

Pre- and Post-Training Questions

Module 2 Personal Protective Equipment (PPE)

Facilitator notes: Use the pre- and post-training questions below to gauge knowledge before and after each course. Note that this will add an additional 5-10 minutes before and after each module. You may alternatively use these questions for an optional post-training discussion. Results of these tests can help facilitators determine which infection prevention and control concepts were well-understood during the training session and which need additional time or training. We suggest printing a copy of the pre- and post-training tests for each participant. Answers may be collected anonymously if preferred. Participants should have access to the correct answers after the tests are administered; facilitators may decide to review the questions and answers as a group.

Module 2: Personal Protective Equipment (PPE) Answer Key

Answers are highlighted in yellow.

1. What is an essential step to complete before putting on (donning) and after removing (doffing) gloves?
 - a) Perform hand hygiene
 - b) Ask the resident how they are
 - c) Identify other types of PPE to use
 - d) Put an extra pair in your pockets in case you need them later

2. If at any point your gloves become contaminated while donning your PPE, what should you do?
 - a) Take them off and throw them away, perform hand hygiene, and replace them with new gloves
 - b) Put another pair of gloves on over the contaminated pair
 - c) Wash your gloves and continue donning PPE
 - d) Take them off and throw them away, and continue your task without gloves

Module 2 Pre-Training Test: **Personal Protective Equipment (PPE)**

Name:

1. What is an essential step to complete before putting on (donning) and after removing (doffing) gloves?
 - a) Perform hand hygiene
 - b) Ask the resident how they are
 - c) Identify other types of PPE to use
 - d) Put an extra pair in your pockets in case you need them later

2. If at any point your gloves become contaminated while donning your PPE, what should you do?
 - a) Take them off and throw them away, perform hand hygiene, and replace them with new gloves
 - b) Put another pair of gloves on over the contaminated pair
 - c) Wash your gloves and continue donning PPE
 - d) Take them off and throw them away, and continue your task without gloves

Module 2 Post-Training Evaluation: **Personal Protective Equipment (PPE)**

Name:

1. What is an essential step to complete before putting on (donning) and after removing (doffing) gloves?
 - a) Perform hand hygiene
 - b) Ask the resident how they are
 - c) Identify other types of PPE to use
 - d) Put an extra pair in your pockets in case you need them later

2. If at any point your gloves become contaminated while donning your PPE, what should you do?
 - a) Take them off and throw them away, perform hand hygiene, and replace them with new gloves
 - b) Put another pair of gloves on over the contaminated pair
 - c) Wash your gloves and continue donning PPE
