e.g., billboards, TV ads, radio ads, etc.) may have an abbreviated version of this acknowledgement, i.e., “Funded by California Department of Public Health.” Media materials must acknowledge the agency that is placing the advertising.

c. Incentives/Promotions

Incentive and promotional materials may omit the acknowledgement if there is a space limitation or the attribution interferes with the image of the piece.

5. Materials Development Submission Requirements

a. Progress Reports

Submit originals of educational and media materials and promotional/incentive items developed during the report period with both copies of the progress report submitted to CDPH/CTCP. For promotional/incentive items, you may include one (1) original with the original progress report and include a clear photo or photocopy of the items with the second copy of the progress report. One copy of the material is retained in the agency’s permanent contract file and the second copy is filed in the CDPH/CTCP Resource Room.

b. TECC Materials Intake

When a new material is created it must be submitted to TECC for inclusion in the Resource Library collection. If appropriate, the material is reviewed and considered for statewide distribution through the TECC catalog.

Submission Requirements:

- Two (2) originals: one for the Resource Library; the other for catalog review;
- Completed Material Development Report accessed through OTIS or the TECC Material Intake Form for those agencies not part of OTIS;

- Results of pre-testing for literacy level and cultural appropriateness; and, field test, pilot test, or expert review evaluation findings, as appropriate;
- Signed Copyright Release Form for all subcontractors including writers, designers, photographers and artists;
- Signed Model/Image Release Form for anyone who is recognizable in photos or illustrations used;
- Receipts/invoices for any stock photos or graphics purchased
- Translations of materials submitted in languages other than English.

The forms listed above are available on the TECC web site at www.tecc.org.

***Note:** Pre-testing or pilot testing of the messages and images of a material being developed or adapted for effectiveness, literacy level, and cultural appropriateness with the intended audience is required by CDPH/CTCP. The use of focus groups is recommended; however, one-to-one interviews or intercept surveys with the intended audience can also be used.*

Send materials and all appropriate development documentation to TECC Resource Library, 4 Carbonero Way, Scotts Valley, CA 95066.

The materials submitted to TECC are in addition to the materials sent in with your progress report. Materials should be submitted to TECC as they are completed. The materials are assessed by an internal TECC review process and external Materials Review Committee for inclusion in the TECC sales catalog. Materials submitted to TECC without appropriate copyright/distribution agreements and photo releases may not be considered for statewide distribution.

c. Master Copies

TECC or CDPH/CTCP may request camera-ready artwork and/or master copies for future reproduction purposes. Each agency that employs subcontracts is responsible for submission of any subcontractor's camera-ready artwork and/or master copies if requested by TECC or CDPH/CTCP.

Master copies are digital files including fonts, images and other links on zip or compact disks.

The required files include:

- A copy of the original file from the page layout or design program (e.g. the original QuarkXPress; Adobe PageMaker, InDesign, Photoshop or Illustrator; MS Publisher or even Word files) in editable/layered form

- All original illustrations and photos (this includes .jpg, .tif, .eps, .psd/Photoshop and .ai/Illustrator files)
- All fonts used, even if they are converted to outlines
- For video masters submit BetaCam tape, or DVD.

Note: *If using a professional graphic designer, please obtain these files, and a completed copyright release form, before final payment. CDPH/CTCP owns all artwork/digital files purchased and created with Proposition 99 funds.*

It is highly recommended that agencies have at least two editable master copies created at the time a material is developed; one that your agency retains and the second for TECC.

6. Contract/Administrative Issues

- When using the consulting services of an artist, writer, or designer for the development of materials, all agencies must indicate "Work for Hire" on contracts and invoices. Please see the CDPH/CTCP copyright language provided below that is to be included in all subcontracts and consultant agreements. This will ensure that the copyright belongs to CDPH/CTCP and that CDPH/CTCP has the authority to make derivative works and that no residual costs will be incurred by CDPH/CTCP for additional printing or use.

The following provision must be included in all subcontract agreements: "The subcontractor grants the State of California copyright interest in any Works created, provided, developed or produced under the agreement and ownership of any Works not fixed in any tangible medium of expression and agrees to assign those rights to the State. For any Works for which the copyright is not granted to the State, the State shall retain a royalty-free, non-exclusive and irrevocable license throughout the world to reproduce, to prepare derivative Works, to distribute copies, to perform, to display, or otherwise use, duplicate or dispose of such Works in any manner for government purposes, and to have or permit others to do so."

- All agencies must print the following on any invoices for duplication services of materials: "All _____ (e.g.: artwork, type, electronic files, or photographic film or video/audio tape) created or submitted for reproduction is the property of the California Department of Public Health. Acceptance of this order indicates agreement of these terms."
- If any material to be developed involves any copyright limitations (e.g., talent fees, limits on distribution, stock photography royalties), agencies must get CDPH/CTCP approval prior to the development of the material.

- d. When using the image or likeness of an individual in an educational or media material and promotional/incentive item, agencies must ensure that the individual has signed a consent form or photo release. Agencies shall obtain an additional consent form from the parent or legal guardian of individuals under 18 years of age.

Note: *Subcontract and consultant agreements and/or photo releases must be completed and include the required CDPH/CTCP copyright language even if no monetary payment is part of the transaction.*

Agencies are to include copies of copyright and/or photo releases when submitting materials to TECC.

- e. Agencies are not allowed to profit from the sale of materials created through the use of CDPH/CTCP funds. In some cases, agencies are allowed to recoup material duplication/distribution costs on a cost-recovery basis only. The agency must contact CDPH/CTCP to obtain PRIOR APPROVAL to generate revenue or if they are considering private distribution of materials.
- f. No video or portion of one can be edited and incorporated into another educational video without the express written permission from the CDPH/CTCP.

7. Content Issues

- a. Educational materials are to be developed as part of an educational intervention which includes other activities, and are never to be the sole source or method of education except those designed for self-help.
- b. Materials must be scientifically and technically accurate and original source information must be cited. When listing references, CDPH/CTCP recommends that the guidelines of the *Chicago Manual of Style* be followed.
- c. Messages must address themes based on research shown to be effective in discouraging tobacco use among the target group(s).
- d. Materials may not contain offensive or misleading messages, and may not personally attack, put down, or blame tobacco users, e.g., messages may not focus on smokers as “losers.”
- e. Educational materials shall not be used to promote religious ideology. Tobacco education materials designed for use in a faith-based setting must have tobacco education as their primary purpose and they can neither advance nor inhibit religion.

- f. No materials shall feature the image, voice, or identifiable views of any elected public official or candidate for public office.

8. Testing Requirements

- a. **Pretesting:** Materials must be pre-tested with the intended target group prior to their use for accuracy, appropriateness, and effectiveness. The use of focus groups for this process is highly recommended. TECC can provide testing assistance and sample test questions.
- b. **Literacy Level:** Materials must be tested for literacy levels and developed at the levels appropriate for the intended target group(s).

9. Educational Incentives

- a. How Incentives May Be Used: Tobacco education projects may use incentives to reinforce or motivate a change in behavior. Incentives are only to be given to participants attaining a pre-specified goal. Incentives may be awarded to individuals, businesses or groups for making a positive behavior or policy change, e.g., quitting smoking, adopting a voluntary smoke-free outdoor dining policy, or endorsing the Smokefree Movies campaign. They may also be awarded to adult and youth volunteers in your program to reward and reinforce participation in the Communities of Excellence Needs Assessment process, participating in beach cigarette litter clean-ups, participating in youth tobacco purchase surveys, being an exemplary spokesperson for policy initiatives, etc.
- b. Types of Educational Incentives: Incentives can be both tangible and intangible in nature. To be most effective, both forms of incentives should be used, for example, giving a reward along with public recognition for meeting specified goals.

An example of a tangible incentive in a youth tobacco control advocacy project is to give youth participating in surveying and media activities T-shirts, following the completion of surveying activities. Other examples of a tangible incentive in a prevention intervention are: (a) the awarding of merit badges to youth participating in a series of tobacco education and empowerment activities, or (b) awarding of gift certificates to youth participating in a prevention activity and who sign pledges to be tobacco-free for one year. In both of these examples, incentives are used to change or reinforce behaviors. An intangible incentive would include writing letters of recommendation for students applying to college or the opportunity to be featured in the media or a video about youth advocacy.

- c. Limitations:
 - 1) **Cash awards are not permitted as an incentive.**

- 2) **The value of an incentive is limited to \$50 worth of merchandise per person per year. The award amount cannot be pooled to exceed the \$50 per person per year limit; however, awards over the \$50 limit may be provided by soliciting donations from the community.**
- 3) The value of the incentive must be commensurate with the degree of behavior change sought. As such, a significant behavior change, such as quitting tobacco use and remaining tobacco-free for a 6-month period, may merit a large award with a value of \$40 to \$50. A less significant behavior, such as attending each cessation class may be rewarded with an incentive of more modest value (e.g., \$5).

d. Tips on Using Educational Incentives:

- 1) It is best to provide a series of small incentives for the initiation of intermediate changes, which could be for the reduction of smoking and given on the selected quit date. Larger incentives should be awarded after the intervention is concluded, and in the case of cessation, when the behavior change can be documented, e.g., smoke-free one month after the conclusion of the cessation program.
- 2) Incentives can be used to motivate participants to try again after a slip or relapse.
- 3) Incentives may be used to motivate or reinforce institutional change, e.g., plaques may be given to businesses or worksites that support non-smoking policies or businesses that reduce the amount of tobacco advertising in their stores.
- 4) It is important to reinforce the behavior change or maintenance of positive behavior by clearly stating how the person earned the incentive when it is given.
- 5) If possible, incentives should reinforce other healthy behaviors, e.g., a pass to a recreational or cultural event, or reinforce other tobacco education efforts in the community, e.g., a gift certificate to a store that has removed its tobacco advertising.
- 6) The value that the target population places on the incentive item should be considered. Youth may value sports equipment, amusement or movie tickets.

10. Food Incentives

- a. Food/refreshments are an allowable incentive item which may be purchased and made available at coalition/advisory committee meetings

or to volunteers who have participated in tobacco control related events and activities such as youth tobacco purchase surveys or beach litter clean-ups. Food is recognized as an appropriate incentive that acknowledges appreciation of the participation of people in meetings, events, and activities. Moreover, it is recognized that the provision of food or refreshments is a cultural expectation in many of the communities that tobacco control projects work with and that the provision of refreshments at planning meetings with these communities will facilitate the development of positive relationships.

- b. The value of food incentives should be reasonable and budgeted overall at no more than approximately \$50 per person per year. For example: yogurt, muffins, coffee and juice for a morning event; sandwiches, fruit, sodas and bottled water for lunch events; or pizza, soda and juice/bottled water for evening events. This is in addition to the other tangible incentives that may be awarded for reinforcing a positive behavior change or for recognizing and reinforcing community participation in tobacco control activities, (e.g., participating in beach cigarette litter clean-ups, serving as an exemplary spokesperson for policy efforts, or making major contributions to the coalition or advisory committee).
- c. The food incentive policy does not permit the purchase of meals for staff on CDPH/CTCP-funded projects (both Local Lead Agency and competitive grants), nor local health department employees. These individuals are subject to the rules and policies for meal and per diem reimbursement required by the CDPH/CTCP contract language or their agency's personnel policies.

11. Promotional Items

- a. Promotional items are used to generate visibility and interest in the program. Promotional items may consist of buttons, key chains, hats, T-shirts, etc.

Example: Giving visors to participants in a tobacco awareness walk-a-thon. The intent of the visor is not to facilitate behavior change, but to generate interest and enthusiasm for the program, and to perpetuate a tobacco-free lifestyle or community message when worn.

- b. The value of promotional items is to be moderate or nominal in cost.
- c. Agencies using promotional items should use those items in a planned manner and require some action on the part of the potential recipient, e.g, complete a tobacco industry knowledge quiz, sign a birthday card celebrating the anniversary of the city's clean indoor air ordinance, smokers sign a tobacco-free honor roll with the number of years they have been tobacco-free.

Materials Development and TECC Intake

Materials Development Report

Print a copy of this report and submit it with the following:

Submission Requirements:

- Two (2) originals, one for the Resource Library; the other for catalog review
- Results of pre-testing for literacy level and cultural appropriateness; and, field test, pilot test, or expert review evaluation findings, as appropriate
- Signed Copyright Release Form for all subcontractors including writers, designers, photographers and artists
- Signed Model/Image Release Form for anyone who is recognizable in photos or illustrations used
- Receipts/invoices for any stock photos or graphics purchased
- Translations of materials submitted in languages other than English

Send these items to: TECC Resource Library, 4 Carbonero Way, Scotts Valley, CA 95066

Signature of person completing this form: _____

Agency Name: Test Agency Number 1

Project Name: Project 2.1

Contract Number:

Date Report Generated: 01/10/2007 03:56 PM

Material ID: 1-6-1-M1

Working Title of Material: Example Material

Brief Description of the Content: This is a test of the OTISv2 Materials submission form

Target Audience to be Reached by **AUDIENCE GROUP(S)**

the Material: Adults 18 years and older

GENERAL POPULATION GROUP(S)

- African
- African American/Black

SPECIFIC ETHNIC POPULATION GROUP(S)

Material Format: Audio Tape

Language: American Sign Language

Projected Completion Date: 01/05-06/05

Primary Content: Alternative Tobacco Products

Material Purpose: Influence attitudes about issue

Number of Copies Distributed:	

ABSTRACT OF FINAL PRODUCT

#04 USE OF CDPH/TCS FUNDS FOR TOBACCO CESSATION

Chapter 300

Adopted 01/96
Revised 12/08

1. Tobacco control programs MAY:
 - a. Administer tobacco cessation programs using self-help, group, community, web-based, and media strategies;
 - b. Train health care professionals or others to provide tobacco cessation services or to integrate tobacco use assessment and cessation services into the protocols of an agency with the provision that cessation services will be institutionalized by a specified date.
 - c. Work with and provide technical assistance to voluntary health organizations to ensure that priority populations, such as ethnic/racial populations, lesbian/gay/bisexual/transgender, low socioeconomic status, and labor populations, and smokeless tobacco users are served by the cessation efforts of those voluntary health organizations.
 - d. Conduct efforts to motivate tobacco users to quit using tobacco products.
 - e. Conduct efforts to educate and inform tobacco users about the cessation benefit available to them through either publicly-funded (e.g. Medi-Cal or Medicare) or privately-funded (e.g., employment based or individual insurance programs).
2. Local Lead Agency tobacco control projects may use no more than 10% of their cumulative budget for the provision of direct cessation services. Competitive grant funded tobacco control projects may be limited to the portion of their budget that may be applied to the delivery of direct cessation services through the procurement under which the project was funded.
3. Funds MAY NOT be used to fund health care professionals or lay professionals to provide **individual** tobacco cessation counseling, tobacco use prevention counseling or counseling to decrease exposure to environmental tobacco smoke in health care clinic settings, the home or at the worksite.
4. Funds MAY NOT be used to develop or administer intensive telephone tobacco cessation counseling without explicit written authorization from CDPH/CTCP in order to avoid duplication of services with the California Smokers' Helpline.
5. Tobacco cessation methodologies are to incorporate the following:

- a. Elements focusing on the health and social consequences of tobacco use;
 - b. Strategies and exercises aimed at quitting;
 - c. Relapse prevention; and
 - d. Evaluation of quit status at three, six months, and one year and annually determine the cost effectiveness of cessation activities.
6. Tobacco cessation methodologies MAY also incorporate the following (when used as an adjunct to an educational intervention meeting the tobacco cessation criteria described above):
- a. Pharmacological interventions; however, CDPH/CTCP funds may not be used to purchase nor reimburse the cost of medications.
 - b. Hypnosis techniques.
 - c. Acupuncture; however, CDPH/CTCP funds may not be used to reimburse staff for performing acupuncture nor for materials associated with performing acupuncture.
7. Tobacco cessation methodologies may not incorporate aversion therapy.

#05 SPONSORSHIP REQUIREMENTS

Chapter 300

Adopted 01/96

Revised 12/08

Definition of Sponsorship

- Sponsorship is a cash and/or in-kind fee paid to a property, event, or organization (typically in sports, arts, entertainment or causes) in return for access to the exploitable commercial potential associated with that property, event, or organization. It is undertaken for the purpose of achieving commercial objectives, and is not philanthropy. It promotes a company (your project) in association with the sponsor (property, event, or organization). Sponsorship is one of the four arms of marketing (advertising, sales promotion, public relations, and sponsorship). A sponsorship can also provide you with access to a live audience, on-site sampling (e.g. of anti-tobacco use materials), and opportunities to survey audiences about tobacco control issues.
- Sponsorship with respect to tobacco control is the promotion of an anti-tobacco use message to an audience attending specific events or venues in the community. The purpose of a sponsorship is to counter the tobacco industry's pro-tobacco use messages or presence in the community and to develop community goodwill for anti-tobacco use educational, media and policy activities. The tobacco control program's sponsorship dollars are to be used as an incentive for community events and/or venues to pass policies rejecting tobacco industry sponsorship and to create smoke-free events or areas. It is likely that a lot of groundwork and relationship building between tobacco control advocates in the community and an event or venue will need to be accomplished in the process of working toward such an objective.

The following are criteria for CDPH/CTCP supported sponsorships.

Documentation that these criteria were met must be included with progress reports. Documentation may include copies of advertising, photos of signage, copies of tobacco-free policies, and anything that shows what was received in exchange for the sponsorship. Sponsorships are subject to the review and approval of CDPH/CTCP and may be denied if deemed to be an inappropriate use of state taxpayer monies. Please use the checklist attached to this policy as a guideline for approving sponsorships at the local level.

1. The tobacco industry has a history of sponsoring events and/or venues, such as racing events or racetracks, rodeos, cultural events, community festivals, special exhibits, county fairs, stadiums, or professional or minor league ballparks. Your project should sponsor these types of events in your community to prevent and/or end the sponsorships provided by the tobacco industry.

2. Youth events and activities generally are inappropriate Proposition 99 sponsorships because the Master Settlement Agreement (MSA) has already disallowed the tobacco industry from providing youth-focused sponsorships. Some exceptions may be made for rural counties where other sponsorship opportunities may not exist, or where it is evident that the sponsorship is building a relationship with the community to pursue stronger policy work in the future. These types of exceptions must be approved on a case by case basis by the Program Consultant (PC) and Contract Manager (CM) assigned to your project.
3. Health fairs are NOT sponsorships and will be denied by CDPH/CTCP.
4. The project is to receive something tangible in exchange for being the sponsor. The larger the financial commitment, the larger the value the sponsor should receive, which may include large signage at the event, advertising in the event program or materials, booth space, radio or television publicity, public announcements at the event and/or cross promotions with other sponsors.
5. As the sponsor, the project should negotiate that the events sponsored with tobacco control funds be tobacco-free, or at a minimum, have designated smoking or non-smoking areas, e.g., no smoking in the carnival areas of fairs, designated non-smoking areas in the stadium at a rodeo or racetrack. Another aspect of negotiation of a sponsorship agreement might include a written non-acceptance of tobacco industry funds policy to be adopted by the event organizing body (board) or by the venue where events are held (such as a rodeo arena, racetrack grounds, or fairgrounds). Information and model policies for fairgrounds, rodeos, and other event venues are available from the CDPH/CTCP-funded legal and policy projects or on the PARTNERS Project SMART Money web page.
6. Tobacco control funds are not to be viewed as a long-term replacement of tobacco company sponsorships or financial support to any one individual, team, group, event, or organization. Therefore, a sponsorship is limited to two (2) years unless it is otherwise justified and receives prior approval by your PC and CM.
7. Sponsorships are typically for \$1,000 - \$2,000. An exemption may be sought from CDPH/CTCP if there are special circumstances – these will be decided on a case by case basis.
8. Any individual performer, team, group, event, organization, or venue sponsored with tobacco control funds must prominently display a large sign or banner that promotes an anti-tobacco message AND the name of the sponsor (i.e., the project or organization's name). The project may not sponsor an event or venue that is currently receiving tobacco company sponsorship. It is possible to obtain

a venue policy prohibiting tobacco sponsorship even for events that are sponsored at the national level by a tobacco company. For example, Pro Rodeo Cowboys Association (PRCA) rodeos are sponsored nationally by Copenhagen, but if the rodeo arena in a particular city has a venue policy prohibiting such sponsorship, the Copenhagen scoreboard, flag, and banners would not be allowed into that particular arena.

9. Publicity promoting the individual performer, team, group, event, organization, or venue is to include an anti-tobacco use message AND the name of the sponsor (i.e., the project or organization's name).
10. Sponsorships must be outlined in the Scope of Work and budgeted in a separate line item labeled "Sponsorships."

Checklist for Evaluating the Likelihood of a Sponsorship Match (Adapted from International Events Group, IEG Inc.)

Use this checklist as a guide to evaluate events or venues that you should approach in your community with sponsorship monies, or when being approached by events or organizations seeking sponsorships. This is merely a guide to help you think about what should be included in your sponsorship agreement – not every box needs to be checked, but you should think about each of the issues listed. The more boxes checked, the more likely it is that the sponsorship match will be approved by CDPH/CTCP.

Image Compatibility

- Does the event offer the imagery and/or lifestyle that my program is trying to establish and with which we want to be associated? (*Is it a smoke free event? Does it have smoke free areas? Does it have a high profile in the community?*)
- Are the other co-sponsoring companies those with whom my program wants to be associated? (*Does the event have any continuing tobacco sponsorship? If so, the sponsorship is NOT appropriate.*)

Audience Composition/Reach

- Does the event or venue attract the audience that my program wants to reach?
- Is this sponsorship opportunity in the geographic market that my program wants to impact?
- Does the audience feel a strong sense of ownership or identification with the venue or event?
- What is the extended reach of the event or venue? Are there on-site spectators? Television viewers?

Ability to Leverage/Additional Promotional Opportunities

- Can my program conduct cross-promotions with appropriate cosponsors?
- Does the opportunity occur during a time that we would like extra visibility in the community? (*What other tobacco control activities are going on in the community?*)
- Is the promotional time frame of the sponsorship defined clearly, and will it meet program needs? (*Year round? One season? One event?*)
- Are there opportunities for display? (*May we have an educational booth at the event?*)

Media Coverage and Recognition

- Is the event appealing – in a positive way - to the media?
- Can the event draw broadcast and print coverage?
- Will my program be recognized in that coverage?
- Can the event attract a TV or radio broadcast?
- Will my program's signage show up on the TV broadcast or be mentioned on-air?

Communicate Product Attributes

- Can my program's message be worn while participants compete or perform?
- Can my program's message be showcased as a key element of the event?

Efficiency

- Does the event or venue deliver to a wide audience?
- Is the relationship between the cost of sponsorship and the value received appropriate?
- Does the sponsorship's cost compare with that of similar properties?
- Is this the most cost effective means to get the results I am looking for?

Measurability

- Does the event or venue conduct regular surveys or tracking studies that could be shared with my program and/or that might include questions developed around tobacco sponsorship? *(Can I include public opinion questions around the issue of tobacco sponsorship and smoke free areas within the event?)*
- Does the event or venue lend itself to measuring the reach and impact of the sponsorship you are offering? *(Do they track audience demographics? Do they collect attendance data?)*

Ability to Extend

- Does the sponsorship contain spin-off opportunities? *(If I sponsor a racing team, will I have the opportunity to approach racetrack owners/operators regarding implementing smoke free areas?)*
- Is the sponsorship something my program can build upon? *(If I sponsor a Pro-Rodeo Cowboy's Association rodeo that agrees to eliminate the Copenhagen scoreboard and not announce livestock names that contain tobacco brands, can I do the same for a Professional Bull Riders event at the same venue and build toward getting a venue policy passed?)*

Ease of Administration

- Is the event well organized?
- Are event staff specific about what the sponsorship includes?
- Can the event/venue deliver what they have promised in exchange for the sponsorship? *(Do I have a signed board policy or venue policy in hand?)*
- Do I have staff to properly administer the sponsorship? *(Will someone attend the event to make sure we get what was agreed to and document this for the progress report? Will there be staff to conduct surveys at the event if needed? Do we need staff for an information booth?)*
- Does the event have a credible track record? *(Is it a well-established community event with a consistently large audience?)*
- Will the event/venue work with us to capitalize on the sponsorship by initiating cross-promotions via sponsorship workshops or producing post-event reports?

- Is the lead time sufficient for staff to develop materials/deliverables collateral to the sponsorship in order to maximize the effect?

Risk Factors

- If the sponsorship fails to meet our objectives, can we withdraw without suffering adverse consequences, such as public dissatisfaction?
- Is the event/venue financially stable?
- Will the event/venue audience feel that our message is making a positive difference in the event?
- Have we made sure that there are no venue restrictions that might cause conflict with our program or message?

#06 SUBCONTRACT AGREEMENT REQUIREMENTS

Chapter 300

Adopted 12/06

Revised 12/08

The subcontract agreement requirements stated here apply to competitive grantees only. CDPH/CTCP does not review Local Lead Agencies subcontract agreements.

The term “subcontractor” includes any individual or entity, which enters into a subcontract agreement with the grantee for performance of any part of the grant with CDPH/CTCP.

1. CDPH/CTCP will review and approve subcontract agreements that are greater than \$50,000 (except as noted in item 2.). Please refer to Section I, Administrative Section of the Competitive Grantees Administrative and Policy Manual, Chapter 600, Subcontract Requirements for instructions.

Subcontract agreements that are \$50,000 or less will not be reviewed by CDPH/CTCP (except as noted in item 2.); however, the grantee will certify that the subcontract agreement adheres to the CDPH/CTCP subcontract requirements (refer to Section I, Administrative Section of the Competitive Grantees Administrative and Policy Manual, Chapter 600, Subcontract Requirements). A subcontract agreement certification must be submitted to CDPH/CTCP. The complete subcontract agreement and a copy of the certification form will be retained by the agency.

2. Evaluator subcontract agreements regardless of the amount will not be reviewed by CDPH/CTCP **if** the Evaluator is identified in the grantee’s initial scope of work (SOW) and in the budget, and their qualifications, activities, and costs are approved in the final SOW and budget justification process. A subcontract agreement certification must be submitted to CDPH/CTCP.

If the grantee has not identified the Evaluator and the grant is fully executed, the grantee will need to submit the Evaluator subcontract agreement for CDPH/CTCP review and approval. Please refer to Section I, Administrative Section of the Competitive Grantees Administrative and Policy Manual, Chapter 600, Subcontract Requirements for instructions.

#07 YOUTH TOBACCO PURCHASE SURVEY REQUIREMENTS

Chapter 300

Adopted 01/96
Revised 12/08

The following requirements shall be followed by agencies when conducting youth tobacco purchase surveys:

1. Agencies may use either consummated buys or attempted buys for conducting youth tobacco purchase surveys. A list of the pros and cons of each of these formats can be found immediately following this policy.
2. Agencies who conduct consummated purchase surveys must first obtain immunity from prosecution under Penal Code 308 for youth volunteers to conduct the survey from your county's District Attorney, Chief of Police or County Sheriff. For those who conduct attempted purchases, you **do not** need to obtain immunity from prosecution for youth volunteers. As a courtesy and for safety purposes you still need to get support from and coordinate with local law enforcement.
3. Agencies should notify one another and coordinate youth tobacco purchase surveys conducted in the region with Local Lead Agencies and other competitive grantees as appropriate to avoid confusing the local law enforcement agencies and the media.
4. Youth participating in the purchase surveys should preferably be between 15 and 17 years of age and include an approximate equal gender representation. Efforts must be made to ensure appropriate ethnic representation to match the communities being surveyed.
5. Teens must receive a minimum of one hour of training on the survey protocol.
6. Safety of the youth participants must always be placed first and appropriate safety measures followed at all times.
7. Informed consent and a liability waiver must be obtained from all adult and youth survey participants prior to their participation in any survey activities. Documentation of valid California driver license is required of all adult drivers.
8. Agencies are required to use CDPH/CTCP protocols and procedures for conducting youth tobacco purchase surveys including the youth purchase survey

instrument, forms, and data collection procedures (for consummated or attempted purchase surveys).

9. The agency shall develop a random sample of retailers (to include grocery stores, gas/convenience stores, liquor stores, convenience stores, drug stores/pharmacies, gas stations only, restaurants, and others) for self-selected geographic area to be surveyed. CDPH/CTCP may be contacted for assistance in generating random lists, and for sample size. A replacement list will also be generated. Stores may be contacted prior to the survey to confirm their correct address, and that the store sells tobacco, however, precautions must be taken not to alert the store of an upcoming purchase survey.
10. Results of the purchase survey should be disseminated to policy-makers, including local elected officials and community leaders, through media channels (press conferences, news releases, press kits), and other appropriate mechanisms to generate support for action to decrease youth access to tobacco. Results should be posted on PARTNERS.
11. A report of the results is to be sent to CDPH/CTCP, and is to include, at a minimum: purchase protocol, survey instrument, survey methodology, buy rate for each area surveyed, and barriers/facilitating factors in conducting the survey.
12. Stores surveyed may be contacted following purchase survey to provide feedback (letters of congratulations or disappointment). Educational activities directed to merchants who illegally sold tobacco to youth following a purchase survey include: distribution of merchant education materials, in-store visits, and merchant education training.

**SIDE BY SIDE COMPARISON
OF
CONSUMMATED -VS- ATTEMPTED YOUTH TOBACCO PURCHASE SURVEY**

Consummated		Attempted	
Pros	<p>Have evidence of a sale and more accuracy.</p> <p>Cigarette pkgs. can be used in press conferences.</p> <p>More closely duplicates the real situation.</p> <p>Youth don't have to be embarrassed by coming up short on money.</p> <p>Helps build commitment among youth volunteers when they see the actual purchases.</p> <p>Disposal of tobacco products can be turned into an advocacy activity by mailing them back to the tobacco companies as gifts of death.</p> <p>Can collect Marlboro Adventure miles and Camel bucks to obtain promotional items for other educational activities.</p>	Pros	<p>Easier to obtain law enf. permission.</p> <p>Well received by media because youth stopped the buy.</p> <p>Don't have to spend money on tobacco products.</p> <p>Don't have to track money during the "buys."</p> <p>Philosophically more acceptable to some adults because you aren't encouraging youth to "break the law."</p>
Cons	<p>Have greater difficulty obtaining local law enf. permission for surveys.</p> <p>Some people perceive it as encouraging young people to break the law.</p> <p>Have to budget for buying tobacco although the cost goes down as sell rates are reduced.</p> <p>Have to handle money during "buys" and track it.</p> <p>Budget has to include cost of purchasing tobacco</p>	Cons	<p>May tip retailers off that this is a survey.</p> <p>Youth may be embarrassed.</p> <p>Don't have hard evidence of the buy.</p> <p>The picture for the media is less dramatic without the cigarette pkgs.</p>

#08 USE OF PROPOSITION 99 FUNDS FOR ENFORCEMENT ACTIVITIES

Chapter 300

Adopted 01/96
Revised 12/08

1. Proposition 99 funds may not be used to conduct law enforcement activities. They can only be used for purposes specified in the statute. Law enforcement is not within the scope of any of the specified purposes as detailed below.

2. California Revenue and Taxation Code Section 30122 authorizes use of Proposition 99 funds as follows:

"(a) The Cigarette and Tobacco Products Surtax Fund is hereby created in the State Treasury. The fund shall consist of all revenues deposited therein pursuant to this article. Moneys in the fund may only be appropriated for the following purposes:

(1) Tobacco-related school and community health education programs.

(2) Tobacco-related disease research.

(3) Medical and hospital care and treatment of patients who cannot afford to pay for those services, and for whom payment will not be made through any private coverage or by any program funded in whole or in part by the federal government.

(4) Programs for fire prevention, environmental conservation; protection, restoration, enhancement, and maintenance of fish, waterfowl, and wildlife habitat areas; and enhancement of state and local park and recreational purposes.

(b) The funds consist of six separate accounts as follows:

(5) The Unallocated Account, which shall be available for appropriation for any purpose specified in subdivision (a)."

3. Law enforcement activities which MAY NOT be funded include, but are not limited to:

- Inspections or stings conducted for the purpose of determining compliance with local, state or federal law and issuing a penalty or fine (This should not be construed to mean that Proposition 99-funded programs cannot conduct surveys or evaluation activities to determine compliance with tobacco-related laws);

- Legal fees; and
 - Fees associated with due process, court hearings or administrative hearings.
4. Proposition 99 funds MAY be used to:
- Motivate appropriate agencies to conduct enforcement activities;
 - Train enforcement agency staff;
 - Educate violators of tobacco-related laws;
 - Provide educational warning letters, educational materials and signs describing tobacco-related laws;
 - Train business owners and employees; and
 - Generate or demonstrate public support for enforcement of tobacco-related laws.

#09 COMMUNICATIONS SYSTEM REQUIREMENTS

Chapter 300

Adopted 01/96
Revised 12/08

CDPH/CTCP-funded agencies are responsible for coordinating information, referral, and outreach efforts.

1. Agencies are required to subscribe to CDPH/CTCP' computer network system known as PARTNERS (See Policy #16) and log on to the web site at least once per week. Agencies are also encouraged to use PARTNERS as a means to disseminate information about their activities and solicit assistance from other PARTNERS users via the Strategy Exchange. To this end, agencies must have access to the Internet and e-mail.
2. Agencies are to use the CDPH/CTCP calendar available through both PARTNERS and the Online Tobacco Information System (OTIS) to post major trainings, conferences or events that are of interest to California's tobacco control community or that may facilitate efforts to coordinate events statewide.
3. Agencies are to use the electronic project directory available through OTIS (See Policy #20) for purposes of coordination, collaboration, and to avoid duplication of effort when planning, implementing, and evaluating tobacco control projects.
4. Agencies are to widely publicize and promote the California Smokers' Helpline to the public, health care providers, worksites, schools, and others.
5. Agencies are to tag educational and media materials with the California Smokers' Helpline telephone numbers, as appropriate. Contact the Helpline prior to any mass media promotion of the Helpline telephone numbers so that the Helpline can plan ahead and handle the increase in calls resulting from your promotion.

English (adults & teens)	1-800-NOBUTTS
Spanish	1-800-45-NOFUME
Korean	1-800-556-5564
Cantonese/Mandarin	1-800-838-8917
Vietnamese	1-800-778-8440
Smokeless Tobacco	1-800-844-CHEW
Hearing Impaired	1-800-933-4TDD

6. Local Lead Agencies should develop a resource directory of tobacco education and control services within the local health jurisdiction and provide this information to the California Smokers' Helpline annually.

7. Agencies are encouraged to incorporate reference to TobaccoFreeCA.com and the “undo” campaign tag into their programs by doing the following:

- Add the following “undo” campaign tag line and web site reference in their e-mail signature line (note that the “undo” should be in red):

Imagine a world without cigarettes: “undo” tobacco everywhere.
www.TobaccoFreeCA.com

- Add a hyperlink to www.TobaccoFreeCA.com on your program or agency’s Web site.
- Add www.TobaccoFreeCA.com to your local ads, flyers, banners and other printed materials.

#10 TRAINING AND TECHNICAL ASSISTANCE REQUIREMENTS

Chapter 300

Adopted 02/94
Revised 12/08

1. CDPH/CTCP-funded agencies may provide training and technical assistance on a variety of issues including: policies to control exposure to environmental tobacco smoke, youth access to tobacco, exposure of youth to tobacco advertising and promotions; spokesperson and leadership development; grant writing; how to find alternative funding sources for community events other than the tobacco industry; program planning, evaluation; development of the capacity to manage programs; data collection; legal and policy issues; and other areas of concern.
2. A key goal of training and technical assistance should be to build the capacity of the agency, organization, individual or institution to plan, implement, and evaluate tobacco use prevention and reduction activities.
3. LLAs are responsible for providing training and technical assistance to agencies, organizations, businesses, worksites, cities, law enforcement agencies, retail groups and others involved in tobacco use prevention and reduction activities. LLAs may also be called upon to assist CDPH/CTCP-funded grantees with both programmatic and administrative issues.

#11 USE OF CDPH/TCS MEDIA MATERIALS

Chapter 300

Adopted 02/94
Revised 12/08

PRIOR to developing media materials, contact the Tobacco Education Clearinghouse of California (TECC) at 1-800-258-9090, the CDPH/CTCP Media Unit at (916) 449-5500, and the federal Centers for Disease Control and Prevention, Office on Smoking and Health (CDC/OSH) Media Campaign Resource Center (MCRC) at (770) 488-5705 to determine if there are existing materials available which are appropriate for the targeted audience and advertising strategy. This is a **MANDATORY** requirement and must be documented in progress reports submitted to CDPH/CTCP.

Statewide Media Material

CDPH/CTCP' Media Unit makes materials available to all CDPH/CTCP-funded projects. These media materials include print materials for newspapers, posters or billboards, and paid radio and television (TV) advertisements (ads), including ethnic and language-specific materials. Radio and TV public service announcements (PSAs) to be run on donated station time are subject to different rules than ads with paid placement. PSA availability is limited.

The State has entered into agreements with the Screen Actors Guild, American Federation of Television and Radio Artists, and CDC/OSH. These agreements govern the availability and use of broadcast media. The State's radio and TV ads cannot be used for broadcast, internet or educational videos unless payments and contracts with the actors and musicians (talent) are current. Use of CDPH/CTCP commercials must be authorized by the State within strict timeframes to avoid penalty payments, for which the agency could be held liable. Therefore, the State must monitor the distribution and usage of its radio and TV ads. As funding levels and advertising plans are subject to change, Local Lead Agencies must check with CDPH/CTCP to confirm current availability of broadcast media.

Prior CDPH/CTCP media campaign ads have been transferred to CDC/OSH. Through their advertising contractor, CDC/OSH now maintains the talent payments and contract renewals for these ads in order to make them available to states and health agencies worldwide. Ads from the current California Statewide Media Campaign, as well as selected ads from prior campaigns, may be available directly from the State. Agencies should allow extra time in their media schedules when ads maintained by CDC/OSH are requested.

Following are the general requirements for using *all* advertising materials:

1. Before requesting any materials from CDPH/CTCP, agencies shall develop a media plan and submit it to CDPH/CTCP, Media Unit, with a copy furnished to your CDPH/CTCP Program Consultant. The media plan shall include:
 - the media to be utilized (e.g., television, magazines, direct mail)
 - placement schedules (time periods during which each advertisement will run and where it will run)
2. Use of materials must be coordinated with the other tobacco education agencies (e.g., LLAs, competitive grantees and statewide projects operating within the same media market, as well as CDPH/CTCP' Media Unit for planned State funded media activity in local area. Changes in the level and targeting of advertising often have a strong impact on the number of requests from the public for information and materials, complaints, as well as utilization of the State's toll-free numbers for tobacco use cessation and other programs. The State must be allowed sufficient notice in order to ensure staff and resources are available in response to shifting demands. In addition, coordination will avoid ineffective duplication of efforts and ensure that advertising in all geographic regions will be mutually supportive of program goals, cost-effective, and as widely distributed as possible.
3. The "tag" identifying the agency and/or sponsor and Helpline number, if applicable, should be used consistently throughout each media market. See Policy #03, Item 4, for information regarding "tagging" of media materials.
4. Media materials should be chosen to reach the targeted audience cost-effectively. Review the CDPH/CTCP TV, radio and print ads found at <http://www.tobaccofreeca.com/ads>, TECC advertisement summaries, the CDC/OSH Media Campaign Resource Center, and local media research data in order to determine the best placement and type of media.
5. LLAs are encouraged to promote media materials for use within news or feature stories. There are no restrictions or talent payments associated with incorporation of an advertisement into a news or feature report.
6. The media materials shall not be used for the promotion of any for-profit product, service, or business. No admission fee may be charged for admittance to a presentation of any advertisement. Advertisements shall not be incorporated into a curriculum, Powerpoint presentation or media production, such as an educational video. Requests for these types of use must be referred to CDPH/CTCP Media Unit.
7. Agencies shall maintain detailed records of distribution of commercials.

Public Service Announcements (PSAs)

Specific requirements for using the State's PSAs are as follows:

1. PSAs may only be used for broadcast on a public service basis, that is, on donated media time.
2. PSAs shall not be altered or edited in any way.
3. A "tag" (printed titles and/or voiceover) can be added to the PSA, within the space and time allowed.
4. Agencies may copy the PSAs only for broadcast use on a public service basis. Agencies shall not distribute the PSAs to other agencies or organizations. Requests from other agencies and organizations must be referred to CDPH/CTCP.

Paid Radio and Television Commercials

The following requirements govern the use of the State's radio and TV commercials:

1. Commercials shall be aired in their entirety and shall not be altered or edited in any way.
2. A "tag" (printed titles and/or voiceover) can be added to the paid commercial within the space and time allowed. The tag should include information stating who is paying for the commercial broadcast time. The State recommends, "Paid for by [organization's name], funded by the California Department of Public Health."
3. The commercial must be aired on a paid basis only, that is, on purchased media time.
4. Payment for any media time purchased by the agency or its designee shall be the responsibility of the local lead agency.
5. It is essential that agencies coordinate with the State media campaign for the local use of ads to minimize talent payments due. Agencies planning broadcast ads are responsible for paying all talent fees. However, in some cases, talent payment may not be needed if for example, the State's media campaign is currently using the advertisement and paying talent.
6. Agencies should not make copies of commercials provided. Usually the broadcast quality ads will be made available directly to the media vendor with only a viewing copy to the local agency. Agencies shall not distribute paid

commercials to other agencies or organizations. Requests from other agencies and organizations must be referred to CDPH/CTCP.

Billboards and Print Materials

1. The State Media Campaign can make existing print ads available to agencies at little or no cost. Payment for advertising space purchased by the agency or its designee shall be the responsibility of the agency.
2. The State's billboards and other print materials are produced in limited quantities. Costs associated with sniping (adding Helpline/sponsor information to a billboard or print advertisement), shipping, and additional print runs may be the responsibility of the agency.

Internet Use

Internet and other electronic technology is rapidly evolving, and the Screen Actors Guild commercials contract changes frequently as a result. Currently, internet rights for ads produced by CDPH/CTCP are extremely limited. Agencies should not upload or forward any ads provided since significant costs could be incurred. For any type of media use beyond traditional broadcast and print, contact CDPH/CTCP' Media Unit.

To Request CDPH/CTCP Media Materials:

To request media materials, send a fax on your agency letterhead to Sandra Soria with a copy to your Program Consultant at (916) 449-5505. Include your media plan and as much of the following information as possible:

- title and/or description of the advertisement
- where the ad will air or appear along with vendor contact information
 - number and locations of billboards or newspapers, or
 - number, locations, and call letters of stations
- if outdoor or print, the size(s) needed
- period of time when the ad will run
- local tag copy, if applicable

For Assistance

1. To coordinate media efforts, call Sandra Soria of the CDPH/CTCP' Media Unit at (916) 449-5724 or e-mail Sandra at Sandra.Soria@cdph.ca.gov.
2. For more information on how to integrate media advocacy into your tobacco control program, refer to the guidelines on the following pages.

GUIDELINES FOR INTEGRATING MEDIA ADVOCACY INTO TOBACCO EDUCATION PROJECTS

The following are guidelines for using media advocacy strategies and should be incorporated into the development of tobacco control projects. These guidelines were developed with support from the Stanford Center for Research in Disease Prevention.

Many media stories result from creative opportunism - seizing opportunities created by unplanned events and the evolving news environment. These opportunities can be prepared for by developing and following a strategic plan that integrates media into the broader scope of the project.

A strategic approach means weaving media throughout all interventions. It does not simply mean publicity for your agency or media exposure for tobacco-related stories measured by column inches or broadcast minutes. This can result in a costly and common error of compartmentalizing media activities or segregating them from the foundation of the overall program.

The key steps to integrating media advocacy into your project are:

A. Determine Your Policy Objectives

- Are you working on reduction of youth access to tobacco?
- Are you trying to increase enforcement of youth access to tobacco laws?
- Are you trying to limit tobacco advertising/signs in your community?
- Are you trying to eliminate tobacco sponsorship of local events?
- Are you attempting to build support for enforcement of smoke-free bars?
- Are you trying to reshape public opinion focusing on protecting the public?
- Are you trying to build support for smoke-free multi-unit housing?

B. Determine Your Audience, Channel, Communication Objective, and Resources

1. Audience

- Are you attempting to educate community decision-makers or the public?
- If the public, what are their demographics?
 - Where do they get their information from?
 - Who do they think is credible to deliver the message?

2. Channel

- Have you developed an inventory of media outlets in your community such as newspapers, radio stations, community publications, etc?
- Which ones have a history of covering local issues of health and policy?
- What is their circulation/reach?
- What are the available formats?
- What are the names of key people?

3. Communication Objective

- Are you trying to make people aware of a specific tobacco policy or issue?
- Are you trying to impart information on environmental issues that support policy?
- Or do you actually want people to take a specific action?

4. Resources

- What is your budget?
- Who on your staff has media experience, contacts or mailing lists?
- What equipment do you have available to you (desktop publishing system; video player, camera, etc.)?

After the audience, channel, communication objective, resources and policy objectives have been decided, consider the tactics to implement these strategies.

C. Designate a Media Specialist

The designated media specialist does not necessarily need to be someone with extensive media experience, but it should be one person, with the help of a subcommittee, who is committed to getting acquainted with, tracking and working with local media. The media specialist does not necessarily need to be the spokesperson for your organization or a particular event, but a reliable source that can facilitate interviews, gather requested information, and develop rapport with the media contacts. Having assigned people to handle contacts and details lends professionalism and continuity. It is important, however, that the media specialist does not become isolated, but works as part of the main planning team.

D. Develop and Maintain Key Media Contacts

Media organizations are primarily businesses, and doing business depends a great deal on relationships with key people. Treat these relationships with the

utmost level of professionalism and kindness. If a reporter contacts you, **always** inquire about their deadline and be diligent on meeting it. If you are contacting a reporter, become familiar with their outlet, internal deadlines and topics of interest. Positioning your organization as a resource in your field is integral in maintaining key media contacts. Send thank you letters, when appropriate, to both the reporter and their immediate supervisor.

E. Formulate a Rough Media Plan Based on Your Policy Objectives

Think through how the available outlets and resources can help to meet the identified needs. Most importantly, leave time and energy to take advantage of breaking news, to be opportunistic in making sure your message gets heard in the way you want it to get heard.

F. Divide the Media Activities into Thematic Time Frames

The thematic time frames should be long enough to plan ahead, and short enough to manage. For example, a certain number of months emphasizing tobacco-free casinos, a certain number focusing on smoke-free multi-unit housing, a certain number on youth access issues, etc.

G. Coordinate Media Activities with Interventions

Coordinate media activities with interventions in your own plan as well as those of neighboring counties, the State or the nation. By integrating your media plans with other community events, whether they are your own or others, you will be re-enforcing the tobacco control message on different levels simultaneously.

H. Integrate News Stories and Messages

Plan media events to generate news that relates to your policy objectives.

For example:

- If your issue is youth, have youth collect tobacco industry promotional giveaways and then hold a press conference to announce their intention to return them to the tobacco industry. Or, sponsor a high school graduating class in exchange for class involvement in a public service billboard campaign on tobacco control. Hold a Kick-Off event when a new billboard goes up.
- Do something unusually newsworthy on the anniversary of a policy. Invite the press.
- If your goal is increasing awareness of tobacco as an environmental issue, sponsor a tobacco-free event in your community; this is a good news story for the press.

I. Develop Opportunistic Media Readiness Skills

This means having everything in place so that you can quickly and intelligently respond to an unplanned media opportunity. For example:

- Identify appropriate spokespeople.
- Train key coalition members to speak to the media on your policy objectives. Be sure they have "media bites" ready to keep them on topic and succinct...
- Consider the ethnic media available in your community and have spokespersons ready to address them in-language.
- Place opinion-editorial pieces and letters to the editor supporting your message at key times.
- Develop Media Products: Work with the policy and media subcommittees of your coalition to develop radio, billboard, bus board materials or even brochures that support your policy objectives, e.g., single family multi-unit housing, youth access to tobacco, tobacco advertising targeting youth.

These products should relate to your policy objectives and the messages and approach should be acceptable to the group you are trying to reach. There should be a dissemination plan and an appropriate production company experienced in your type of media efforts may need to be hired.

J. Develop an Evaluation Plan

Maintain a file or scrapbook of your distribution efforts and subsequent media coverage. Consider adding a telephone number and incentive for calling in to track response to the media placement. Analyze the quantity and type of media support and letters to the editor.

#12 LOBBYING POLICY

Chapter 300

Adopted 02/94
Revised 12/08

CDPH/CTCP engages in and funds policy and advocacy activities which are legitimate tools of health education, health promotion, and public health. CDPH/CTCP funds **may not** be used to support lobbying activities.

Lobbying is communicating with:

- a member or staff of a legislative body, a government official or employee who may participate in the formulation of the legislation; or
- The general public with the specific intention of promoting a yes or no vote on a particular piece of legislation.

Such communication is considered lobbying only if its principal purpose is to influence legislation.

Educating legislators, their staff, government employees, or the general public about your program or about tobacco-related issues is **NOT** considered lobbying.

#13 COORDINATING WITH SCHOOLS

Chapter 300

Adopted 02/94

Revised 12/08

Although schools and health departments receive separate funds for tobacco education, there should be a coordinated effort in the delivery of programs targeting youth in schools and the community in order to create a comprehensive approach. It is suggested that as appropriate to your agency's scope of work that your agency:

1. Develop a communication system and partnership with the county offices of education, and to the degree possible, with local school districts.
2. Designate a staff member as a liaison with the schools.
3. Help facilitate the enforcement of tobacco-free school policies.
4. Collaborate with schools on the following types of activities:
 - Tobacco-related community service opportunities for students.
 - Train facilitators to provide tobacco cessation services for students, faculty and non-credentialed staff. Promote use of the California Smokers' Helpline with schools.
 - Promote adoption of science-based tobacco use prevention curricula.
 - Conduct out-of-classroom educational programs and after-school programs.
 - Advocacy campaigns to improve teacher training and support for tobacco use prevention curricula.
 - Conduct parent participation programs.
 - Co-sponsor special events, e.g., Great American Smoke-out.
 - Co-sponsor speech contests, youth press conferences.
 - Coordinate a special edition of school newspapers covering tobacco issues and provide recognition (a.k.a. "Pulitzer prize") for the best story and photojournalism story.
 - Purchase advertising space in high school yearbooks or newspapers.
 - Coordinate surveillance activities on youth tobacco use, youth access to tobacco and tobacco advertising and promotional cues in the community which target youth.
 - Provide joint training for youth, teachers, parents, and youth serving community based organizations.
 - Develop a speaker's bureau.
 - Collaborate on youth empowerment activities, e.g., a letter writing campaign or interviews conducted by youth and linked with community activities and leaders.

- Jointly conduct a county youth conference.
- Coordinate community service events, e.g., reforestation activities in areas resulting from cigarette caused fires, collecting and tabulating tobacco product-related litter, etc.
- Recruit students for participation in tobacco-related survey and compliance check activities.
- Co-sponsor trainings when community and school programs are using the same evidence-based curricula.
- Participate on each other's advisory coalitions.
- Work together to assess an LLA's Communities of Excellence indicators relative to schools and an LEA's Needs Assessment indicators relative to the community.
- Focus on LEA parent education session on secondhand smoke in the home.
- Link school community service or service-learning requirements and activities with community youth tobacco control interventions.
- Encourage youth development and empowerment by allowing students to attend state and local advocacy networking opportunities (e.g., California Youth Advocacy Network).
- Work with local health providers to facilitate evidence-based curricula lessons at schools.
- Work together to bring youth cessation services to school campuses and the communities.

#14 USE OF CDPH/TCS FUNDS IN SCHOOL SETTINGS

Chapter 300

Adopted 02/94
Revised 12/08

The following requirements apply to the use of CDPH/CTCP funds in schools.

1. CDPH/CTCP funds cannot be used for the development or implementation of **in-classroom** curriculum in public schools.
2. CDPH/CTCP funded projects may supplement on-going California Department of Education (CDE) funded curriculum programs in the classroom in order to support policy-related objectives, e.g., objectives to achieve “R” rating of movies with tobacco use, or provide extra-curricular activities for which CDE funding is not available. Examples of supplementing curriculum may include adding advocacy activities or providing supporting materials.
3. CDPH/CTCP funded programs proposing curricular activities in public classrooms must obtain a letter from the individual school, school district, or county office of education in which the program will be presented. This letter must:
 - a. Describe the current CDE tobacco education curricula; and
 - b. State how the CDPH/CTCP funded project will supplement the CDE funded activities and curricula.
4. In private schools, funds cannot be used to directly benefit the school or assume the schools' responsibility to provide tobacco control education.

#15 USE OF PROPOSITION 99 FUNDS IN THE ENFORCEMENT OF MINORS' POSSESSION OF TOBACCO {Penal Code Section 308(b)}

Chapter 300

Adopted 06/97
Revised 12/08

Effective January 1, 1997, an amendment to Penal Code Section 308(b) added "possession" of tobacco as an illegal act for minors, along with purchasing or receiving tobacco products. Upon conviction, youth under 18 years of age can be fined \$75.00 or given 30 hours of community service work. This legislative change seems to have stimulated interest by local law enforcement and schools to enforce youth tobacco possession. However, many leading tobacco control experts agree that penalizing youth for possessing tobacco is not a desirable policy option (Wasserman and Jacobson, 1997). It is important that efforts to reduce the access and use of tobacco by youth are part of a **comprehensive approach** that targets tobacco retailers, tobacco marketing tactics, social source venues, and include policy options.

The following guidelines clarify the appropriate use of Proposition 99 funds regarding enforcement of the youth tobacco possession law.

The California Department of Public Health/California Tobacco Control Program (CDPH/CTCP) does not fund school-based or community-based diversion programs (e.g., alternative education programs to suspension for tobacco use on campus). This includes community service activities for youth cited for smoking or possessing tobacco products. The reasons for this are:

- A. Diversion and required community service programs are not consistent with CDPH/CTCP' overall program strategy of focusing on community norm change rather than individual behavior change.
- B. Community-based diversion and required community service programs are punishment resulting from a law enforcement action. As stated in Policy #08 of this section, Proposition 99 funds may not be used for law enforcement activities.
- C. There is no evidence that diversion or mandatory community service programs are an effective strategy to reducing youth smoking rates or decreasing illegal tobacco sales to minors. Leading scientific health organizations do not endorse these strategies. (See attached bibliography)
- D. CDPH/CTCP found that peer reviewed literature to date does not demonstrate that mandated participation in tobacco diversion programs or required community service either significantly impacts youth cessation rates among those participating, or reduces youth uptake of tobacco.
- E. The Department of Education specifically funds school-based youth cessation programs.

#16 PARTNERS COMPUTER NETWORK SYSTEM

Chapter 300

Adopted 09/98
Revised 12/08

The **Partners web site network** is a statewide electronic communication system, developed to link the California Department of Public Health, California Tobacco Control Program (CDPH/CTCP) with its contractors.

The **goal of Partners** is to provide an efficient and timely communication system for CDPH/CTCP to communicate with its contractors and for projects to share resources and expertise in program and policy development and implementation. In addition, Partners provides a forum for planning and strategizing across the state, maximizing resources, avoiding duplication of effort, and enhancing agency capability. The system allows CDPH/CTCP-funded projects throughout California to share information, educational materials, program and training resources, and planning strategies. **All CDPH/CTCP funded projects in California are required to participate in the network and log onto the web site at least once per week.** Technical assistance is provided to assist users with accessing and using Partners and can be obtained via e-mail at partners.partners.webmaster@cdph.ca.gov.

The two main components of the Partners web site are **CDPH/CTCP Update** and the **InfoHub**. Projects are expected to access these two specific features on a weekly basis. There are many other features on the web site including news, online forms, lists, links to other sites and various resources.

CDPH/CTCP Update contains announcements concerning trainings, conferences, forms, current events, trends in tobacco control, etc. CDPH/CTCP Update is posted every Monday. Users can access the current CDPH/CTCP Update from the Main Menu. Previous weeks' issues are available by clicking on Back Issues of CDPH/CTCP Updates.

The **InfoHub** is the user-driven portion of Partners. Users can read and post messages on this electronic bulletin board system. Projects are strongly encouraged by CDPH/CTCP to post messages on this system, in order to share their knowledge and experience with other projects. Common types of messages include: requests for information, upcoming events, job postings, executive summaries of reports, recent successes and failures, helpful resources, etc. Messages can be posted in the current month or under special topic areas.

Subscription (Membership) Requirements:

Partners is a password-protected web site for CDPH/CTCP-funded projects. Users must submit an online application and agree to abide by the Membership Agreement. Once the application is approved by CDPH/CTCP, new members are assigned a unique Username and Password and notified by e-mail. **Usernames and Passwords are specific to the individual and must not be transferred, reassigned or shared.** There is **no cost** to the project for enrollment in the Partners network, and **any number of users** may be enrolled. New project directors can access the online application at the following URL: <http://www.tcspartners.org/PartnersRegistrationExternal.cfm>.

Agencies are required to maintain a Partners account and log onto the web site at least once per week. Agencies are also encouraged to use Partners as a means to disseminate information about their activities and solicit assistance from other Partners users via the Strategy Exchange.

Each project’s Partners use and their Strategy Exchange postings are reported to CDPH/CTCP on a biannual basis. Each project receives a quarterly Partners Use Grade (via e-mail), based on the number of weeks which at least one person from their project accessed Partners.

System Requirements for new purchases:

Minimum Hardware Specifications:

Desktop computers should have at least a Pentium IV processor, adequate hard disk space, 1 gigabyte of memory, 1.44 megabyte diskette drive, CD Rom drive, and network card (for connecting to a LAN or broadband internet access).

Recommended Software Specifications:

Type	Minimum
Operating System	Microsoft (MS) Windows 2000 Professional or XP Professional Service Pack 2 ①
Presentation	PowerPoint 2003 (as part of MS Office 2003 Professional Service Pack 2 Application Suite) ②
Word Processing	Word 2003 (as part of Office 2003 Professional Service Pack 2 Application Suite) ②
Spreadsheet	Excel 2003 (as part of Office 2003 Professional Service Pack 2 Application Suite) ②
Database	MS Access 2003 (as part of Office 2003 Professional Service Pack 2 Application Suite) ②

Hard Disk Encryption	Existing Agency software standard; or other hard disk encryption product.
Browsers	Internet Explorer v. 6.0
Adobe Acrobat Reader	Adobe Acrobat Reader 7.x
Statistical	Epi Info version 3.3 ③
Antivirus Software	Required (most current version of any brand)
JAVA Software	JAVA Runtime Environment v 5

① – Support for MS Windows 2000 Professional by Microsoft ends June 2009.

② – Please note that Microsoft support for Microsoft Office XP Professional (2002 version of applications) ends June 2008. Support for Microsoft Office 2000 Professional ends June 2007.

③ - May be downloaded for free at <http://www.cdc.gov/epiinfo/>.

Other Requirements

E-mail Address Internet Access

In addition to the above requirements, if the computer purchased will be connected to your agency's existing local area network, you will need to contact your network administrator for appropriate network software and connectivity issues/problems.

Note: *Any recommendations above are based solely on achieving a higher level of compatibility with the equipment and software used by the California Tobacco Control Program Section. They do not constitute product endorsements.*

#17 PROCESS TO REQUEST USE AND/OR ADAPTATION OF EDUCATIONAL OR MEDIA MATERIALS PRODUCED WITH CDPH/TCS FUNDS

Chapter 300

Adopted 09/99
Revised 12/08

The State of California owns the copyright on educational and media materials developed with funds from CDPH/CTCP. (In the case of materials developed by Local Lead Agencies {LLAs}, the copyright is jointly owned). Following is the procedure to request the use of and/or adaptation of materials by an agency other than the agency that produced the material. Contact the Tobacco Education Clearinghouse of California (TECC) at (800) 258-9090 for assistance with this procedure and to ensure that there are no copyright restrictions associated with the material.

1. Requests Concerning Statewide Media Campaign Materials:

Ads from California are periodically transferred to the Centers for Disease Control and Prevention's (CDC) Media Campaign Resource Center (MCRC). Visit the MCRC site at <http://www.cdc.gov/tobacco/mcrc/> to view available ads developed by the CDPH/CTCP Statewide Media Campaign prior to 2006 as well as ads developed by many tobacco control organizations throughout the country. Your agency may be responsible for paying fees associated with changing the tagline for requested ads as well as associated talent fees.

Requests to use the public relations materials developed by the CDPH/CTCP Statewide Media Campaign or questions regarding ads developed by CDPH/CTCP should be directed to Sandra Soria, Media Analyst, CDPH/CTCP at (916) 449-5724.

2. Requests Concerning Educational and Media Materials Produced in Whole or in Part with Competitive Grantee Funding:

This includes Competitive Grantees, the California Smokers' Helpline, the Tobacco Education Clearinghouse of California and any other statewide projects funded with Competitive Grant Funds.

a. Requests from a Government Agency, American Cancer Society, American Heart Association or American Lung Association Affiliate

- 1) **Make a Written Request:** Direct the written request to the CDPH/CTCP Program Consultant assigned to work with the

contractor that developed the material and provide a copy of the request to the assigned CDPH/CTCP Contract Manager. The email is to describe: the product, how it will be used, and any modification the requestor would like to make.

- a) **Changes to the tagline:** If the request is simply to change the tagline on a brochure, poster, or ad to identify the requestor's agency name, CDPH/CTCP will generally grant permission for this. If the request concerns a material that might involve the use of "talent fees" or other special conditions, CDPH/CTCP will generally grant permission provided the requestor includes a letter from the agency that originally produced the material which indicates there is no issue with the "talent fees" or other conditions, e.g., a special work of art or photograph.
- b) **Modifications to a Brochure:** Permission will generally be granted to adapt or modify brochures. The standard funding acknowledgement is not required of agencies that are using the material outside of California.
- c) **Modifications to a Video:** Permission will not generally be granted to modify videos or to incorporate footage of an existing video into a new "work." Any request to do so will be forwarded to the Chief of Local Programs and Evaluation, CDPH/CTCP for a secondary review and decision.
- d) **Modifications to a Training Curriculum:** Permission will not generally be granted to modify or incorporate a curriculum into a new "work." Any request to do so will be forward to the Chief of Local Programs and Evaluation, CDPH/CTCP for a secondary review and decision.
- e) **Modifications to a Poster:** Permission will not generally be granted to modify or incorporate a poster into a new "work." Any request to do so will be forward to the Chief of Local Programs and Evaluation, CDPH/CTCP for a secondary review and decision.

b. Requests from Other Non-Profit Agencies or from For-Profit Agencies

- 1) **Make a Written Request:** Direct the written request to the Chief of Local Programs and Evaluation, CDPH/CTCP. The email is to describe: the product, how it will be used and distributed, cost if applicable, and any modification the requestor would like to make.

- 2) **Restrictions:** Restrictions generally will be similar to those cited above. A gift of public funds “for the profit of an agency will be considered and avoided” in any request.
- 3) **Educational or Media Material Produced in Whole or in Part with Local Lead Agency Funding:** Seek permission directly from the LLA that produced the educational or media material to use or modify the material. This includes materials developed by LLA subcontractors.
- 4) **Cost of Providing or Modifying Materials:** Any agency granted permission to use or modify educational or media materials developed with funds from CDPH/CTCP is to bear the cost associated with the use or modification of the material. CDPH/CTCP-funded projects, including the Tobacco Education Clearinghouse of California, may bill agencies for providing a duplicate set of camera-ready materials. The requesting agency is solely responsible for working or negotiating with a printer, graphic artist, talent agency or media vendor.

#18 PC 308(a) OPERATIONS GUIDELINES

Chapter 300

Adopted 01/02

Revised 12/08

The following minimum standards shall apply to all decoys working with members of designated agencies engaged in undercover activities pertaining to PC 308(a) enforcement. For further information on conducting PC 308(a) operations, consult the STORE Campaign web page on PARTNERS.

1. All decoys shall be less than 18 years old at the time of any undercover decoy operation. The decoy shall display an appearance consistent with their age (less than 18 years old) and environment.
2. A photograph or video recording will be taken immediately prior to or at the time of the operation for the purpose of recalling the decoys appearance at this time. The photograph and/or video recording will be retained by the agency supervising the decoy operation.
3. A decoy shall carry his or her own identification showing their correct date of birth or not carry any identification. A decoy who carries identification shall present it upon request to any seller of tobacco products.
4. Enforcement agencies may require decoys to respond truthfully to the seller if verbally asked their age or they may allow the decoy to verbally respond that they are 18 years of age.
5. A decoy shall be supervised by a regularly employed adult peace officer or other authorized statutory adult authority at all times during the operation.
6. The designated agency may use recording equipment, including video, audio, photographic and other audio/visual recording equipment, to record and document an operation.
7. Upon completion of the decoy operation, the designated agency may notify the owner or owner's agent of the operations results.

#19 NON-ACCEPTANCE OF TOBACCO COMPANY FUNDS

Chapter 300

Adopted 07/02

Revised 12/08

In order to receive funds from the CDPH/CTCP, contractors must comply with the following:

Universities/Colleges Only

The Principal Investigator, or any investigator associated with the contract cannot receive funding from or have an affiliation or contractual relationship with a tobacco company, any of its subsidiaries or parent company within the last five (5) years prior to the start date of the contract period. In addition, the Principal Investigator or any investigator associated with the contract will not accept funding from or have an affiliation or contractual relationship with a tobacco company, any of its subsidiaries or parent company during the term of the contract with CDPH/CTCP. See attached partial list of tobacco company subsidiaries.

All Other CDPH/CTCP Contractors

The contractor will not accept funding from or have an affiliation or contractual relationship with a tobacco company, any of its subsidiaries or parent company during the term of the contract with CDPH/CTCP. See attached partial list of tobacco company subsidiaries. Since subcontractors are held to the same standards as the prime contractor, they are also subject to these requirements.

Contractors are required to sign and submit the "Certification of Non-Acceptance of Tobacco Funds" form as part of the Request for Application process. The certifications are on file at CDPH/TCS. See attached sample of the certification form. Violation of this CDPH/CTCP policy during the term of the contract may result in termination of the contract.

CERTIFICATION OF NON-ACCEPTANCE OF TOBACCO FUNDS

Company/Organization Name

Please check one of the following:

The applicant named above hereby certifies that it will not accept funding from nor have an affiliation or contractual relationship with a tobacco company, any of its subsidiaries or parent company during the term of the contract with the California Department of Public Health, California Tobacco Control Program.

University/Colleges Only

The Principal Investigator, or any investigator associated with the contract, of the university or college named above hereby certifies that he/she has not received funding from nor had an affiliation or contractual relationship with a tobacco company, any of its subsidiaries or parent company within the last five (5) years prior to the start date of the grant period. In addition, the Principal Investigator, or any investigator associated with the contract, of the university or college named above hereby certifies that he/she will not accept funding from nor have an affiliation or contractual relationship with a tobacco company, any of its subsidiaries or parent company during the term of the contract with the California Department of Public Health, Tobacco Control Section.

CERTIFICATION

I, the official named below, hereby swear that I am duly authorized legally to bind the contractor or grant recipient to the above described certification. I am fully aware that this certification, executed on the date below, is made under penalty of perjury under the laws of the State of California.

Director of Agency or Principal Investigator:

#20 Online Tobacco Information System

Chapter 300

Adopted 12/06

Revised 12/08

Background

The Online Tobacco Information System (OTIS) is a Web-based business management portal that incorporates CDPH/CTCP business management systems with information-communication systems. It provides a single uniform interface for hundreds of users to access contract and grant-related documents and networking-collaboration tools from any computer, 24 hours a day, 7 days a week. As a database, OTIS is searchable, provides access to real-time data, and the ability to aggregate data for reports.

Overall, OTIS provides an efficient means for CDPH/CTCP and applicants to manage its contracting processes. These include the :1) submission and approval of Comprehensive Tobacco Control Plans and competitive grant applications; 2) submission and approval of progress reports; 3) submission and approval of fiscal documents, and 4) submission and approval of other contract related documents such as subcontracts.

Communication systems within OTIS include a personal and shared calendar that provides access to national, state, regional and local event information; a task management system for personal and project use; a contact directory with a master list of agency contacts; a searchable project directory that provides access to the scopes of work of all projects within OTIS; and a Local Program Evaluator Registry that provides contact information and the qualifications of registered local program evaluators.

Major benefits to using this Web-based business management portal include:

- Data entry and terminology are standardized and consistent across procurements.
- The budget and other areas requiring calculations are totaled for the applicant by OTIS.
- Common terminology facilitates the linkage of activities described in the scope of work to budgeted expenses (providing incentives, placing media, educational materials development, printing, etc.).
- Agency contact information only has to be submitted once regardless of the number of applications the agency has funded by CDPH/CTCP.
- Other projects' scopes of work can be searched in order to identify agencies working with similar target audiences, interventions, and evaluation activities.

This can facilitate networking, marketing trainings, identification of programming gaps, or collaborating on advertising and educational materials development.

- Generates usable reports that track who, what, where, and how much funding is going toward particular programs; what projects are working on specific interventions or with specific target populations.
- Integrates any communication and business applications into a single Web site for improved access to timely information. System applications include: statewide calendar, project directory, local program evaluator directory, plan/application submission, plan/application approval, progress report submission, progress report approval, and cost report/invoice submission and approval.
- Promotes management of local project materials development by the Tobacco Education Clearinghouse of California.
- The review and approval of documents submitted by contractors is streamlined (e.g., no more losing paper, and the ability to track where documents are in the approval process).
- Logs all communications for increased accountability.

Membership Requirements

OTIS is a password-protected Web-system for CDPH/CTCP-funded projects. Users will be issued an individual user identification and password. These may not be transferred, reassigned or shared with anyone else.

Project Directors are required to notify CDPH/CTCP immediately about staff changes in order to deactivate an account.

OTIS Usage Requirements

- CDPH/CTCP-funded projects, which are a part of OTIS, are required to submit all contract/grant application documents, progress and fiscal reports via OTIS.
- Project Directors are responsible for ensuring that their staff participates in trainings, access user guides, and online training resources.
- Project Directors are responsible for reporting OTIS errors or access issues to CDPH/CTCP in a timely manner.

System Requirements

The system requirements for OTIS are the same as the system requirements for PARTNERS; see Policy #16 PARTNERS COMPUTER NETWORK SYSTEM.

#21 Nicotine Maintenance Policy

Chapter 300

Adopted 12/06

Revised 12/08

Nicotine maintenance is the strategy to provide tobacco users concerned about their health with a new option to substitute, in place of conventional combustible cigarettes, the long-term use of another, potentially less dangerous nicotine-delivery product that can still satisfy the user's addiction. CDPH/CTCP believes that the nicotine maintenance strategy poses a serious threat to public health efforts aimed at reducing the toll of death and disease caused by tobacco use. The goal of the nicotine maintenance strategy is to:

- Convince consumers that they can receive the same enjoyment and satisfaction without the risk
- Convince tobacco users they do not have to quit
- Convince non-users that the pleasure outweighs the risk – so try it.

Nicotine maintenance products are known as potentially reduced exposure products (PREPs). At the present time, PREPs fall into three categories:

- Modified cigarettes and cigarette-like products
- Smokeless tobacco, snus, and tobacco lozenges
- Medicinal nicotine currently under development by pharmaceutical companies that is intended for long-term use rather than as an aid to cessation.

Various sources have recommended or suggested that these products are the next safest alternative to quitting because they reduce exposure to one or more tobacco toxicants. The three types of PREPs clearly present a continuum of health risk to the user, with combustible products posing a greater risk to an individual's health than medicinal nicotine products. CDPH/CTCP is concerned that the promotion of nicotine maintenance products has the potential to foster the norm that addiction to nicotine is acceptable, and is of little health consequence to the user or population as a whole. Legitimizing the nicotine maintenance strategy would undermine and damage the ability of state and local governments to implement and sustain proven effective tobacco use prevention and cessation strategies such as tobacco taxes, secondhand smoke restrictions, counter-advertising campaigns, and cessation quit-lines.

CDPH/CTCP believes that tobacco cessation and nicotine maintenance are contradictory strategies. Promoting the co-existence of tobacco cessation and nicotine maintenance strategies ignores the complexity of how product marketing is received and acted upon by tobacco users and potential users, as well as policy makers who are

in a position to allocate resources and enact policies that regulate smoking and the sale and promotion of tobacco products.

Whether nicotine maintenance messages are conveyed by the public health community, tobacco companies or the pharmaceutical industry, they will likely legitimize nicotine addiction. In doing so, these messages will decrease motivation for quitting among California's four million adult and youth smokers, decrease quit attempts, slow tobacco cessation, increase the rate of youth initiation, and undermine the effectiveness of comprehensive tobacco control programs that seek to denormalize tobacco use and promote cessation.

The efficacy of the nicotine maintenance strategy is unproven in terms of providing a health benefit at the individual and population levels. Tobacco products contain a complex array of toxicants and cancer causing agents. It is unknown what the impact will be of decreasing exposure to individual toxicants and how genetics and prior history of the individual would influence individual benefits. Additionally, the response of consumers in a real world setting is unknown:

- Will cigarettes and PREPs be used concurrently?
- Will PREPs only be used in those situations where smoking is not allowed?
- Will motivation to quit decrease; will tobacco uptake increase?
- Will support for secondhand smoke policies diminish?

Of particular concern to CDPH/CTCP is that some members of the public health community are recommending the promotion of smokeless tobacco, snus, and long-term use of nicotine replacement therapy in lieu of smoking. (Bates C, Fagerström K, Jarvis MJ, Kunze, McNeill A, Ramström, 2003; Sweanor D, 2003; Kozolowski LT, O'Conner RJ, Quinio Edwards B, 2003).

The tobacco industry is aware of smokers' increasing concern about the health effects of smoking, as well as the public's increasing intolerance of secondhand smoke. Lawsuits and the accompanying financial instability have shaken the tobacco industry. Settlements have led to price hikes and reduced consumption. Faced with the prospect of a steady decrease in cigarette sales, the tobacco industry is looking for a "turn around" strategy. To protect itself from future lawsuits and further hostile legislation, it must establish a respectable public image, demonstrate repentance by acknowledging the health effects of tobacco use, and seek legitimacy for new products positioned as reducing health risks while creating a safe harbor through Federal Drug Administration oversight of these products. These products are not aimed at the highly addicted, hard core smoker—but rather the smoker who is contemplating quitting and youth and young adults who are not yet established tobacco users.

CDPH/CTCP is concerned that as nicotine maintenance products are produced and marketed, they may not be used in the way intended, and those messages about these products may be perceived and acted upon in ways not anticipated. In summary, CDPH/CTCP believes the nicotine maintenance strategy:

- Legitimizes nicotine addiction
- Decreases motivation for quitting
- Slows smoking cessation progress
- Weakens support for California Tobacco Control Program education, policy, media and taxation efforts
- Confuses the public and harms the credibility of public health
- Provides a turn around opportunity for the tobacco industry

As such, CDPH/CTCP prohibits its contractors from using its funds to promote or sanction the nicotine maintenance strategy and particularly smokeless tobacco as a safer alternative to combustible cigarettes.

CHAPTER 400 ADMINISTRATIVE REQUIREMENTS

TABLE OF CONTENTS

Policy No.	Page
#01 DATA COLLECTION AND REPORTING REQUIREMENTS.....	1
#02 EQUIPMENT PURCHASES.....	3
#03 STAFFING, ADMINISTRATIVE AND TRAVEL REQUIREMENTS.....	6
#04 INTEREST EARNED AND GENERATED REVENUE REQUIREMENTS.....	10
#05 INFORMATION SECURITY REQUIREMENTS.....	12

#01 DATA COLLECTION AND REPORTING REQUIREMENTS

Chapter 400

Adopted 02/94
Revised 12/08

1. Agencies shall conduct surveillance activities, collect and maintain data, submit reports, and conduct evaluations in accordance with CDPH/CTCP requirements.
2. Agencies shall allocate a minimum percentage of their total CDPH/CTCP budget towards an evaluation component. This component should support staff designated to oversee evaluation, required data collection, surveillance, evaluation, and reporting requirements. This is a mandatory requirement and must be evident in the budget. For the minimum percentage required, refer to the procurement to which your agency responded.
3. Agencies shall designate one staff person as the lead on evaluation activities. Agencies shall allocate the minimum percentage of a staff person's time, as required in the procurement to which the agency responded, to be dedicated toward overseeing evaluation activities, coordinating evaluation activities with CDPH/CTCP, and any evaluation consultant or subcontractor who may be hired. This is a mandatory requirement and must be evident in the budget.
4. The document, Tell Your Story: Guidelines for Preparing a Complete High Quality Final Evaluation Report is to be used as the standard for preparing final evaluation reports. This document can be found at <http://www.cdph.ca.gov/programs/Tobacco/Documents/CTCPTellYourStory.pdf?CFID=1305887&CFTOKEN=78134549> or on the C-STATS web site at www.cstats.info.
5. The C-STATS web site, www.cstats.info, is to be used as a resource for online access to California's county, regional, and statewide tobacco statistics. C-STATS provides access to a wide variety of information, including evaluation resources for local projects, publications, and local information on a broad range of tobacco-related indicators, from behavioral measures to local policies.
6. Progress Reports shall be submitted bi-annually to CDPH/CTCP, with one original and one copy, each complete with attachments.
7. The content of the Progress Reports shall be in accordance with CDPH/CTCP instructions and the required forms shall be used. Agencies should maintain back-up documentation, such as logs, sign-in sheets, press releases, etc. to verify all information provided in the progress reports and will be required to submit documentation with progress reports as identified in the progress report instructions.

8. If timely and accurate progress reports and evaluation reports are not received by CDPH/CTCP, payments will be withheld until delinquent or deficient reports are up-to-date or evaluation requirements are satisfied. Contractors shall be given a time-certain date by which to re-submit unsatisfactory reports. If reports are not submitted timely or remain unsatisfactory, the contract award may be reduced.
9. Each agency shall cooperate with and participate in evaluation activities conducted by agencies that are under contract with CDPH/CTCP for the purpose of evaluation or surveillance activities.

#02 EQUIPMENT PURCHASES

Chapter 400

Adopted 02/94
Revised 12/08

Vehicles:

CDPH/CTCP does not allow the lease or purchase of vehicles; this includes the lease of, lease with the option to purchase, or rental plans with purchase options of vehicles. Agencies must budget for the use of their agency-owned vehicle or personally-owned staff vehicles by allocating funds for reimbursement of mileage at a rate approved by CDPH/CTCP. The agency can bill CDPH/CTCP contract each month for the amount of project-associated mileage traveled by approved staff on travel status refer to Section I, Chapter 400 of your Competitive Grantees Administrative and Policy Manual for Travel Information or for Local Lead Agencies reimbursed at the approved county/city rate.

Mobile Phones:

Mobile phones, cellular phones, and other multi-function portable phones are allowed up to \$500 per person (including the service) for a maximum of \$2,500 per LLA or Grant annually. Purchase must be based on sufficient justification with prior CDPH/CTCP approval. Refer to Chapter 400, Policy #05 Information Security Requirements for additional information regarding equipment and data security requirements.

Desktop and Laptop Computers:

With sufficient justification and prior CDPH/CTCP approval, Competitive Grantees and LLAs may be authorized to purchase computer equipment, including appropriate hardware and software that meets CDPH/CTCP minimum requirements. Agencies authorized by CDPH/CTCP to purchase computer hardware and software should contact their contract manager to obtain a current list of desktop and laptop computer standards. Refer to Chapter 400, Policy #05 Information Security Requirements for additional information regarding equipment and data security requirements.

Computer Hardware

1. The agency shall have equipment for the purposes of producing CDPH/CTCP mandated progress reports, completing statewide independent evaluation instruments and reports, and participating in PARTNERS and OTIS (Online Tobacco Information System). Agencies should have access to high speed broadband internet access, or local area network (LAN) access.

Desktop computers should have at least a Pentium IV processor, adequate hard disk space, 1 gigabyte of memory, 1.44 megabyte diskette drive, CD Rom drive, and network card (for connecting to a LAN or broadband internet access).

2. Agency purchasing approval will follow the appropriate CDPH/CTCP budget process in OTIS. Computer equipment requests are to be justified by demonstrated programmatic or administrative need. After approval, the contractor shall follow the CDPH/CTCP procedures for purchase and inventory of the equipment. Refer to Section I, Chapter 800 of the Competitive Grantees Administrative and Policy Manual for procedures and format to follow. Equipment purchases not in the approved budget will be disallowed.
3. The agency shall modify its computer system as requested by CDPH/CTCP.
4. Agencies shall conform to the CDPH/CTCP Information Security Requirements, Policy #05, for computer security and storing of confidential data.
5. Equipment purchases not in the approved budget will be disallowed unless a prior written request is submitted to the CDPH/CTCP Contract Manager for review and approval, and a written approval is given.

Computer Software

1. Contract language prohibits the use of state funds for the acquisition, operation, or maintenance of computer software in violation of licensing and copyright laws. By signing the contract award, the contractor has certified that it has appropriate systems and controls in place to ensure that violations do not occur.
2. Agency purchasing approval will follow the appropriate CDPH/CTCP budget process in OTIS. After approval, the contractor shall follow the CDPH/CTCP procedures for purchasing and inventory of the equipment. Refer to Section I, Chapter 800 of the Competitive Grantees Administrative and Policy Manual for procedures and format to follow. Software purchases not in the approved budget will be disallowed unless a prior written request is submitted to the CDPH/CTCP Contract Manager for review and approval, and a written approval is given.
3. Following are the recommended software packages an agency should have available for use:

(continued on next page)

Software Specifications:

Type	Minimum
Operating System	Microsoft (MS) Windows 2000 Professional or XP Professional Service Pack 2 ①
Presentation	PowerPoint 2003 (as part of MS Office 2003 Professional Service Pack 2 Application Suite) ②
Word Processing	Word 2003 (as part of Office 2003 Professional Service Pack 2 Application Suite) ②
Spreadsheet	Excel 2003 (as part of Office 2003 Professional Service Pack 2 Application Suite) ②
Database	MS Access 2003 (as part of Office 2003 Professional Service Pack 2 Application Suite) ②
Hard Disk Encryption	Existing Agency software standard; or other hard disk encryption product.
Browsers	Internet Explorer v. 6.0
Adobe Acrobat Reader	Adobe Acrobat Reader 7.x or later
Statistical	Epi Info version 3.3 ③
Antivirus Software	Required (most current version of any brand)
JAVA Software	JAVA Runtime Environment v 5

① – Support for MS Windows 2000 Professional by Microsoft ends June 2009.

② – Please note that Microsoft support for Microsoft Office XP Professional (2002 version of applications) ends June 2008. Support for Microsoft Office 2000 Professional ends June 2007.

③ - May be downloaded for free at <http://www.cdc.gov/epiinfo/>.

4. The agency shall modify or change its software according to CDPH/CTCP specifications.
5. Any recommendations above are based solely on achieving a level of compatibility with the equipment and software used by CDPH/CTCP. It does not constitute product endorsements.

#03 STAFFING, ADMINISTRATIVE AND TRAVEL REQUIREMENTS

Chapter 400

Adopted 01/96
Revised 12/08

Additional requirements may be found in Section I of the Local Lead Agency and/or Competitive Grantee Administrative and Policy Manuals.

Staffing

1. Personnel classifications and/or professional disciplines shall be appropriate for the completion of the scope of work requirements.
2. The agency is responsible for notifying their CDPH/CTCP contract manager in a timely manner of staff changes in the Project Director position. The agency shall use an approved form and format as instructed by CDPH/CTCP.
3. The agency shall designate one staff person as the lead on evaluation activities. Agencies shall allocate the minimum percentage of a staff person's time, as required in the procurement to which the agency responded, to be dedicated toward overseeing evaluation activities, coordinating evaluation activities with CDPH/CTCP, and any evaluation consultant or subcontractor who may be hired. This is a mandatory requirement and must be evident in the budget.
4. The agency shall have professional staff qualified to:
 - Collaborate with community agencies, organizations, and targeted populations;
 - Implement principles and practices of community health education;
 - Coordinate community assessments, conduct educational, media, policy activities and evaluation;
 - Collect and tabulate required data;
 - Perform program planning and evaluation activities;
 - Fiscally and administratively manage the tobacco control program; and
 - Comply with reporting and record keeping requirements of the State.
5. The agency must have on file and provide to CDPH/CTCP as requested, job descriptions and duty statements for all positions listed in the budget.
6. In **Local Lead Agencies**, either the individual designated as the Project Director (PD) or the individual designated as the Project Coordinator (PC) shall be assigned to the project 100% time. The PD may be assigned to the project less than 100% if the PC is designated 100%. The PD or the PC shall have day-to-day responsibility for the overall management and implementation of the project.

This includes ensuring that intervention and evaluation activities in the approved scope of work are conducted satisfactorily, on time and in accordance with CTCP policies; ensuring that progress reports are accurate, complete and submitted on time; ensuring that the budget is expended according to the approved budget and appropriate fiscal documentation is maintained for expenditures; ensuring that cost reports are accurate, complete and submitted on time; and ensuring that project staff participate in CTCP required trainings.

A reduced PD/PC staffing pattern in which neither the PD nor the PC are assigned to the project 100% requires prior CDPH/CTCP approval. CTCP recommends that either the PD or PC be assigned to the project no less than 75%. To request consideration and approval of a staffing pattern in which the PC or PC is less than 100%, the LLA is required to insert and complete the following statement in the narrative budget justification for the position in OTIS.

“XXXXX County requests approval of this PD (or PC as appropriate to your request) at # percent of time. This is justified for the following reasons: (Insert your reasons her.) With this reduced effort, XXXXX County will commit to ensuring that progress reports and cost reports are accurate, complete and submitted in a timely manner and that participation in CTCP required trainings, and collaboration with local and statewide projects will be maintained. XXXXX County acknowledges that CTCP may request an increase in the PD (or PC) effort on the project if these functions are not satisfactorily maintained at the reduced time level.”

The reduction must be justified (e.g., diminishing funds, the PD needs to oversee other internal programs, MSA or competitive grant funded program also, personal issues, etc.). CTCP will evaluate the justification provided and additionally consider the following criteria:

- Has a past track record of satisfactory progress towards completing its scope of work;
- Progress reports and cost reports are submitted timely, complete, and accurate;
- There is participation by appropriate staff in CDPH/CTCP trainings and conferences;
- There is evidence of local collaboration; and
- All of the above functions are maintained at the reduced time level.

If the above criteria are not met, CDPH/CTCP reserves the right to restore the PD/PC time base back to 100% time. Approval of the reduced time will be provided to the LLA in the OTIS Negotiation Report in which the CTCP Program Consultant and Contract Manager will be required to actively acknowledge and state their approval of the reduced PD/PC time base when reviewing and approving the budget portion of the Comprehensive Tobacco Control Plan.

Budget and Administrative Requirements

1. Agencies will prepare either cost reports (Local Lead Agencies) or monthly invoices (Competitive Grantees) in arrears which detail the actual program expenditures in accordance with the format prescribed by CDPH/CTCP.
2. Payments to agencies are contingent upon receipt and approval of their scope of work and budget and upon receipt and approval of other contractual deliverables such as progress reports and cost reports or invoices.
3. Agencies must maintain a functioning e-mail account.
4. If a **Local Lead Agency** subcontracts out 60% or more of the tobacco control allocation to one agency to implement the comprehensive tobacco control plan, then the subcontractor will be required to develop a sub-budget, following the same guidelines applicable to the LLA.
5. Agencies shall comply with administrative and contractual requirements as provided to them in the form of the contract manual updates and Program Letters throughout the contract term.

Travel Requirements

1. **Required** CDPH/CTCP Travel and Training:

Project directors or their designee are **required** to budget for and attend the CDPH/CTCP Project Directors Meeting which is typically held every eighteen (18) months. In addition to the CDPH/CTCP Project Directors Meeting there may be other trainings, meetings, or conferences required by the guidelines, request for application, or renewal instructions under which the agency was funded. The funds budgeted for CDPH/CTCP **required** trainings, meetings, or conferences cannot be used for any other purpose. If a **required** training, meeting, or conference is not attended the funds budgeted for it will remain in the line item unspent and will be disencumbered at the close of the contract.

2. Out-of-State Travel

- a. Local Lead Agencies

Local Lead Agencies may expend their funds for out-of-state travel when the travel is consistent with county guidelines and requested and approved through the CDPH/CTCP budget process. However, final approval of any out-of-state travel will be contingent upon:

- participating in the conference as a presenter, panel member, speaker, etc.; and,

- Being up-to-date on progress in the scope of work and current with submission of progress/cost reports.

b. All Other CDPH/CTCP Contractors

All other CDPH/CTCP contractors must request in writing, prior approval for out-of-state travel and justify the request unless it is pre-approved through the CDPH/CTCP budget process. However, final approval of any out-of-state travel will be contingent upon:

- participating in the conference as a presenter, panel member, speaker, etc.; and,
- Being up-to-date on progress in the scope of work and current with submission of progress/cost reports.

This includes “salary only” trips in which another agency is paying for travel and per diem and you are requesting CDPH/CTCP to pay for your salary. The request is to be addressed to the Contract Manager (CM) assigned to your project and must include, at a minimum, the following:

- A letter requesting approval for the trip. The letter must describe the trip in detail; indicate the benefits to the tobacco control program if the CDPH/CTCP funded staff were allowed to attend;
- A detailed description of all costs related to the travel. This includes salary costs for the individuals traveling, lodging, airfare, car rental, food, etc. If related costs are not provided in the request, CDPH/CTCP staff will make the determination as to how much will be allowed, if any; and,
- A copy of the letter of invitation, conference brochure, agenda, etc.
- If you have been able to secure partial funding for travel from another source, please indicate the amount and the name of the agency providing the funds.

Your request will be reviewed by the CM/PC to determine if there is sufficient merit for the travel request and if sufficient funds are available in your contract. The request is then forwarded to the CDPH/CTCP Assistant Chief who shall make the final decision on all out-of-state travel requests.

Please allow 10 working days to receive a response to your written request. Out-of-state travel, including salary only trips, that occurs without prior written approval will be denied. Refer to Section I of your Administrative and Policy Manual for the procedures and format to follow in submitting your request.

#04 INTEREST EARNED AND GENERATED REVENUE REQUIREMENTS

Chapter 400

Adopted 04/96

Revised 12/08

Interest Earned

1. Local Lead Agencies

LLAs are required, per their allocation agreement, to deposit their prospective payments into an interest bearing, insured trust account. The allocation agreement requires that the interest accruing from these prospective payments must be used for state-approved tobacco control program-related activities and shall be used to defray costs incurred by the program, measurably expand the program, or improve the quality of services above the level of services already funded under the allocation agreement.

LLAs may use funds from interest earned to purchase items in the approved scope of work (i.e., incentives, media, promotional items, etc.) or temporary help (and the fringe benefit expenses associated with the temporary help position) without obtaining **additional** prior written approval (the written approval of the CTCP constitutes prior written approval). These funds cannot be used to supplement fringe benefit expenses for regular staff or for Indirect Cost expenses.

Prior written approval will be required to use these funds for equipment purchases or for purchases of any items not in the approved scope of work (i.e., consultants, media, etc.).

The LLA must comply with the following:

- Obtain prior written approval from CDPH/CTCP to use interest earned money from the trust account to purchase items/services not in the approved scope of work. Refer to Section I of this manual for the procedures and format to follow in obtaining approval.
- Maintain adequate documentation of the receipt and use of such interest. Once approval is obtained to use interest earned money, the LLA must report the use of these monies during the cost report period in which they were spent. Refer to Section I for the procedures and format to follow in submitting cost reports.
- Return to the State any unexpended interest remaining in the trust account, if funding authority for this allocation agreement expires or the

agreement is canceled. Refer to your allocation agreement for more information. CDPH/CTCP will provide detailed instructions on how to return unexpended interest in the latter part of the agreement term.

2. Competitive Grantees

These projects may have earned interest by obtaining an advance payment on the first fiscal year amount of their contract award. Specific provisions of the contract do not allow for the use of interest earned to defray program costs, measurably expand the program, or improve the quality of services above the level of services already funded under their contract. If you obtained an advance payment, any interest accruing from this advance payment is to be returned to the state prior to the contract expiration or termination date. Refer to the advance payment provisions of your contract for more information.

Generated Revenue

Please read carefully the generated revenue clause in your contract. CDPH/CTCP would prefer that the programs use the funds in their contract to conduct business rather than generate revenue to pay for program activities. If the program feels it is absolutely necessary that they generate revenue, then the program must comply with the following:

- Obtain prior written approval from CDPH/CTCP to generate revenue. Refer to Section I of this manual for the procedures and format to follow in obtaining approval.
- Maintain adequate documentation of the receipt and use of these monies. LLAs must report the use of these monies during the cost report period in which they were spent (refer to Section I of this manual for the procedures and format to follow in submitting cost reports). All other contractors may be asked at any time to provide documentation of the receipt and use of these monies.
- Return to the State any unexpended funds, including any interest earned, remaining in the generated revenue account, if funding authority for this contract expires or the contract is canceled. Refer to your contract language for more information. CDPH/CTCP will provide detailed instructions on how to return unexpended generated revenue in the latter part of the agreement/contract term.

#05 INFORMATION SECURITY REQUIREMENTS

Chapter 400

Adopted 12/06
Revised 12/08

Information Security Policy

Contractors and Local Lead Agencies must adhere to their own agency's information security policies. In addition, the contractor must follow the CDPH Health Administrative Manual (HAM), Information Security Policy, and Section 6-1000 through 6-1060 where applicable (upon request) This policy outlines CDPH requirements established to address information security and extends to all CDPH personnel, contractors, vendors, clients and customers.

Classification of Data

Automated files and databases should be given appropriate protection from loss, inappropriate disclosure, and unauthorized modification. Files and databases can contain the following types of information listed below. A complete description can be found in the HAM, Section 6-1010.2, (upon request)

1. **Confidential.** Under the Information Practices Act (Civil Code, Sections 1798-1798.70), personal information may not be disclosed in a manner that identifies that individual unless authorized by law. Confidential data needs to be protected from unauthorized access or disclosure.
 - a. **Confidential-Critical.** Privileged data that has the most limited access and requires the highest degree of integrity. This is data that will do the most damage to the organization should it be disclosed.
 - b. **Confidential-Private.** Data essential to the ongoing operation of the organization and its subsidiaries. It allows the organization to conduct its internal business and maintain support of its applications and business processes.
 - c. **Confidential-Restricted.** Data that is intended for internal use within an organization. This data must be protected from unauthorized access, modification, or deletion. Restricted data should only be provided to individuals with a need to know and they must be authorized to access the information.
2. **Sensitive Information.** May be either public or confidential and requires special precautions to protect it from unauthorized modifications or deletions.

Information Security Practices

Listed below are examples of security practices contractors should be following. A complete list can be found in the HAM, Section 6-1020 (upon request).

1. Good security practices are expected of each contractor, including using due care to preserve data integrity and confidentiality.
2. Contractors are responsible for the security of their computer and their data. Steps should be taken to protect computer equipment from theft and unauthorized use.
3. Computer and equipment resources should be used for business purposes.
4. Desktop systems should be kept in a secure area. Confidential data should not be stored on a personal computer unless adequate precautions have been taken.
5. Network passwords and password protected screen savers should be used. Passwords should not be shared. Use an unusual combination of 8 characters or more for a secure password. Passwords should not be written down, posted where they may be accessed or included in a data file, log-on script, or macro. Passwords should be changed immediately if revealed or compromised.
6. Computer software should be acquired from reputable sources that will ensure the integrity of the software.
7. Software license agreements, terms and condition, and copyright laws shall be strictly followed.
8. All computers should have anti-virus and security patches up to date.
9. Back-up and recovery procedures should be in place with each agency.

Mobile Computing Policy

For the purposes of this Policy, mobile devices are defined as any portable device such as laptops, Personal Digital Assistants (PDA's), a handheld device that serves as a beefed-up organizer or toned-down laptop. In addition, some PDAs combine the computing functions with telephone/fax, Internet and networking features), tablet PCs, etc. As a reminder, all mobile devices remain the property of CDPH/CTCP. CDPH/CTCP will require proper State identification labels and will provide procedures for tagging, reporting, and retrieving equipment.

1. Competitive Grantees must follow the CDPH mobile computing policy as listed in the HAM, Section 6-1020.9 (upon request)
2. Local Lead Agencies must adhere to their own local agency mobile computing policy. However, if the local lead agency does not have a mobile computing

policy, those agencies must adhere to the CDPH mobile computing policy as listed in the HAM, Section 6-1020.9 (upon request)

Below are some of the agency's responsibilities for the security of their mobile devices and the information they contain. A complete description of this policy can be found in the HAM, Section 6-1020.9 (upon request)

1. Confidential information containing names, social security numbers, medical or financial information should not be downloaded or stored on mobile devices unless absolutely necessary for program operations. Employees must use an encryption product when storing confidential information.
2. In cases where use of mobile devices for downloading or storage of confidential information has been determined to be absolutely necessary, contractors are required to delete information from their mobile device if it is clearly no longer needed or potentially useful. Use of an "erase" feature (e.g., putting a document in a virtual recycle bin) is not sufficient for confidential information because the information may still be recoverable. Confidential data must be deleted via an overwrite (zeroization) program or other such approved device.
3. Mobile devices must be protected by a power-on password and contractors must use an approved encryption product when storing confidential information.
4. Mobile devices must not be left unattended at any time and precautions should be taken to ensure other persons cannot view on-screen data in public places.
5. Contractors should make available laptops to their LAN Administrator monthly for regular maintenance and PDAs (includes Blackberries) should be tethered to the PC for synchronization and encryption updates on a weekly basis.
6. When an employee is allocated a mobile device, the mobile device remains the property of the agency and CDPH/CTCP, and upon termination of employment the individual must return the mobile device to their LAN administrator or supervisor.
7. If a mobile device is lost or stolen, employees must notify their manager or supervisor and CDPH/CTCP contract manager.

Internet/Electronic Mail

Contractors who access the Internet and/or E-mail are to follow these guidelines to conduct official CDPH/CTCP related business. A complete description of the CDPH policy can be found in the HAM, Section 6-1030 (upon request). Any confidential information sent through the Internet and/or E-mail could be intercepted, modified, misdirected, or destroyed by unauthorized persons if adequate access controls are not in place. Encryption, authentication, and/or any other security schemes should be used to ensure that data is secure and made available only to the appropriate and intended recipients.

The intentional use of CDPH/CTCP resources for personal advantage, gain, or profit is inconsistent, incompatible, and in conflict with the duties of officers, contractors, and employees. Examples of inappropriate use include, but are not limited to, viewing, sending, creating, and/or downloading any information that:

1. Violates or infringes on the rights of any other person, including the right to privacy;
2. Contains defamatory, false, abusive, obscene, pornographic, profane, sexually oriented, threatening, racially offensive, or otherwise biased, discriminatory, or illegal material;
3. Violates agency or departmental regulations prohibiting sexual harassment, and/or discrimination;
4. Conduct, engage, or solicit the performance of any activities in violation of any state, federal or local laws, regulations, rules, executive orders or agency or departmental regulations, policies or directives;
5. Conduct any political activity;
6. Engage in any activity for personal gain or personal business transactions;
7. Make any unauthorized purchases; or
8. Use data for private gain, or divulge confidential departmental information or records unless officially authorized to do so.
