CALIFORNIA DEPARTMENT OF PUBLIC HEALTH PROGRAM OVERVIEW

The mission of the California Department of Public Health (CDPH) is to optimize the health and well-being of the people in California, primarily through population-based programs, strategies, and initiatives.

The CDPH's goals are to achieve health equities and eliminate health disparities; eliminate preventable disease, disability, injury, and premature death; promote social and physical environments that support good health for all; prepare for, respond to, and recover from emerging public health threats and emergencies; improve the quality of the workforce and workplace; and promote and maintain an efficient and effective organization. The CDPH is working toward these goals through its programmatic and operational support activities and in collaboration with local health departments and other organizations throughout the State.

GENERAL BUDGET OVERVIEW

The CDPH budget supports activities and services that reinforce the State's commitment to the health and well-being of all Californians. For Fiscal Year (FY) 2013-14, the Budget Act provides \$3.4 billion for the support of CDPH programs and services, a decrease of 2.09% from the 2012-13 Enacted Budget on June 30, 2012. Of the amount approved, \$702 million is for State Operations and \$2.69 billion is for Local Assistance. The decrease is largely due to Federal Funding decrease in the AIDS Drug Assistance Program and to cost containment efforts in the WIC Program. The budget affirms CDPH's commitment to address the public health needs of Californians.
