

The purpose of the Maternal, Child and Adolescent Health (MCAH) Collaborative Survey is to inform the State MCAH Division Title V Annual Report of local health jurisdiction (LHJ) involvement in collaborative efforts and identify collective impact efforts and possible opportunities across the State.

In this survey, we are using the term 'collaborative effort' to describe what also might be called a collaborative, coalition, community group or partnership. Please complete *one survey for each key collaborative* effort you participate in. **Each LHJ must submit at least one survey.** Key collaboratives are group efforts that were identified in your MCAH Scope of Work for this year and that your MCAH program leads or plays a key role in. Please answer the questions to the best of your knowledge; there are no 'right' answers.

**\* 1. Name of collaborative effort**

**\* 2. Local Health Jurisdiction**

## MCAH SOW Health Topics

### 3. What health topic does this collaborative effort address? (Check all that apply)
