

The COVID-19 vaccines, pregnancy, & breastfeeding: what to ask your healthcare provider.

Getting vaccinated while pregnant or breastfeeding is a personal choice. A conversation with your healthcare provider can help you make an informed decision.

Ask questions, get answers.

Here are some questions you can discuss with your healthcare provider.

Am I likely to be exposed to the COVID-19 virus?

Can my child receive antibodies from breast milk?

What side effects can I expect?

If I get vaccinated, will I pass antibodies to the fetus?

Is it safe to get the COVID-19 vaccine during pregnancy?

How do the vaccines work to protect me?
