Introduction

State law requires California private schools serving elementary or high school students to file an affidavit or statement each year with the State Superintendent of Public Instruction. The California Department of Education (CDE) annually publishes statistics on these schools. This report is a summary of selected data submitted by the private schools for the 2008-09 school year.

In accordance with the Budget Act of 2008, this report includes only California private schools reporting enrollments of six or more students. In summary:

- 7.86 percent of California's total kindergarten through grade twelve population attended private schools in the 2008-09 school year. This reflects a 0.47 percent decrease compared to the 2007-08 year.
- Of the 533,180 students enrolled in California's private schools, nearly one-third were enrolled in elementary grades (kindergarten through grade eight) and nearly two-thirds were enrolled in secondary grades (grades nine through twelve).
- Nearly 78 percent of the students enrolled in private schools in California in the 2008-09 school year attended schools with a religious affiliation (denomination).
- Roman Catholic schools accounted for nearly 33 percent of the total number of church-affiliated schools and served approximately 54 percent of the students attending such schools.
- Seven counties had ten percent or more of their total students enrolled in private schools in the 2008-09 school year: Alameda (10.16 percent), Marin (16.01 percent), Napa (12.97 percent), San Francisco (29.44 percent), San Mateo (15.25 percent), Santa Clara (12.70), and Santa Cruz (10.64 percent).
- Comparing 2008-09 school year data to 2000-01 data, the number of schools reporting 25 or more students decreased by 620 (approximately 20 percent) and the total enrollment decreased by 110,910 (approximately 18 percent).
- Comparing 2008-09 data to 2000-01 data, public school enrollment has increased by 3 percent while private school enrollment has decreased by approximately 18 percent¹.

¹ The 18% decrease in private school enrollment may be due in part to one or more of the following reasons: California's economic conditions, increased charter school options, increased number of schools with less than 6 students, increased number of schools that chose to not file the private school affidavit, and a change in California Department of Education's private school data management practices.
