

Commonly Prescribed Therapeutic Formulas

FORMULA	INDICATION/DIAGNOSIS
Elecare (unflavored) powder	For infants and children: dietary management of protein maldigestion, malabsorption, severe food allergies, short-bowel syndrome, eosinophilic GI disorders, GI-tract impairment, or other conditions in which an amino acid-based diet is required.
Elecare Jr. (vanilla) powder	For children 1 year and older: milk, soy, and/or protein hydrolysate formula allergies or intolerances. Nutritional therapy for severe food allergies, short-bowel syndrome, eosinophilic GI disorders, and malabsorptive conditions.
Neocate Infant powder	For infants: cow and soy milk allergy, protein intolerance; allergy-associated conditions including short-bowel syndrome, eosinophilic GI disorders, malabsorption, GERD, and other GI disorders.
Neocate Jr. unflavored powder	For children 1 year and older: cow and soy milk allergy, protein intolerance; allergy-associated conditions including short-bowel syndrome, eosinophilic GI disorders, malabsorption, GERD, and other GI disorders.
Pur Amino powder	For infants: severe cow's milk protein allergy, not effectively managed by an extensively hydrolyzed formula. May also be indicated for multiple food protein allergies in both infants and toddlers.
Nutramigen with Enflora LGG	For infants: cow's milk and soy protein allergies, in addition to other allergies.
Pregestimil powder	For infants: fat malabsorption with or without sensitivity to intact proteins. Conditions in which fat malabsorption or steatorrhea may be associated include cystic fibrosis, short bowel syndrome, intractable diarrhea, and severe protein calorie malnutrition.
Similac PM 60/40 powder	For infants: lowered mineral intake needs, such as impaired renal function.
