

WIC ISIS CHANGE RELEASE NOTICE

Purpose This ISIS Change Release Notice provides updated information to all CDPH WIC and Local Agency staff about new features, enhancements to existing features, and defects fixed that are now available in production.

The table below contains the ISIS system schedule for **ONE** Change Release that was deployed to production including the Effective Date.

Schedule

	DESCRIPTION	DAY	DATE	CHANGE CYCLE ID
1	Change Cycle	Saturday	November 15, 2014	10326
	Effective Date	Monday	November 17, 2014	

Fixes

This section is used to describe fixes to current existing features that are a result of a defect.

1. Participation Report not counting BBO6N packages with correct priority,

PROBLEM:	An issue with the participation process where the Priority for the issued BO6N food packages (empty packages) was not being populated in the Participation tables has been corrected. This problem caused all issued BO6N food packages to be counted as "unknown" on the ISIS Participation Report by Category and Priority
RESOLUTION:	The ISIS Participation Report by Category and Priority will now count the issued BO6N packages in the correct priority.
