

# Kids get more than academics in school.

Schools have worked hard to minimize transmission of COVID-19 with safety plans.

Wearing a mask protects your child and others on campus by keeping the virus from spreading in the air.

Keep your kid at home if they're sick and let the school know.

Hand washing helps prevent the spread of COVID-19.

The best protection against COVID-19 is the vaccine.

Good airflow in classrooms and school buildings helps remove air that may contain the virus.

Together we can help make schools a safer place for our children.
