

WIC ISIS CHANGE RELEASE NOTICE For Local Agencies

Purpose The Change Release Notice provides updated information to CDPH WIC and all WIC Local Agency staff about new features, enhancements to existing features, and defects fixed that are now available in production.

The table below contains the ISIS system schedule for a Change Release that was deployed to production including the effective date.

Schedule	DESCRIPTION	DAY	DATE	CHANGE RELEASE ID	
	1	Change Release	Saturday	November 21, 2015	10351
		Effective Date	Monday	November 23, 2015	

Fixes This section is used to describe fixes to existing features that were the result of a defect.*

1. The “Change Individual” screen incorrectly required that a value be entered when an Individual is transferred from outside of ISIS.

PROBLEM:	When a participant was transferred into ISIS from out of state, the “ID Documentation” and “Present at Cert” fields were not on the screens (because they had been certified in another state WIC agency). When the local agency staff went through Change to add in the NE Plan and Food Prescription, ISIS required an entry in these fields, which was not appropriate.
RESOLUTION:	ISIS no longer requires a code for “ID Documentation” and “Present at Cert” – if the individual was transferred from out of state.

*Other planned fixes referenced in the advance change release notice dated November 13, 2015, have been deferred until a subsequent change release.
