

WIC ISIS CHANGE RELEASE NOTICE

Purpose This ISIS Change Release Notice provides updated information to all CDPH, WIC and Local Agency staff about new features, enhancements to existing features, and defects fixed that are now available in production.

The table below contains the ISIS system schedule for one Change Release that was deployed to production including the effective date.

Schedule	DESCRIPTION	DAY	DATE	CHANGE RELEASE ID
	1	Change Release	Saturday	August 22, 2015
	Effective Date	Monday	August 24, 2015	

Enhancements This section is used to describe changes to existing features that were not a result of a defect.

1. Due to business need, added three (3) new preferred languages.

CURRENT:	WIC is serving many participants that speak Afghanistan languages.
CHANGE:	The following languages were added to ISIS: DA - Dari PA - Pashto UR - Urdu

Fixes

This section is used to describe fixes to existing features that were a result of a defect.

1. Email Address line appeared on three (3) ISIS Participation Reports at Local Agency level.

PROBLEM:	An email address line appeared on August 2 nd on three (3) ISIS participation report screens with “@CDPH.CA.GOV.” This email address line should not be on these reports.
RESOLUTION:	Email address line was removed from the following reports: <ol style="list-style-type: none"> 1. ISI45 Participation by Category and Priority (By Date Printed) 2. ISI87 Participation by Category and Priority (By Prescription Month) 3. ISI67 UNISSUED Report

2. ISIS Database Error occurred and would not allow users to save manually entered comments when Family Comments Table exceeded 600 rows.

PROBLEM:	When attempting to enter Family Comments, if there were more than 600 rows in the WIC_FAMILY_COMMENTS table and a local agency staff attempted to manually enter another Family Comment, when they pressed F11=Done, ISIS kicked them back to the Food Instruments Menu and gave the error message: “A database error has occurred. SQL code (-530) APPL (IDI21A) TBL (~3)” and the comments they attempted to enter were not saved.
RESOLUTION:	ISIS now saves manually entered Family Comments up to 1,500 rows. After adding the comment and pressing F11, ISIS returns the user to the SELECT FOR COMMENTS/HOLDS screen.
