

# Have you been invited to join

# CalScope?

CalScope is a study from the California Department of Public Health (CDPH) that will help us learn how many Californians have antibodies (from a past infection or vaccination) to the virus that causes COVID-19. Your participation can help prevent and stop the spread of COVID-19.

1

CDPH mails invitation letters to randomly selected households in your county.

2

Up to 1 adult and 1 child per household register online or over the phone and order at-home antibody test kit(s).

3

Adult and/or child complete online survey(s) and finger-prick blood sample(s).

4

Return completed test kit(s) with blood sample(s) by mail.

5

Receive your results by mail in 6-8 weeks. Get a \$20 gift card for each completed survey and each kit. Up to \$80 per household!

For more information, email [CalScope@cdph.ca.gov](mailto:CalScope@cdph.ca.gov) or visit [www.CalScope.org](http://www.CalScope.org)
