

# Adolescent Sexual and Reproductive Health, Trinity County, 2014

Adolescence is the developmental period from ages 10 to 19. During adolescence and into early adulthood, the brain undergoes the last major period of growth and reorganization, resulting in an increased need for stimulation and changes in social and emotional information processing. Adolescence is a time for youth to explore their identity and values. Often this occurs in the context of peer relationships though parents and other adult figures remain influential. Although the morbidity and mortality rates increase sharply from childhood through adolescence, most youth fare well. Adolescence is a critical time for establishing patterns for a positive adulthood - including an active role in one's reproductive and sexual health.

### Trinity County Adolescent Birth Rate by Age Group, 2004 - 2014

### Adolescent Births In Trinity County

- Less than 20 adolescent births occurred in Trinity
  County in 2014, representing 0.0% of adolescent births
  in the state that year. 0.0% of CA females ages 15 19
  lived in Trinity County in 2014.
- Because the number of female adolescents aged 15-19 living in Trinity County is small, trends in birth rates over time should be interpreted with caution as small changes in the number of births per year can have large effects on the birth rate.
- Since 2004, there have been too few births per year, and across mutiple year periods, to produce reliable birth rate data for adolescents aged 15-17 in Trinity County.
