

WIC MIS CHANGE RELEASE NOTICE For Local Agencies

Purpose The Change Release Notice provides updated information to CDPH WIC and all WIC Local Agency staff about new features, enhancements to existing features, and defects fixed that are now available in production.

The table below indicates the WIC MIS system schedule for a Change Release that was deployed to production, including the effective date.

Schedule

	DESCRIPTION	DAY	DATE	CHANGE RELEASE ID
1	Change Release	Saturday	January 23, 2016	10353
	Effective Date	Monday	January 25, 2016	

WIC MIS CHANGE RELEASE NOTICE

Scheduled Date:	JAN 23, 2016	Effective Date:	JAN 25, 2016	Change ID#:	10353
-----------------	--------------	-----------------	--------------	-------------	-------

Fixes

This section is used to describe fixes to existing features that were the result of a defect.

1. Label for “Total Prenatal Weight Gain” did not display completely on the “Breastfeeding/ Non-Breastfeeding Weight” screens.

PROBLEM:	Label appeared as “Total Prenatal Weight Gai,” “Total Prenatal Weight G,” and “Total Prenatal Weight Ga,” respectively, on screens ICB35M01, ICC35M01, and IRE35M01.
RESOLUTION:	Label now correctly appears as “Total Prenatal Weight Gain” on all three screens.

2. Cursor incorrectly ended up on last entry on HCT label after an entry.

PROBLEM:	After entering date, HGB and pronto data, cursor ended up on the last entry of the HCT label.
RESOLUTION:	Cursor now correctly goes to first position in pronto label field.

3. The instruction to press “CTRL” incorrectly displayed on the F4=Options text instructions menu for the “Health Information – Child” individual information screen and other screens with Pronto related prompts. Instructions now state to press “ENTER” instead of “CTRL.”

PROBLEM:	F4=Options text instructions menu for “Was a Pronto device used to collect Hemoglobin data” question on the ICE50M01, and other screens with Pronto related prompts such as IRE50M01, ICE56M01, ICC56M01, and IRE56M01, stated “Place cursor on choice, then press ‘CTRL’.”
RESOLUTION:	Message now reads “Place cursor on choice, then press ‘ENTER’.”

WIC MIS CHANGE RELEASE NOTICE

Scheduled Date:	JAN 23, 2016	Effective Date:	JAN 25, 2016	Change ID#:	10353
-----------------	--------------	-----------------	--------------	-------------	-------

4. On the "Browse Appointment Criteria" screen, a single digit value entered in the month field (without a leading "0"), caused an ASRA ABEND error, rather than displaying the correct error message.

PROBLEM:	On the "Browse Appointment Criteria" screen, each date (MM DD YY) is required to be entered as a 2 position field. If a single digit value was entered in the month field, it caused an ASRA ABEND error, rather than displaying a message stating that the date input is invalid.
RESOLUTION:	WIC MIS no longer returns an ASRA ABEND error when a single digit is entered in the month field, but displays the correct error message stating that the date input is invalid.

5. On the "Browse Prescription" screen, the cursor was incorrectly set on the beans/peanut butter menu selection choice. The cursor should be set on the command line instead.

PROBLEM:	On the "Browse Prescription" screen, the cursor was incorrectly set on the beans/peanut butter menu selection choice.
RESOLUTION:	On the "Browse Prescription" screen, the cursor is now correctly set on the command line.
